maximising wildlife returns by minimising threats...

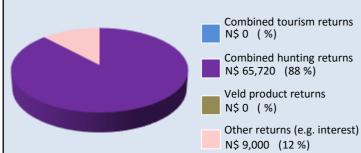

Conservancy status summary

Returns from natural resources in 2014

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 74,720

15

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ employment to conservancy residents

Total conflict cost estimate

Conservancy	N\$ 74,720		
	Private Sector		
Employment	Conservancy	4 staff	N\$ 30,040

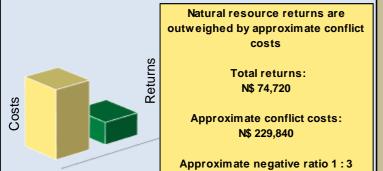

Cost of natural resource conflicts in 2014

e	estimates are based on average national values				
	Estimated human wildlife conflict cost	N\$ 222,410			
	Estimated poached high value species loss	N\$ 7,430			

N\$ 229,840

Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

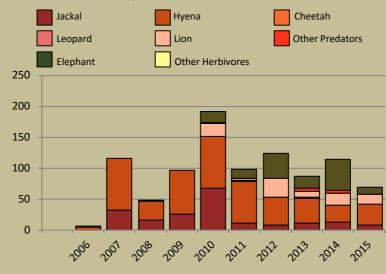

Management performance in 2015

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census

19 Resource targets	

Human wildlife conflict

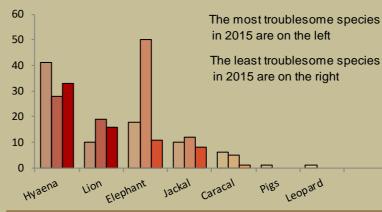

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

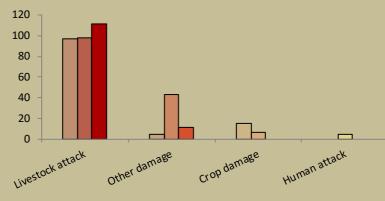

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2013-2015

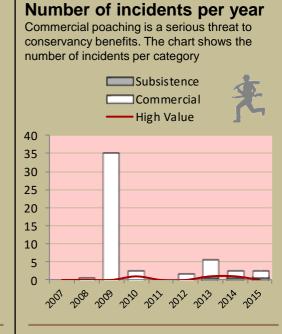

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

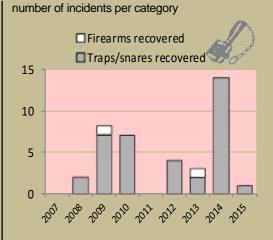

Wildlife removals - quota use and value

		Quota 201	15	Animals actually used in 2015						Potential	Potential	
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$	
Hyaena	4	4								5,746		
Jackal	4	4								128		
Lion	1	1								153,240		
Springbok	85	5	80	3	10	53			66	2,937	520	
Wildebeest	5	5		3					3	5,108		

Poaching

Traps and firearms recovered

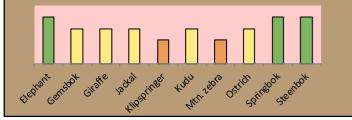

Arrests and convictions

number of incidents per category

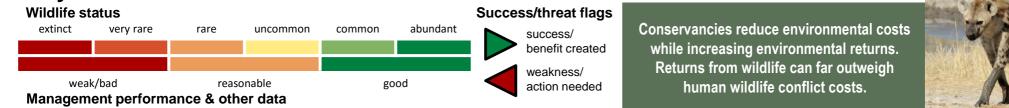

Wildlife status summary in 2015

Potential value estimates (N\$) for species are based on:

- · Potential trophy value the average trophy value for that species in the conservancy landscape
 - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- · Potential other use value the average meat value for common species
- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

	Animals	Estimated	Wildlife Status			
Species	Seen 2015	population range	Count Trend	National Guideline	Desired Status	
Elephant	5					
Gemsbok						
Giraffe						
Jackal	2					
Klipspringer						
Kudu						
Mtn. zebra						
Ostrich						
Springbok	235	894 - 1380				
Steenbok	2	7 - 80				

Wildlife Status

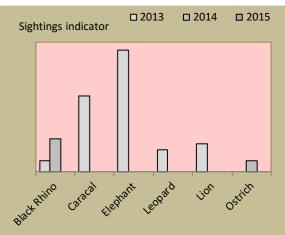

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

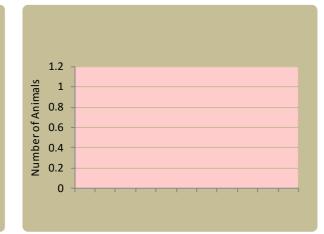

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

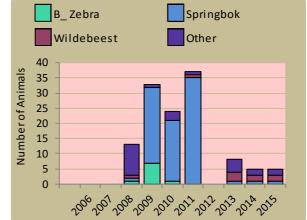

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

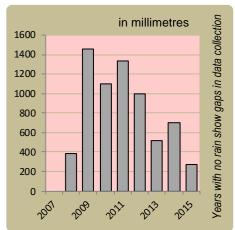

Wildlife introductions

Wildlife mortalities

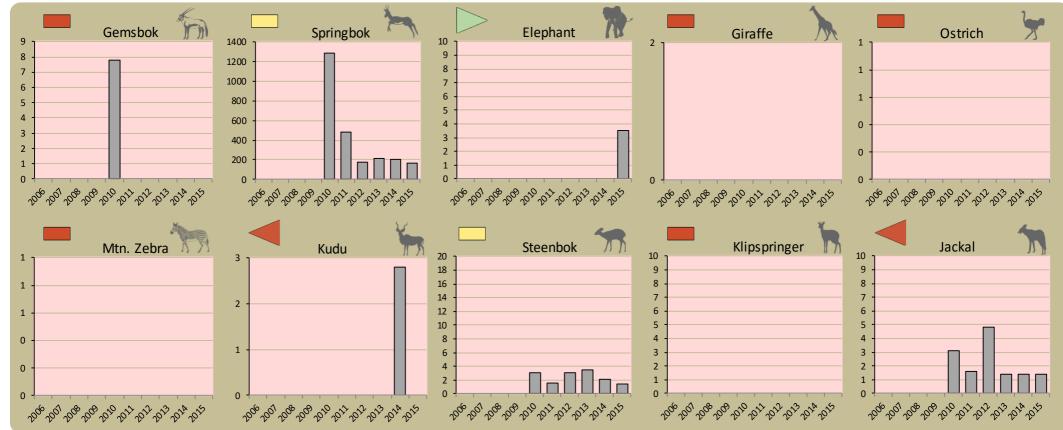

Annual rainfall

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan				We managed to implement all the planned activities
Zonation Plan				Use did not cover all the activities
Natural Resource Plan				We do not have NR plan in place though we carry out activities.
Human Wildlife Conflict Plan				We implemented most of the planned activities.
Tourism Plan				We managed to carry out a lot of activities.
Sustainable Financial Plan				We could not account for all funds received.
Benefit Distribution Plan				We managed to distribute various benefits to members.
Staff Plan				We do not have a plan and did not carry out all activities.
Assets Plan				We don't have a plan and a store room to keep assets.
HIV/AIDS Plan				We don't have any plan in place and no activities implemented.
Communication Plan				We don't have a plan that can guide us.
