Conservancy status summary

Returns from natural resources in 2016 the chart shows the main sources of returns and values

and their percentage of the total returns

Approximate Total Returns N\$ 311,800

Two of the most significant returns for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- √ Employment to conservancy residents

Conscivancy	14φ 5 1 1,000		
	Private Sector		
Employment	Conservancy	8 staff	N\$ 245,650

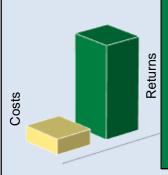

Cost of natural resource conflicts in 2016

estimates are based on average national values

Total conflict cost estimate	N\$ 51,530	
Estimated poached high value species loss	N\$ 0	
Estimated human wildlife conflict cost	N\$ 51,530	
oolinatoo aro bacca on average national values		

Natural resource cost-return ratio in 2016

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

> **Total returns:** N\$ 311,800

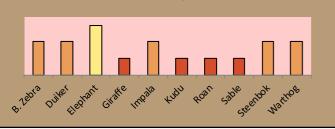

Approximate conflict costs: N\$ 51,530

Approximate positive ratio 6:1

Management performance in 2016

Category	Performance			
1 Adequate staffing				
2 Adequate expenditure				
3 Audit attendance				
4 NR management plan				
5 Zonation				
6 Leadership				
7 Display of material				
8 Event Book modules				
9 Event Book quality				
10 Compliance				
11 Game census				
12 Reporting & adaptive m/ment				
13 Law enforcement				
14 Human Wildlife Conflict				
15 Harvesting management				
16 Sources of NR income				
17 Benefits produced				
18 Resource trends				
19 Resource targets				

Wildlife status summary in 2016

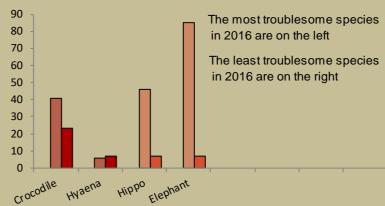

Human wildlife conflict

Human wildlife conflict trend the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators Crocodile Hyaena Lion Other predators Elephant Pigs/Porcupine Antelope/baboon 200 180 160 140 120 100 80 60 40

Most troublesome problem animals 2014-2016

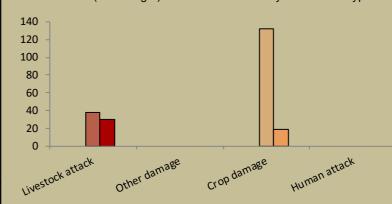

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

you has the top top top top top top

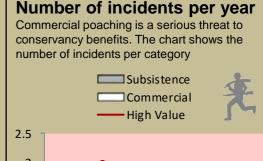

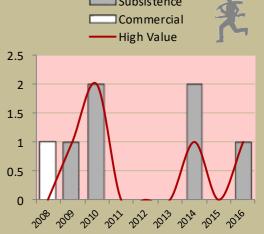

Type of damage by problem animals 2014-2016

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

		Quota 2016 Animals actually used in 2016				- Potential	Potential					
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$	
Crocodile	1	1								25,500		
Elephant*	5	3	2	1	1				2	200,000	180,000	
Нірро	5	2	3	1					1	25,000	5,500	

Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species

- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

Wildlife status very rare rare uncommon common abundant weak/bad reasonable good Management performance & other data

Success/threat flags

success/ benefit created weakness/

action needed

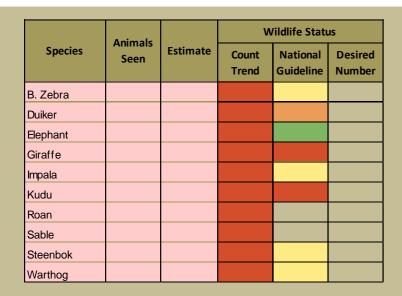

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

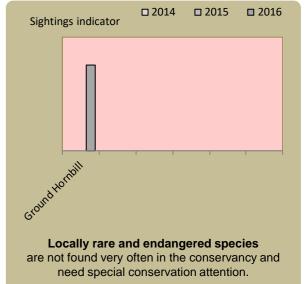

National quideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

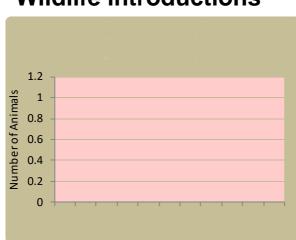

red (extinct) - the species needs to be reintroduced.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) - there should be more than double; dark orange (very rare) – there should be more than triple;

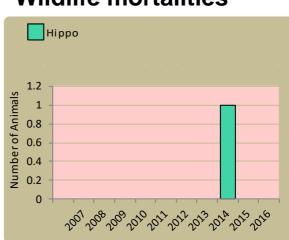

Locally rare species

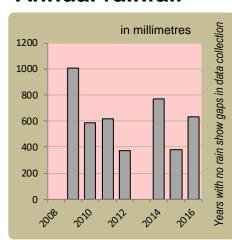

Wildlife introductions

Wildlife mortalities

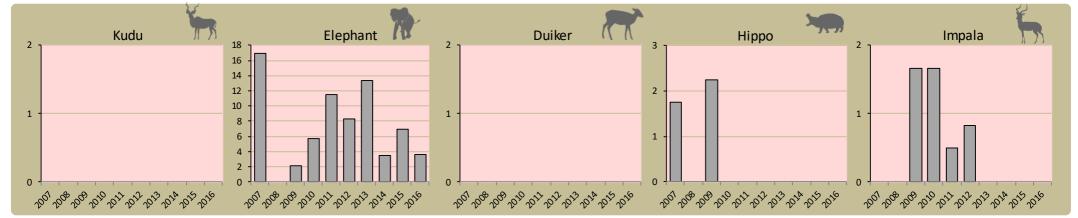

Annual rainfall

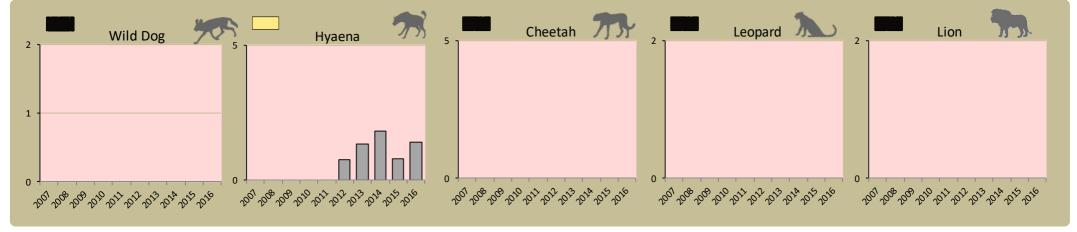

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

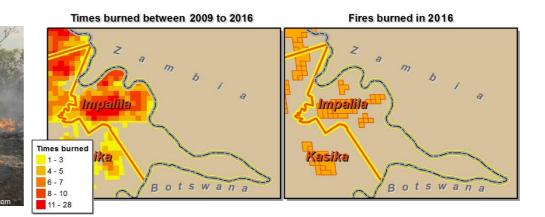

Predator monitoring charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy statistics

Date Registered: December 2005

Population (2011 census): 880

Size (square kilometres): 73

Conservancy Governance

Number of management committee members:

Date of last AGM: Mon, November 28, 2016

Attendance at AGM: Men: 33; Women: 64

Date of next AGM: Sat, October 28, 2017

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Management and Utilisation				Illegal fishing has decreased drastically due to patrols from reports.
Zonation Plan				Difficult to relocate people that were already settled in wildlife corridors.
Benefit Distribution				It was equitably distributed.
Human Wildlife Conflict Management				All the members that came to the office for assistamce were assisted promptly.
Sustainable Business and Financial Planning				Successful budgeting was carried out. Did the auditing of missing funds.
Tourism				Some negotiations have started and look promising, plus there is a new MOU with new PH.
Staff Management				new members have contracts.
Assets Management/Register				There is an updated asset register
HIV/AIDS				It's a new management.
Communication				Reports are presented monthly and important info is also tabled there.
