maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2014 the chart shows the main sources of returns and values

and their percentage of the total returns

Approximate Total Returns N\$ 2,264,750

Two of the most significant returns for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- ✓ Employment to conservancy residents

Conservancy	N\$ 1,417,490		
Employment	Private Sector	34 staff	N\$ 534,720
	Conservancy	27 staff	N\$ 559,380

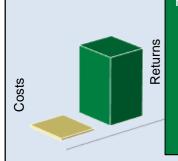

Cost of natural resource conflicts in 2014

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 75,090
Estimated poached high value species loss	N \$ 0
Total conflict cost estimate	N\$ 75,090

Natural resource cost-return ratio in 2014

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

Total returns: N\$ 2,264,750

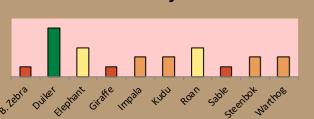

Approximate conflict costs: N\$ 75,090

Approximate positive ratio 30 : 1

Management performance in 2015

Category	Performance			
1 Adequate staffing				
2 Adequate expenditure				
3 Audit attendance				
4 NR management plan				
5 Zonation				
6 Leadership				
7 Display of material				
8 Event Book modules				
9 Event Book quality				
10 Compliance				
11 Game census				
12 Reporting & adaptive m/ment				
13 Law enforcement				
14 Human Wildlife Conflict				
15 Harvesting management				
16 Sources of NR income				
17 Benefits produced				
18 Resource trends				
19 Resource targets				

Wildlife status summary in 2015

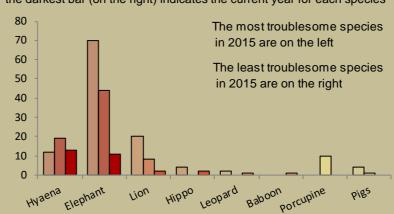

Human wildlife conflict

Human wildlife conflict trend the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators Crocodile Hyaena Lion Other predators Elephant Pigs/Porcupine Antelope/baboon 140 120 100 80 60 40 20 2001 2008 2009 2010 2011 2012 2012 2014 2015

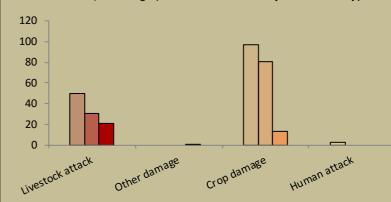

Most troublesome problem animals 2013-2015

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

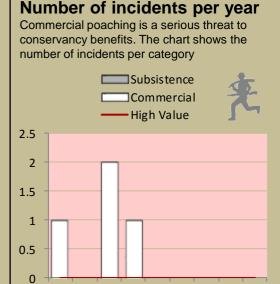

Type of damage by problem animals 2013-2015

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

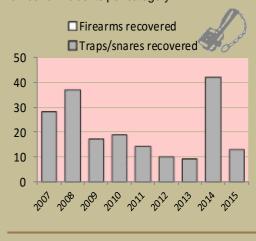

Poaching

Traps and firearms recovered

2001 200 200 200 2012 2013 2014 2015

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

	Quota 2015			Animals actually used in 2015					- Potential	Potential	
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
Baboon	5	5		2					2	383	
Buffalo	16	12	4	12	3				16	76,620	5,500
Bushbuck	1	1		1					1	10,216	
Crocodile	1	1								19,155	
Duiker	6		6								140
Elephant*	6	4	2	2	1				4	204,320	63,600
Нірро	4	2	2	2	1				4	25,540	5,500
Impala	10	4	6	4	2				6	3,576	680
Kudu	4	2	2	2	2				5	5,491	2,580
Leopard	1	1		1					1	51,080	
Reedbuck	1	1		1					1	7,662	
Roan*	1	1		1					1	76,620	
Sable*	1	1								76,620	
Warthog	10	6	4	6	4				10	2,682	400
B. Zebra	2	2		2					2	5,108	

Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species
 the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

Wildlife status
extinct very rare rare uncommon common abundant

weak/bad reasonable good

Management performance & other data

Success/threat flags

success/ benefit created

weakness/

action needed

Conservancies reduce environmental costs while increasing environmental returns.

Returns from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Wildlife Status **Animals Species Estimate** National Desired Count Seen Guideline Number B. Zebra Duiker **Elephant** Giraffe Impala Kudu Roan Sable Steenbok 76 Warthog

Wildlife Status

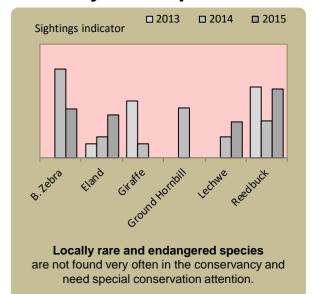

Count trend – gives the species status in the conservancy based on game count trend data.

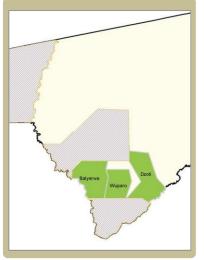

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

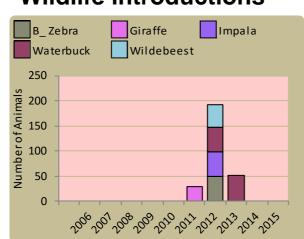

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

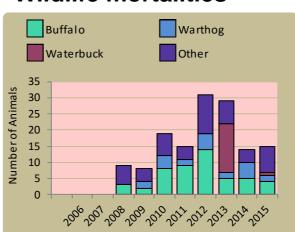

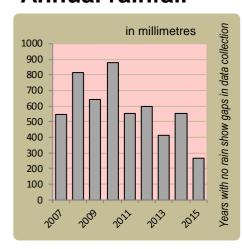

Wildlife mortalities

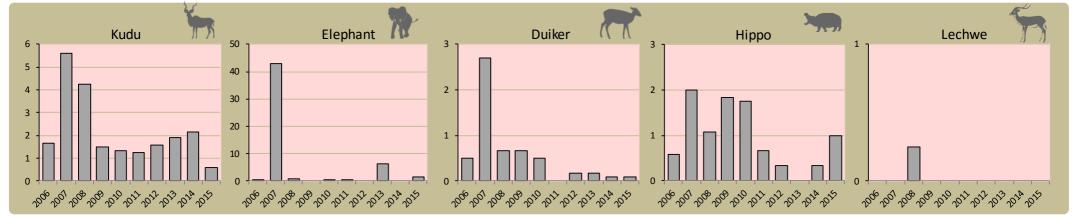

Annual rainfall

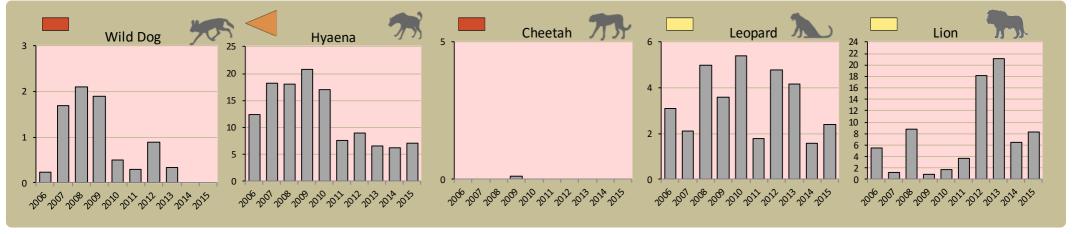

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

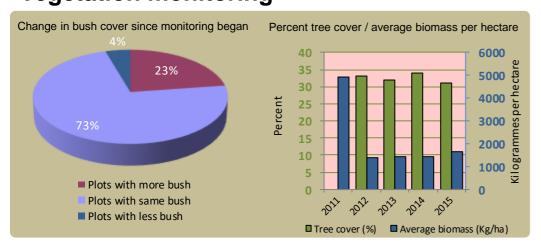

Predator monitoring

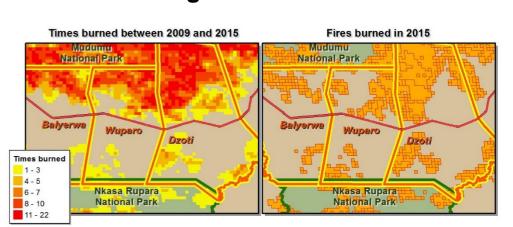

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits.

Some wildlife can cause conflicts,
but all wildlife is of value to tourism,
trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Meat Distribution	

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Utilisation and Management Plan				Reduced poaching
Zonation Plan				Members understand the plan & obey it
Natural Resource Plan				Community respects policies and procedures
Human Wildlife Conflict Plan				Farmers understand the requirements of the plan and keep the crops and livestock monitored and all times.
Tourism Plan				Members understand the plan and respect the sites allocated for tourism activities.
Sustainable Financial Plan				Conflict among members of the conservancy i.e electrificationn project denied in some areas.
Benefit Distribution Plan				Members happy with the benefits received from the conservancy and the criteria used for distribution.
Staff Plan				Effective implementation of plans.
Assets Plan				Asset register not maintained
HIV/AIDS Plan				Members now understand the impact of living with HIV/AIDS by conducting regular tests
Communication Plan				Information being communicated to members on conservancy activities.
