Dear Sir/madam

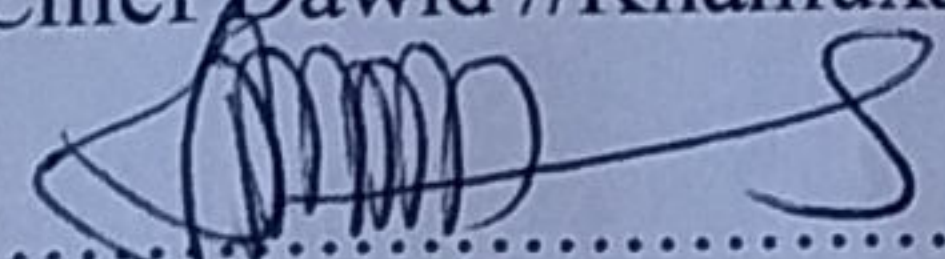

Re: Concern letter

The office of the Hai-//om Traditional Authority has taken note to the concern over the vital mining project, which is in exploration stage, this project if it has to materialize will enhance and change our marginalization in the region and area. We hope very much this will strongly economize our social economic status.

It is our request that Augite Environmental Consulting must return to us after their exploration process and give us a full report about any findings and process for the future for us to sit down for possible contracts and social benefits of our communities.

Therefore, the Hai-//om Traditional Authority support and trust that we will be part of the development in the future.

Yours in development  
Chief Dawid //Khamuxab

  
.....  
Chief of the Hai-//om Community

Chairman: Chief Dawid //Khamuxab
