

1. Project Site Area

The project offices are located in Walvis Bay, Erongo region (-22.94722222, 14.50361111). However, the operation will be conducted at all ports and other offshore areas in Namibia. Henceforth, it is not practical to have a physical location for the project at sea as some of the activities will be undertaken at mid-water during anchorage or transshipment of goods.
