

A large, dark-colored water buffalo stands in a shallow body of water, possibly a pond or a slow-moving river. The buffalo has thick, dark skin and large, curved horns. It is facing the camera, and its reflection is visible in the water. The background shows some greenery and a clear sky.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen	Estimate	Wildlife Status		
			Count Trend	National Guideline	Desired Number
B. Zebra					
Duiker					
Elephant					
Giraffe					
Impala					
Kudu					
Roan					
Sable					
Steenbok					
Warthog					

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Wildlife introductions

Wildlife mortalities

Annual rainfall

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

Predator monitoring

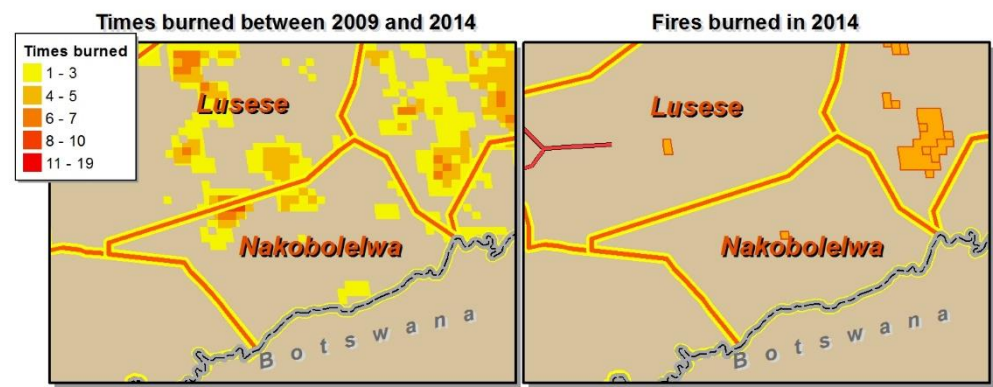

charts show the average number of animals seen per Event Book each year
status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.
