20 Annual Conservancy Status Summary & Natural Resource Report Audit Report

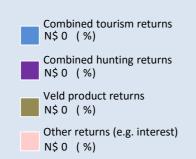

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ employment to conservancy residents

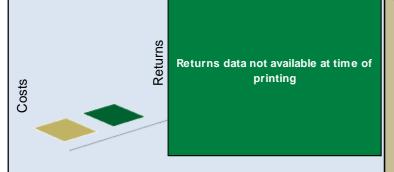

| Conservancy | Conservancy income | | | | |
|-------------|--------------------|--|--|--|--|
| | Private Sector | | | | |
| Employment | Conservancy | | | | |

Cost of natural resource conflicts in 2014

| Estimated human wildlife conflict cost | N\$ 0 |
|---|--------------|
| | |
| Estimated poached high value species loss | N\$ 0 |
| | |
| Total conflict cost estimate | N\$ 0 |
| | |

Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

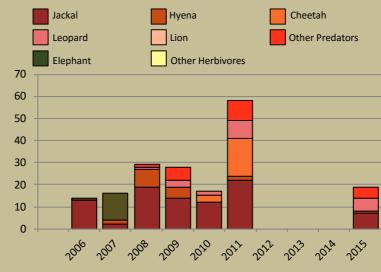

Management performance in 2015

| Category | Performance |
|--------------------------------|-------------|
| 1 Adequate staffing | |
| 2 Adequate expenditure | |
| 3 Audit attendance | |
| 4 NR management plan | |
| 5 Zonation | |
| 6 Leadership | |
| 7 Display of material | |
| 8 Event Book modules | |
| 9 Event Book quality | |
| 10 Compliance | |
| 11 Game census | |
| 12 Reporting & adaptive m/ment | |
| 13 Law enforcement | |
| 14 Human Wildlife Conflict | |
| 15 Harvesting management | |
| 16 Sources of NR income | |
| 17 Benefits produced | |
| 18 Resource trends | |
| 19 Resource targets | |

Human wildlife conflict

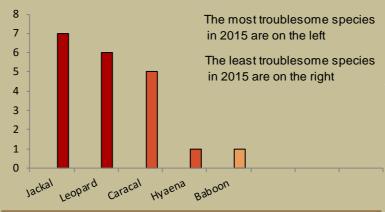

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

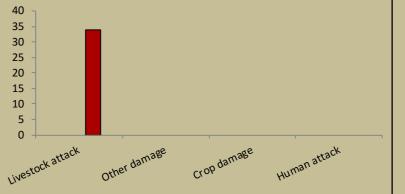

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2013-2015

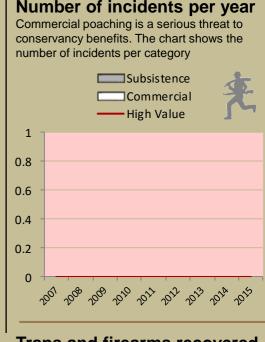

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

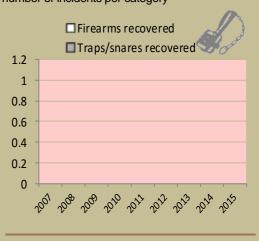

Wildlife removals - quota use and value

| | Quota 2015 | | Animals actually used in 2015 | | | | - Potential | Potential | | | |
|-----------|------------|--------|-------------------------------|--------|-------------------------|-----------------|-------------------|-------------------|--------------|------------------|------------------------|
| Species | Total | Trophy | Other Use | Trophy | Own Use & Premium | Shoot & Sell | Capture & Sale | Problem Animal | Total Use | Trophy Other use | Other use Value N\$ |
| Baboon | 5 | 5 | | | | | | | | 383 | |
| Cheetah | 1 | 1 | | | | | | | | 9,450 | |
| Duiker | 1 | 1 | | | | | | | | 1,916 | |
| Jackal | 5 | 5 | | | | | | | | 128 | |
| Ostrich | 15 | 5 | 10 | | | | | | | 1,277 | 600 |
| Springbok | 50 | 10 | 40 | | 2 | | | | 2 | 2,937 | 520 |
| Steenbok | 2 | 2 | | | | | | | | 1,532 | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |

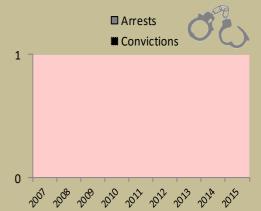

Poaching

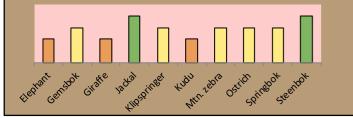

Traps and firearms recovered number of incidents per category

Arrests and convictions number of incidents per category

Wildlife status summary in 2015

Potential value estimates (N\$) for species are based on:

• Potential trophy value - the average trophy value for that species in the conservancy landscape

- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

· Potential other use value - the average meat value for common species

- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

| | Animals | Estimated population range | Wildlife Status | | | | | |
|--------------|--------------|----------------------------------|-----------------|-----------------------|-------------------|--|--|--|
| Species | Seen 2015 | | Count Trend | National Guideline | Desired Status | | | |
| Elephant | | | | | | | | |
| Gemsbok | | | | | | | | |
| Giraffe | | | | | | | | |
| Jackal | 4 | | | | | | | |
| Klipspringer | | | | | | | | |
| Kudu | | | | | | | | |
| Mtn. zebra | | | | | | | | |
| Ostrich | 3 | 16 - 30 | | | | | | |
| Springbok | 3 | 6 - 10 | | | | | | |
| Steenbok | 7 | 37 - 450 | | | | | | |

Wildlife Status

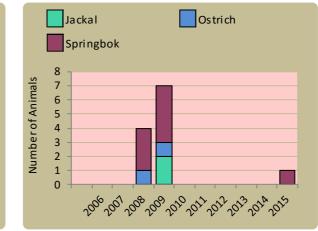

Count trend - gives the species status in the conservancy based on game count trend data.

National guideline - gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) - there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

Wildlife mortalities

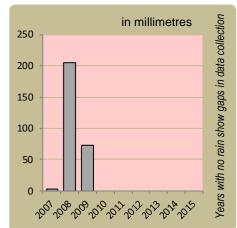

Locally rare species

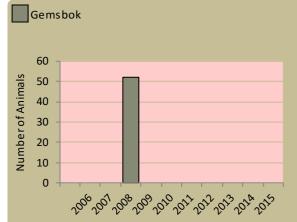

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Annual rainfall

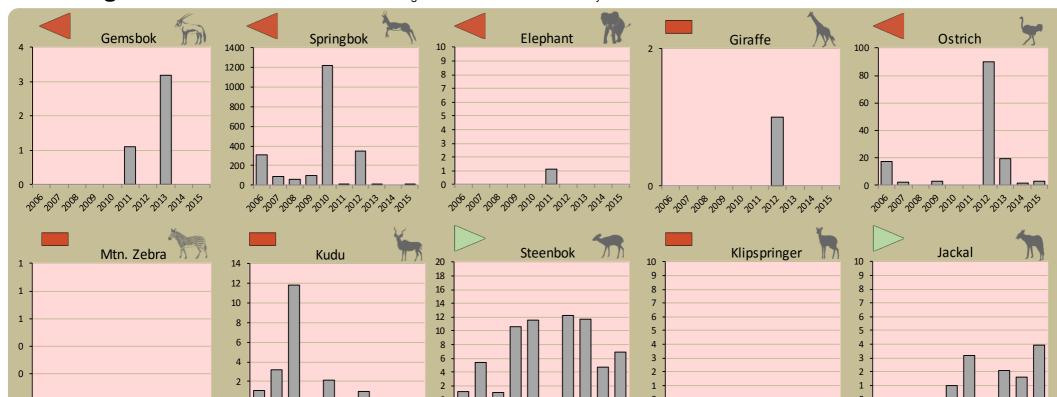

Wildlife introductions

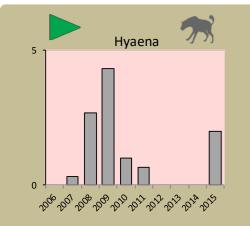

Annual game count

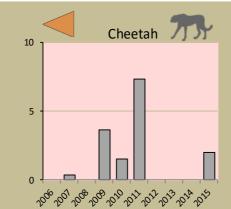

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

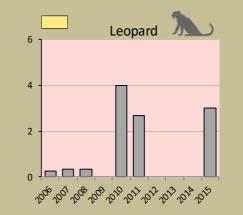

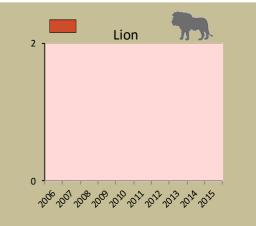

_____ 0 -por poi por por por pri pri pri pri pri pri LOG DO, DO LOG DO DI DI DI DI DI DI DI DI

Predator monitoring charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

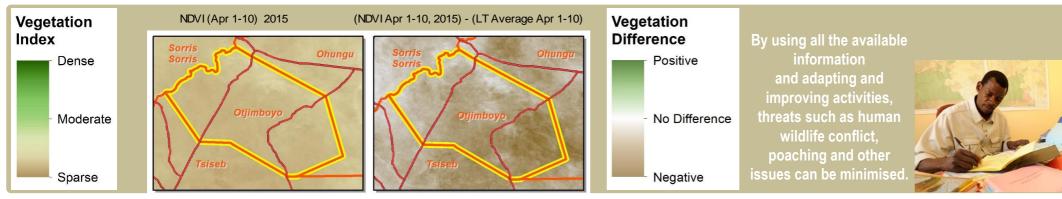

Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the **Vegetation monitoring** Green vegetation index (NDVI). Maps show vegetation cover in the instance days of April of als current year and the difference between the current year and the 10 year average (2001-2010)

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

| Effectiveness of implementation | Poor | Fair | Good | Explanation of effectiveness rating |
|--------------------------------------|------|------|------|---|
| Game Utilisation and Management Plan | | | | Only partially implemented due to limitations |
| Zonation Plan | | | | The plan wasonly developed recently and only partially implemented. |
| Natural Resource Plan | | | | |
| Human Wildlife Conflict Plan | | | | The HWC plan was recently developed and only partially implemented partially. |
| Tourism Plan | | | | Tourism plan recently developed and not fully implemented. |
| Sustainable Financial Plan | | | | |
| Benefit Distribution Plan | | | | Plan recently developed and still needs to be approved thus only partially implemented. |
| Staff Plan | | | | |
| Assets Plan | | | | |
| HIV/AIDS Plan | | | | |
| Communication Plan | | | | |
