PART B: SCOPE OF THE ENVIRONMENTAL CLEARANCE CERTIFICATE

1. The environmental clearance certificate is for:

- Proposed Exploration / Prospecting Activities in the Exclusive Prospecting License (EPL) No. 6413, Omaruru District, Erongo Region, North Central Namibia

Details of the activity(s) covered by the environmental clearance certificate.

The EPL holder intends to implement an exploration programme aimed at searching or prospecting for possible economic base, rare and precious metals, dimension stones and industrial minerals groups in the EPL 6413 area. The exploration activities to be undertaken as assessed in this environmental assessment are as follows:

- (i) Initial desktop exploration activities;
- (ii) Regional reconnaissance field-based activities;
- (iii) Initial local field-based activities;
- (iv) Detailed local field-based activities including drilling of exploration boreholes, and;
- (v) Prefeasibility and feasibility studies to be implemented on a site specific area if the local field-based studies proves positive.

[Note: Please attach plans to show the location and scope of the designated activity(s), and use additional sheets if necessary: Please find attached the Background Information Document (BID).

Title of Activity: Proposed Exploration / Prospecting activities for base, rare and precious metals, dimension stones and industrial minerals groups in the Exclusive Prospecting License (EPL) No. 6413 Omaruru District, Erongo Region, North Central Namibia

Nature of Activity: Minerals exploration / prospecting for base, rare and precious metals, dimension stones and industrial minerals groups.

Location of Activity: The EPL 6413 is situated on communal land covering, Okemyenya, Ondundotjuapa, Otjotopera, Omutiwanduka and Okamaera areas, Omaruru District of the Erongo Region, in the north-central Namibia.

Scale and Scope of Activity: Minerals Exploration covering the following activities:

1. Initial desktop exploration activities (review of existing information and all previous activities in order identify any potential target/s);
2. Regional reconnaissance field-based activities such mapping and sampling to identify areas with potential targets based on the recommendations of the desktop work;

3. Initial local field-based activities such as widely spaced mapping, sampling, surveying and possible drilling in order to determine the viability of any delineated local target;
4. Detailed local field-based activities such very detailed mapping, sampling, surveying and possible drilling in order to determine the feasibility of any delineated local target;
5. Prefeasibility and feasibility studies to be implemented on a site specific area if the local field-based studies proves positive followed by test mining.

The scope of the field-based support and logistical activities will be dependent on the scale of proposed exploration activities to be undertaken. The proposed exploration activities will be supported by existing tracks and campsites / farmstead as well as existing accommodation in the local area as may be applicable. In the absences of existing tracks, the field team will create such new tracks with the permission of the land owner/s and depending on the scale of exploration. In the absences of existing suitable campsite / farmstead, a temporary camp site will be setup at suitable locations in line with the EMP provisions within the EPL area. The size of the exploration camp will be of very limited footprints during the exploration phase but may be expanded for the subsequent mine development phases in an event of a discovery.

PART C: DECLARATION BY APPLICANT

I hereby certify that the particulars given above are correct and true to the best of my knowledge and belief. I understand the environmental clearance certificate may be suspended, amended or cancelled if any information given above is false, misleading, wrong or incomplete.
