**2. COMMENTS:**

Karibibtown Council experiences water quality problems at the moment, and based on the presentation by the environmentalists it is evident that the water quality of being water provided by NamWater is questionable. In the month of March the Microbial shows that the product water was more <sup>health</sup> risky than the Reservoir.

**3. Questions/Suggestion**

NamWater to provide daily water schedules to Karibib Town Council for Council to monitor and control the water issue within the town.

A monthly schedule of the <sup>various</sup> tests and cleaning of the Treatment plant and water reservoir need to be provided to Karibib Town Council or shared with the end users.
