

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2016

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 1,348,990

Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy income	N\$ 307,840
--------------------	-------------

Employment	Private Sector	31 staff	N\$ 826,720
	Conservancy	8 staff	N\$ 164,200

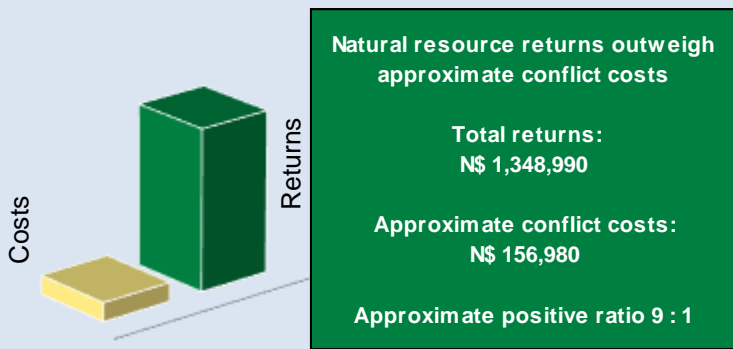

Cost of natural resource conflicts in 2016

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 152,130
Estimated poached high value species loss	N\$ 4,850
Total conflict cost estimate	N\$ 156,980

Natural resource cost-return ratio in 2016

the chart shows the approximate ratio of returns to costs

Management performance in 2016

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Good
4 NR management plan	Good
5 Zonation	Weak
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Weak
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Good
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak
19 Resource targets	Weak

Wildlife status summary in 2016

Key to the status barometer

Human wildlife conflict

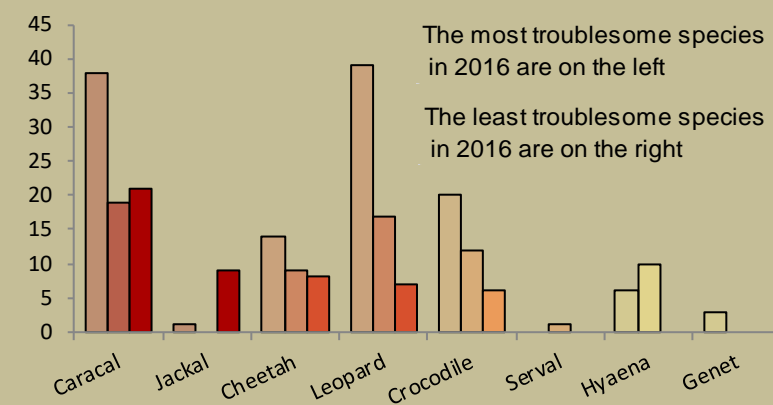

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2014-2016

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2014-2016

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2016			Animals actually used in 2016					Potential Trophy Value N\$	Potential Other use Value N\$	
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal			Total Use
Baboon	5	5								700	
Cheetah	1	1								16,300	
Duiker	2	2								1,900	
B-f Impala	5	5								13,800	
Kudu*	15	5	10							8,100	48,500
Leopard	1	1								32,400	
Steenbok	5	5								1,600	
Mtn Zebra	5	5								7,400	

Potential value estimates (N\$) for species are based on:

- **Potential trophy value** - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- **Potential other use value** - the average meat value for common species - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2016	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant				Dark Orange	
Gemsbok				Green	
Giraffe				Red	
Jackal				Yellow	
Klipspringer				Green	
Kudu				Yellow	
Mtn. zebra				Orange	
Ostrich				Yellow	
Springbok				Yellow	
Steenbok				Green	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

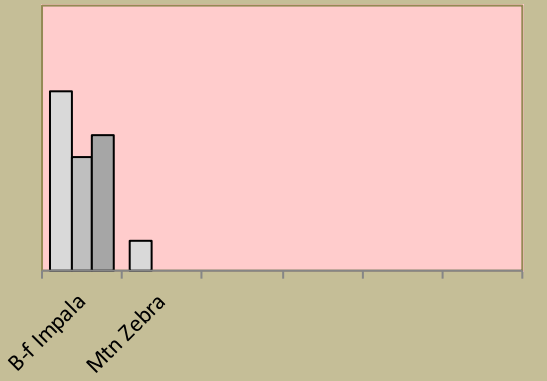

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Sightings indicator □ 2014 □ 2015 □ 2016

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

Annual rainfall

Annual game count

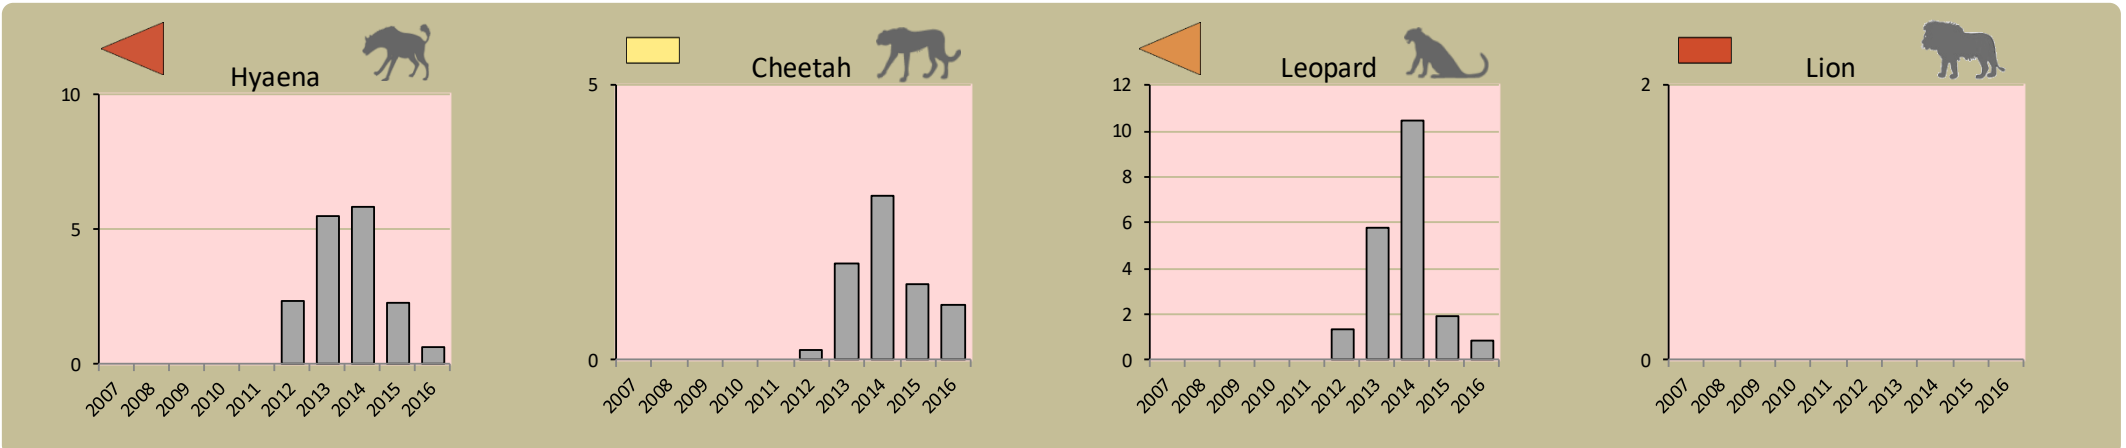

No counts done

A. Jarvis

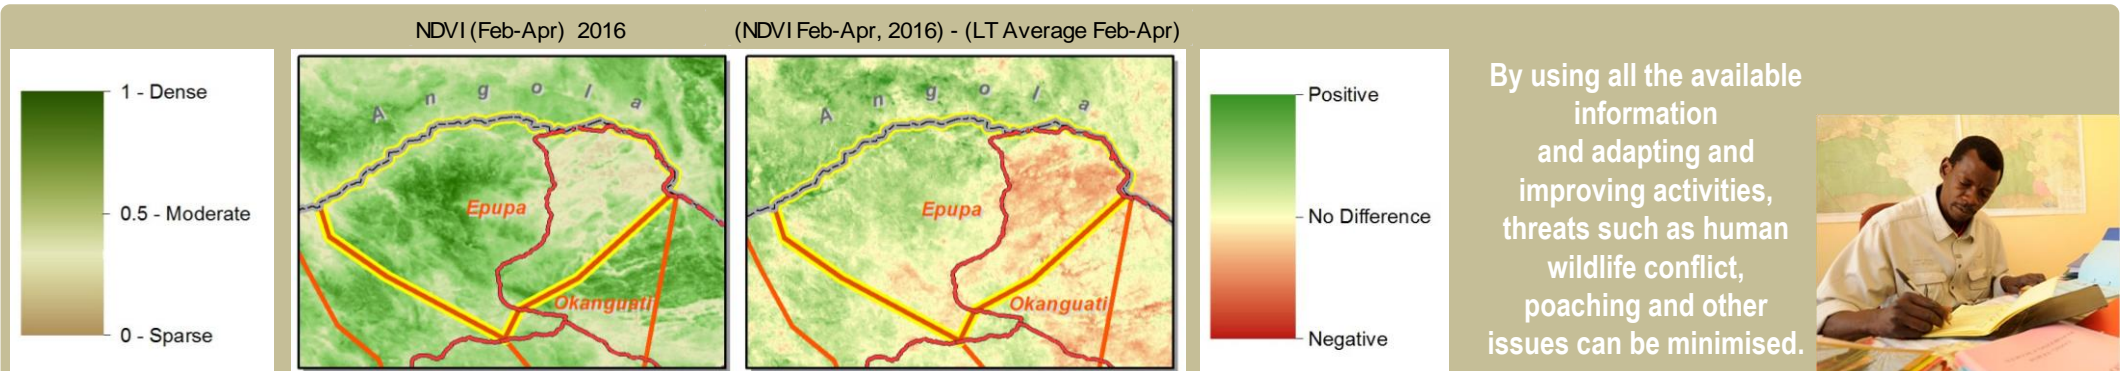

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2015)

Enabling wise conservancy governance...

Conservancy statistics

Date Registered:	October 2012
Population (2011 census):	2970
Size (square kilometres):	2912

Conservancy Governance

Number of management committee members:	14
Date of last AGM:	Tue, November 1, 2016
Attendance at AGM:	Men: 105; Women: 105
Date of next AGM:	Wed, November 1, 2017

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Management and Utilisation				
Zonation Plan				
Benefit Distribution				
Human Wildlife Conflict Management			Good	Implementation was very effective.
Sustainable Business and Financial Planning		Fair		Financial books were not audited.
Tourism			Good	Activities were very effective and there is only one lodge that is not supporting the conservancy.
Staff Management			Good	The plan was implemented as planned.
Assets Management/Register	Poor			We still don't have assets and an asset register.
HIV/AIDS		Fair		Some people don't use a condom.
Communication			Good	Implementation was very effective.
