Conservancy status summary

Returns from natural resources in 2016

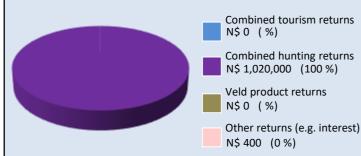

Conservancy

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 1,020,400

20

16

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ Employment to conservancy residents

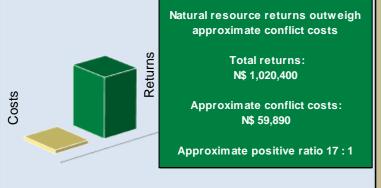

| Conservancy | N\$ 948,400 | | |
|-------------|----------------|----------|-------------|
| E | Private Sector | 6 staff | N\$ 72,000 |
| Employment | Conservancy | 15 staff | N\$ 294,900 |

Cost of natural resource conflicts in 2016

| | Total conflict cost estimate | N\$ 59,890 |
|---|---|------------|
| | Estimated poached high value species loss | N\$ 30,850 |
| | Estimated human wildlife conflict cost | N\$ 29,040 |
| e | stimates are based on average national values | |

Natural resource cost-return ratio in 2016

the chart shows the approximate ratio of returns to costs

Management performance in 2016

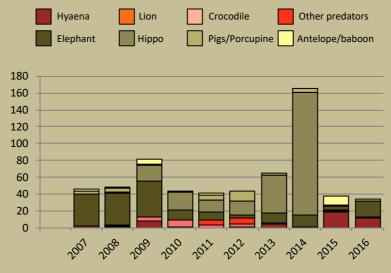

| Category | Performance |
|--------------------------------|-------------|
| 1 Adequate staffing | |
| 2 Adequate expenditure | |
| 3 Audit attendance | |
| 4 NR management plan | |
| 5 Zonation | |

Wildlife status summary in 2016

Potential value estimates (N\$) for species are based on:

· Potential trophy value - the average trophy value for that species in the conservancy landscape

- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

- · Potential other use value the average meat value for common species
- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

| 0.7 | Animals | Estimate | Wildlife Status | | | | | |
|----------|---------|----------|-----------------|-----------------------|-------------------|--|--|--|
| Species | Seen | | Count Trend | National Guideline | Desired Number | | | |
| B. Zebra | 625 | | | | | | | |
| Duiker | 5 | | | | | | | |
| Elephant | | | | | | | | |
| Giraffe | | | | | | | | |
| Impala | | | | | | | | |
| Kudu | | | | | | | | |
| Roan | | | | | | | | |
| Sable | | | | | | | | |
| Steenbok | | | | | | | | |

Number of Animals

Wildlife Status

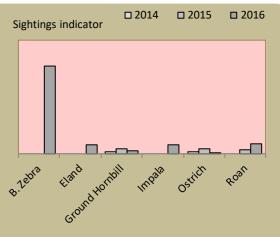

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline - gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) - there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

Locally rare species

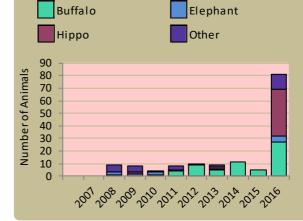

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Annual rainfall

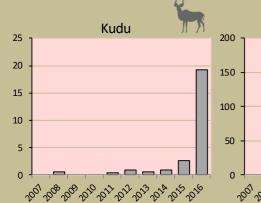

Wildlife introductions

Wildlife mortalities

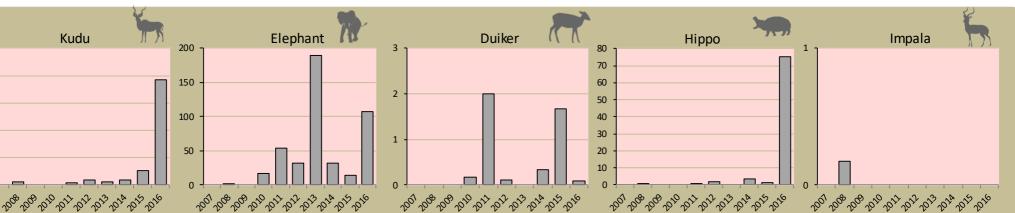

in millimetres with no rain show gaps in data collection 1000 900 800 700 600 500 400 300 200 100 0 2014 2010 2012 2008 2016

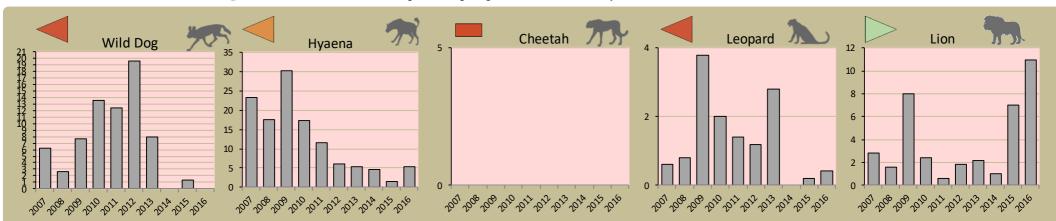

Fixed route patrols

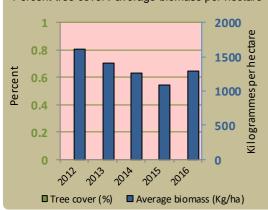

charts show the number of sightings of each species per fixed route foot patrol each year

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years **Predator monitoring**

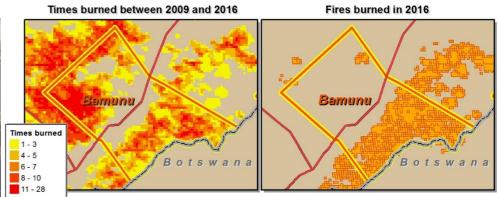

Vegetation monitoring

Percent tree cover / average biomass per hectare

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

| Effectiveness of implementation | Poor | Fair | Good | Explanation of effectiveness rating |
|---|------|------|------|--|
| Game Management and Utilisation | | | | Everything was done according to plan. |
| Zonation Plan | | | | Other members have kraals in the core area. |
| Benefit Distribution | | | | Activities done as per plan. |
| Human Wildlife Conflict Management | | | | More awareness is needed by community members. |
| Sustainable Business and Financial Planning | | | | Finances are properly managed and there is no money missing. |
| Tourism | | | | More diversity of non-consumptive tourism is needed. |
| Staff Management | | | | No training was done in other sectors (treasurer) |
| Assets Management/Register | | | | All assets are recorded. |
| HIV/AIDS | | | | More awareness needs to be raised. |
| Communication | | | | Information has been circulated in an effective manner. |
