Re № NB 23-05 of 28 March 2023

To: Mr. Axel Tibinyane
The Director
Atomic Energy and Radiation Protection Regulator
P/Bag 13198
Windhoek

Dear Mr. Tibinyane

Subject: Submission of approval for a Radiation Management Plan for a Mobile Analytical Laboratory

Headspring Investments Pty (Ltd) is conducting uranium exploration in the Omahake, Hardap and Khomas regions. The exploration involves drilling, sampling, and laboratory testing of samples. For the year 2020 and 2021 uranium ore samples from the exploration activities were sent to Kazakhstan for physical and geo-chemical analysis.

The company intends to operate a field mobile geo-analytical laboratory at Farm Tripoli, Omaheke Region. The laboratory will provide sample preparation, assaying and analytical testing of the uranium mineralisation from the exploration. Headsprings Investments herewith submits the Radiation Management Plan (RMP) for the laboratory for approval and the application for registration and licensing to possess and use an XRF.

Please do not hesitate to contact Mr. Aldo Hengari at Aldo.Henagri@uranium1.com, Mobile number 0813215002 should you require any additional information.

Yours Sincerely,

Mr. A. Shutov
Director
