Conservancy Status Summary & Natural Resource Report

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014 the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 374,200

Two of the most significant returns for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- ✓employment to conservancy residents

Conservancy	N\$		
Employment	Private Sector	21 staff	N\$ 368,600
	Conservancy	2 staff	N\$ 38,750

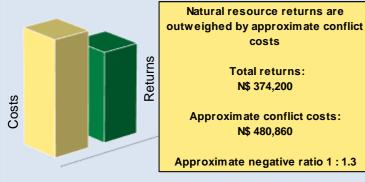

Cost of natural resource conflicts in 2014

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 384,270	
Estimated poached high value species loss	N\$ 96,590	
Total conflict cost estimate	N\$ 480,860	

Natural resource cost-return ratio in 2014

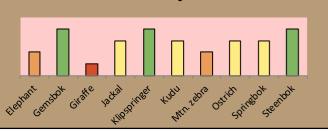

the chart shows the approximate ratio of returns to costs

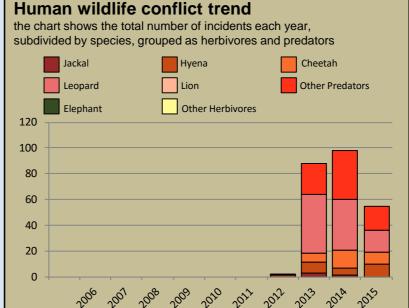

Management performance in 2015

Category	Performance			
1 Adequate staffing				
2 Adequate expenditure				
3 Audit attendance				
4 NR management plan				
5 Zonation				
6 Leadership				
7 Display of material				
8 Event Book modules				
9 Event Book quality				
10 Compliance				
11 Game census				
12 Reporting & adaptive m/ment				
13 Law enforcement				
14 Human Wildlife Conflict				
15 Harvesting management				
16 Sources of NR income				
17 Benefits produced				
18 Resource trends				
19 Resource targets				

Wildlife status summary in 2015

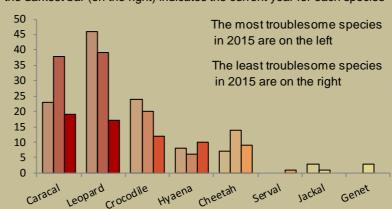

Human wildlife conflict

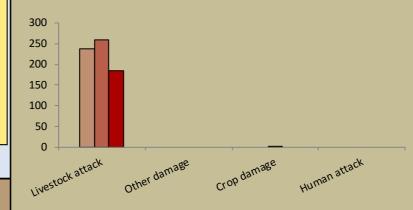

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

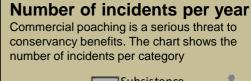

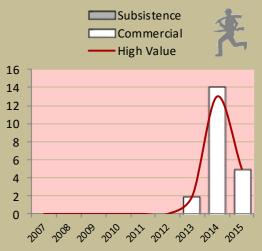

Type of damage by problem animals 2013-2015

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

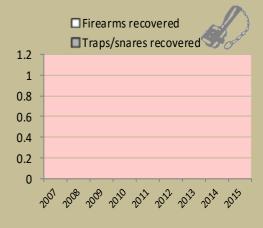

Poaching

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals - quota use and value

Species Total Trophy Other Use Trophy Own Use & Shoot & Capture Sell & Sale Animal Use Trophy Value N\$ Other use Value N\$			Quota 201	15	Animals actually used in 2015		- Potential	Potential		
Cheetah 1 1 9,450 Duiker 2 2 1,916 B-f Impala 5 5 8,939 Kudu 15 5 10 5,491 2,580 Leopard 1 1 51,080 51,080 Steenbok 5 5 1,532 51,080 51,080	Species	Total	Trophy	Other Use	Trophy	&			Trophy	Other use
Duiker 2 2 1,916 B-f Impala 5 5 8,939 Kudu 15 5 10 5,491 2,580 Leopard 1 1 51,080 51,080 Steenbok 5 5 1,532	Baboon	5	5						383

Leopard 1 1 51,080 Steenbok 5 5 1,532	B-f Impala	5	5						8,939	
Steenbok 5 5 1,532	Kudu	15	5	10					5,491	2,580
	Leopard	1	1						51,080	
Mtn Zebra 5 5 5 5 5,108	Steenbok	5	5						1,532	
	Mtn Zebra	5	5						5,108	

Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species
- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

weak/bad reasonable good

Management performance & other data

Success/threat flags

success/ benefit created

weakness/

action needed

Conservancies reduce environmental costs while increasing environmental returns.

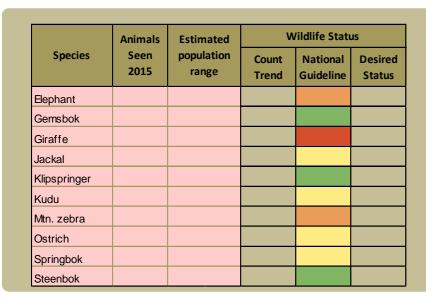

Returns from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Wildlife Status

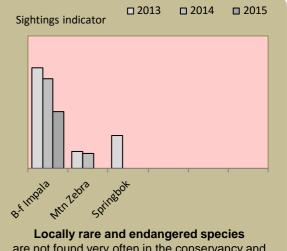

Count trend - gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

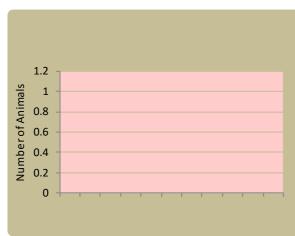

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) – there should be more than double; dark orange (very rare) – there should be more than triple; red (extinct) - the species needs to be reintroduced.

Locally rare species

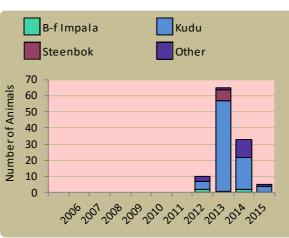

are not found very often in the conservancy and need special conservation attention.

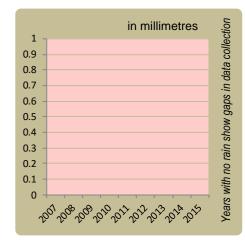

Wildlife introductions

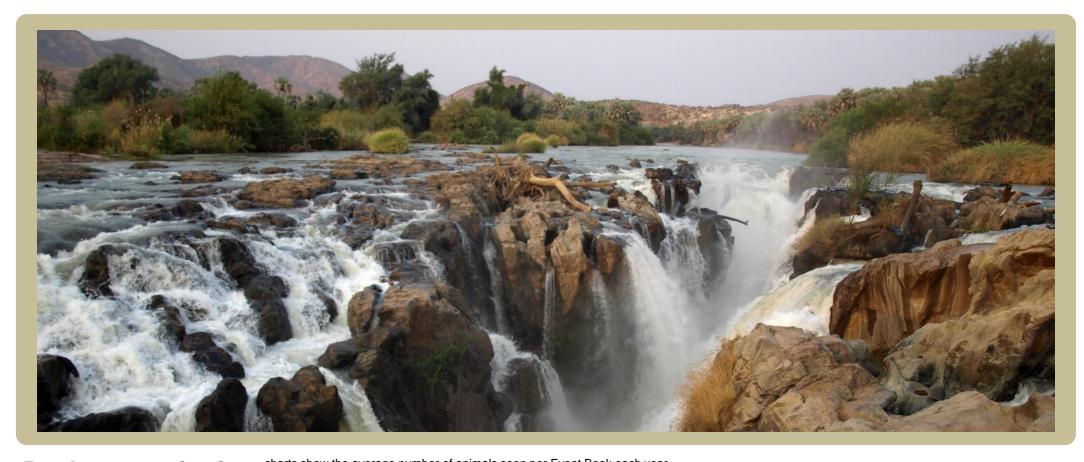

Wildlife mortalities

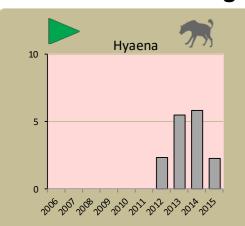

Annual rainfall

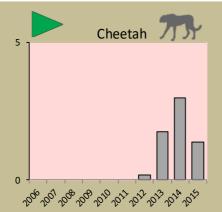

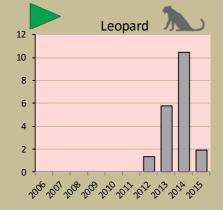

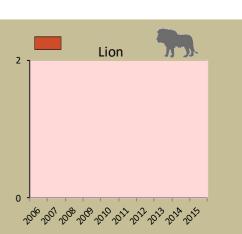

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

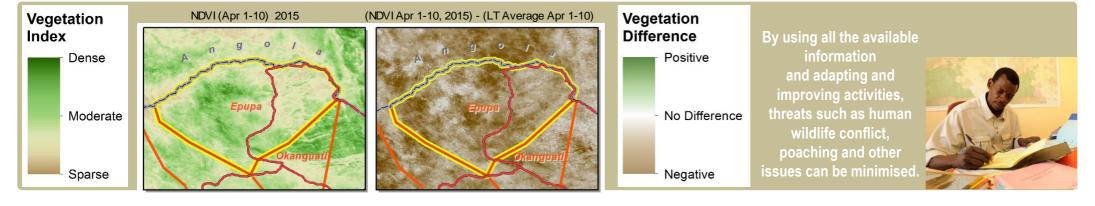

Vegetation monitoring Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the current year and the 10 year average (2001-2010)

Epupa Institutional Report

Benefits

Benefits		

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan				All well done according to the plan.
Zonation Plan				Zonation area is not GPSed and mapped yet.
Natural Resource Plan				We don't haverst our NR and don't have proper control in place.
Human Wildlife Conflict Plan				We still lost livestock due to predators
Tourism Plan				We need our own campsite and a PH.
Sustainable Financial Plan				We report back to the community on monies received.
Benefit Distribution Plan				We didn't hunt game to distribute money to community in 2015
Staff Plan				We don't have staff contracts
Assets Plan				It does not work we don't have assets
HIV/AIDS Plan				We always teach people on HIV/AIDS
Communication Plan				Our way of communication is very effective.
