I&AP COMMENTS COMPILATION:

PUBLIC CONSULTATION FOR THE CONSTRUCTION AND OPERATION OF TAILINGS STORAGE FACILITY (TSF3) FOR QKR NAMIBIA NAVACHAB GOLD MINE, ERONGO REGION, NAMIBIA

PROJECT NUMBER: ECC-107-387-REP-16-D

REPORT VERSION: REV 01

DATE: 8 JUNE 2023

Prepared by:

TITLE AND APPROVAL PAGE

Project Name:	Public consultation for the construction and operation of tailings storage facility (TSF3) for QKR Namibia Navachab Gold Mine, Erongo Region, Namibia
Client Company Name:	QKR Namibia Navachab Gold Mine (Pty) Ltd
Client Representatives:	Mr Anthony Moller
Ministry Reference:	APP-002964
Authors:	Monique Jarrett and Jessica Bezuidenhout
Status of Report:	Draft for public review
Project Number:	ECC-107-387-REP-16-D
Date of issue:	8 June 2023
Review Period	08 June – 22 June 2023

DISCLAIMER

The report has been prepared by Environmental Compliance Consultancy (Pty) Ltd (ECC) (Reg. No. 2022/0593) on behalf of the Proponent. Authored by ECC employees with no material interest in the report's outcome, ECC maintains independence from the Proponent and has no financial interest in the Project apart from fair remuneration for professional fees. Payment of fees is not contingent on the report's results or any government decision. ECC members or employees are not, and do not intend to be, employed by the Proponent, nor do they hold any shareholding in the Project. Personal views expressed by the writer may not reflect ECC or its client's views. The environmental report's information is based on the best available data and professional judgment at the time of writing. However, please note that environmental conditions can change rapidly, and the accuracy, completeness, or currency of the information cannot be guaranteed.

1 SUMMARY OF PUBLIC MEETING AND COMMENTS RECEIVED FROM I&APS

1.1 INTRODUCTION

Environmental Compliance Consultancy (ECC) has been engaged by QKR Namibia Navachab Gold Mine (Pty) Ltd (hereafter referred to as Navachab), the Proponent, to conduct an Environmental Impact Assessment (EIA) in accordance with the Environmental Management Act, No. 7 of 2007 and its regulations of 2012, for which an application for an environmental clearance certificate will be submitted for construction and operation of tailings storage facility three (TSF 3) within the Erongo Region, Namibia.

QKR Namibia Navachab Gold Mine (Pty) Ltd is a mining company with a portfolio of gold assets in Namibia. The Proponent is a Namibian registered company that proposes constructing and developing a 20 million cubic meters (Mm³) tailing storage facility. Navachab Gold Mine is an open pit mine located approximately 9 km outside Karibib.

1.2 PUBLIC MEETING SUMMARY

The public meeting was facilitated by ECC's senior practitioner, with the assistance of the Environmental assessment practitioner (EAP). The welcoming and agenda of the meeting included an introduction to ECC as an independent environmental consulting company commissioned by the Proponent Navachab as the environmental assessment practitioner (EAP) to conduct the environmental impact assessment for the Project as part of the environmental clearance certification application process for the proposed Project.

As part of the Project's introduction to the public, the following was outlined:

- Project location
- Baseline
- ESIA process and procedures

An explanation of the Project's current status was provided to the public. It was emphasized that the objective of the current public scoping meeting conducted in the early scoping phase is to engage all stakeholders and to identify further potential studies and assessments that may be required for inclusion in the environmental impact assessment of the Project.

The technical presentation by Navachab then provided an overview of the proposed construction and operation of the TSF 3 as well as the overall Project:

The presentation from ECC covered a detailed description of the public consultation purpose and intentions as part of the environmental and social impact assessment (ESIA) process for the

processing plant. At this stage, I&APs were encouraged and informed of the importance of raising any concerns and comments related to the proposed operations of the processing plant which are to be considered in the ESIA studies and submitted along with the application for an environmental clearance certificate to the competent authorities and MEFT for a record of decision.

The main components of the environmental assessment identified for consideration in the ESIA were discussed, aspects and concerns raised which will form an important part of the impact study for the proposed Project. The current phase involves and engages I&APs to develop target-specific Terms of References (TOR) for necessary specialist studies to address all identified concerns and potential impacts in the assessment report.

1.3 KEY FEEDBACK ON ISSUES OF CONCERN – PUBLIC MEETING

The pool of comments received from all meetings held was provided by key stakeholders and representatives of the community. The I&APs provided useful and valuable input into the ESIA through points and comments raised during the various meetings. From the review of the recorded statements the key common theme/s of concern that was raised can be summarised as follows:

1.3.1 WATER POLLUTION FROM CHEMICALS USED IN THE TSF

The I&APs in attendance questioned as to whether or not chemicals will be used as part of the operations of the TSF 3. The Proponent explained that most of the chemical used during the processing of the ore is re-used in the processing plant therefore only a small concentration of the chemicals used in the processing plant are expelled to the TSF. The more dangerous of the chemicals used, that being cyanide is broken down when exposed to sunlight in the open TSF.

2 ACKNOWLEDGEMENTS

In closing of the meeting ECC thanked all I&APs for their attendance and for providing valuable feedback during the public meeting. Through the public engagement process the Proponent and ECC have endeavoured to provide a platform to hear and address all relevant comments put forward by I&APs.

ECC further endorsed the fact that constructive feedback from I&APs results in a more robust and improved ESIA. This process results in a project that is understood by the community and I&APs. The I&AP's feedback will contribute to identifying the potential impacts to be assessed and concerns to be considered and addressed as the project progresses.

2.1 DETAILED COMMENTS AND RESPONSES FROM THE PUBLIC MEETING

The official public consultation period began on the 13th of July 2022 and remained open until the 19th of July 2022 for initial comments. These were received during the public meeting and via email which are to be included in the scoping report. These comments and their respective responses are included in the tables below.

Further comments were welcome after that date and the public consultation period will remain open for I&APs until the final assessment report for the project is ready for submission to the competent authorities.

Table 1 - Comments and feedback from the public meeting

28 th July 2022 Karibib Private School Hall Karibib, Erongo Region		
Stakeholder name and details	Comments/question received	Response/clarification
Unidentified I&AP	What percentage increase in production would necessitate this TSF 3?	TSF 2 will reach its full capacity next year and then will be decommissioned and rehabilitated thus the need for the construction of TSF 3. Will be built in a valley using waste rock.
	Where will the water come from to feed the TSF 3?	TSF 3 will be fed with a slurry mixture expelled from the ore processing plant. No additional water will be required to feed TSF 3.
Jessica Bezuidenhout EAP from Environmental Compliance Consultancy (ECC)	What do you do to remove or reduce the chemicals before you pump the tailings out of the processing facility?	Several chemicals are used such as cyanide and peroxide etc, we recover about 8% of the water used and is sent back before it is sent to the TSF. So, it depends on the Cyanide contents in that 8% of water is recovered. There is also a filter plant where a dry cake is produced and is co-disposed with the waste rock. Most of the chemicals are recovered and sent back and re-used in the mine. When any excess Cyanide is released with tailings and is then exposed to sunlight is then destroyed by the sunlight. Navachab also has several monitoring boreholes to monitor on a regular basis any contamination.
	Do you subscribe to the international cyanide Code for the Manufacture, Transport, and Use of Cyanide in the Production of Gold and how	We subscribe to this standard in terms of monitoring.

28th July 2022 Karibib Private School Hall Karibib, Erongo Region		
Stakeholder name and details	Comments/question received	Response/clarification
	does that affect monitoring?	
	How long will the construction be, as this will result in more trucks being on the road generating more noise in the town and how much noise do you expect from this?	Want to start with construction before the end of the year. Will use normal managing equipment no special equipment that may generate any excessive noise.
Unidentified I&AP	How do you prevent these chemicals from entering the hydrological system?	Once the tailings are dry there is no trace of chemicals in the dry cake anymore if any it is in very minute amounts.

Table 2 - Comments received from I&APs via email during the registration period.

Stakeholder details	Comments/question received	Response/clarification
Thomas Rathernam X=TR Consultants	I particularly like to see what was provided for in terms of rehabilitation in the company's life of mine plan.	This will be addressed in the impact assessment phase
Conette Smith Drenam (Pty) Ltd	1. About 1.5 km away from the border there was an existing borehole on our premises with a depth of about 22m when we bought the farm in 1993. In 2005 we had to redrill the borehole to 48m due to the water level that went down. Five years ago, in 2017 we had again to redrill that same hole to 80m.	This matter is being addressed directly with the proponent as part of ongoing consultation on this topic.

Stakeholder details	Comments/question received	Response/clarification
	<p>We think that this was due to the fact that the open pit went further down and the water table went down as well. Do you intend to go further down with the open pit and do you intend to do underground and if so will that affect the water table negatively for us?</p> <p>2. How do you want to compensate us if we must drill our boreholes further down?</p> <p>3. Will, you also use chemicals in your operations if you say yes, can you please provide us with a detailed list and inform us if it is hazardous in our drinking water?</p>	
<p>Karel Andries Esterhuizen</p> <p>Erongo Plant Hire/Erongo Road and Dust Control</p>	<p>Interest to tender</p>	<p>Comment Noted.</p>
<p>Dr Klaus Rheinschimich</p> <p>Drenam Pty (Ltd)</p>	<p>I have a view concern with your waist dam so close to our farm I just want to find out if the a big rainstorm comes of about 150mm in half an hour will the wall of the waist dam be stable?</p>	<p>This will be addressed in the impact assessment phase.</p>

APPENDIX A – BID

APPENDIX B – ADVERTS PUBLISHED

QKR NAMIBIA
NAVACHAB GOLD MINE

NOTICE OF AN ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED CONSTRUCTION OF AN ADDITIONAL TAILINGS STORAGE FACILITY, KARIBIB, ERONGO REGION, NAMIBIA.

Environmental Compliance Consultancy CC (ECC) hereby gives notice to the public that an application for an environmental clearance certificate in terms of the Environmental Management Act, No. 7 of 2007 will be made as per the following:

Applicant/ Proponent:	QKR Namibia Navachab Gold Mine (Pty) Ltd
Environmental Assessment Practitioner (EAP):	Environmental Compliance Consultancy
Location:	Erongo Region, Namibia

Project: The proposed construction of an additional Tailings Storage Facility (TSF 3) at Navachab Gold Mine, Erongo Region, Namibia.

Proposed Activities: The Proponent intends to construct a 20 Mm³ Tailings Storage Facility (TSF 3) at the Navachab Gold Mine.

TSF 3 will receive residue from the Navachab Carbon-In-Pulp plant. TSF 3 will be built using the coarse fraction of tailings sands from cyclones and using non-mineralized run of mine waste rock. The area of TSF 3 will be approximately 40 to 50 ha, with one main dam of approximately 20 to 25 m in height and approximately 700 to 800 m in length.

Purpose of the review and registration period: The purpose of the review and registration period is to introduce the proposed Project and to afford registered interested and affected parties (I&APS) an opportunity to comment on the Background Information Document (BID) to ensure that all issues and concerns are brought forward, captured and considered further in the assessment.

Public meeting: A public meeting is scheduled to take place on the 28th of July 2022 at 10:00 AM in the Karibib Private School Hall, Karibib, Erongo Region.

The registration period is effective from 13 July 2022 to 29 July 2022. I&APs and stakeholders are required to register for the project at: <https://eccenvironmental.com/download/the-proposed-construction-and-operation-of-an-additional-tailings-storage-facility-tsf3-erongo-region-namibia/>

The team at ECC will then maintain contact with all registered I&APs to keep them informed and engaged as the ESIA process develops, ECC will also provide registered I&APs relevant documents to review during the assessment process.

ENVIRONMENTAL
COMPLIANCE CONSULTANCY

In anticipation of USAID/Namibia Reducing HIV Vulnerability: Integrated Child and Youth Health - Namibia (REACH) to be implemented in Kavango West, Kavango East and Zambezi regions, IntraHealth Namibia is seeking suitable qualified candidates for the following positions*:

- Chief of Party - Rundu
- Deputy Chief of Party - Rundu
- Manager - Finance - Windhoek

For more detailed job requirements of these positions, please visit our website at www.intrahealthnamibia.org by clicking on Work With Us, then Career Opportunities, and then Jobs. Closing date for applications is 29th July 2022.

Only online applications will be accepted. No email or hard copy applications will be considered. Only shortlisted candidates will be contacted within 4 weeks after the closing date. IntraHealth Namibia is an equal opportunity employer.

*These positions are contingent upon award and approval from USAID.

TENDERS

ENQUIRY NO. E185-HD-2022

THE PROVISION OF INFRASTRUCTURE MAINTENANCE SERVICES

1. SCOPE OF WORKS

Namdab Diamond Corporation (Pty) Ltd hereby invites reputable and suitably qualified service providers to submit their proposals for the provision of Infrastructure Maintenance Services at its operations in Southern Coastal Mines, situated approximately 300km north of Oranjemund.

The scope of services shall primarily consist of maintenance, repair, replacement and installation services, including but not limited to the following disciplines:

1. Civil Services - Building Maintenance;
2. Carpentry;
3. Mechanical Services; and
4. Fitting, Including Fitting & Tuning.

2. TENDER ENQUIRY DOCUMENTS

Interested parties may contact Renee Strauss, at the below listed details to obtain a copy of the enquiry documents:

Email: rensosytrauss@namdeb.com
Tel: +264 (0)8 238 502

3. COMPULSORY VIRTUAL SITE INSPECTION

A compulsory virtual technical site inspection (see further details in the tender enquiry) shall be conducted on **Tuesday, 26th July 2022** via the **Mircroet Teams** online communication platform.

Only Tenders that attended the compulsory virtual site inspection shall be eligible to participate in the tender process.

4. CLOSING DATE

Tender proposals must be submitted via email to tender@namdeb.com. The closing date and time is **14h00 on Monday, 1st August 2022**.

NOTICE OF AN ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED CONSTRUCTION OF AN ADDITIONAL TAILINGS STORAGE FACILITY, KARIBIB, ERONGO REGION, NAMIBIA.

Environmental Compliance Consultancy (ECC) hereby gives notice to the public that an application for an environmental clearance certificate in terms of the Environmental Management Act, No. 7 of 2002 will be made in per the following:

Applicant/Proponent: QKR Namibia Navachab Gold Mine (Pty) Ltd
Environmental Compliance Consultant: Environmental Compliance Consultancy
Location: Erongo Region, Namibia

Project: The proposed construction of an additional Tailings Storage Facility (TSF 3) at Namdeb (old) Mine, Erongo Region, Namibia.

Proposed Activities: The Proposed intends to construct a 20 000m³ Tailings Storage Facility (TSF 3) at the Namdeb (old) Mine.

TSF 3 will receive material from the Namdeb Carbon-In-Pulp plant. TSF 3 will be built using the coarse fraction of tailings sands from cyclones and using non-sulfidized run of mine waste rock. The area of TSF 3 will be approximately 40 to 50 ha, with one main dam of approximately 25 to 30 m in height and approximately 700 m in its length.

Purpose of the review and registration period: The purpose of the review and registration period is to introduce the proposed project and to afford registered interested and affected parties (RIAPs) an opportunity to comment on the Electronic Information Document (EID) to ensure that all issues and concerns are brought forward, captured and considered further in the assessment.

Public meeting: A public meeting is scheduled to take place on the 26th of July 2022 at 09:00 AM in the Karibib (Private) School Hall, Karibib, Erongo Region.

The registration period is effective from 13 July 2022 to 29 July 2022. RIAPs and stakeholders are invited to register for the period at: www.environmental.com.na or info@environmental.com.na

The team at ECC will then maintain contact with all registered RIAPs to keep them informed and engaged as the EIA process develops. ECC will also provide registered RIAPs relevant documents to review during the assessment process.

AGENDA

- Main Objectives
- Background Information
- Environmental & Social Impact Assessment (ESIA) Process – *Presented by ECC*
- Navachab TSF 3 Presentation – *Presented by Hildebrand*
- Potential Biophysical & Socio-economic Impacts – *Presented by ECC*
- Baseline Studies
- Public Participation

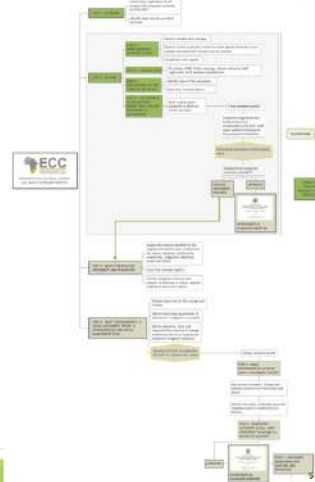

MAIN OBJECTIVES

- Provide information describing the planned Navachab TSF 3 project and associated activities;
- Provide an independent environmental and social assessment of the activities associated with the proposed mining project; and
- Develop management and mitigation measures associated with any identified potential impacts where necessary.

ESIA STAGES

- Stage 1: Screening stage - identification of *triggered* listed activities from the EMA Regulations of 2012. – **Completed (APP 0010395)**
- Stage 2: Scoping stage - Baseline studies, **public consultation commencement** and developing ToR for specialist input. Develop a scoping report and EMP. **In progress**
 - Submission of draft scoping report and EMP for **public review**.
 - Submission of the final scoping report and draft EMP for **government review**.
- Stage 3 ESIA - **impact identification and evaluation and reporting. Next step**
 - Final ESIA report development with the specialist contributions.
 - Final EMP development.
 - Public review of draft ESIA report and EMP.
- Stage 4: **Submission to the competent authorities (MME and MEFT)**

 Erongo Region, Namibia

Project: The proposed construction of an additional Tailings Storage Facility (TSF 3) at the Navachab Gold Mine.

Project Activities: The Project intends to construct a 2000m² Tailings Storage Facility (TSF 3) at the Navachab Gold Mine.

TSF 3 will receive residue from the Navachab Carbon-in-Pulp plant. TSF 3 will be built using the coarse fraction of tailings which have undergone all stages of processing. The area of TSF 3 will be approximately 40 x 50 m, with an area part of approximately 20 m x 25 m in height and approximately 100 m to 150 m in length.

Public review and registration period: The review and registration period is to commence the proposed Project and its effect on the environment and affected parties (identify any dependencies to comment on the Background Information Document (BID) to ensure that all issues and concerns are brought forward, updated and considered before the assessment).

Public meeting: A public meeting is scheduled to take place on the 20th of July 2022 at 16:00 AM in the Karibib-Private School Hall, Karibib, Erongo Region.

The registration period is effective from 22 July 2022 to 29 July 2022. SAPs and stakeholders are required to register for the project on <https://www.environmental.com.na> to download the proposed application and comment on it. An additional deadline for comments is 05 August 2022.

The team of ECC will then consider, consult with registered SAPs to keep them informed and engaged on the EIA process. ECC will also provide registered SAPs relevant documents to review during the assessment process.

PROJECT BID

The proposed construction and operation of an additional tailings storage facility (TSF3), Erongo Region, Namibia

Construction and operation of an additional tailings storage facility

QKR Namibia Navachab Gold Mine (Pty) Ltd wishes to construct a 2000m² tailings storage facility (TSF3), which is located on site 1.0 km southeast of Karibib, Erongo Region. The construction of TSF 3 will allow Navachab to continue operations for the rest of the life of the mine (LOM) while ensuring the safe disposal of tailings from the carbon-in-pulp (CIP) plant. This will ensure the continued provision of employment to thousands of people. The construction of the TSF will require the use of new outside contractors and a labour force from Karibib and surrounding areas.

ECC's Role

ECC has been contracted by QKR Namibia Navachab Gold Mine (Pty) Ltd, as the independent Environmental Assessment Practitioner (EAP), to facilitate the ESR process. Prior to the start of the proposed Project, an environmental clearance certificate has to be issued in terms of the Environmental Management Act, 1 of 2002 and the associated EIA Regulations. A final decision relating to the above-mentioned application will be made by Ministry of Environment, Forestry and Tourism (MEFT) Department of Environmental Affairs (DEA).

APPENDIX E – SITE NOTICES

Karibib Post Office

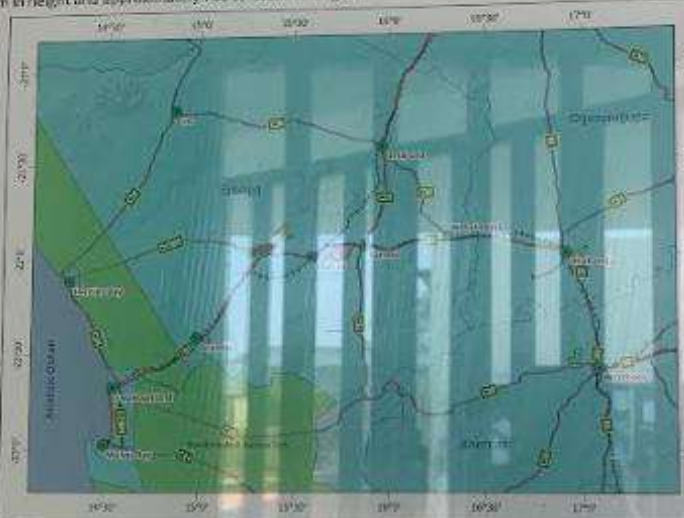

Karibib Town Council

**NOTIFICATION OF THE PROPOSED CONSTRUCTION OF A THIRD TAILINGS STORAGE FACILITY (TSF 3),
KARIBIB, ERONGO REGION, NAMIBIA.**

Environmental Compliance Consultancy CC (ECC) hereby gives notice to the public that an application for an environmental clearance certificate in accordance with the Environmental Management Act, No. 7 of 2007 will be made as per the following:

<p>Applicant: QKR Namibia Navachab Gold Mine (Pty) Ltd Environmental Assessment Practitioner (EAP): Environmental Compliance Consultancy Location: Erongo Region, Namibia Project ID: ECC-107-378 Proposed Project Area: Karibib District, Erongo Region, Namibia</p>	<p>Proposed Project Activity: The construction of a 200 million m³ Tailings Storage Facility (TSF 3) that will receive residue from the Navachab Carbon-In-Pulp plant. TSF 3 will be built using the coarse fraction of tailings sands from cyclones and using non-mineralised run of mine waste rock. The area of TSF 3 will be approximately 40 to 50 ha, with one main dam of approximately 70 to 25m in height and approximately 700 to 800m in length.</p>

Scale: 1:50,000
 Vertical Datum: 1975
 Horizontal Datum: WGS 84

I&APs Registration: The purpose of the registration period is to introduce the proposed Project and to afford Interested and Affected Parties (I&APs) an opportunity to register with ECC and comment on the Background Information Document (BID), to ensure that potential issues and concerns are brought forward so that they can be considered and assessed during the impact assessment process. The registration period is effective from **13 July 2022 to 29 July 2022**. I&APs and stakeholders are required to register for the Project at: <https://eccenvironmental.com/download/the-proposed-construction-and-operation-of-an-additional-tailings-storage-facility-tsf3-erongo-region-namibia/>

Public Meeting: A public meeting is scheduled to take place on the **28th of July 2022** at **10:00 AM** in the **Karibib Private School Hall**, Karibib, Erongo Region.

The team at ECC will then maintain contact with all registered I&APs to engage and to keep them informed as the ESIA process develops. ECC will also provide registered I&APs input opportunities and review periods throughout the assessment process.
