TAKE NOTICE that Messrs. M and N Planning & Property Development Cc (Town and Regional Planners) on behalf of owner of Erf 3347, Istanbul Street No.10, Otjomuise has applied to the Windhoek Municipal Council and intends applying to the Urban & Regional Planning Board in terms of the stipulations of the Urban & Regional Planning Act, 2018 (Act No. 5 of 2018) for:

- rezoning of Erf 3347, Istanbul Street No.10, Otjomuise from 'residential' with a density of 1:300m² to 'business' with a bulk of 0.4
- consent to use Erf 3347, Istanbul Street No.10, Otjomuise in accordance with the proposed zoning and bulk while rezoning is being completed.

Erf 3347, Istanbul Street No. 10, Otjomuise is zoned 'residential' with a density of 1:300m² and is approximately 313m² in extent. The proposed rezoning to 'business' with a bulk of 0.4 will allow the owner to use Erf 3347, Otjomuise for business (Retailer Shop) purposes. The number of vehicles for which parking must be provided on-site will be provided in accordance with the Windhoek Town Planning Scheme.

Further take notice that the plan of the Erf lies for inspection on the Town Planning notice board in the Customer Care Centre, Main Municipal Offices, Rev. Michael Scott Street, Windhoek and with applicant. Further take notice that any person objecting to the proposed use of the land as set out above may lodge such objection together with the grounds thereof, with the City of Windhoek, Urban Policy Division and with the applicant in writing. Last day for objections is the 08th August 2023.

PUBLIC NOTICE ENVIRONMENTAL IMPACT ASSESSMENT

Take note that Stubenrauch Planning Consultants (Town and Regional Planners and Environmental Consultants) on behalf of Outapi Town Council (the proponent), the registered owner of Erf 1089, Outapi Extension 4 hereby gives notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the following:

- PROJECT DETAILS:**
- Permanent Closure of Erf 1089,
 - Outapi Extension 4 as a Public Open Space;
 - Rezoning of Erf 1089, Outapi Extension 4 from "Public Open Space" to Residential";
 - Subdivision of Erf 1089, Outapi Extension 4 into Erf A/1089, B/1089, C/1089 and the Remainder.

PROJECT LOCATION: Outapi, Omusati Region

The Proponent: Outapi Town Council
Environmental Assessment Practitioner (EAP): Stubenrauch Planning Consultants (SPC)

REGISTRATION OF I&APs AND SUBMISSION OF COMMENTS:

In line with Namibia's Environmental Management Act (No. 7 of 2007) and EIA regulations (GN 30 of 6 February 2012), all I&APs are hereby invited to register with the applicant to obtain further information. Further take notice that any person having objections and/or comments to the proposed application as depicted above, may lodge such objection/ comment in writing with the Chief Executive Officer of the Outapi Town Council and with the applicant (SPC) in writing via Email: bronwynn@spc.com.na ; Tel: 061 25 11 89 on or before **1 August 2023.**

PUBLIC NOTICE ENVIRONMENTAL IMPACT ASSESSMENT

Stubenrauch Planning Consultants (SPC) hereby give notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the following:

PROJECT DETAILS:

- Establishment of the Flexible Land Tenure Schemes in Ombili and Bonya Informal Settlements in Helao Nafidi, Ohangwena Region.
- Creation of block erven and streets within the Flexible Land Tenure Scheme Boundaries of Bonya & Ombili Informal Settlements.
- Provision of associated bulk services.

The Proponent: Helao Nafidi Town Council
Environmental Assessment Practitioner (EAP): Stubenrauch Planning Consultants (SPC)

The proponent intends to establish the Flexible Land Tenure Schemes for the following identified areas in Helao Nafidi Town:

- Bonya Informal Settlement
- Ombili Informal Settlement

REGISTRATION OF I&APs AND SUBMISSION OF COMMENTS:

In line with Namibia's Environmental Management Act (No. 7 of 2007) and EIA regulations (GN 30 of 6 February 2012), all I&APs are hereby invited to register and submit their comments, concerns, or questions in writing on or before **Tuesday, 01 August 2023.**

Proof of public consultation
Meeting minutes and attendance register

18 August 2023

PUBLIC CONSULTATION MEETING MINUTES

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) No. 8357 LOCATED SOUTH OF USAKOS, ERONGO REGION.

Date: Friday, 9 August 2023

Time: 12:20 – 13:00

Venue: Tsaobis Nature Park, Rest camp

The public consultation meeting was attended by 7 people, including an environmental consultant and an Archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS), and the proponent - **Please refer to the attached attendance register.**

1. INTRODUCTION AND WELCOMING REMARKS

The meeting was opened by the environmental consultant, Ms. Aili lipinge, with the introduction of the team, who they are, and the purpose as to why they are consulting affected parties of the proposed prospecting and exploration activities on EPL 8357. The meeting attendance register was then circulated for the attendees to write down their names and contact details so that they can be added to the list of interested and affected parties (I&APs) and receive further information on the ESA process.

2. MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

The Environmental Scoping Assessment (ESA) process and the reason why the Proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent Environmental Consultant to carry out the ESA and apply for the Environmental Clearance Certificate (ECC).

2.2 Explanation of what an ESA is, its Process, and the Public Role in the Process

Ms. Iiping explained to the attendees what the meeting was all about and why they were invited (with reference to the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 Environmental Impact Assessment (EIA) Regulations on Public Consultation). Mr. Iiping further explained what an ESA is and that the proposed exploration activities are one of the listed activities in the 2012 EIA Regulations of the EMA that cannot be undertaken without an ECC from the Environmental Commissioner.

2.3 Presentation of Potential Project Impacts

To ensure transparency and that the attendees understand both sides of the proposed project activities, the Environmental Consultants also presented the potential pre-identified potential positive & negative environmental and social impacts.

2.4 Public Open Discussion (Interactive Session)

Mr. Leonard provided the meeting attendees with the opportunity to raise their concerns/issues and/ or comment on the proposed project activities. The issues and comments recorded are presented in Table 1 below.

Table 1: Comments and issues raised during the public consultation meeting, 10th February 2023

Comment/ issue No.	Commenter name & issue/comment / question	Response and name of responder:
1.	Commenter 1: Will the exploration activity have an impact on the baboon research (studies) being carried out in Tsaobis and Ukuib West?	Ms. Aili lipinge): Thank you for the information, scientific research/studies are very important ad one can not compromise them, therefore we will make those farms as a no-go zone and create a buffer around them (Meaning no exploration activities can occur around the proposed project).
2.	Commenter 2: Can the proponent pariotize employing residents within the EPL	Ms. lipinge : Noted
3.	Commenter 3: We are not against the project, the proponent can go ahead with the proposed project	Ms. lipinge : Noted

FINAL REMARKS AND CONCLUSION OF THE MEETING

Ms. lipinge thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns, and inputs had been noted down for consideration and addressing in the Environmental Scoping Assessment (ESA) Report as well as incorporating their recommendations into the draft EMP.

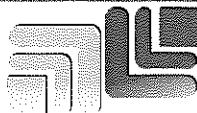

Furthermore, Ms. lipinge informed the attendees that the draft meeting minutes, Environmental Assessment Report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the draft ESA Report and EMP is done, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration of an ECC.

The meeting adjourned at 13h00.

Concerns raised over a Zoom meeting with Mr. Piet Potgieter on the 8th of August 2023, at 10H00;

- No exploration activities must occur around any existing structure, they must be 50m away,
- In terms of site clearing; strictly to the size as stipulated in the work plan/program,
- The proponent must use farm workers for unskilled labours as they know the farm much better.

To: drieskruger71@gmail.com
Cc: desireeroux@polka.co.za; 'Heida'; public@ednamibia.com
Subject: RE: Environmental Scoping Assessment for EPL8357

Dear Dries Kruger
I hope this email finds you well,
Please find my response in red

- Why were we not directly contacted with regards to the meeting? As far as I know none of the other affected parties attended the meeting. Were you successful in making contact with them with regards to the planned meeting at Tsaobis? Did they provide any feedback, questions, or concerns?

Thank you for your question, the draft meeting minutes, ESA and EMP will be shared with all registered stakeholders today **Friday (18 August 2023)** for public comments.

In addition, we are still busy with a public consultation phase, whereby we are receiving comments and concerns from stakeholders / Interested and Affected Parties. All concerns/comments received, will be incorporated in the scoping report and mitigation measures will be provided in the EMP.

- Has EPL8357 been granted? On the Cadastre (<https://maps.landfolio.com/Namibia/>) it is register as a pending EPL applied for in September 2020.

The EPL (Licence) hasn't been granted yet, it is waiting for the Environmental Clearance Certificate (ECC) FROM THE Ministry of Environment, Forestry and Tourism.

- Is an approved Environmental Scoping Assessment (ESA) and Environmental Clearance Certificate (ECC) for EPL8357 needed for grant of the EPL or is it a condition before any on-ground activities can commence?

The proponent (EPL) holder needs to obtain an ECC first before the commencement of any groundwork/exploration activities.

- What is the scope of work on the ESA? What impacts are you expecting, and will you be looking at?

The Draft ESA and EMP will be shared with all registered stakeholders by today Friday (18 August 2023) for public comments. It will stipulate all the positive and negative impacts, apart from that we will provide the mitigation measures to the negative impacts in the Environmental Management Plan.

- Will there be a subsequent Environmental Management Plan (EMP) forthcoming after the ESA has been completed? Who will enforce the ESMP and see that conditions are met?

The proponent will be responsible to enforce all conditions stated in the EMP, Plus six (6) upon the issuing of the ECC, An independent consultant needs to carry out an audit to see if the proponent is complying to the conditions stated in the EMP.

- What exploration activities are planned on the EPL area and for which minerals/commodities? Geophysical, rock and soil sampling, trenching, drilling?

The proponent is interested in exploring for Base & Rare Metals, Precious Metals, Dimension Stone, and Industrial minerals, Once the proponent have carried out the geological mapping m that's when they will determine the exploration method that will be employed ;

- work?

Once the ECC is issued, then the proponent needs to discuss with the farm owners about the access agreement ;
What process is followed if access to a farm is refused by the owner for the ESA or exploration activities?

- If everything falls in place, when do you expect to start and finish the ESA?
The Draft ESA and EMP will be shared with all registered stakeholders 18 August 2023 for public comments.

- If all goes according to plan, when is exploration activities expected to start?
This will only be determined once the ECC is granted.

- What process would be followed in case an affected party has grievances during the ESA and exploration activities? Assuming access to the farms are granted.

Once the Environmental Clearance Certificate (ECC) for EPL 8357 is granted, before the proponent commences with exploration activities, the proponent needs to sign the access agreement with the farm

owner . In that agreement. The proponent clearly states how many staff members will be involved in the exploration activity, The types/ color of car(s) that will be involved in the exploration, their timeline and all logistics that will be involved during exploration. The proponent therefore needs to comply to all conditions stated in the access agreement, Prior to that there is also an Environmental Management Plan (EMP) , that states all the responsibilities and mitigation measures in place. In case the proponent is not complying, and the matter is reported to the Environmental Commissioner, The ECC can be suspended/cancelled for non-compliance given that the Directorate of Environmental Affairs official assessed the matter also and that are convinced / there is proof,

- Where can someone get access to the ESA report once it has been concluded and will affected parties be given an opportunity to review the report and comment?
The Draft ESA and EMP will be shared with all registered stakeholders by Friday (18 August 2023) for public comments and the public will be given two weeks to review the report.

If needs be, I can arrange a Zoom meeting for further clarity,
Thank you and best regards.

Aili

Subject: FW: Environmental Scoping Assessment for EPL8357
Importance: High

Hi Aili,

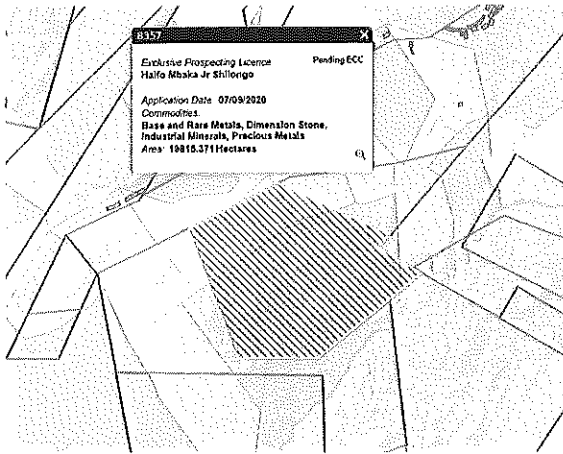

Sorry for only coming back to you now but I was travelling. I was really hoping to meet you guys at Tsaobis on the 9th of August to hear about the planned Environmental Scoping Assessment for EPL8357. I was also hoping to ask questions and get clarity on what the scope of your assessment will be and what exploration activities are planned. Just to confirm I travelled to Tsaobis and was there from 9.50am to 11am waiting for you to arrive for the scheduled 10am meeting.

We are from the farm Nuwerus 147 which is noted as an affected area in your letter. On your map our farm is named as Ukuip West and falls outside the affected area. We were informed about the meeting by our neighbour from Tsaobis, Isac, who forwarded the notification letter. He asked me to also attend on his behalf to hear how Tsaobis will be affected. I will provide feedback to him once I receive feedback from you.

I've also copied the registered owner of Nuwerus, Heida Roux, and my wife Desiree on the email so that they can ask additional questions if needed.

Nevertheless, please find below my questions. We trust that the whole process will be inclusive and transparent towards affected parties and that future meeting and interaction will be better organised than the Tsaobis meeting of the 9th of August.

- Why were we not directly contacted with regards to the meeting?
- As far as I know none of the other affected parties attended the meeting. Were you successful in making contact with them with regards to the planned meeting at Tsaobis? Did they provide any feedback, questions, or concerns?
- Has EPL8357 been granted? On the Cadastre (<https://maps.landfolio.com/Namibia/>) it is register as a pending EPL applied for in September 2020.

- Is an approved Environmental Scoping Assessment (ESA) and Environmental Clearance Certificate (ECC) for EPL8357 needed for grant of the EPL or is it a condition before any on-ground activities can commence?
- What is the scope of work on the ESA? What impacts are you expecting, and will you be looking at?
- Will there be a subsequent Environmental Management Plan (EMP) forthcoming after the ESA has been completed? Who will enforce the ESMP and see that conditions are met?
- What exploration activities are planned on the EPL area and for which minerals/commodities? Geophysical, rock and soil sampling, trenching, drilling?
- What access to which farms will be required for the ESA and planned exploration work?
- What process is followed if access to a farm is refused by the owner for the ESA or exploration activities?
- If everything falls in place, when do you expect to start and finish the ESA?
- If all goes according to plan, when is exploration activities expected to start?
- What process would be followed in case an affected party has grievances during the ESA and exploration activities? Assuming access to the farms are granted.
- Where can someone get access to the ESA report once it has been concluded and will affected parties be given an opportunity to review the report and comment?

That's it from me for now.

Desi, Heida, anything to add?

Regards
Dries Kruger

Subject: RE: EPL8357 Environmental Scoping Assessment

Good morning, Dries,

Thank you for your comments/input,
Kindly note that your comments will be used as appendices for our final submission at MEFT.
Kindly find my response in red

- Figure 2 has the farm name Ukuib West for two farms. These are incorrect and confusing and do not match the names of affected farms listed in 1.1. The eastern of the Ukuib West farms in your map is actually Nuwerus while the western Ukuib West is Ja Nee. The cadastre system is also incorrect as it refers to both as Nuwerus 147. See maps below for clarification.

Farm Ja Nee

Farm Nuwerus

We have noted that sir,

- For the record, we never received a Background Information Document as stated on page iii. Or does this relate to the Public Notice received calling for the Tsaobis meeting on the 9th?
- My sincere apology if the Background Information Document never reached you, kindly find it as an attachment,
- The meeting on the 9th of August at Tsaobis was poorly attended mainly because the majority of affected landowners were not contacted beforehand. It should be noted in the report who were directly informed by you about the meeting, on what date they were informed, and from who you received a response and on what date. In your document it is unclear as to why so few people attended the meeting when, in reality, it is

due to the fact that the affected landowners were not informed and that you were more than 2 hours late for the meeting. I waited for one and a quarter hours before leaving the meeting venue.

- Our apologies for that , our vehicle had some mechanical problems , thus we were a bit delayed,
- “Successful exploration” on p18 can also be attributed to not finding any potential economical mineral deposits. Should it not rather say “Positive exploration outcomes on EL8357...)
- Noted sir,
- Why is drone airborne geophysical surveys not considered instead of using an aircraft? Is it not cheaper and less disturbing?
- We will share this comment with our client to see his inputs as to which method will he use fo geophysics survey,
- In my experience pitting and trenching is Invasive Exploration Techniques and should be listed under Exploration phase rather than Prospecting phase. Trenching and pitting are invasive techniques, Kindly see that on page 20 of the ESA report. This is especially true if excavators, jackhammers, etc. will be used and the areas have to be fenced off afterwards because of the risk of injury . Noted sir
- Noted sir
- If excavators, jackhammers, etc. are used for pitting and trenching then the team will also have to be accommodated close to the side. Yes, Fuel will have to be provided and waste managed Noted sir. Should trenching and pitting programs not be managed and fall under the same rules and is the same with drilling programs? Pitting/trenching and drilling are of the same program, the client will choose which method to use for exploration depending on the geophysics of the EPL.
- Where will the geologist and field assistance be accommodated during the mapping, soil sampling and ground geophysical activities?
- The project personnel (prospecting and exploration team) will be accommodated in a campsite, which will consist of tents, caravans and/or make-shift buildings and temporary ablution facilities. This campsite will be set up near the exploration sites on the EPL. **If the accommodation camp is to be set up on a farm, necessary arrangements will be made with the farm/landowner(s).**
- In my view rehabilitation of drill sites and accesses as well as pits and trenches can be done immediately after drilling and sampling has been completed and signed off by the landowner. In other words, it can be done concurrently with the programs. No need to leave it until the entire program has been completed to start with rehabilitation.
- Noted sir, The exploitation team usually rehabilitated the area upon completion of drilling or digging trenches.
- Drilling needs to be done away from existing water boreholes.
- The comment is well-noted.
- The 500m no-go buffer zone for the Swakop River as proposed in your document must be properly enforced. How will this be done?
- We have noted that, There are usually environmental audits that are carried out by an independent consultant to confirm/see if the proponent is complying with the conditions stated in the EMP. The audit report is usually carried out every 6 months after the ECC is issued. This report will be submitted to the Ministry of Environment, Forestry, and Tourism, thus once the proponent is not complying, the ministry can withdraw / Recall the Environmental Clearance Certificate (ECC).
- I suppose this will be a condition in the agreement with the landowner but closing of farm gates should be an important requirement. Noted sir
- On page 88, is the proponent not also under legal obligation of the some “Water Act” when it comes to water extraction especially for diamond core drilling which uses a lot of water? Also when drilling a new water borehole for an exploration camp?
- It's well-noted sir, we will highlight that in our report.

Once more thank you for your inputs, They are highly appreciated,

Many thanks and best regards

Aili

Subject: RE: EPL8357 Environmental Scoping Assessment
Importance: High

Hi Aili,

I reviewed the Draft Environmental Assessment document and below are my comments. Please confirm receipt.

Regards
Dries

- Figure 2 has the farm name Ukuib West for two farms. These are incorrect and confusing and do not match the names of affected farms listed in 1.1. The eastern of the Ukuib West farms in your map is actually Nuwerus while the western Ukuib West is Ja Nee. The cadastre system is also incorrect as it refers to both as Nuwerus 147. See maps below for clarification.

- For the record, we never received a Background Information Document as stated on page iii. Or does this relate to the Public Notice received calling for the Tsaobis meeting on the 9th?
- The meeting on the 9th of August at Tsaobis was poorly attended mainly because the majority of affected landowners were not contacted beforehand. Subject: Fwd: EPL8357 Environmental Scoping Assessment

Good Day Aili,

Our farm neighbor has brought this to our attention, see mail below and attached.

Nobody approached us from your end before, so it's great to know about this, thank you Dries.

Most of this EPL falls within our farmland, and we hereby want to register as a concerned party for any ongoing activities/comments/concerns/issues.

Please include us in the mailing list.

Please note that this EPL is pending ECC approval and we do not allow access to anyone before this milestone has been reached.

Please keep us informed with any further correspondence regarding this EPL.

Kind Regards

Stefan Kleemann

Subject: EPL8357 Environmental Scoping Assessment

To: <swkleemann@gmail.com>

Hi Stefan,

My name is Dries Kruger. My wife phoned you today about the Environmental Scoping Assessment (ESA) that is being done as part of the application process for EPL8357. The applicant has to get an Environmental Clearance Certificate from the government before the EPL is granted. The applied for area does not fall on our farm Nuwerus but I believe it does cover an area of your farm.

I've attached the following:

- The original notice of a public meeting.
- The Scoping Assessment Document for public review
- My email to the environmental consultants doing the study and their answers.

I did go to the proposed meeting but left after waiting more than an hour.

If the application area does cover your farm, I think it is a good idea if you do send them a list of your questions and concerns for them to address. See my questions to them.

We have until 31 Augustus to send comments on the ESA. I will review this weekend and send my comments.

Kind regards

Dries

Subject: RE: Feedback as part of the public consultation process for the proposed Exploration activities on EPL No. 8357 located South of Usakos, Erongo region

Dear Piet,
Thank you for your input,
Kindly note, this input will form part of the appendices for our final submission at MEFT.
Kindest regards
Aili

Subject: Feedback as part of the public consultation process for the proposed Exploration activities on EPL No. 8357 located South of Usakos, Erongo region

Dear Aili,

Thank you very much for including me and my farm manager, Sebiu Mbadje, in the consultation process.

I've read through the draft Environmental Scoping Assessment and Management plan and I have the following feedback:

1. A no-go zone should be established in a 200 meter radius around a site of archeological significance located at the following coordinates: Latitude: -22.387800 and Longitude: 15.573060 with no blasting, drilling or any access allowed.
2. An exclusion zone of 10 meters should be established either side of the remnants of the German narrow gauge railway line from the coordinates Latitude: -22.366935 and Longitude: 15.553080 to the coordinates Latitude: -- 22.371848 and Longitude: 15.542258. This is a site of cultural and historical significance that has the potential to contribute to employment creation through tourism.
3. An exclusion zone of any activity should be established around the concentration of *Vachellia Erioloba* / *Acacia Erioloba* / camel thorn trees located inside the Dorst River that are hundreds of years old. These trees should specifically be mentioned so that they are protected.
4. No fire should be made on the farm and the concession holder will be held liable for any losses caused by veld fires that are started as a result of exploration on the farm.
5. No water point should be accessed the concession holder or his employees to protect the water points from damage by persons who are not trained to operate the equipment there and to prevent the unauthorised persons from injury.
6. In the interest of safety and security as well as biosecurity and to prevent veld fires, I will not allow the concession holder to establish a tented camp on my farm.
7. I will determine the exact route that should be used by the concession holder for any access and exit from the farm and access will only be provided under the direct supervision of my farm manager. This will not necessarily be

the most direct route and no deviation from this route for any reason will be allowed. I will not allow the concession holder or his staff any access from other adjacent farms across the boundary fences between the farms.

8. No person who has been in an area with foot and mouth disease within the preceding 3 weeks is allowed on the farm and it is the concession holder's responsibility to screen his staff for this prior to bringing them onto the farm.

9. The concession holder will be held liable for any losses that can be proven to have been caused by the transfer of any disease by the concession holder and/or his staff to the livestock on the farm.

10. No person with a criminal record or any person who is intoxicated will be allowed on the farm.

11. No rifles or any other weapons are allowed on the farm.

12. The concession holder and his staff are not allowed to bring any plastic bags, poison, pesticide, herbicide, animals, raw meat or any animal material or plant material onto the farm.

13. The concession holder and his staff are not allowed to remove any animals, reptiles, equipment, plants, plant material or animal material from the farm.

14. The concession holder and his staff are required to bring their own drinking water with them and at no time are they allowed to remain within 50m of any pump, borehole, water installation, security installation or building on the farm and no photos should be taken of any structure or installation on the farm.

15. The concession holder and his staff are not allowed to give any instruction to any of the farm workers and should not approach to within 500m of any livestock or dogs on the farm.

16. The normal running of the commercial farm is not to be interrupted or impeded in any way by the exploration on the farm.

17. Any clearing of vegetation for drilling should only be done within a radius of 3m of the hole being drilled. The area is an extremely brittle environment and the clearing of vegetation in a larger area will increase desertification.

Can you please confirm receipt of my feedback and me now if I need to provide any further clarification on these points?

Much appreciated,

Petrus Potgieter

Dear Esteemed Interested and Affected parties,

Following the public consultation meeting that was held at Tsaobis Nature Park (Rest camp) in which some of you participated, I have now compiled an Environmental Scoping Assessment and Management plan with all its appendices for your review. **Kindly send us any comments on or before the 30th of August 2023**

Kindly note we are still busy with the public consultation stage; All comments and concerns regarding this proposed project will be incorporated in the final scoping report before we submit it to the component authorities.

Thank you best regards!
Aili lipinge

Cc: 'EDS Stakeholder Engagement' <public@edsnamibia.com>

Subject: Stakeholder identification for the proposed Exploration activities on EPL No. 8357 located South of Usakos, Erongo region

Dear Esteemed Interested and Affected Parties,

This email serves to inform you that Excel Dynamic Solutions (Pty) Ltd (the consultant) has been appointed by Haifo Mbaka Jr. Shilongo (the proponent) to act on their behalf in obtaining an Environmental Clearance Certificate (ECC)

for the proposed mineral exploration activities on Exclusive Prospecting Licence (EPL) 8357. The project area is located approximately 40 km South of Usakos Town in the Erongo Region.

Mineral prospecting and exploration is one of the listed activities that cannot be undertaken without an Environmental Clearance Certificate (ECC) as per the 2012 Environmental Impact Assessment (EIA) Regulations of the Environmental Management Act No. 7 of 2007. The Proponent, therefore, appointed Excel Dynamic Solutions (Pty) Ltd, an independent Environmental Consultants firm to conduct the required Environmental Scoping Assessment (ESA) process and apply for the ECC.

Furthermore, Section 21 to 24 of the EIA Regulations requires that Public Consultation is undertaken as one of the crucial components of the Environmental Assessment, which involves the pre-identification of potential Interested & Affected Parties (I&APs) or Stakeholders and ongoing registration of new I&APs and subsequent consultation. You have therefore been identified as a potential I&AP for this proposed activity, and the reason you are receiving this communication. Please find the attached Background Information Document (BID) and Site Notice of the proposed exploration activities.

The EPL overlies into Nordenburg, Farm No. 76; Mormor, Farm No. 111; Horebis Nord, Farm No. 61; Dorstrivier Farm No. 15; Marmor – Dorstrivier, Farm No 36 and Nuwerus, Farm No.147 and Excel Dynamic Solutions (Pty) Ltd consultant teams will require permission to access the farm as part of the Environmental and Heritage Assessment upon the public consultation meeting.

Please note that the Public Consultation meeting is scheduled will be shared in due course.

Regards,
