Dear Sir

RE: input and comments on the proposed

On the 11th of February, I, Warden (TKNP North) Martha Kambidhi, had a site visit with the EAP (Green Gain Consultants cc) and the Proponent (Bony Exploration (Pty) Ltd) at the ongoing exploration and proposed small- scale mining activities on EPL 6691, Luderitz District, east of Luderitz in Tsau Khaeb National Park.

The identified potential impacts that this project might have caused on the physical environment can be mitigated as per the proposed measures in the Background Information Documents. Therefore the contractors / proponent should adhere to the park rules in all project stages and put the proposed measures in place. I therefore do not have any objection over this activities.

Yours in conservation.

Martha Kambidhi :
TKNP North - Warden
