NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND REZONING OF ERF 4369, OSHAKATI PROPER FROM SINGLE RESIDENTIAL WITH A DENSITY OF 1/300 TO BUSINESS WITH A BULK OF 1

Notice is hereby given to all Interested and Affected Parties (I & APs) that an application for the Environmental Clearance Certificate will be submitted to the Environmental Commissioner in terms of the Environmental Management Act (Act No. 7 of 2007) for the following activities.

Title: Rezoning of Erf 4369, Oshakati Proper from single residential with a density of 1/300 to business with a bulk of 1.

Proponent: Mrs. Ester Ndapewa Embanga

EAP: Green Gain Environmental Consultants cc

All I&APs are hereby invited to request background information Documents (BID) and send their comments to eia@greengain.com.na on or before 16 February 2023

REZONING NOTICE:

Notice is hereby given in terms of Regulation 10(1) of the Urban and Regional Planning Act, (Act No. 5 of 2018) that Hilaria Kevanhu under the supervision of Geraldine van Rooi, intends to apply on behalf of the registered owner of Erf 4369, Oshakati Proper for the:

- Rezoning of Erf 4369, Oshakati Proper from single residential with a density of 1/300 to business with a bulk of 1
- Consent to have flats on the property
- Consent to Commence with the Proposed Development / Land Use whilst rezoning is ongoing.

The rezoning of Erf 4369, Oshakati Proper would accord the owners of the property to increase the development potential of the erf and ensure that the mono-functionality of the surrounding neighbourhood is countered.

Take note that a similar notice of the intent to rezone, have been posted on site, the Government Gazette as well as on the Notice Board of the Oshakati Town Council. The consultation with neighbouring erf owners duly took place too.

Do take note too that any person objecting to the proposed rezoning as set out above may lodge such objection together with the grounds thereof with the Chief Executive Officer, Oshakati Town Council, Private Bag 5830 Oshakati and/or the applicant in writing within 14 working days of the publication of this notice. The last date for comments/ objections is thus 16 February 2023.

EXPLORATION ACTIVITIES ON ERF 4458, REGIONAL PARK, ERONGO REGION

Notice is hereby given to all Interested and Affected Parties (I&APs), that an application for an Environmental Clearance Certificate will be submitted to the Competent Authority and the Ministry of Environment, Forestry and Tourism (MEFT) for the following activities.

Project title: Proposed exploration activities on EPL 4458.

Project location: Keishöhe area, Lüderitz District, Karas region

Proponent: Bony's Exploration (Pty) Ltd.

Description: The proponent intends to continue with exploration activities of base and rare metals, dimension stones, industrial minerals, and precious metals on the Keishöhe carbonate siding within EPL 4458 and located about 4km southeast of the old Keishöhe railway station, near the town of Aus. In terms of the Environmental Management Act 07 of 2007, the intended activities cannot be undertaken without an EIA study being carried out.

I&APs are hereby invited to register, request the Background Information Document (BID), attend the public meeting, and submit comments/inputs to eia@greengain.com.na The last day to submit inputs is 10 February 2023.

The public and stakeholder meeting is scheduled as follows

Green Gain Consultants

NATIONAL NEWS

Andrada Mining

Historical drill hole information further indicates that the Proximal Pegmatites remain open-ended at depth, and accordingly, Andrada is embarking on a confirmatory drilling programme to improve the tin resource classification and to evaluate lithium and tantalum potential of the Proximal Pegmatites.

“The declaration of this inferred resource, using the historical drill data from the Uis mine, significantly advances the total Andrada mineral inventory towards management’s internal mineral resource target of at least 200-million tonnes of mineralisation,” said Andrada chief executive Anthony Viljoen.

“These additional pegmatites, together with the mineral resource at the V1/V2 orebody, provide an entire resource portfolio of approximately 128-million tonnes of ore with a gross combined content of 170 000 t of tin, making Andrada the owner of one of the largest tin assets globally,” Viljoen acclaims.

“Furthermore, through our demonstrated ability to rapidly and profitably scale up production at the existing operations at the Uis mine, we believe Andrada has the ability to compound the company’s economies of scale and position the company as one of the lowest cost tech-metal producers in the next five years,” he adds.

Viljoen says the existing mineral reserve, which is currently being mined, as well as the ongoing infill drilling programme over the entire mining licence, have also shown the potential of lithium mineralisation contained within the same pegmatites.

Andrada will be completing the work required to bring the lithium operation into production, as well as expanding the infill drilling programme to explore the opportunity that the lithium presents as a co-product revenue stream with the tin operation in the coming months.

NATIONAL NEWS

Cumulation

and the product shall be deemed to have originated in the state party where the final processing or manufacturing takes place.

As originating in the AfCFTA state party, and if the product to be traded needs to be exported temporarily outside the Free Trade Area, for it to retain the AfCFTA origin the product should meet certain criteria.

The product should not undergo further production or any other operation outside the territories of the member country, other than unloading, reloading, or any other operation necessary to preserve it in good condition, or to transport the product to the territory of a state party; and remains under customs control while outside the territories of the state parties.

The same provisions regulate a return of an originating product that was exported from a state party to a third party.

It shall be considered as non-originating unless it can be proven to the satisfaction of the customs authorities that the returning product is the same as that which was exported; and has not undergone any operation beyond that which was necessary to preserve it in good condition.

In terms of paragraph 2 of Article 23 of the Protocol on Trade in Goods as read with Paragraph 1 of Article 9, products produced in Special Economic Arrangement / Zone (SEZ) qualify for preferential tariff treatment if they meet the rules of origin requirements specified in Annex 2.

This means if Namibia expedites the regulatory framework of its Sustainable Special Economic Zones, and operationalises its own time- it could aid the country's competitiveness.

CRITERIA FOR AFCFTA PREFERENTIAL TARIFFS

AfCFTA products originating in a state party shall, on importation into another State Party, benefit from the AfCFTA preferential treatment upon submission of certain proof of origin.

A Certificate of Origin, whether in hard or electronic copy, issuance and acceptance of electronic Certificate of Origin shall be per each State Party's national legislation.

Or the Origin Declaration given by the exporter on an invoice, a delivery note or any other commercial document which describes the products concerned in sufficient detail to enable them to be identified.

Proof of origin shall be prepared and submitted to the Customs Authorities of the importing State Party in any of the AU official languages and in accordance with the procedures applicable in that State Party.

They said authorities may require a translation of such proof of origin.

A Certificate of Origin shall be issued by the Designated Competent Authority of the exporting State Party on application having been made in writing by the exporter or, under the exporter's responsibility, by the authorised representative.

The secretariat has also noted that the effective implementation of the AfCFTA Rules of Origin by the States Parties requires the issuing of Certificates of Origin and the verification of these Certificates.
