

### maximising wildlife returns by minimising threats...

#### Conservancy status summary

##### Returns from natural resources in 2014

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 3,846,100

##### Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy income	N\$ 1,358,390
--------------------	---------------

Employment	Private Sector	72 staff	N\$ 2,380,210
	Conservancy	10 staff	N\$ 390,380

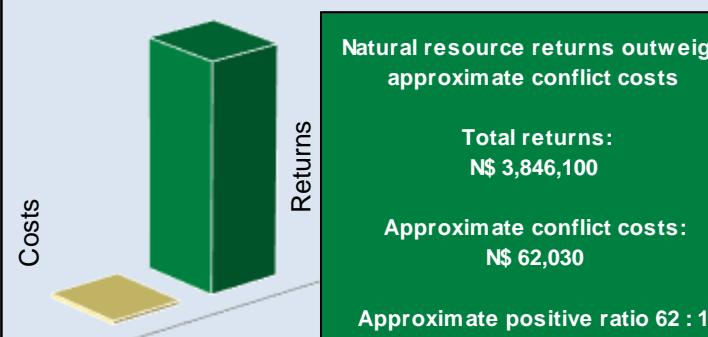

##### Cost of natural resource conflicts in 2014

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 62,030
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 62,030

##### Natural resource cost-return ratio in 2014

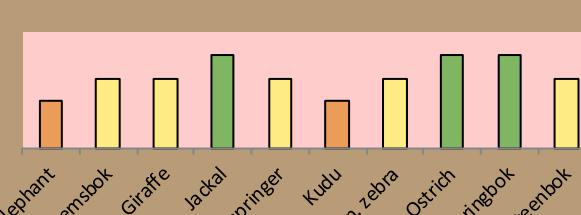

the chart shows the approximate ratio of returns to costs

#### Management performance in 2015

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive m/ment	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

#### Wildlife status summary in 2015

#### Key to the status barometer

##### Wildlife status

extinct very rare rare uncommon common abundant

weak/bad reasonable good

##### Success/threat flags

success/benefit created  
weakness/action needed

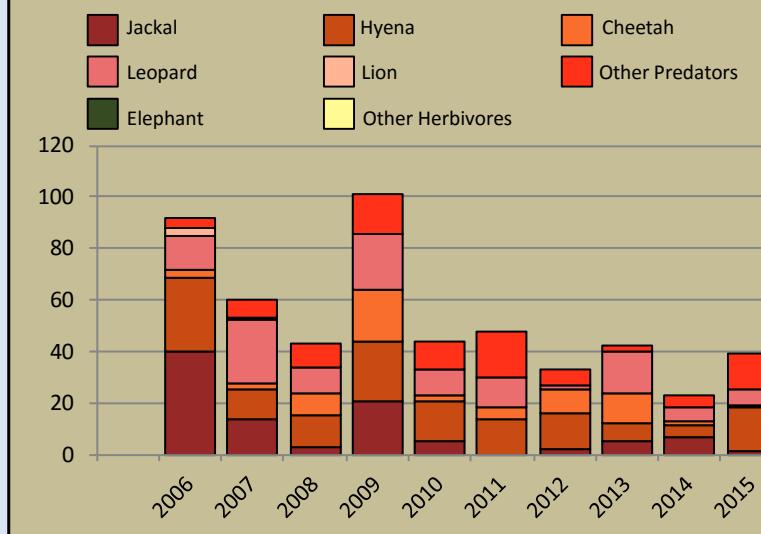

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

#### Human wildlife conflict

##### Human wildlife conflict trend

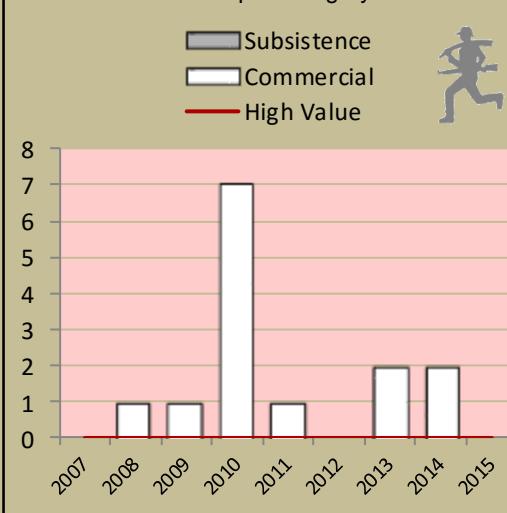

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

#### Poaching

##### Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

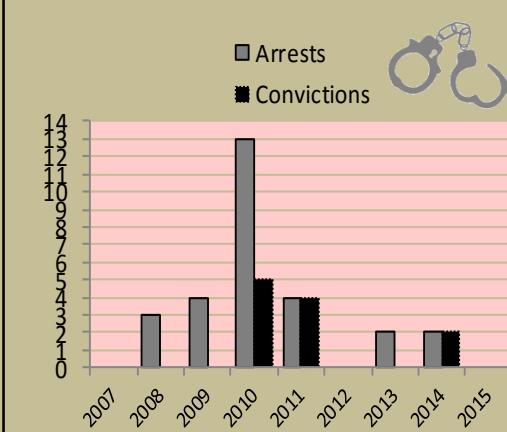

#### Traps and firearms recovered

number of incidents per category

#### Arrests and convictions

number of incidents per category

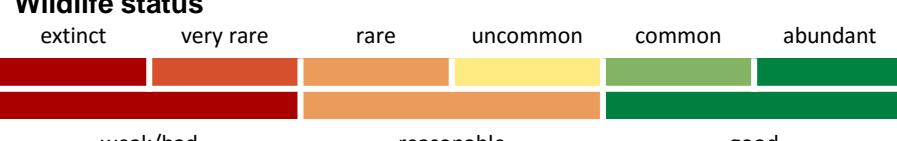

#### Wildlife removals – quota use and value

Species	Quota 2015				Animals actually used in 2015					Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Cheetah	1	1								9,450	
Crocodile	1	1								19,155	
Gemsbok	45	20	25		2	1			3	4,725	2,160
Jackal	4	4								128	
Leopard	1	1								51,080	
Ostrich	18	10	8							1,277	600
Springbok	70	15	55		14				14	2,937	520
Steenbok	2	2								1,532	
Mtn Zebra	12	10	2							5,108	3,320

Potential value estimates (N\$) for species are based on:

- Potential trophy value - the average trophy value for that species in the conservancy landscape
  - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value - the average meat value for common species
  - the average live sale value of each high value species (indicated with an \*)[high value species are never used for meat]

#### Management performance & other data

# monitoring numbers and trends for a healthy conservancy...

## Current wildlife numbers and status

Species	Animals Seen 2015	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant					
Gemsbok	256	1346 - 2140			
Giraffe	1				
Jackal	4				
Klipspringer					
Kudu					
Mtn. zebra	6	47 - 60			
Ostrich	64	267 - 510			
Springbok	186	1154 - 2640			
Steenbok					

### Wildlife Status

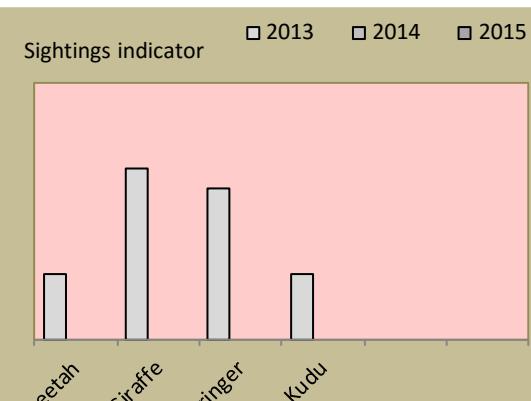

**Count trend** – gives the species status in the conservancy based on game count trend data.

**National guideline** – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

**Desired number** – gives the species status in the conservancy based on what the conservancy would like to have.

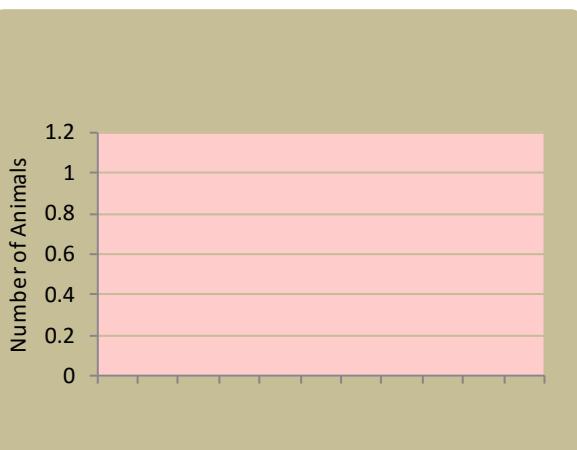

**dark green** (abundant) – there should be less;  
**light green** (common) – the desired number is reached;  
**yellow** (uncommon) – there should be more;  
**light orange** (rare) – there should be more than double;  
**dark orange** (very rare) – there should be more than triple;  
**red** (extinct) – the species needs to be reintroduced.

## Locally rare species

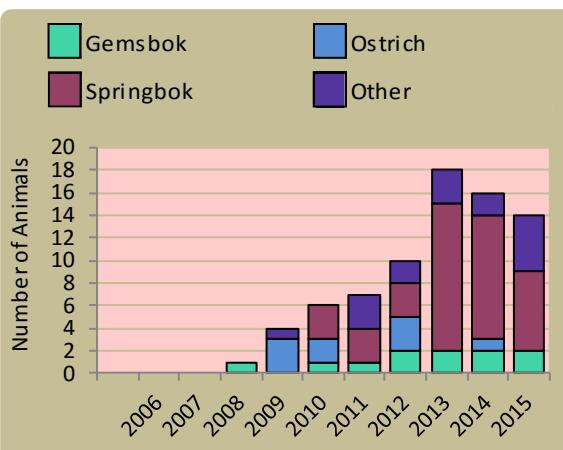

**Locally rare and endangered species** are not found very often in the conservancy and need special conservation attention.

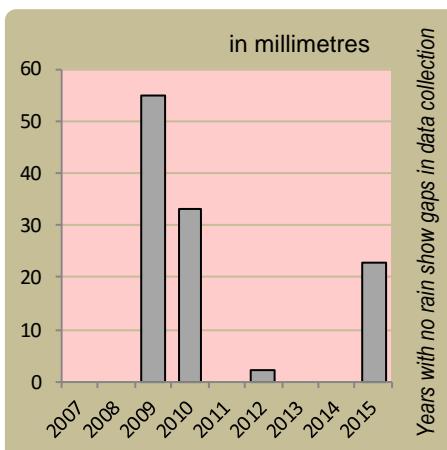

## Wildlife introductions

## Wildlife mortalities

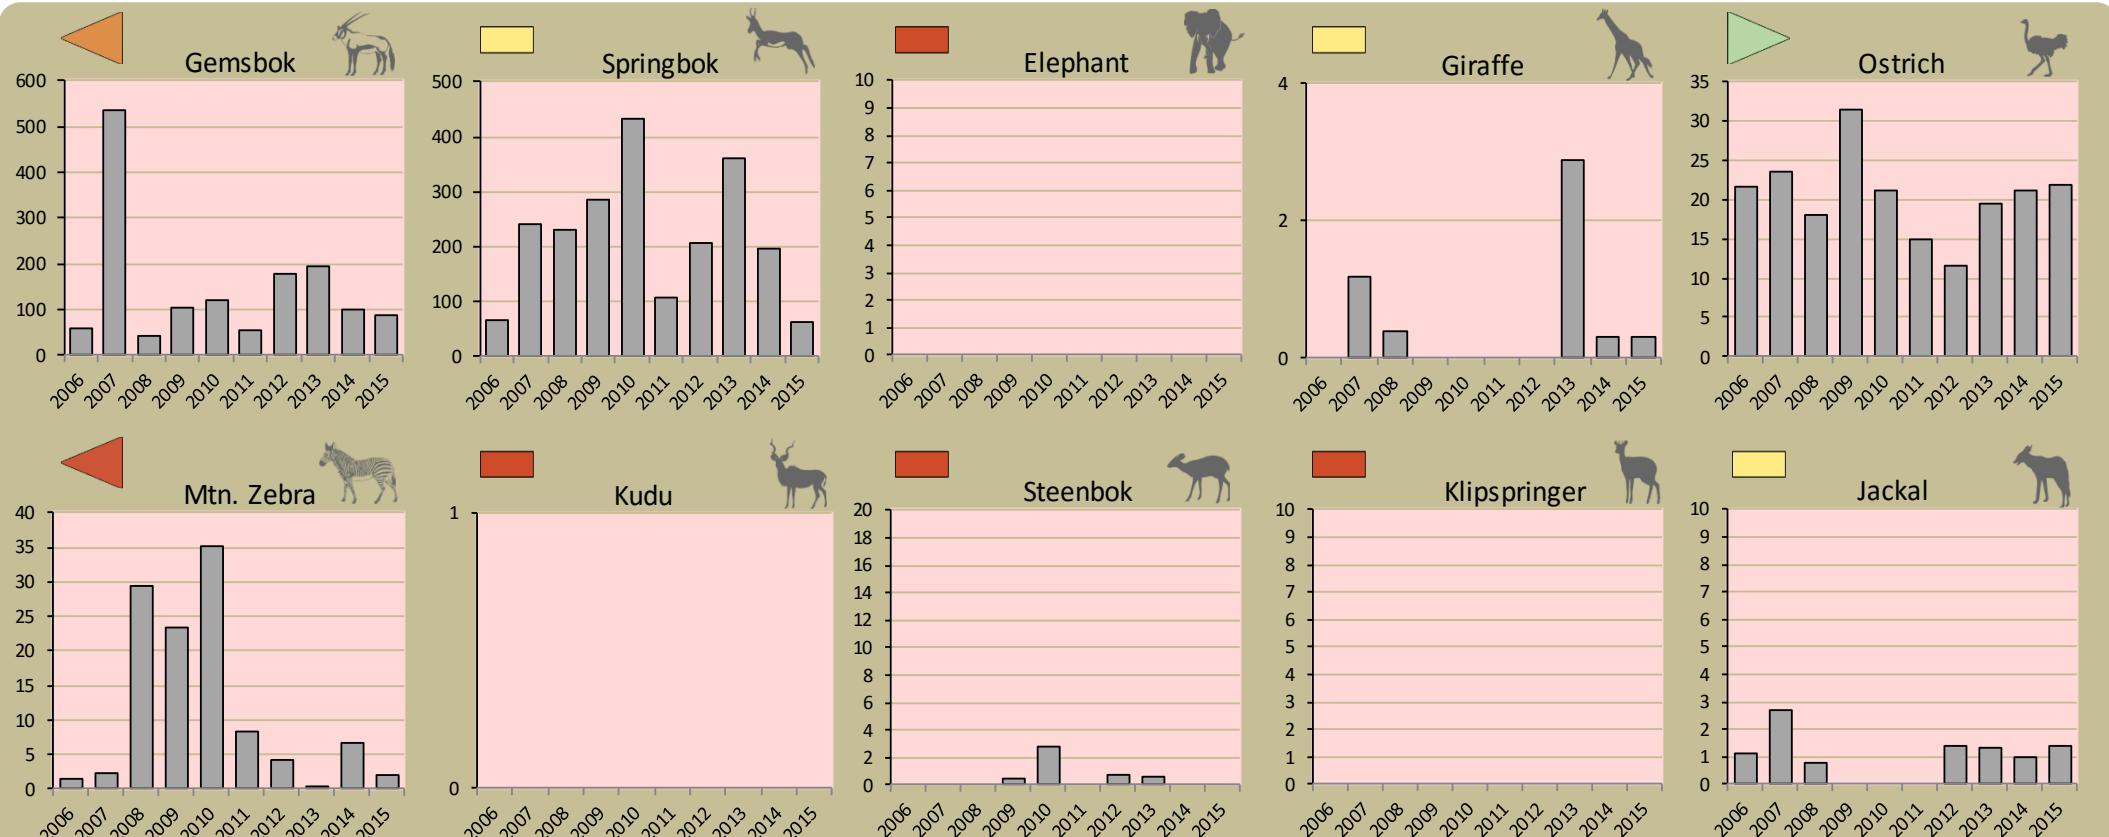

## Annual rainfall

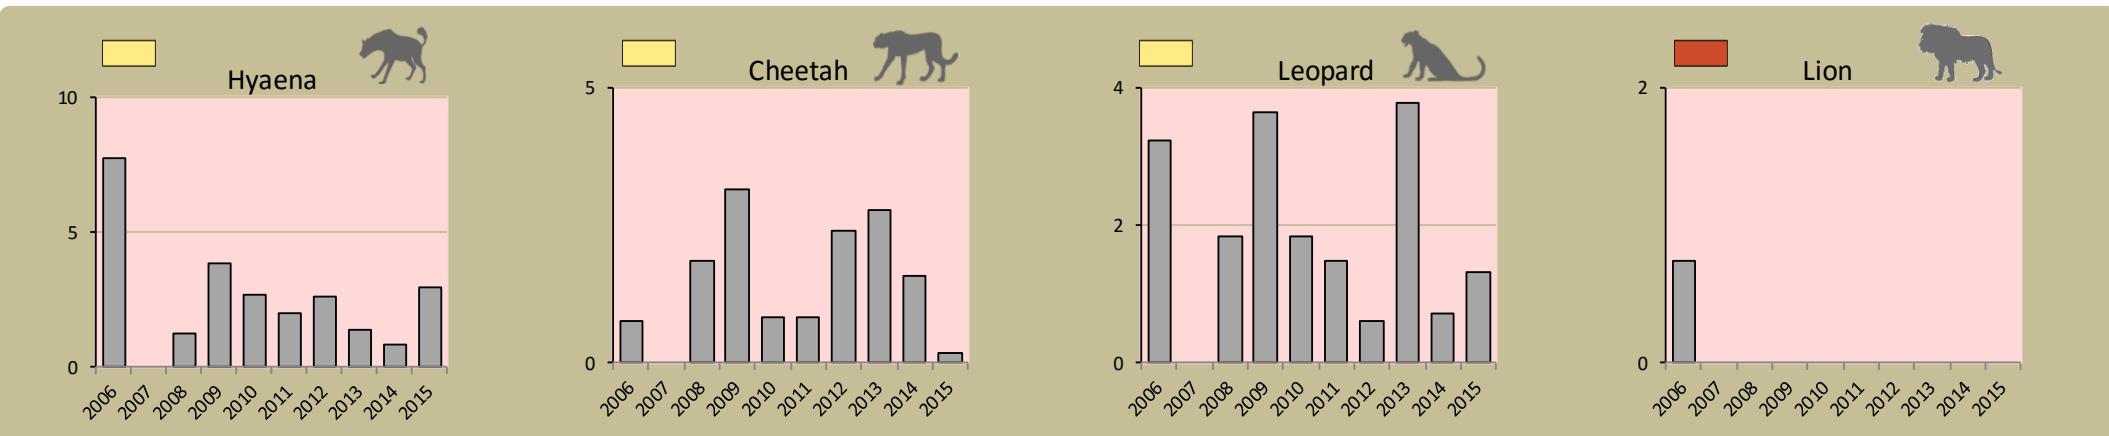

## Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

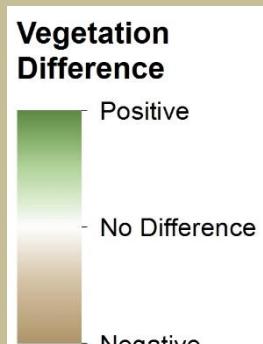

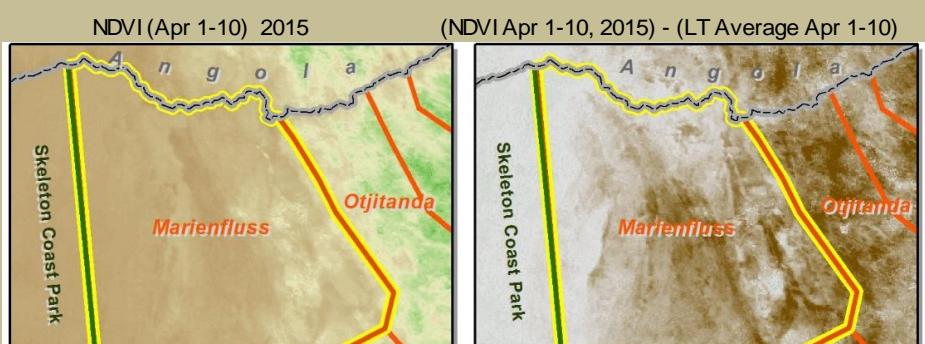

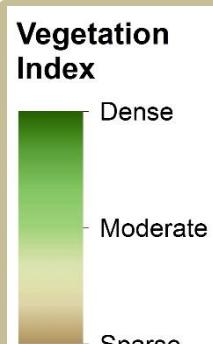

## Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

## Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the current year and the difference between the current year and the 10 year average (2001-2010)

By using all the available information and adapting and improving activities, threats such as human-wildlife conflict, poaching and other issues can be minimised.

### Enabling wise conservancy governance...

#### Conservancy statistics

<b>Date Registered:</b>	January 2001
<b>Members:</b>	185
<b>Size (square kilometres):</b>	3034

#### Constitutional adherence

Approved constitution	✗
AGM held	✓
Management and utilisation plan	✗
Financial annual report approved at AGM	✓
Financial report external review	✓
Benefit distribution plan	✗

#### Conservancy Governance

<b>Number of management committee members:</b>	9
<b>Date of last AGM:</b>	Tue, December 1, 2015
<b>Attendance at AGM:</b>	Men: 50; Women: 46
<b>Date of next AGM:</b>	Sat, October 1, 2016
<b>Other important issues</b>	
Financial report approved?	✓
Budget approved?	✓
Work plan approved?	✓

#### Employment

<b>Conservancy staff: Male</b>	10
Female	6
<b>Community game guards:</b>	6
<b>Community resource monitors:</b>	0
<b>Lodge staff: Male</b>	0
Female	0

#### Benefits

#### Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?
