## Sesfontein

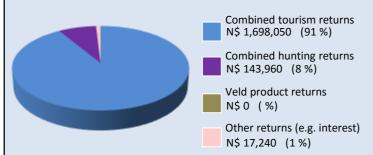

# Conservancy Status Summary & Natural Resource Report

## maximising wildlife returns by minimising threats...

### **Conservancy status summary**

# Returns from natural resources in 2014 the chart shows the main sources of returns and values and their percentage of the total returns

### Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy	N\$ 519,100	
	Private Sector	
Employment	Conservancy	

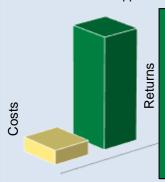

### Cost of natural resource conflicts in 2014

estimates are based on average national values

Total conflict cost estim	N\$ 236,320	
Estimated poached high	N\$ 0	
Estimated human wildlife	conflict cost	N\$ 236,320
estililates are based on averag	je Halionai values	

### Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

Total returns: **N**\$ 1,859,250

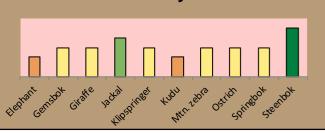

Approximate conflict costs: N\$ 236,320

Approximate positive ratio 8 : 1

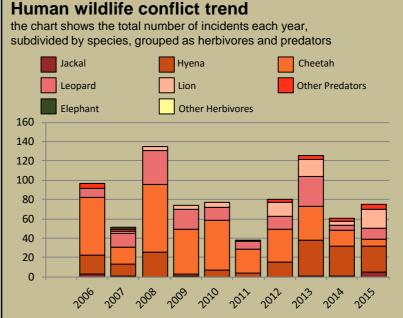

### Management performance in 2015

Category	Performance			
1 Adequate staffing				
2 Adequate expenditure				
3 Audit attendance				
4 NR management plan				
5 Zonation				
6 Leadership				
7 Display of material				
8 Event Book modules				
9 Event Book quality				
10 Compliance				
11 Game census				
12 Reporting & adaptive m/ment				
13 Law enforcement				
14 Human Wildlife Conflict				
15 Harvesting management				
16 Sources of NR income				
17 Benefits produced				
18 Resource trends				
19 Resource targets				

### Wildlife status summary in 2015

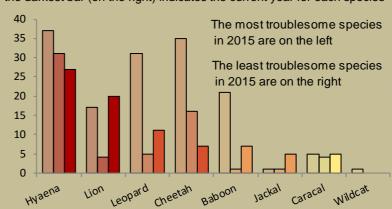

### **Human wildlife conflict**

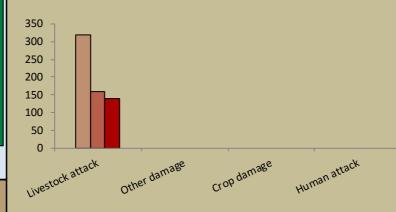

### Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

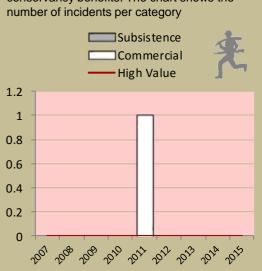

### Type of damage by problem animals 2013-2015

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

### **Poaching**

### Traps and firearms recovered

number of incidents per category

### **Arrests and convictions**

number of incidents per category

### Wildlife removals – quota use and value

	Species	Quota 2015			Animals actually used in 2015					- Potential	Potential	
		Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
	Baboon	5	5		1					1	383	
	Caracal	2	2								2,554	
	Cheetah	1	1								9,450	
	Gemsbok	70	20	50	5	30	15			55	4,725	2,160
	Giraffe	2	2		1					1	10,854	
	Hyaena	1	1								5,746	
	Jackal	5	5								128	
	Klipspringer	2	2		1					1	4,980	
	Kudu	2	2								5,491	
	Leopard	1	1		1		1			2	51,080	
	Ostrich	15	10	5	6					6	1,277	600
	Springbok	100	30	70	10	35	20			80	2,937	520
	Steenbok	2	2		1					1	1,532	
	Mtn Zebra	20	15	5	6		5			11	5,108	3,320

### Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species
   the average live sale value of each high value species (indicated with an \*)[high value species are never used for meat]

### Key to the status barometer

weak/bad reasonable good

Management performance & other data

### Success/threat flags

success/ benefit created

weakness/

action needed

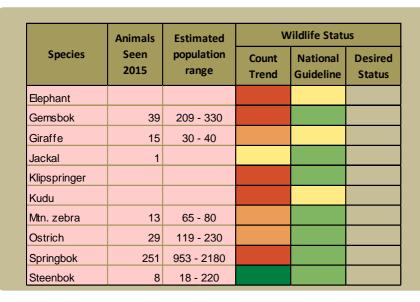

Conservancies reduce environmental costs while increasing environmental returns.

Returns from wildlife can far outweigh human wildlife conflict costs.

# monitoring numbers and trends for a healthy conservancy...

### **Current wildlife numbers and status**

### Wildlife Status

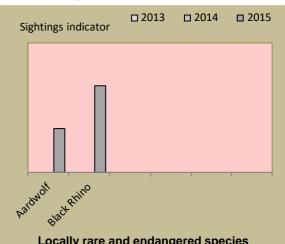

Count trend - gives the species status in the conservancy based on game count trend data.

National guideline - gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; **light orange** (rare) – there should be more than double; dark orange (very rare) – there should be more than triple; red (extinct) - the species needs to be reintroduced.

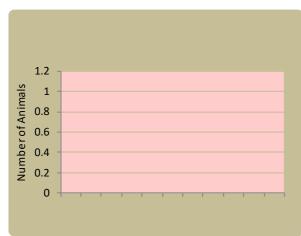

### Locally rare species

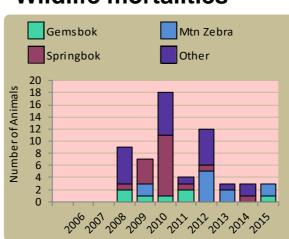

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

### Wildlife introductions

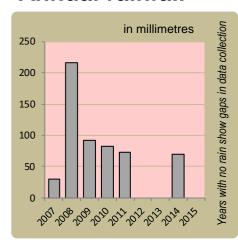

Natural Resource Rep

### Wildlife mortalities

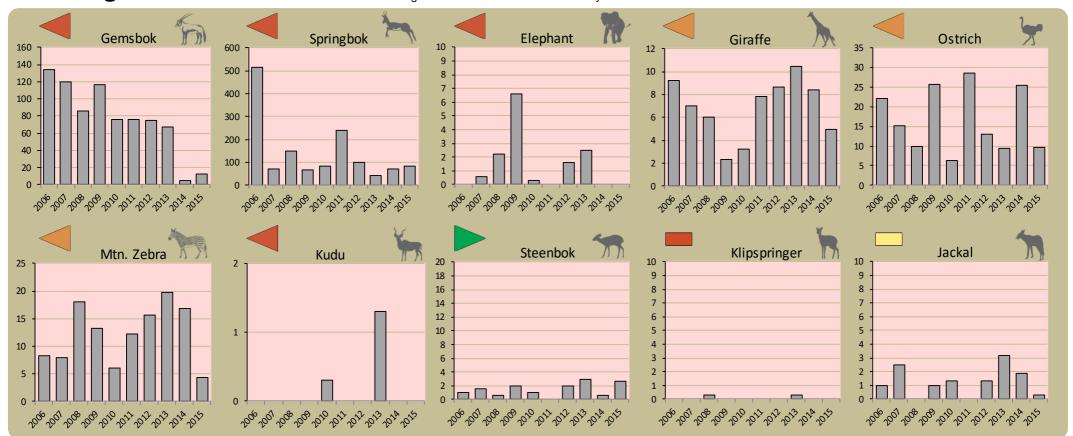

### Annual rainfall

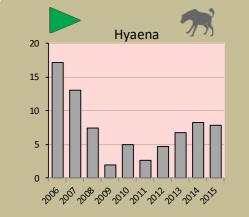

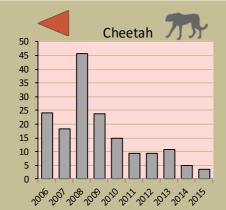

### **Annual game count**

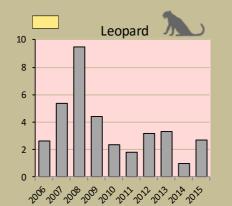

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

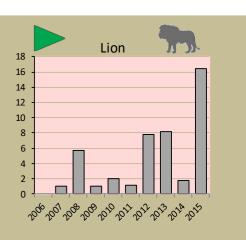

Predator monitoring charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings transfer in the control of the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers reflect the general sightings transfer in the status barometers and the status barometers are sta

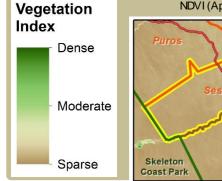

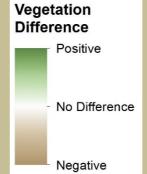

Vegetation monitoring Green vegetation index (NDVI). Maps show vegetation cover in the illist to days of April of the current year and the 10 year average (2001-2010) Green vegetation index (NDVI). Maps show vegetation cover in the first 10 days of April of the

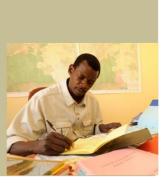

By using all the available information and adapting and improving activities, wildlife conflict, poaching and other issues can be minimised

# Sesfontein Institutional Report

# Enabling wise conservancy governance...

### **Conservancy statistics**

Date Registered: July 2003

Members: 729

Size (square kilometres): 2465

### **Conservancy Governance**

Number of management committee members:	9
Date of last AGM:	Thu, October 1, 2015
Attendance at AGM:	Men: ; Women:
Date of next AGM:	Tue, June 30, 2015
Other important issues	
Financial report approved?	×
Budget approved?	4
	<b>X</b>

Work plan approved?

### **Constitutional adherence**

Approved constitution	4
AGM held	4
Management and utilisation plan	×
Financial annual report approved at AGM	×
Financial report external review	<
Benefit distribution plan	×

### **Employment**

Conservancy staff: Male	11
Female	3
Community game guards:	8
Community resource monitors:	0
Lodge staff: Male	0
Female	0

### **Benefits**

	1
Meat Benefit	

### Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan				The level of effort put into monitoring key species in the area is enormous. Apprehended a lot of criminals in the area. Appointed Rhino Rangers etc.
Zonation Plan				People are up in arms to ensure areas designated for tourism & wildlife remain as such.
Natural Resource Plan				
Human Wildlife Conflict Plan				It remains a challenge for the conservancy.
Tourism Plan				
Sustainable Financial Plan				
Benefit Distribution Plan				Benefits are given to members, but there is no plan.
Staff Plan				Only some activities implemented.
Assets Plan				Needs improvement.
HIV/AIDS Plan				Constituency fully supportive and dedicated staff.
Communication Plan				Need a good communication strategy & skilled people to ensure good communication.
