Yellow Square Properties

Take notice that HARMONIC TOWN PLANNING CONSULTANTS CC, Town and Regional Planners, on behalf of the owner of the respective erf, intends to apply to the Mariental Municipality for the:

- Rezoning of Portion 120 A Portion of Portion C of the Farm Koichas No.89 from "Undetermined" to "Special" for the establishment of shops, offices, a bottle store and General Business Buildings.
- Consent to start with the construction and use the Erf in accordance with the new zoning while the rezoning is in progress.

Portion 120 A Portion of Portion C of the Farm Koichas No.89, measures ± 1,4420 hectares in extent and is zoned "Undetermined". The proposed rezoning to "Special" will enable the erf owner to establish shops, offices, a bottle store and will enable the owner to erect a business building on the property.

Sufficient parking for the development will be provided in accordance with the requirements of the Mariental Zoning Scheme.

Further take notice that the plan of the erf lies for inspection on the town planning notice board at the Mariental Municipality and at Harmonic Town Planning Offices, 76B Pasteur Street, Windhoek West.

Further take notice that any person objecting to the proposed use of the land as set out above may lodge such objection together with the grounds thereof, with the Mariental Municipality and with the Applicant in writing within 14 days of the last publication of this notice (final date for objections is Friday, 02 June 2023). Contact: Harold Kisting Harmonic Town Planning Consultants CC Town and Regional Planners P.O. Box 3216, Windhoek Cell 081 127 5879- Fax 088646401 Email: hkisting@namibnet.com

REZONING NOTICE:

Please note that NAMLAND TOWN AND REGIONAL PLANNING & ENVIRONMENTAL MANAGEMENT CONSULTANTS, on behalf of the owner of Erf 215, intends to apply to the Karibib Town Council for:

- Subdivision of erf 215, Karibib into Portion A and Reminder
- Rezoning of Erf Portion A, from Institution to General Residential with a 'with density of 1:300
- Consent to commence development while the rezoning is being finalized.

Portion A has size of 7000 m² and currently zoned Institutional located in south of Karibib Private School. The area in which the erf is located is predominantly residential as illustrated in the locality plans. The Portion is 7000 square meter in extent and zoned 'Institutional'.

The proposed new zoning will allow the owners to construct a total of accommodation units on the property. Access to the erf will be obtained from the existing entrance. Parking will be provided in accordance with the requirements of the Karibib Town Planning Scheme.

Note that the locality plan of the erf lies for inspection on the Town Planning Notice Board at the Town Council

Further take notice that any person objecting to the proposed use of land set out above may lodge such objection, together with the grounds thereof, with the Town Council and with the applicant in writing within 14 days after the appearance of the last notice (final date for objections is Date 22 May 2023).

NOTICE

Take note that **Stubenrauch Planning Consultants cc** has applied to the Lüderitz Town Council, and intends on applying to the Urban and Regional Planning Board on behalf of Ghost Town Tours cc for the following:

• SUBDIVISION OF PORTION F OF THE FARM LÜDERITZ TOWN AND REMAINDER;

• AMENDMENT OF TABLE C IN THE LÜDERITZ ZONING SCHEME TO INCLUDE PORTION A FOR THE SPECIAL USE OF OYSTER AND MUSSEL FARMING. Portion F of the Farm Lüderitz Town and Townlands No. 11 is located in the south western part of the Lüderitz Townlands. Proposed Portion A measures approximately 6500m² in extent, and according to the Lüderitz Zoning Scheme, Portion F of the Farm Lüderitz Town and Townlands No. 11 is zoned "Special" for the use of oyster and mussel farming in accordance with conditions imposed by the Ministry of Fisheries, Namport and the Lüderitz Town Council. The purpose of this application is to subdivide Portion F of the Farm Lüderitz Town and Townlands No 11 into Portion A and the Remainder for the owners to be used for farming oysters and mussels. Please take note that the application, locality map and its supporting documents lie open for inspection during normal office hours at the Lüderitz Town Council (Town Planning Office) and SPC Office, 45 Feld Street, Windhoek. Further take note that any person objecting to the proposed application as set out above may lodge such objection, together with the grounds thereof, with the Town Council and with the applicant in writing within 14 days after the appearance of this notice (final date for objections is **DATE 22 MAY 2023**). 23 June 2023

PUBLIC CONSULTATION MEETING MINUTES:

Environmental Scoping Assessment (ESA) for Proposed Prospecting and Exploration Activities on Exclusive Prospecting License (EPL) No. 7887 located Southwest of Solitaire in both the Khomas and Hardap Regions, Namibia.

Date: Friday, 2nd June 2023

Time: 10h00

Venue: Namib Naukluft Lodge

The public consultation meeting was attended by 12 people, including one (2) environmental consultants from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register**

1. INTRODUCTION AND WELCOMING REMARKS

The meeting was opened by the environmental consultant by introducing the team and stating the purpose of the consultation meeting with the parties affected by the proposed prospecting and exploration activities on EPL 7887. The meeting attendance register was circulated for the attendees to sign and add their contact details, so that they could be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

2. MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

Mr. Stefanus Johannes explained the EIA process to the attendees, and the reason for their invitation to the meeting (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. Johannes further explained the importance for the proposed project of requiring an ECC and attendee's role in the EIA process.

2.3 Presentation of Potential Project Impacts

To ensure transparency towards the public and understanding of proposed works by the attendees, the Environmental Consultant also presented the pre-identified potential positive & negative environmental and social impacts.

2.4 Public Open Discussion (Interactive Session)

Mr. Johannes provided the meeting attendees with the opportunity to raise their concerns/issues and/ or comment on the proposed project activities. The issues and comments recorded are presented in **Table 1** below.

Table 1: Comments and issues raised during the public consultation meeting, 2nd of June 2023

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
1.	Commenter 1: The application as done in October 2019, as that the entire document that was signed or did it go along with a sign mining lease?	Stefanus Johanness (SJ): This is an application for the applied commodities with the ministry of mines and energy (MME)
2.	Commenter 1: The application states that you were required to do this within 6 months from the time of the application and is now few months left for it to expire, don't you think you are in violation of your application?	SJ: I believe we are not, the application was done (2019) before new regulation were set, without an ECC our client is an applicant and therefore before the lapse of the 3 years awarded to them, an EIA must be conducted. Our work as consultants is to conduct an EIA on behalf of the proponent which they have hired us to do within the stipulated time given.
3.	Commenter 1: Do you think it is feasible to do a study within the little time left?	Proponent Representative (PR): I am Candy Ngula, representing my partners who unfortunately could not make it today. We approached EDS this year to assist us. When we applied for the EPL in 2019 we did intend to carry out the EIA process as required at the time but we were taken aback by the Covid pandemic. The intention was to extend the period of the EPL due to some of those challenges.
4.	Commenter 1: Has the extension been approved by MME?	PR: Our intention was to extend the period. When we approached the consultant we did consider the few months remaining. We do trust that we will be able to do what is necessary and this is part of the reason we here to get an insight from the interested and affected parties on the proposed project, in

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
		the few months left we are doing the needful and will request for an extension if need be.
5.	Commenter 2: Well, you haven't even started anything with the environmental assessment	Iyaloo Nakale (IN): We are at the stakeholder engagement stage of the process right now, the process of the EIA has already commenced. This consultation meeting is to engage you, hear your views, receive your concerns and raised issues on the proposed project.
6.	Commenter 2: It is not our job to tell you but for you to find out. You need to find specialists in the area to tell you that.	IN: Noted.
7.	Commenter 1: You have not started your desktop study yet?	IN: Yes, we have Sir. PR: There is a geological study that has been done on the EPL
8.	Commenter 1: You have that report?	PR: Yes
9.	Commenter 1: Okay, look I think what is happening here is that I did some digging and 42 or 43 operating mines of BS stone have been shut down and abundant, they left and did not even finish cleaning	SJ: We take note of that.

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	<p>up the area. Now do you really think that the farmers and landowners and everybody here is going to allow you to come in here and tear down this mountains apart for useless dimension stones that you cannot even sell? When you know that 80% of the tourists come to Namibia drive down these roads to look at the scenery and landscapes. Do you really think this useless mine is going to create jobs to offset the income of hundreds of employees and thousands of tourists that come through here? You did not just walk in an angry room you walked in an existential problem, the industry here is tourism not farming and certainly not mining and we are not going to allow you to tear down these mountains for dimension stones that is what I have to say.</p>	
10.	<p>Commenter 3: There is a UNESCO world heritage site here so you're not allowed to mine and if you do that we will lose a world heritage site in Namibia which is a major problem seeing we only have two.</p>	<p>IN: Is that on Morewag?</p>
11.	<p>Commenter 3: We have a buffer zone here, have you done the study yet?</p>	<p>IN: We take Note of that, even it is not showing as such on the mining cadaster.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
12.	<p>Commenter 4: The purpose of this meeting is to evaluate the validity of your work that was done here for mining and prospecting I mean that is why we came here comment on. Now you are sitting with proposals that meaningless in the context of this environment here. This is a useless meeting and we are wasting our time because we cannot evaluate what you have produced.</p>	<p>SJ: Okay, I think we are getting of track here, the EIA is a process and we cannot do things backward. We are here to engage in consultation with you as affected parties on the proposed project as stated by my colleague. We are here to assess the environment on the EPL. As consultants we a not favoring mining but here to carry out the study as stipulated in the EMA.</p>
13.	<p>Commenter 2: Yes but you are working for them</p> <p>Commenter 5: No study was done.</p>	<p>SJ: Yes to do the EIA study. We cannot be bias in our work, just because we showed up with the proponent does not mean I have to be in their favor.</p> <p>Listen, we cannot carry out a whole study without engaging with the interested and affected parties first. How will you feel if I show up on your farm start doing assessment without informing you and later come to you and consult you after the fact?</p>
14.	<p>Commenter 1: That will be a big problem</p> <p>Commenter 3: We are not trying to be mean to you guys but we also are trying to be environmentally friendly because you are going into our direct environment with a history of plant and animal studies done for the past 25 years and I mean we know everything about this place so you can understand where we are coming from with this.</p>	<p>SJ: I understand what you mean but like I said this is an informative meeting we are nor mining.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
15.	Commenter 5: What is going to be the source of their water?	SJ: An agreement has to be made between the landowners and proponent on sourcing water and if not the proponent will have to source the water elsewhere.
16.	Commenter 4: I think MME should have never given an EPL in this location, I am shocked they did that. This is one of the most pristine tourist attraction area in the country and to think of ruining it is unforgettable.	SJ: We take note of that.

FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. Johannes thanked the attendees for their input through comments and by raising their concerns. He indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration, and for addressing in the Environmental Scoping Assessment (ESA) Report, as well as incorporating their recommendations into the draft EMP.

Furthermore, Mr. Johannes informed the attendees that the draft meeting minutes, Environmental Assessment Report (EAR) and Environmental Management Plan (EMP) will be shared with them for their review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the reporting is completed, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration for an ECC.

The meeting adjourned at 11h00

Namibia
14 June 2023

To Whom it may Concern,

With this letter, we would like to inform you of our concerns in regards to the mining operations plans in the landscape. The proposed prospecting and possible mining that Andre Nangoma Investment CC will cause untold damage to the environment. This area is a sensitive area with many small eco systems in place, which are home to some faun and flora.

The concerns here are multiple.

- Where will the water and resources for these activities be sources from?
- How much water will these actions require daily? This area is in the desert, a naturally water scarce environment.
- Off road driving in sensitive areas will cause immense impact and damage. How will Andre Nangoma Investment CC mitigate and prevent this from happening?
- Geological exploration requires much equipment and many people. How and where will these people be accommodated and fed? What are the measures in place to ensure minimal ecological impact and damage?
- While the proponent may say they will rehabilitate and clean up after their activities, will there be a guarantee of the funds required for a proper clean up, being available?

As an organization we wish to make it clear that we have many concerns, and do not believe that these are being suitable and reasonably addressed by the company in question.

We are strongly opposed to exploration and mining activities on protected and sensitive land.

Kindest Regards
Lee

Re: Review and comments on the Drafts for the Environmental Scoping Assessment (ESA), Environmental Management Plan (EMP) and Meeting Minutes for EPL 7887.

Dear Ms. Nakale

we confirm receipt of the drafted Minutes of Meeting, EMP and ESA. However, it appears that you failed once more to make sure your emails and draft reports are distributed to all I&APs. Further, the response time (1 week) you granted all I&APs is too short and not in accordance with the formal procedures. This practice leaves us as a directly affected party in serious question of your fair and professional approach towards the project, and your work in general.

The latest draft versions are not acceptable for us since they are incomplete, biased and not profound. We do not understand that your ESA report is still in favour of the proposed project, and it is obvious that your team intentionally left out crucial concerns raised and comments made during the meeting. These are, but not limited to, the following:

>> 1) Minutes of Meeting

- The MoMs are incomplete as you did leave out several important concerns expressed by the directly affected parties, namely the three letters that have been read out loud and handed out to you by Mr. Kai Sturm. It is not sufficient to just attach these letters of concern to the reports to be submitted to the relevant authorities. We kindly ask you to include all three letters in their entirety and unaltered in the Minutes of Meeting document. Following this, we expect you to explain in your ESA in detail how to address all of our concerns as the exploration project is taken further. In other words, your ESA lacks any detailed response to our concerns!

- Further, you fail to mention the pivotal concern, expressed by the owners of Namib Naukluft Lodge and direct neighbours of farm Morewag, of said farm being part of the Namib Naukluft Park and thus the UNESCO "Namib Sand Sea" World Heritage Site! How can prospecting/ mining operations even be considered in such an area and the adjacent buffer zone? Please elaborate in detail.

>> 2) ESA draft:

a) Executive Summary Section, page iv

- All points mentioned in the positive impacts Section completely ignore the fact that mining activities in our area will destroy all activities, employments and further developments in the well established local tourism sector - and are therefore no positive impacts AT ALL. Please let your team redraft your elaborations in this paragraph for us to review. Also include a list of all Lodges & tourism businesses that would be directly affected. Further, there is no such thing as a (quote) "local business that would supply Personal Protective Equipment (PPE), machinery spare parts, lubricants, etc." - in our area! This point sounds like it just has been copy&pasted from another ESA! Please delete it as it is irrelevant!

- In the Negative impacts section you fail to mention that our landscape forms the livelihood of all tourism enterprises in the area! Absolutely unacceptable, so please include this very important point.

Taking the incomplete list of impacts into account, the conclusion section (page v) is unacceptable as drafted. Please redraft!

c) Section 1.3. Motivation for the proposed project

Again, you fail to mention that we have a well established tourism industry with not only temporary, but permanent employments in this area that contributes to the Namibian economy as one of the largest economic sectors in the country. It is a fact that mining and tourism just cannot coexist and that mining will destroy any tourism operations. Please redraft!

d) Section 2.2.3 Accessibility to Site

QUOTE: "The EPL is accessible via the D1275 that diverges onto the M0031 and then onto the M0036 that leads to the EPL. The Proponent may need to do some upgrading on the site access roads to ensure that it is fit to accommodate project-related vehicles, such as heavy trucks."

Poor planning. Driving down Spreetshoogte Pass with heavy trucks is impossible.

e) Section 2.2.8 Accommodation

QUOTE: "The exploration crew will be accommodated in Noordoewer or Aussenkehr, or a campsite will be set up for the exploration crew near the exploration sites."

Copy&Paste. We are in the Solitaire area, not Noordoewer.

f) Section 3.1.1 The "No-go" Alternative

See my comments mentioned above under a). All points listed in this section ignore the fact that tourism operations could be able to continue undisturbed in case the proposed project is to be aborted, which would be the most important positive outcome for all local businesses!!

g) Section 4.2 International Policies, Principles, Standards, Treaties, and Conventions

At the very end of this section you mention the World Heritage Convention, 1972, but **fail to elaborate how the proposed project is in conflict with UNESCO's legal framework** as ratified by the Namibian Government. Please elaborate!

h) Section 5.1.1. Climate

QUOTE: "The temperature during the day is warm and you won't have rain here anytime soon."

All text and graphics are copy & pasted from a UK travel website, the No. 1 result on google when searching for 'Solitaire climate'; with all due respect, this is unprofessional. The mentioned average rainfall figure of 262mm in Solitaire remains to be verified. We have been living in the area for 30 years and did our rain statistics, and the average is not even half the given figure. In view of climate change you should base your statistics on data that has been gathered locally and in more recent years.

This is only one example of how the research, data collection and presentation in your draft report is done, and it appears to be rather perfunctory.

i) Section 5.1.5 Water Resources: Groundwater and Surface Water

QUOTE: "The Tsondab River which traverses the EPL, is a small ephemeral river located in the southern part of Namibia..."

Please elaborate under which classification standards the Tsondab is to be described as a 'small' river. Further you fail to mention that the river is feeding Tsondabvlei, which is located in the Namib Naukluft Park = UNESCO World heritage site; and that it is de facto Southern Africa's most important breeding area to endangered vulture species. Please include all these details in the relevant sections of your report.

j) Section 5.1.6 Flora & Fauna

QUOTE: "Mopane Trees: In some areas of the transition zone, particularly in the northeastern parts of Namibia, you may find mopane trees (*Colophospermum mopane*). These trees have butterfly shaped leaves and are well-adapted to drier conditions."

QUOTE: "The area is dominated by vast expanses of grassland and dotted with camel-thorn trees and aloes as well as the occasional ilala palm."

Another example of copy&paste. We are in South-Western Namibia and there is **no such natural vegetation to be found here.**

k) Section 5.2.1 Local Level and Archaeological Findings

QUOTE: "There are no nationally recognized archaeological sites recorded within the EPL. However, there is a possibility that unrecorded or undiscovered archaeological features or artifacts may be discovered during the exploration phase."

Poor research. It is general knowledge that the Tsondab Valley area does have remarkable artifact concentrations. Elaborate in detail!

l) Section 5.3 Surrounding Land Uses

QUOTE: "During the site visit the consultants observed the following: (A) A Lodge and (B) Power lines as shown in Figure 12..."

This is the only detail given in the section, accompanied with a picture of Namib Naukluft Lodge and a nearby power line pole. Please give profound information.

m) Section 5.4 Socio-Economic conditions - Economic Activities

QUOTE: "The main economic driver in the area is tourism. Solitaire serves as a stopover point for travelers heading to popular attractions. Tourists often stay overnight in lodges, campsites, or guesthouses in the area. Additionally, the iconic Solitaire Bakery, known for its apple pie, attracts visitors passing through."

Very biased perspective implying our area is just a stop-over to major attractions and not an attraction by itself. Please give an objective perspective.

QUOTE: "Local artisans and craftspeople in the Solitaire area produce traditional handmade crafts and souvenirs. These may include items such as jewelry, carvings, pottery, and textiles. These products are often sold to tourists visiting the area, providing an additional source of income for local artisans."

QUOTE: "Some services cater to the needs of residents and tourists passing through the region. These services include small shops, fuel stations, convenience stores, and vehicle repair facilities."

This whole section lacks to give a realistic picture of the local businesses. There are no local artisans and the only place that offers any of the services mentioned, if at all, are offered at Solitaire and that on very basic level.

QUOTE: "While Solitaire itself is a small and rustic town, there are several tourism attractions and activities in the surrounding area. Here are some notable attractions in the Solitaire area:
Sossusvlei and Deadvlei: Solitaire serves as a gateway to the renowned Sossusvlei and Deadvlei, which are famous for their towering red sand dunes and striking landscapes. Visitors can explore the dunes, climb Big Daddy (one of the tallest dunes in the world), and witness the incredible play of light and shadow during sunrise and sunset.
Sesriem Canyon: Sesriem Canyon is a narrow gorge carved by the Tsauchab River. Visitors can hike along the canyon, marvel at the towering walls, and learn about the geological history of the area. The canyon offers beautiful views and an opportunity to spot unique desert-adapted plant species..."

All these things are not the local attractions but rather more than 100km away and therefore irrelevant. Redraft or rather delete.

n) Section 6.2 Communication with I&APs - Table 5: Summary of main issues raised, and comments received during public meeting engagements

Poor/ incomplete list of main concerns expressed by I&APs! Redraft!

o) Section 7) IMPACT IDENTIFICATION, ASSESSMENT AND MITIGATION MEASURES - 7.1 Impact Identification

As mentioned above several times all positive & negative impacts listed are not giving a realistic picture. Redraft!

p) Section 7.3 Assessment of Potential Negative Impacts

All classifications / significances put in wrong perspective

q) Section 8 RECOMMENDATIONS AND CONCLUSION

Due to all arguments mentioned above we demand a redraft of this whole section from you.

>> 3) EMP draft:

Since the ESA draft is not acceptable the EMP also has to be revised in detail.

- APPENDIX 1:

QUOTE: "Archaeological material must NOT be touched. Tempering with the materials is an offence under the heritage act and punishable upon conviction by the law. Responsibility: Operator: To exercise due caution if archaeological remains are found"

Please elaborate which and how artifacts are to be identified by on-site staff!

Finally, we emphasize again that we do not approve any of your current draft versions and expect you to rework all reports - with profound data obtained from your professional research - for us to review before you submit any report to the relevant authorities. If you fail to do so we are already in contact with our legal counsellors.

For the sake of transparency, information and awareness we will submit this letter with the **relevant Ministries (M.M.E. & M.E.T.)** by hand.

Sincerely,

Kristin Schreiber

Your Ref.:

Our Ref.:

Date: 31 May 2023

Subject: Concerns Regarding Mining Activities and the proposed exploration activities on Exclusive Prospective License (EPL) No. 7887 located near Solitaire in the Khomas and Hardap Regions, Namibia.

I am writing to express my deep concerns about the proposed mining activities in the Namib Desert. These are 7 points against the exploration and mining activities.

Environmental Impact: Mining activities in a nature conservation area would have significant adverse effects on the environment. The extraction of minerals often involves the destruction of ecosystems and habitats for various plant and animal species. This disruption can lead to the loss of biodiversity and irreversible damage to fragile ecosystems that may take decades or even centuries to recover.

Habitat Destruction: Nature conservation areas are designated to protect and preserve unique and vulnerable ecosystems. Allowing mining in these areas would result in the destruction of natural habitats and the displacement or extinction of many plant and animal species. This loss of habitat can disrupt entire food chains and have cascading effects on the overall ecosystem functioning.

Water Contamination: Mining activities often require large amounts of water, and the extraction process can lead to the release of harmful chemicals and pollutants into nearby water sources. In a nature conservation area, where pristine water bodies and sensitive aquatic ecosystems exist, mining operations would pose a significant risk of water contamination. This contamination can have detrimental effects on communities that rely on these water sources.

Soil Degradation: Mining activities typically involve the removal of topsoil and vegetation, leading to soil erosion and degradation. In a nature conservation area, where the soil is often crucial for

sustaining unique plant species, mining would result in the loss of valuable soil resources. The degradation of soil quality can have long-lasting effects on the ability of the ecosystem to regenerate and support diverse plant life.

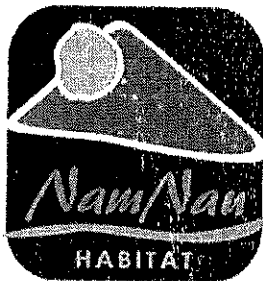

Pollution: Mining activities will create noise-, air- and light pollution. As well as chemical pollution to the soil and water systems. It will be destructive to the entire ecosystem.

Tourism and Recreation Impact: Nature conservation areas attract tourists and visitors who seek to experience the unique natural beauty and biodiversity of the region. Mining operations in these areas would detract from the aesthetic appeal and drive away tourists. The loss of tourism revenue will have economic repercussions for local communities that rely on this sector for livelihoods.

Long-term Sustainability: Mining is an inherently finite activity, with limited reserves of minerals available for extraction. Once mining operations are complete, there is often little effort to restore the area to its original state, leaving behind scars on the landscape. In a nature conservation area, where the focus is on long-term sustainability and preservation of natural resources, mining would contradict the fundamental goals and values of conservation.

Yours sincerely,

Kai Sturm

Our Ref.:

Date: 31 May 2023

Subject: Concerns Regarding Mining Activities and the proposed exploration activities on Exclusive Prospective License (EPL) No. 7887 located near Solitaire in the Khomas and Hardap Regions, Namibia.

I am writing to express my deep concerns about the proposed mining activities in the Namib Desert.

The Namib Desert is a remarkable ecosystem renowned for its unique biodiversity and delicate balance of life. It is home to a wide array of flora and fauna, some of which are found nowhere else on Earth. The pristine dunes, arid plains, and ancient canyons harbor an irreplaceable natural heritage that must be safeguarded for future generations.

Mining operations, especially in environmentally sensitive areas like the Namib Desert, have been known to cause severe ecological damage. The extraction of mineral resources often involves the clearing of vast areas, leading to habitat destruction, soil erosion, and disruption of delicate ecosystems. The Namib Desert, with its fragile flora and fauna, is particularly susceptible to irreparable harm that could result from such industrial activities.

Furthermore, the Namib Desert plays a crucial role in regulating local weather patterns and water cycles. The dunes act as natural barriers, preventing the encroachment of desertification while providing a source of moisture through fog precipitation. Mining operations in this delicate region could disrupt these natural processes, leading to a cascade of negative consequences, including changes in rainfall patterns and the loss of vital water resources for both wildlife and nearby communities.

In addition to the environmental concerns, mining activities in the Namib Desert also raise significant social and cultural apprehensions. The desert is home to various indigenous communities whose livelihoods and cultural practices are intricately tied to the land. These

communities have preserved their traditions for generations, relying on the desert's resources for sustenance and spiritual connection. The introduction of mining operations could disrupt

their way of life, lead to the displacement of communities, and cause the loss of cultural heritage.

Considering the potential devastating impacts of mining in the Namib Desert, I urge you and your organization to reconsider supporting or allowing any mining activities in this unique and fragile ecosystem. Instead, let us focus our efforts on sustainable development practices that prioritize environmental conservation and the well-being of local communities.

I kindly request an opportunity to engage in further dialogue regarding this matter and explore alternative solutions that can ensure the protection of the Namib Desert's ecological and cultural significance.

Thank you for your attention to this urgent matter. Together, we can make a difference and ensure the preservation of this natural treasure for generations to come.

Yours sincerely,

Jan-Philipp Sturm

Re: Our concerns with regard to proposed exploration activities on Exclusive Prospective License (EPL) No. 7887 located near Solitaire in the Khomas and Hardap Regions , Namibia.

To whom it may concern.

This letter serves to express the concerns of the directly affected parties:

**Tsondab Valley No. 931;
Ababis No. 933,
Abendruhe No. 411
Vito No. 945**

related to the above mentioned potential exploration and mining activities on our properties.

We kindly request Excel Dynamic Solutions to **provide information with validated data** that addresses the impact of the proposed exploration in the surrounding sensitive ecosystem of the desert/ semi-

desert. This includes the directly adjacent 'Namib Sand Sea' UNESCO World Heritage Site that was inscribed on the UNESCO Heritage list in 2013 at the request of the Namibian government.

Herewith the questions of concern:

- 1) **UNESCO World Heritage Site 'Buffer Zone'**: According to documents published by UNESCO the area affected by EPL 7887 is located inside the buffer zone. What does that encompass and how do exploration & mining activities interfere with the regulations laid out by UNESCO?
- 2) **Socio-economic aspects**: The 'Namib Sand Sea' UNESCO Heritage site is – along with Etosha National Park – the number one tourist attraction for travelers visiting Namibia. Please forward relevant statistics on the negative effect on adjacent Tourism Enterprises and those falling into the Buffer Zone, that offer tourist accommodation and activities; including the following subjects:
 - 2.1 Employment
 - 2.2 Water consumption
 - 2.3 Traffic & road condition
 - 2.4 Air pollution
 - 2.5 Light pollution
 - 2.6 Noise pollution
 - 2.7 Waste Management (Chemical etc.)
 - 2.8 Tourism activities, e.g. walking trails, scenic drives, photographic excursions etc.
- 3) **Endangered & protected vulture population**: What is the effect of exploration/ mining activities in line with the flight of Whitebacked and Lapped Faced Vultures from the Naukluft Mountains to their breeding nests in the Tsondab River and Tsondabvlei?
- 4) **Archeological aspects**: Which artefacts can be encountered in the area and how will they be identified by the prospectors (for protection)?
- 5) **Wild Life Migration disturbance**: How will prospective digging and potential mining effect the movement of wild life (Oryx, Springbok, Ostrich, Giraffe, Spotted Hyena, Cheetahs, Desert Fox etc.) once the Kuiseb River has dried up (since the game inside and outside the Namib Naukluft Park is dependent on the water supply on our private land and the border fence to the park has been defective for decades)?
- 6) **Mining dust and periodical East Storms**: How will our sensitive desert and semi-desert flora and fauna be affected by potential mining dust dispersed by the east storms that are to be expected annually during the winter months?

We as directly affected parties thank you for your concern and attention and request you to kindly provide clarification on the above questions at the next meeting.

For the sake of transparency, information and awareness the affected parties will make these questions of concern available to the relevant Ministries (M.M.E. & M.E.T.) via email.

Sincerely,

Kristin Schreiber
