APPENDIX C: EVIDENCE OF PUBLIC CONSULTATION

The following was advertised in the ‘Republikein, Sun, and Allgemeine Zeitung’ newspapers on the 21st September 2020.

Donkerhoekbegs council for toilets

**Health hazard**

Residents claim they've been living without proper toilets for the past 30 years. Donkerhoek informal settlement residents in Khomas want the local council to speed up construction of toilets, the residents have been without toilets since independence in 1990.

The residents said they have been living in unhygienic conditions for years, and they fear an outbreak of a disease as soon as the rains start. One resident, Mavis Nkana, said: "It is unhealthy to use these toilets as they are not connected to the main sewer system."

He added that his family has had to use a plastic bag to contain their waste. He said they are afraid of diseases spreading in the community."

Robust results for Capricorn

**FROM PAGE 1**

The mining group’s results were driven by strong top-line growth as realised revenue increased by 13.3% to R44.2 billion, which represents an increase of 13.3% in constant rand terms. This is ahead of the 11.0% increase in NSE during the period to R49.05 billion in the previous year. However, Capricorn’s share price fell by 5.3% in response to the results announcement.

The group’s adjusted headline earnings increased by 29.3% to R7.1 billion, while adjusted headline earnigns per share increased by 25.2% to R4.00.

On a constant rand basis, adjusted headline earnings increased by 18.6% to R7.1 billion, while adjusted headline earnigns per share increased by 16.6% to R4.00.

The group’s adjusted headearnings margin increased by 4.2 percentage points to 16.5%, while adjusted headline earnigns per share increased by 4.2 percentage points to R4.00.

The group’s adjusted statutory earnings increased by 26.1% to R6.5 billion, while adjusted statutory earnings per share increased by 21.5% to R3.30.

On a constant rand basis, adjusted statutory earnings increased by 30.0% to R6.5 billion, while adjusted statutory earnings per share increased by 26.0% to R3.30.

The group’s adjusted statutory earnings increased by 26.1% to R6.5 billion, while adjusted statutory earnings per share increased by 21.5% to R3.30.

On a constant rand basis, adjusted statutory earnings increased by 30.0% to R6.5 billion, while adjusted statutory earnings per share increased by 26.0% to R3.30.

The group’s adjusted statutory earnings increased by 26.1% to R6.5 billion, while adjusted statutory earnings per share increased by 21.5% to R3.30.

On a constant rand basis, adjusted statutory earnings increased by 30.0% to R6.5 billion, while adjusted statutory earnings per share increased by 26.0% to R3.30.
The following was advertised in the ‘Republikein, Sun, and Allgemeine Zeitung’ newspapers on the 28th September 2020.

The agriculture and forestry sector surged to 47.2 percent in real value added during the second quarter of 2020. (Photo: Manka)

**Easing of fiscal consolidation policy**

Agriculture, ICT, health drives growth

ICT grew due to increased activities in the usage of data and demand surged up for data and calls as workers shifted to working from offices to homes.

The real Gross Domestic Product (GDP) per person was reduced by 0.1 percent during the period under review, compared to a decline of 0.2 percent in the same quarter of 2019.

**Drivers**

Provincial reduction in government expenditure was observed across all sectors of the economy except for agriculture and forestry, ICT and health. The poor performance of the economy was mainly due to the impact of resources that were put in place to combat the spread of the Coronavirus pandemic, NIA said.

The main driver for the improved performance was the increase in value added in agriculture, forestry and-fishing sector surged to 47.2 percent in real value added during the second quarter of 2020, which is a steep contraction of 5.6 percent registered during the same quarter of 2019, NIA added.

The main driver for the improved performance was the increase in value added in agriculture, forestry and-fishing sector surged to 47.2 percent in real value added during the second quarter of 2020, which is a steep contraction of 5.6 percent registered during the same quarter of 2019, NIA added.

**Fiscal consolidation**

NIA said the main drivers for the improvement were the increase in value added in agriculture, forestry and-fishing sector surged to 47.2 percent in real value added during the second quarter of 2020, which is a steep contraction of 5.6 percent registered during the same quarter of 2019, NIA added.

**ICT sector**

ICT sector growth remained flat due to the increased activities in the usage of data as demand surged up for data and calls as workers shifted from working from offices to homes.

NIA noted that ICT services were affected by demand from higher institutions switching from face-to-face teaching to online learning. Automation in the health sector is needed to the easing of the fiscal consolidation policy.

**Agriculture**

The NIA said the main drivers for the improvement were the increase in value added in agriculture, forestry and-fishing sector surged to 47.2 percent in real value added during the second quarter of 2020, which is a steep contraction of 5.6 percent registered during the same quarter of 2019, NIA added.
NOTICE OF ENVIRONMENTAL ASSESSMENT AND PUBLIC PARTICIPATION PROCESS FOR EXPLORATION ACTIVITIES FOR BASE AND RARE METALS AND PRECIOUS METALS, IN THE KHOMAS AND OMAHEKE REGIONS, NAMIBIA

Environmental Compliance Consultancy cc (ECC) hereby gives notice to the public that an application for an environmental clearance certificate in accordance with the Environmental Management Act, No. 7 of 2007 will be made as per the following:

Applicant: Kuiseb Copper Company (Pty) Ltd
Environmental Assessment Practitioner (EAP): Environmental Compliance Consultancy
Location: Khomas and Omaheke regions, Namibia
Project ID: ECC-113 - 309

Proposed activity: The proponent proposes to carry out exploration activities for base and rare metals and precious metals in the Khomas and Omaheke regions in the Gobabis, Witvlei and Doringveld areas, of eastern Namibia. Exploration methods may include an airborne electromagnetic survey (non-invasive, coarse line spacing) and ground truthing, soil and rock-chip sampling, geological mapping and geophysical surveys. Exploration trenching and drilling may occur at a later stage should initial test results appear viable.

Purpose of the review and registration period: The purpose of the review and registration period is to introduce the proposed project and to afford Interested and Affected Parties (I&APs) an opportunity to register and comment on the Non-Technical Summary (NTS) and to ensure that potential issues and concerns are brought forward, captured and considered further in the assessment process.

How you can participate: ECC is undertaking the required environmental assessment and public participation process in terms of the Act. I&APs and stakeholders are required to register for the project at: https://eccenvironmental.com/projects/

Contact: Mr JS Bezuidenhout or Mrs J Mooney
Environmental Compliance Consultancy
Registration Number CC/2013/11404
PO Box 91193, Klein Windhoek

Website: http://www.eccenvironmental.com

Project: Exploration activities on EPLs 7528, 7529, 7530, 7531, 7532, 7533, 7534, 7535, 7536, 7537, 7538, 7539, 7540, 7541, 7542, 7543, 7730, 7731, 7732 for base and rare metals and precious metals in the Khomas and Omaheke regions, Namibia.
Identified Stakeholder and/or Potentially Interested Party for:
Kuiseb Copper Company Exploration Activities

Dear Sir or Madam:

RE: NOTIFICATION OF ENVIRONMENTAL ASSESSMENT FOR EXPLORATION ACTIVITIES FOR BASE AND RARE METALS AND PRECIOUS METALS ON EPLs 7528, 7529, 7530, 7531, 7532, 7533, 7534, 7535, 7536, 7537, 7538, 7539, 7540, 7541, 7542, 7543, 7730, 7731, 7732 IN THE KHOMAS AND OMAHEKE REGIONS, NAMIBIA.

Environmental Compliance Consultancy (ECC) has been engaged by Kuiseb Copper Company (Pty) Ltd (the Proponent) to act on their behalf for the environmental clearance certificate application for the proposed exploration activities for base and rare metals and precious metals on EPLs 7528, 7529, 7530, 7531, 7532, 7533, 7534, 7535, 7536, 7537, 7538, 7539, 7540, 7541, 7542, 7543, 7730, 7731, 7732 in the Khomas and Omaheke regions, Namibia.

ECC is conducting the Environmental Impact Assessment (EIA) in terms of the Environmental Management Act, No. 7 of 2007 and will be submitted to the competent authority and the Ministry of Environment, Forestry and Tourism for a record of decision.

The proposed project is to conduct mineral exploration activities on EPLs 7528, 7529, 7530, 7531, 7532, 7533, 7534, 7535, 7536, 7537, 7538, 7539, 7540, 7541, 7542, 7543, 7730, 7731 and 7732. As part of the proposed exploration project, the following activities are envisaged, which shall be confirmed, as the exploration program is refined:

- Airborne geophysical surveys (non-invasive, coarse line spacing);
- Potential creation of access tracks, where existing tracks cannot be utilised;
- Limited vegetation clearing for the creation of tracks, and survey access; and
- Ground exploration activities may include soil and rock-chip sampling, geological mapping, geophysical surveys, temporary trenching, drilling and drill-core sampling.
This letter is intended to engage stakeholders and potentially Interested and Affected Parties (I&APs) of the project and provide a communication channel to ECC for the project. You have been identified as either a stakeholder, interested or affected party; therefore ECC wishes to inform you of how you can become involved in the project.

Public participation is an important part of the EIA process, as it allows public and stakeholders to obtain information about the proposed project. Public participation occurs at various stages throughout a project lifecycle including:

- Advertising in newspapers;
- Distributing a Non-Technical Summary (NTS) to identified stakeholders and I&APs;
- Registered I&APs will also be informed of the available draft scoping report for a 7-day comment and review period, during this period I&APs will have the opportunity to review the draft document and raise any issues or concerns, and
- Stakeholders and I&APs who wish to register as an I&AP must do so on the ECC website as per the link provided below: https://eccenvironmental.com/projects/

If you are unable to complete the registration form online please email info@eccenvironmental.com and request an electronic copy of the form that you can complete, sign, scan and return via email to info@eccenvironmental.com to register as an I&AP for the project.

ECC values community input and participation in our projects and we look forward to working with you as the project develops.

The NTS can also be obtained from our website and provides a brief overview of the proposed project https://eccenvironmental.com/projects/

Should you have any questions or require additional information please do not hesitate to contact either of us.

Yours sincerely,

Dear Madam/Sir,

On Sunday 11th October 2020, late afternoon, I was informed of a board next to the road (C23) on my farm that wasn't there on Saturday morning. I drove there just to see if it was information of a board next to the road. It was not. I informed you through the board that you attached to the project site.

Kind regards,

Ms Irene Human (12.10.2020)

Response from ECC 13.10.2020

Dear Ms Human,

Thank you for your email. ECC is currently in the Public Participation phase of the assessment, which is to collect the details of direct and indirect affected or interested parties through a variety of means including site notices placed on or along the boundary of the project site. In addition, adverts were published in The Namibian Sun, Republikein, and Allgemeine Zeitung.

ECC recommends that once you have been registered as an I&AP, you can inform us with details of your neighbouring farmers so we can register them and keep them informed throughout the process. In order for us to register them and keep them in the loop, we need to receive your confirmation of their registration. In the meantime, we have registered you as an interested party.

Thank you in advance.

EXPLORATION ACTIVITIES ON EPL 7535
KUISEB COPPER COMPANY (PTY) LTD

DECEMBER 2020
REV 01
PAGE 80 OF 93

Dear Sir/Madam,

I am writing to inform you about the exploration activities that Kuijseb Copper Company Pty Ltd has been undertaking on EPL 7535. These activities were advertised in the local newspapers on the 21st and 28th of September 2020. I want to ensure that you are aware of the notification process for this project.

Until 12 October 2020 would have expired. Herewith, I am complaining about the notification procedure, which is:

- Too late and completely out of order
- Indirect, impersonal, and anonymously
- Potentially interested and affected parties can actually be involved.

The way it was done now creates the impression of deliberate negligence and causes mistrust. I recommend that you get addresses of farmers from the NAU or the different farmer associations to avoid having more people knowing what it is all about and what to do.

I am appealing you to inform the public in a way that potentially interested and affected parties can actually be involved. The way it was done now creates the impression of deliberate negligence and causes mistrust. I recommend that you get addresses of farmers from the NAU or the different farmer associations to avoid having more people knowing what it is all about and what to do.

Thank you in advance.

Kind regards,

Dear Ms. Nangula, As requested, kindly find the attached detailed map, but should you require a map for a specific EPL, kindly let me know. I have also attached KMZ files outlining the borders of the EPLs and the Farm.

Dear Nina, @ ninaboerevereniging@gmail.com, As suggested by Ms. Lüsse I have attached an excel sheet with the farm details, kindly provide me with the email address, contact number, and postal address that you have for the farmers affected by this project.

Should you require any further information, do not hesitate to contact us.
6

Dear Ms. Amwele,

We received the attached information from our Farmer's Union on 15/10/2020.

We need to follow up on your information with members of our association and direct you to the board of the Nina Farmers Association. We are going to inform our members.

Thank you.

Iris Stehn

16.10.2020

7

Dear Mrs. Nangula,

We can't speak for those who are not members of our association and therefore you need to follow up your information with your members.

Thank you.

Iris Stehn

16.10.2020

8

Dear Mrs. Stehn,

We received the attached information for the poorly chosen site location for this sign. We hesitate to contact us.

The board of the Nina Farmers Association decided at yesterday's meeting that we are going to inform our members.

Thank you.

Iris Stehn
In an effort to understand what the implications of this may be, and that by no means are we trying to just be “difficult.” Although I can only speak from my own viewpoint and do not have authorisation to do so on behalf of others, I wish to mention some points:

1. This is the first time that we had any mention of these activities in our area. Apparently, an information sign had been put up at Farm Gum on Farm Gum Sands, about 60km from us at Farm Constance, on a road which we almost never use and therefore we did not see such a sign.

2. If the 21 days since 28/9/2020 is still applicable, then please note that I am particularly concerned, even though most of us have no idea of what the consequences of this operation may be.

3. I also wish to request you to explain to us exactly what this whole operation means, and what are the practical consequences it may have on our land.

4. Please also inform us who the applicant of the prospecting licence is – we need to know what may happen on farmland that is not ours. Our company is not interested in base metals for exploration purposes and therefore the Kuiseb Copper Company is not involved in this operation, but would like as many affected people to see it as we are not in the area, we would like it to be clear.

Response to point 2:

All comments received after the 28th of September are still valid and will be incorporated into the assessment reports. We really value stakeholder input, so we keep these windows open to allow for continued engagement. We would also like to respond to your point on the assessment reports. We are committed to providing regular updates on the project. We welcome feedback on the draft report, and will address any concerns raised by stakeholders.

Response to point 3:

The details of the proposed project will be further explained in the Environmental Impact Assessment (EIA) report to be made available to all the registered stakeholders in due course. We would be willing to have a call with you and your team to discuss the EIA report and answer any questions you may have. Should this be of interest, kindly let me know.

Response to point 4:

Kuiseb Copper Company (Pty) Ltd inJoint venture partnership with Rio Tinto. Kuiseb Copper is a Namibian company with a long history of exploration experience and knowledge. The company is only interested in base metals – copper and silver.
which is our bread and butter.

Kind regards

Hermann Kuschke

Good day Lovisa,

I herewith confirm that I’m acting on behalf of the following property owners:

1. H.S. van der Schyff, Deeds ID FML/00400/00REM, Anaboom (previous owner was P.G. Pretorius);
2. B. Venter, Deed ID FML/00400/00002, Anaboom (previous owner F.G. de Jager);
4. W.P. Michau, Deeds ID FML/00469/00003, Hertzog (previous owner W.S. Michau) and Deeds ID FML/00590, Tunis (previous owner W.S. Michau);

Please register all the above-mentioned parties as relevant I&APs (contact details will follow below).

- H.S. van der Schyff: javvds@gmail.com & schyffies@iway.na

Mr. Jandre van der Schyff (16.10.2020)

Standard acknowledgement email was sent on the 19th October 2020.

Response to point A: As our team use a variety of channels to reach out to, and establish contact with potentially interested or affected parties, some of the tools are more effective than others.

We have access to databases of farm owners, and access a database of farm owners and farmers. This database is our starting point, and we use it to obtain contact details. The information in our database is not updated every year, and we have had to verify this list and amend such details with entities/organisations and individuals on the ground through a public participation process (this is the phase we are currently in).

At ECC our team use a variety of channels to reach out to, and establish contact with potentially interested or affected parties, some of the tools are more effective than others.

At ECC our team use a variety of channels to reach out to, and establish contact with potentially interested or affected parties, some of the tools are more effective than others.
**Response to point C:** Trenching will only become intrusive when the extent of such
activities are more invasive and to
be considered as low-impact. 

As mentioned in the NTS document that activities will be generally low
impact and non-intrusive, but that exploration activities
might be "scaled up" depending on the
exploration findings. Please define "scaled up".

**Response to point B:**

Assist us in reaching the correct people.

We are of the opinion that "temporary trenching" cannot
be considered as low-impact nor non-intrusive.

Note that all the property owner info
information, except that of D.F. du Plessis, is wrong on the excel
spreadsheet indicating the properties
directly affected by the prospecting right.

We are of the opinion that the consultation process is not as
effective as might be expected. Please
explore the communication process and
indicate how ECC will rectify this.

We would appreciate your cooperation with the
provision of up to date contact details of your
members with email addresses so this will enable
us to be in constant contact with your
organization.

6. It is mentioned under paragraph 2.6.2 specific technical tools and equipment to perform this activity. Please indicate how the project is planned to implement this project during the exploration activities, which include surface and groundwater, with the aim of investigating the use of resources, for the successful operation of the farm.

Response to point D: The full spectrum of impacts assessed will be outlined in the environmental impact assessment report that will be made available to all registered I&APs for review and comment in due course. The impacts are developed and assigned mitigation measures as the project progresses and as more information becomes available to us.
Response to point K: The proponent aims to buy the topsoil to resurface the track once drilling is completed. This will always be communicated with the farmer and agreed on, and all relevant permits will be obtained.

Response to point L: The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point M: The proponent will ensure access arrangements will also be formalised and signed between both parties. The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point N: The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point O: The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point P: If water is to be obtained directly from a farm owner’s borehole a signed agreement between the farm owner and the proponent will ensue. Access agreements will also be formalised and signed between both parties, and all relevant permits will be obtained.

Response to point Q: The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point R: The EPLs have been granted by the Ministry of Mines and Energy (MME). Alternatives are predominantly operational and technical alternatives. No new, alternative location is to be considered.

Response to point S: The Environmental Management Plan will contain practical measures to be implemented on site to ensure proper containment structures are in place as well as containment structures are put in place and all relevant permits will be obtained.

Response to point T: If water is to be obtained directly from a farm owner’s borehole a signed agreement between the farm owner and the proponent will ensue. Access agreements will also be formalised and signed between both parties, and all relevant permits will be obtained.

Response to point U: The proponent aims to buy the topsoil to resurface the track once drilling is completed. This will always be communicated with the farmer and agreed on, and all relevant permits will be obtained.
A major concern is the water resource development, and that groundwater might have to be abstracted on the properties for the exploration activities. Please elaborate on how this aspect is planned to be approached in these areas considering that water plays a vital role in the day-to-day farming operations.

L. Please indicate whether there will be any Stakeholder meeting (it is mentioned that it is only a possibility).

Response to point L:
Yes, we certainly intend to have meetings with the stakeholders. An initial meeting was held with the Namibia Agricultural Union on Thursday 22nd October 2020. At this meeting it was resolved that all communication to farm owners should be channeled through their respective farmers unions.

M. Please indicate what the next steps in the process will be and when we can expect any elaborated reports regarding the exploration activities.

Response to point M:
After public participation the reports will be developed which will include all comments received from the public participation phase and incorporated in the draft documentation. The final reports will be developed which will include all comments received from the public participation phase and incorporated in the draft documentation. The final reports will be submitted to the Ministry of Agriculture, Water and Land Reform for approval.

June 2020, Mr. Roelie Venter, Executive Manager, Mr. Roelie Venter, Namibia Agricultural Union

Dear Mrs. Erika von Gierszewski,

Thank you for your email. An appointment has been made with Mr. Venter for this coming Thursday at 10am in Windhoek regarding this. Our office is located in Windhoek and we will meet him there.

Good day,

[signature]

Mrs. Erika von Gierszewski

Response from ECC on 19.10.2020

Regrets

Exploitation activities and extraction plans in the area are subject to approval by the Ministry of Water, Environment and Tourism. Should new boreholes be sunk this will be subject to a water resource development plan that will be subject to a water resource development plan submitted to the Ministry of Water, Environment and Tourism. A water resource evaluation is the water resource assessment report that is prepared for each new borehole and is then submitted to the Ministry of Water, Environment and Tourism.

Good day Lovisa,  

Thank you for elaborating on the concerns located at 1 Jan Jonker Way, Klein Windhoek.
Thank you.

- Hi Lovisa,
  This email only has to do with one property - Ivanhoe, D.F. du Plessis (FML/00092). I've attached a map to this email for your reference. You will notice that the property at hand has a very small part being affected by the PR application (EPL 7543).
  The property owner has asked whether the proponent will consider removing that small part of the PR area from the property, excluding the property from the PR application? The area is ±290ha.
  Looking forward to hearing back from you.

  Regards

Thank you for your feedback Lovisa. We'll wait for the results of the aerial survey then.

  Regards

Jandré van der Schyff

Response from ECC on 23.10.2020

Dear Mr. van der Schyff,
Thank you for your query (as per the attached email).

The license area has been granted by the Ministry of Mines and Energy (MME).

The proposed exploration program will initially include an airborne survey which will then allow the client to zoom in on areas of potential interest. Until the airborne survey work is completed it will be difficult to determine which areas are of interest or not.

We thank you for your understanding, if anything is unclear please do not hesitate to ask.

Thank you.

EXPLORATION ACTIVITIES ON EPL 7535
KUISEB COPPER COMPANY (PTY) LTD

DECEMBER 2020
REV 01
PAGE 91 OF 93

There are numerous farms whose owners are not members of the NAU. However, I think the spelling of some farm names are wrong and thus show as non-members on our member list.

Furthermore I herewith attach a list of the Regional Agricultural Unions and Farmers Association managements for the Khomas and Omaheke regions.

Kind regards
Lester Harker
29.10.2020

Good evening,
Just for clarification on your side, the ECC you send us is not applicable to our farm Grünental as we have an EPL 7029 registered.

Before sending out this information, make sure to reach the correct farm owners in the Omaheke Region.

Kind regards
Wilfried and Sonja Pack
11.11.2020

Response from ECC 23.11.2020

Dear Wilfried and Sonja Pack,

Thank you for your e-mail received on the 11 November 2020. We appreciate your feedback and are sorry for the confusion.

Please accept our apologies for wrongly including you in our email sent out to potentially Interested and Affected Parties (I&APs).

We regret to inform you that you are not within the scope of this project.

You are free to contact us directly at 0811500117.

Kind regards
Mr. Jean Marais
11.11.2020

Response from ECC

Dear Mr. Marais,

Thank you for your email and telephone conversation earlier.

If you are unsure if the farm is within the scope of the project, please call me urgently.

DEAR LESTER,

THANK YOU FOR THE PROMPT RESPONSE.

REGARDS

JEAN MARAIS SC

As per your request to know whether or not your farm De Jager 279 is potentially affected, we can confirm that it is covered over by EPL 7534. However, your farm does not fall within the area of interest delineated for the exploration project. Please do not hesitate to contact me should you require any further assistance.

And
