

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 41,630

Two of the most significant returns for the conservancy:
 ✓ cash income to the conservancy to cover running costs and invest in developments
 ✓ employment to conservancy residents

Conservancy income		N\$ 41,630
Employment	Private Sector	
	Conservancy	1 staff N\$ 25,740

Cost of natural resource conflicts in 2014

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 53,920
Estimated poached high value species loss	N\$ 7,430
Total conflict cost estimate	N\$ 61,350

Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

Management performance in 2015

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Good
4 NR management plan	Weak
5 Zonation	Weak
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Good
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Good
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak
19 Resource targets	Good

Wildlife status summary in 2015

Key to the status barometer

Human wildlife conflict

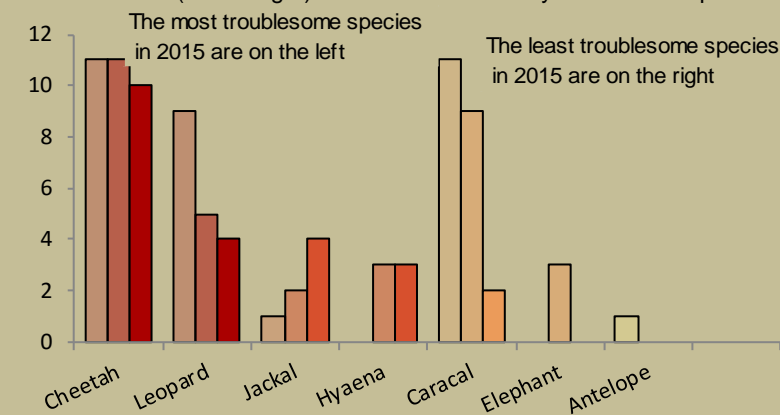

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2013-2015

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2015			Animals actually used in 2015					Potential Trophy Value N\$	Potential Other use Value N\$	
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal			Total Use
Baboon	5	5								383	
Caracal	1	1								2,554	
Cheetah	1	1								9,450	
Duiker	2	2								1,916	
Gemsbok	2	2								4,725	
Jackal	5	5								128	
Klipspringer	1	1								4,980	
Kudu	15	5	10		7				7	5,491	2,580
Leopard	1	1								51,080	
Ostrich	8	2	6		1				1	1,277	600
Springbok	30	10	20		14				14	2,937	520
Steenbok	3	3								1,532	
Mtn Zebra	10	5	5							5,108	3,320

Potential value estimates (N\$) for species are based on:

- **Potential trophy value** - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- **Potential other use value** - the average meat value for common species - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2015	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Dark Orange	Yellow	
Gemsbok			Dark Orange	Green	
Giraffe			Dark Orange	Yellow	
Jackal			Dark Orange	Green	
Klipspringer			Dark Orange	Green	
Kudu	7	11 - 20	Dark Green	Yellow	
Mtn. zebra			Dark Orange	Green	
Ostrich	16	25 - 50	Light Green	Green	
Springbok	156	239 - 550	Yellow	Green	
Steenbok	3	5 - 60	Dark Orange	Green	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

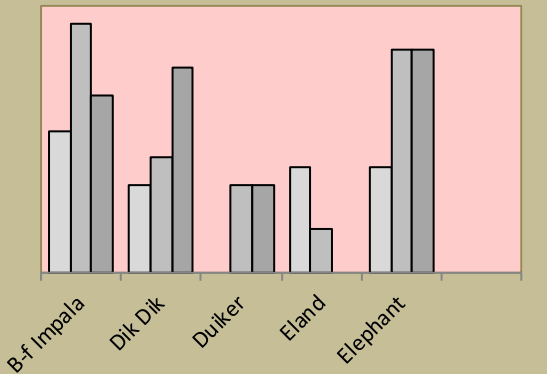

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Sightings indicator □ 2013 □ 2014 □ 2015

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

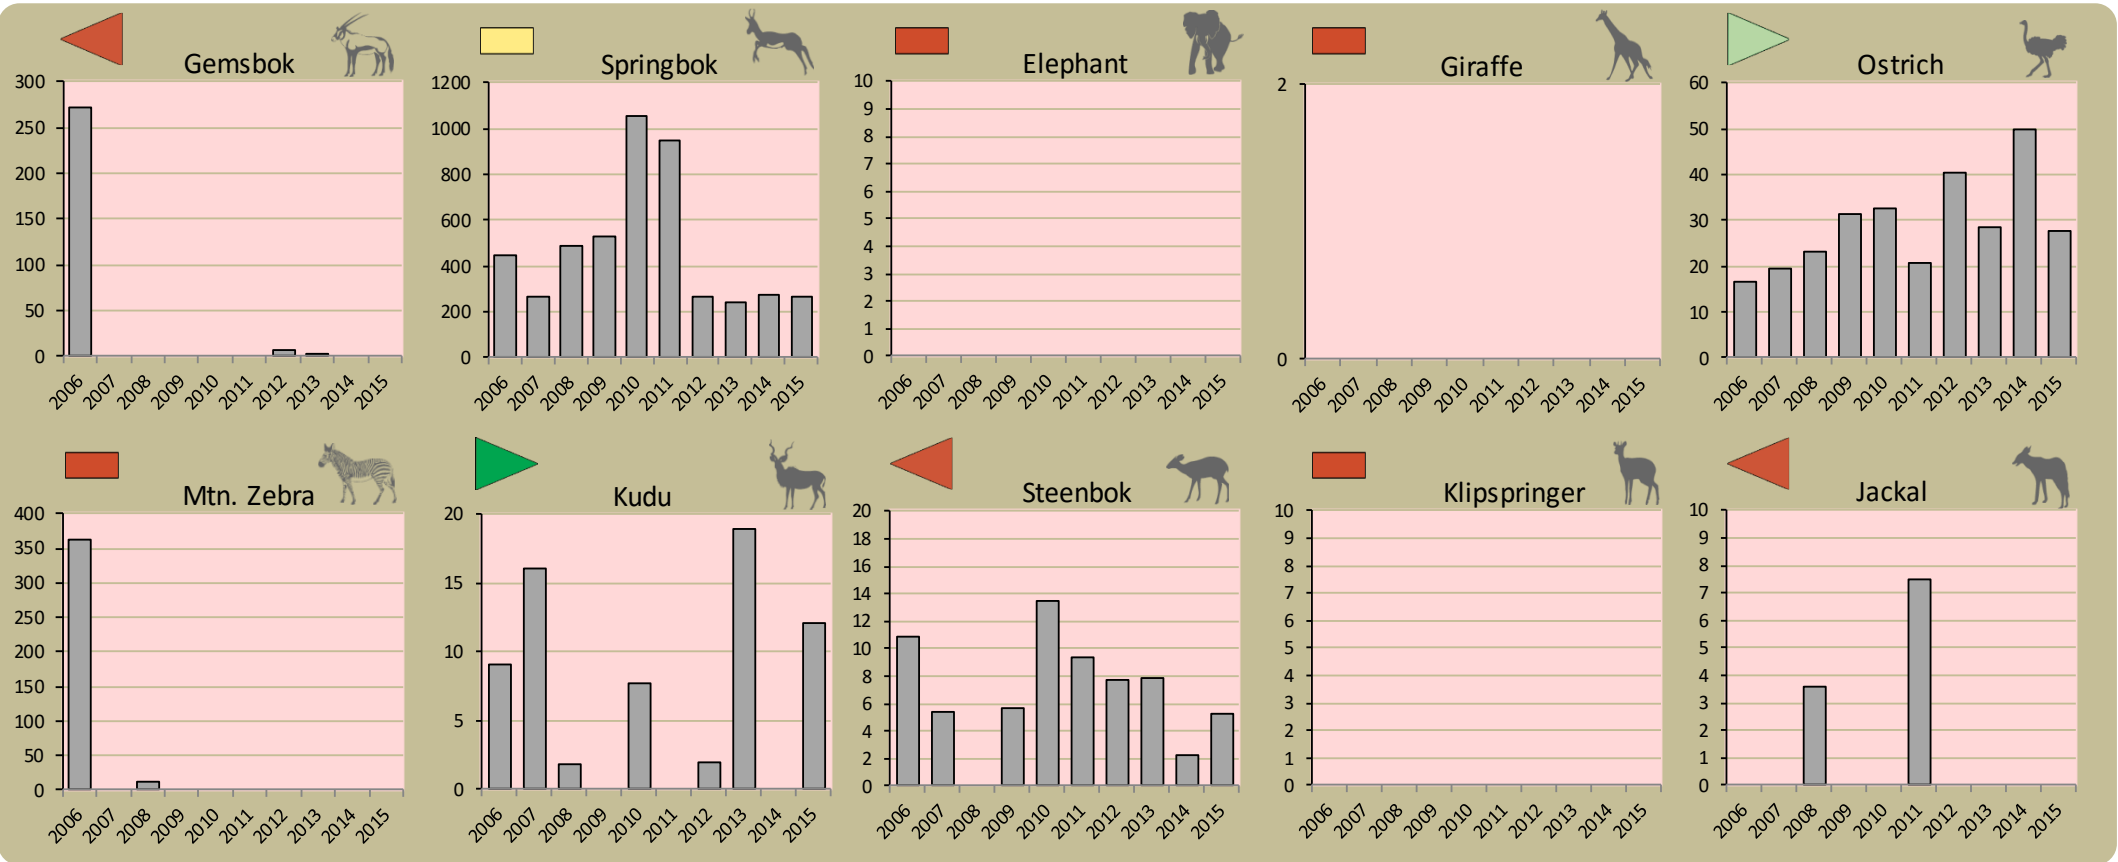

Annual rainfall

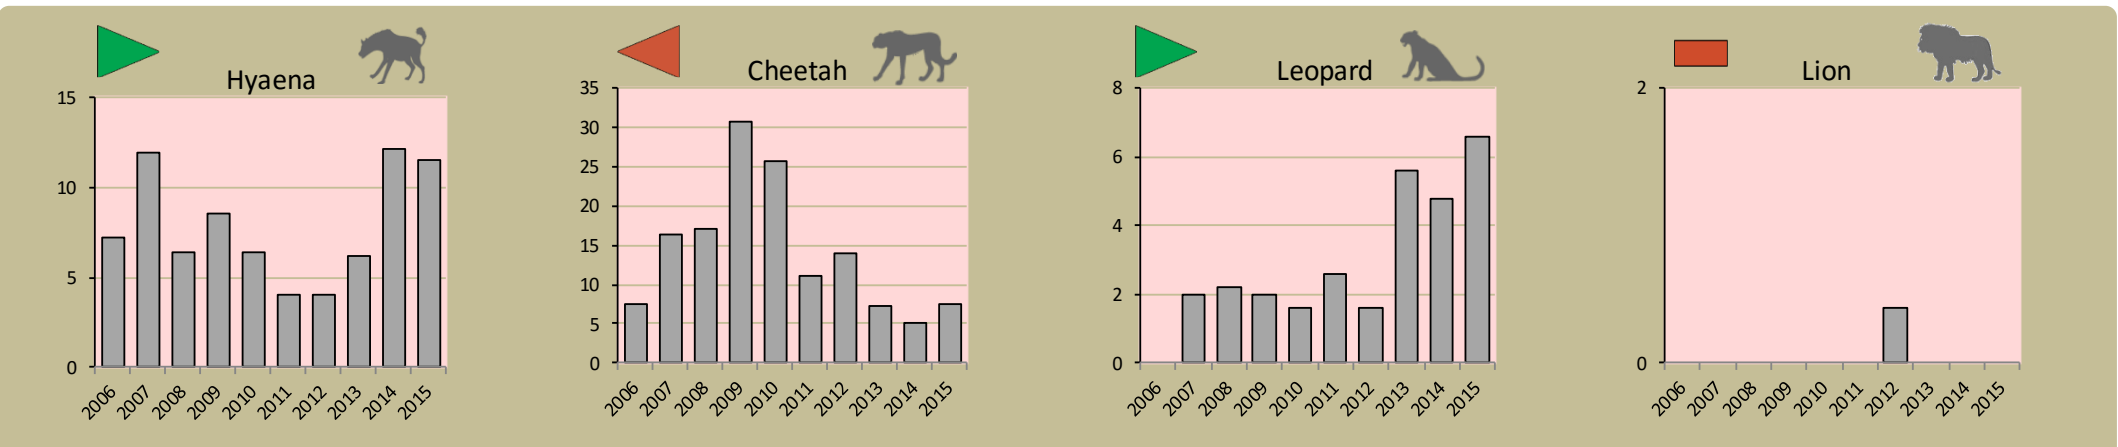

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

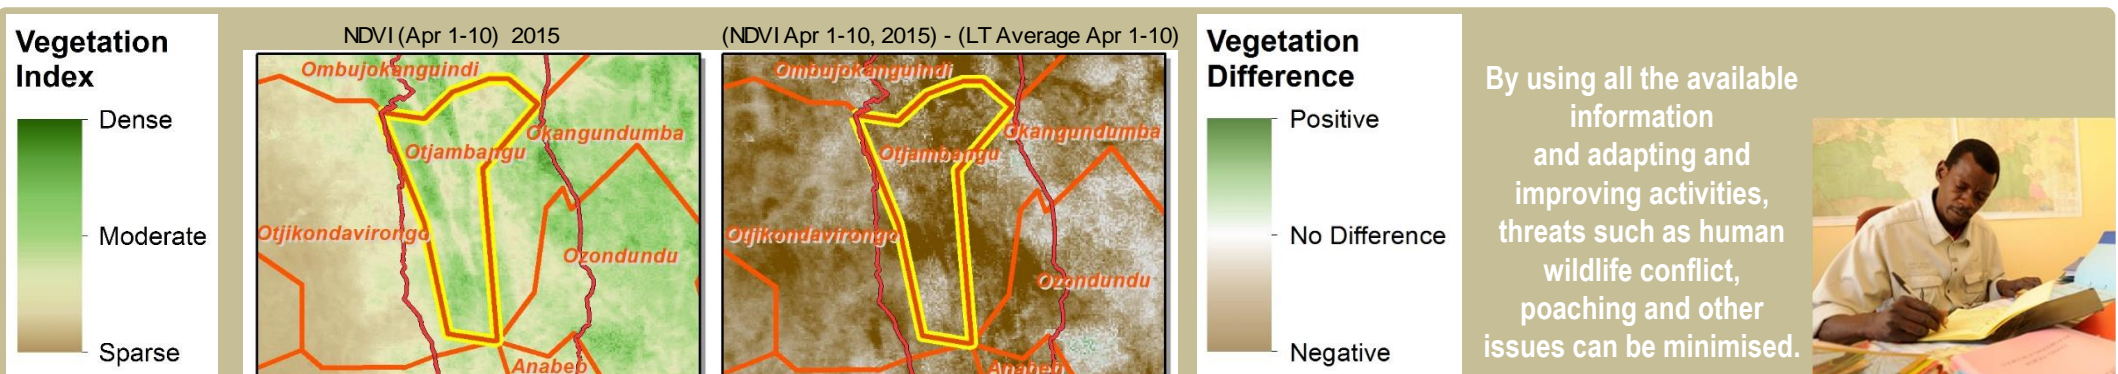

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the current year and the difference between the current year and the 10 year average (2001-2010)

Enabling wise conservancy governance...

Conservancy statistics

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan			Good	Good however we need to have the plan handy.
Zonation Plan		Fair		We have zoned the area. But question if Round River is the right organisation to help with maps. We are working on the draft zonation map.
Natural Resource Plan				
Human Wildlife Conflict Plan			Good	The community cooperates very well. The offset process is also working very well.
Tourism Plan		Fair		There is no plan yet. No campsite but put some efforts towards identifying a campsite and calling an enterprise officer to assist in assessing viability.
Sustainable Financial Plan		Fair		No plan, but at least a savings account was opened and the members have approved the operational costs budget at the AGM.
Benefit Distribution Plan			Good	No plan, but some benefits were distributed to the members.
Staff Plan	Poor			Staff salaries are very little and volunteers are paid more than staff.
Assets Plan		Fair		No plan just asset register.
HIV/AIDS Plan	Poor			Provide counselling sometimes.
Communication Plan		Fair		We do not have a plan but we do communicate effectively.
