

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 1,304,710

- Combined tourism returns N\$ 936,800 (72%)
- Combined hunting returns N\$ 211,100 (16%)
- Veld product returns N\$ 0 (%)
- Other returns (e.g. interest) N\$ 156,810 (12%)

Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy income	N\$ 602,980
--------------------	-------------

Employment	Private Sector	20 staff	N\$ 409,640
	Conservancy	21 staff	N\$ 228,800

Cost of natural resource conflicts in 2014

estimates are based on average national values

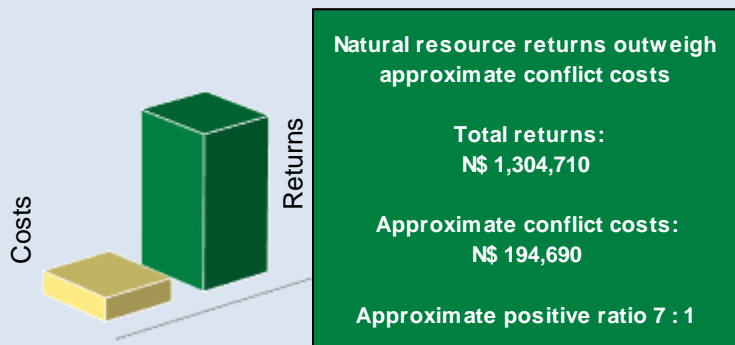

Estimated human wildlife conflict cost	N\$ 164,970
--	-------------

Estimated poached high value species loss	N\$ 29,720
---	------------

Total conflict cost estimate	N\$ 194,690
-------------------------------------	--------------------

Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

Management performance in 2015

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Good
4 NR management plan	Good
5 Zonation	Good
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Good
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Weak
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak
19 Resource targets	Good

Wildlife status summary in 2015

Key to the status barometer

Wildlife status

extinct very rare rare uncommon common abundant

Management performance & other data

weak/bad reasonable good

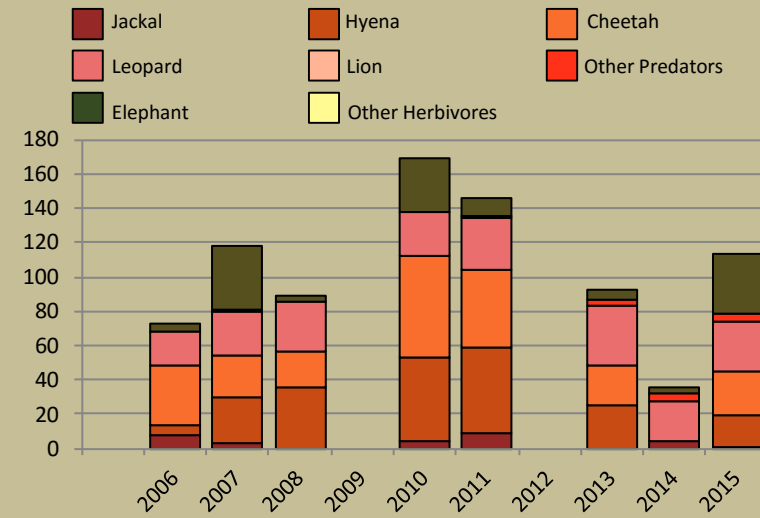

Success/threat flags

- Green triangle: success/benefit created
- Red triangle: weakness/action needed

Human wildlife conflict

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2013-2015

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2015			Animals actually used in 2015						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Baboon	5	5		1					1	383	
Cheetah	1	1								9,450	
Eland	2	2								8,300	
Gemsbok	20	15	5	9	3				12	4,725	2,160
Giraffe	3	1	2		1				2	10,854	11,200
Hyaena	1	1								5,746	
B-f Impala	2	2								8,939	
Jackal	5	5		2					2	128	
Klipspringer	2	2								4,980	
Kudu	4	4		4					4	5,491	
Leopard	1	1		1					1	51,080	
Ostrich	10	8	2							1,277	600
Springbok	70	35	35	17	31				51	2,937	520
Steenbok	2	2								1,532	
Mtn Zebra	30	25	5	17	5				22	5,108	3,320

Potential value estimates (N\$) for species are based on:

- **Potential trophy value** - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- **Potential other use value** - the average meat value for common species - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2015	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Dark Orange	Yellow	
Gemsbok	24	104 - 160	Yellow	Green	
Giraffe	59	108 - 160	Dark Green	Yellow	
Jackal	5		Green	Green	
Klipspringer			Dark Orange	Green	
Kudu			Dark Orange	Yellow	
Mtn. zebra	25	104 - 130	Orange	Green	
Ostrich	12	49 - 90	Dark Orange	Green	
Springbok	643	2659 - 6090	Green	Green	
Steenbok	6	23 - 280	Yellow	Green	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

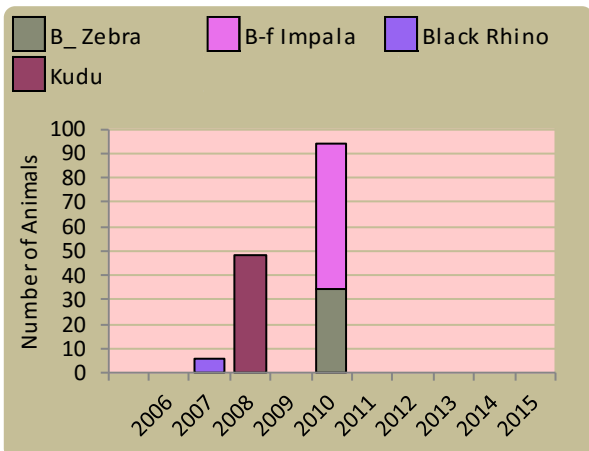

Locally rare species

Sightings indicator □ 2013 □ 2014 □ 2015

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

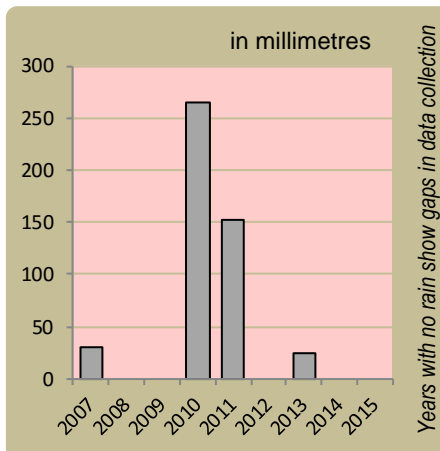

Wildlife introductions

Wildlife mortalities

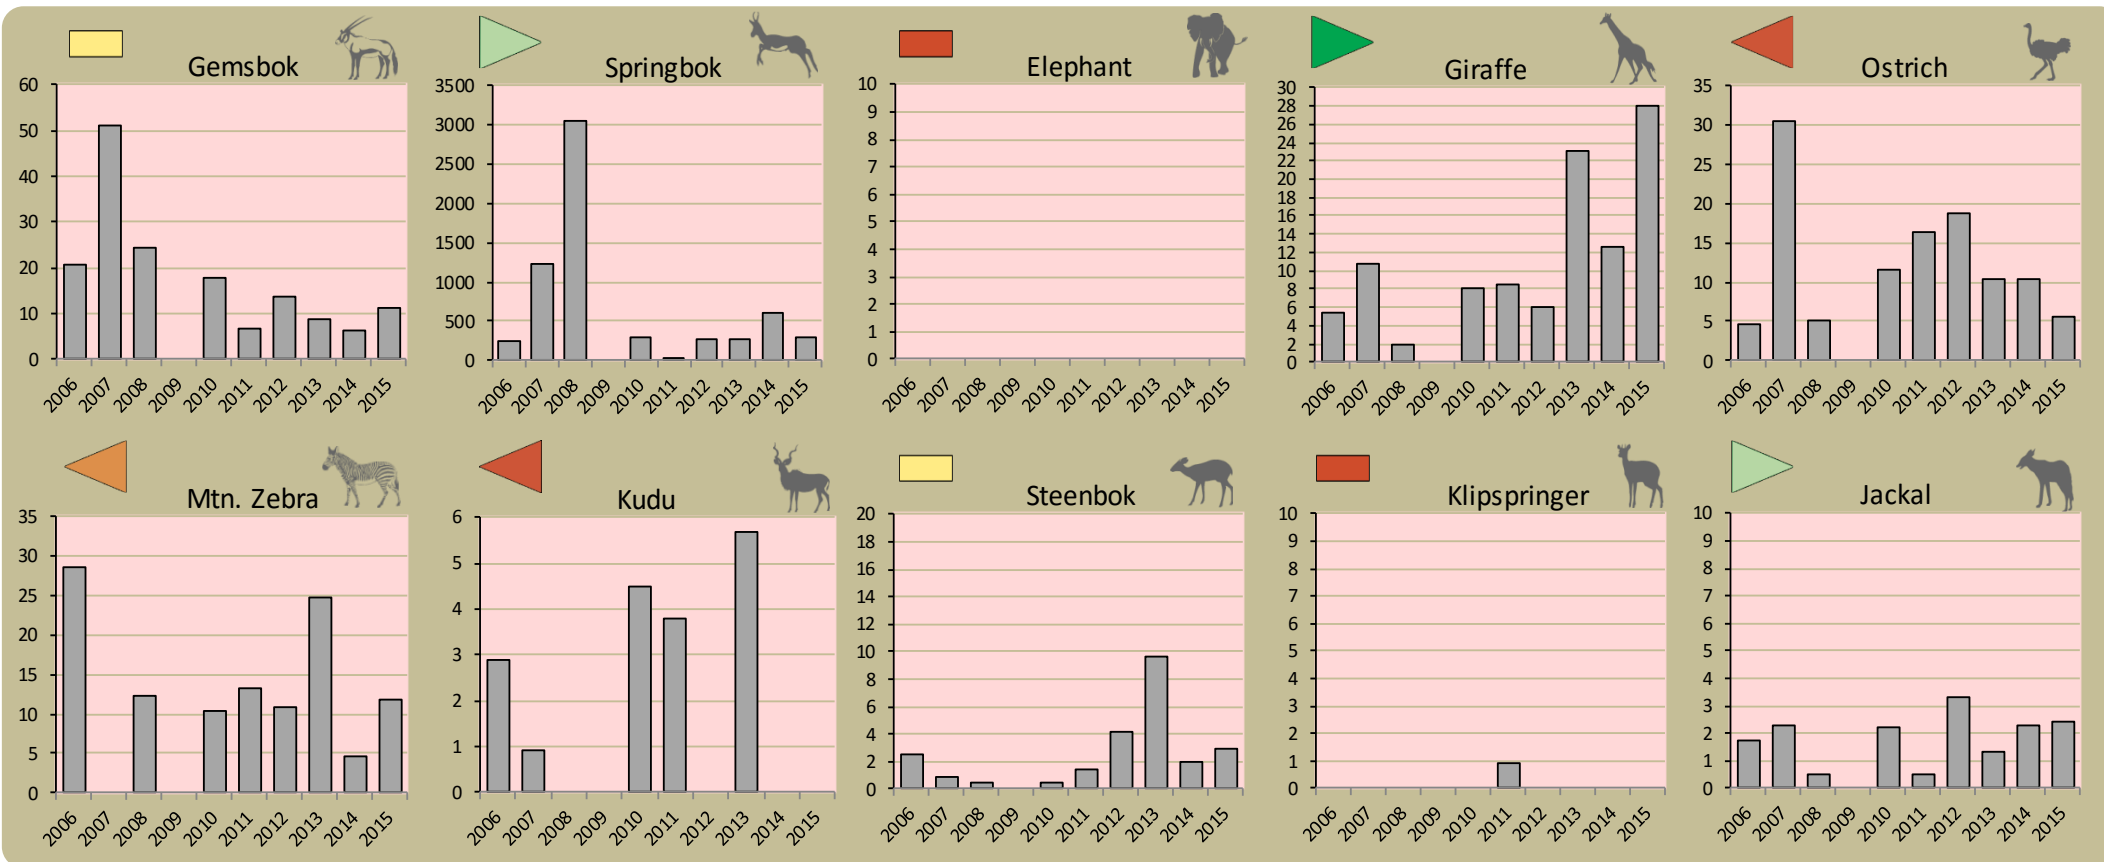

Annual rainfall

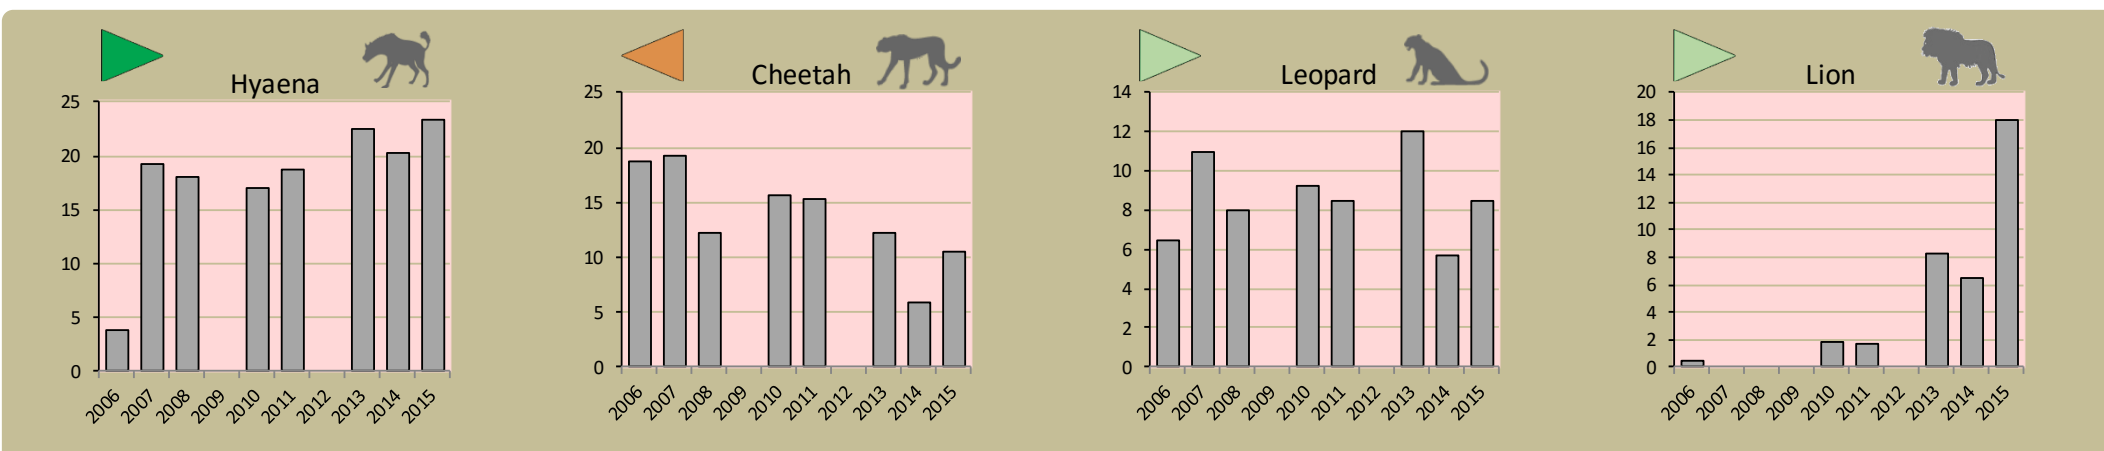

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

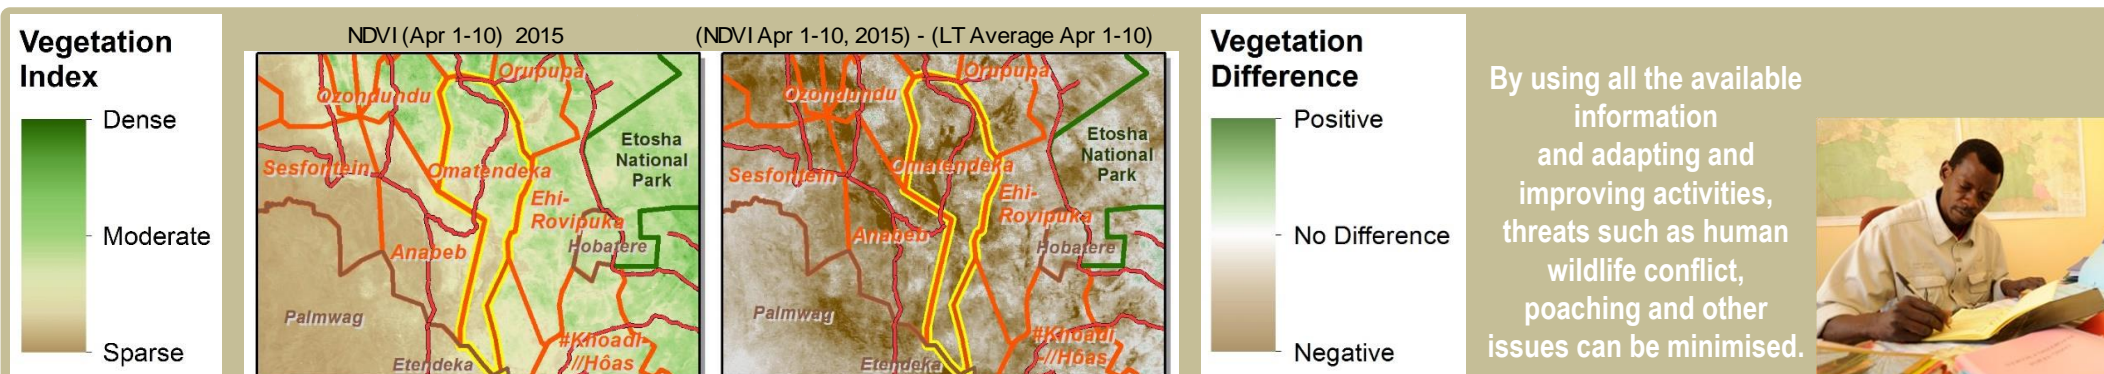

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the current year and the difference between the current year and the 10 year average (2001-2010)

Conservancy staff: Male	3
Female	1
Community game guards:	7
Community resource monitors:	2
Lodge staff: Male	0
Female	0

Benefits

School Builders
Police
Meat Distribution
Meat - Otjikauko Royal House

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan				GUMP was partially implemented due to members who don't stick to our workplan. Other activities such as game count anti-poaching were carried out.
Zonation Plan				Most of the planned activities were completed. People were removed from wildlife zones.
Natural Resource Plan				
Human Wildlife Conflict Plan				Most of our actions are theory based. We did not take practical action such as building strong kraals for our farms.
Tourism Plan				
Sustainable Financial Plan				
Benefit Distribution Plan				
Staff Plan				All our staff know their work and are well informed.
Assets Plan				
HIV/AIDS Plan				The whole conservancy is not covered due to manpower. Requested the ministry of health to give us a permanent staff to counsel our people.
Communication Plan				Our communication sometimes is negatively affected by the lack of radio coverage and cell network.
