

N\$2.8 Billion Imported More

the value of sugars, molasses and honey imported averaged N\$141.5 million with the largest value of N\$313.9 million recorded in August 2022 and the lowest value of N\$44.1 million recorded in June 2022, the NSA reported.

South Africa continued to be Namibia's largest source of imports in May.

"On the other hand, Namibia exported uranium and precious stones (diamonds) worth N\$2.0 billion each. Uranium recorded a trade surplus of N\$2.0 billion while precious stones (diamonds) yielded a trade surplus of N\$1.7 billion.

The country continued to be a net exporter of fish with N\$1.1 billion worth of fish exported and only N\$11 million imported during the month under review," the NSA stated.

Most exported Namibia's goods were destined for SACU in May, with a share of 36.8% of total exports, while OECD and BRICS followed in second and third position with 26.4% and 18.3% of Namibia's total exports, respectively.

The EU and SADC, excluding SACU, took the fourth and fifth positions accounting for 15.7% and 13.4% of the total exports.

In May 2023, the manufacturing industry attained the most exported goods valued at N\$4.4 billion, absorbing 47.4% of total exports, however products from the industry decreased by N\$473 million from the value recorded in April 2023.

Products from the mining and quarrying industry came in second position absorbing 47.0% of the export bill in May.

Exported goods from this industry increased by N\$2.1 billion when compared to the value recorded in April.

Namibia recorded trade surpluses with Botswana, the country's largest export market for May, of N\$1.7 billion, with Canada N\$691 million and China N\$679 million.

"However, trade deficits were recorded against South Africa at N\$2.4 billion, India and Peru both recorded a trade deficit of N\$1.5 billion each during the period under review," NSA reported.

In May, Namibia imported sugars, molasses and honey valued at N\$124.9 million, which was mostly sourced from South Africa.

Basic Income Grant

of the Constitution. But more often they continue to see the government's failure to ensure the well-being and rights of children, in this case, especially protection from poverty and malnutrition.

"This is why civil society organisations play a vital role in advocating radical policy changes. There is a need to pressure the government to prioritise the well-being of the poorest members of our society, so they can provide better care for their children," he said.

According to the 2022 Global Hunger Index, Namibia suffers from a serious level of hunger, ranking 78th out of 116 countries.

Malnutrition is a growing concern, with 24% of children under the age of 5 stunted (reduced growth relative to age), 6% experiencing wasting (weighing too little for their height), and 13% underweight.

According to Kasera, government is evading its responsibilities to protect children.

"The government needs to implement policies and programmes that tackle poverty and malnutrition effectively. The BIG is one such programme and must be accompanied by other social infrastructures that will ensure that the poor have access to essential services. Especially in the context of the current socio-economic conditions, the government must consider inflationary impacts on basic goods."

He added that the poorest among them are paying a huge price as they cannot afford basic goods such as food.

"If we were able to pass so many bills in the last two weeks, we can also pass the bill for a universal BIG. Passing such a bill is a tangible manifestation of the government's commitment to promoting human rights and ensuring that the well-being of children is also

protected," he said.

According to the World Food Programme Namibia is an upper-middle-income country, with a population of 2.5 million people. Despite this classification, 18% of Namibians live below the national poverty line.

Over a fifth of people were unemployed in 2021, mostly women and youth.

The impact of the current global and national food-price crisis on food security is heightened by various factors, including low production of food and livestock in communal areas, mainly due to limited access to modern farming technologies and practices, poor soil fertility, overgrazing, prolonged dry spells, limited access to markets and land-use practices.

According to Governor Nganate, more than 80% of the street children living in Windhoek are from Omaheke and need to be reintegrated and rehabilitated.

"Noting that this calamitous situation required a multi-sectoral and sustainable approach, the Governor has established the Regional Malnutrition Task Force, and is in the process of establishing a garden at the office premises," Nganate said
