

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2016
the chart shows the main sources of returns and values and their percentage of the total returns

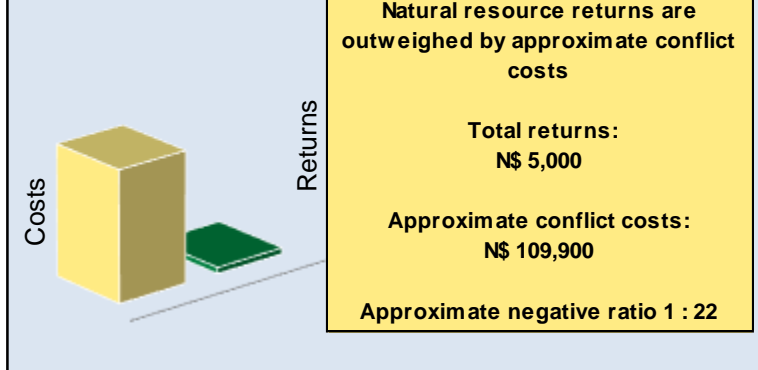

Two of the most significant returns for the conservancy:
✓ cash income to the conservancy to cover running costs and invest in developments
✓ employment to conservancy residents

Conservancy income		N\$ 5,000
Employment	Private Sector	
	Conservancy	

Cost of natural resource conflicts in 2016
estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 109,900
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 109,900

Natural resource cost-return ratio in 2016
the chart shows the approximate ratio of returns to costs

Management performance in 2016

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive m/ment	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

Wildlife status summary in 2016

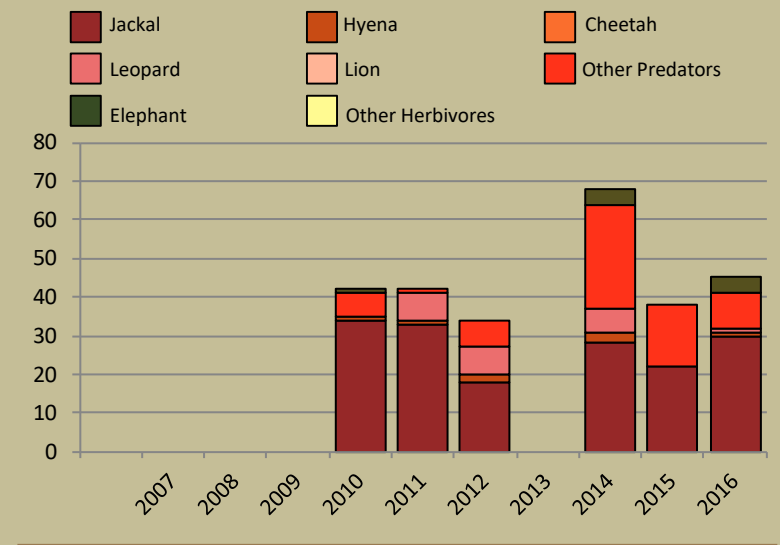

Key to the status barometer

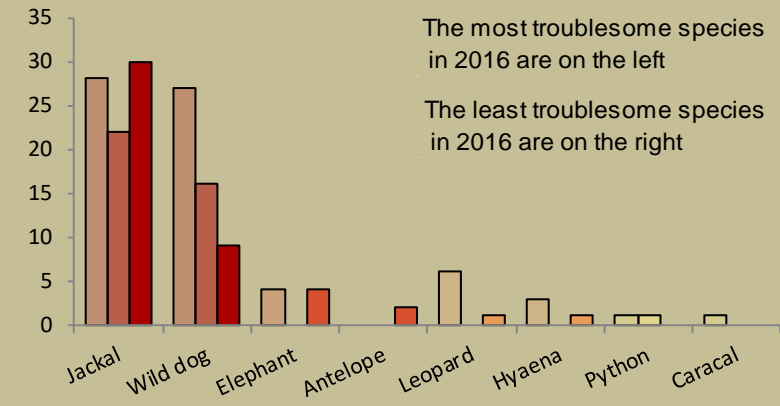

Human wildlife conflict

Human wildlife conflict trend
the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

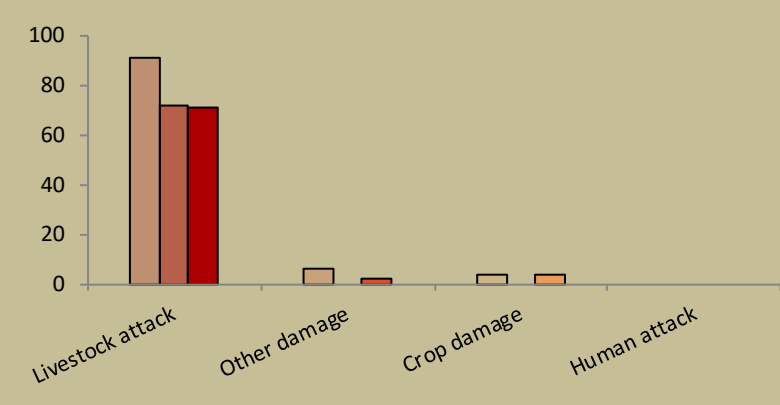

Most troublesome problem animals 2014-2016

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2014-2016

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

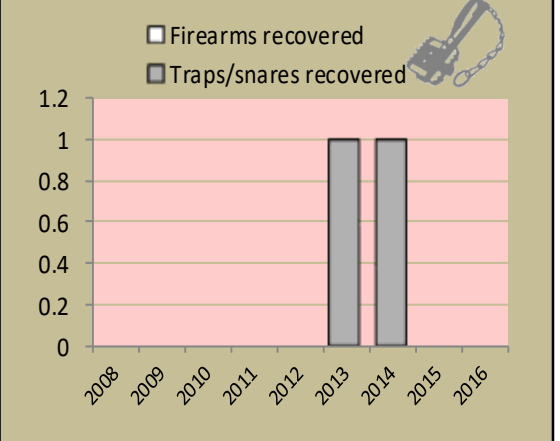

Poaching

Number of incidents per year
Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2016			Animals actually used in 2016					Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal		
Duiker	3	2	1							
Eland*	1		1							9,625
Jackal	5	5								
Kudu*	4		4							19,400
Steenbok	3	2	1							

Potential value estimates (N\$) for species are based on:
 • **Potential trophy value** - the average trophy value for that species in the conservancy landscape
 - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
 • **Potential other use value** - the average meat value for common species
 - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2016	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Dark Orange	Dark Orange	
Gemsbok			Dark Orange	Light Orange	
Giraffe			Dark Orange	Dark Orange	
Jackal			Dark Orange	Yellow	
Klipspringer			Dark Orange	Dark Orange	
Kudu	1	1 - 10	Dark Orange	Dark Orange	
Mtn. zebra			Dark Orange	Dark Orange	
Ostrich			Dark Orange	Yellow	
Springbok			Dark Orange	Yellow	
Steenbok	6	6 - 40	Light Green	Light Orange	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

National guideline – gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

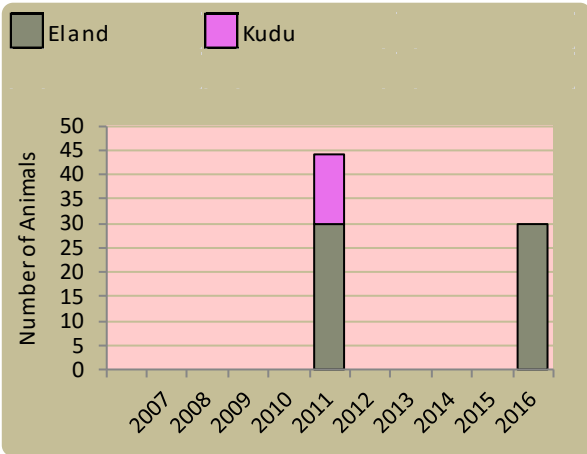

Locally rare species

Sightings indicator □ 2014 □ 2015 □ 2016

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

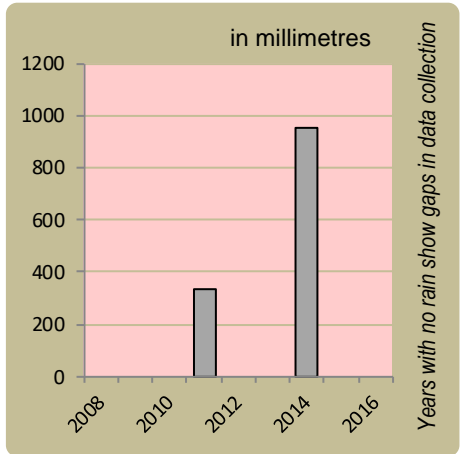

Wildlife introductions

Wildlife mortalities

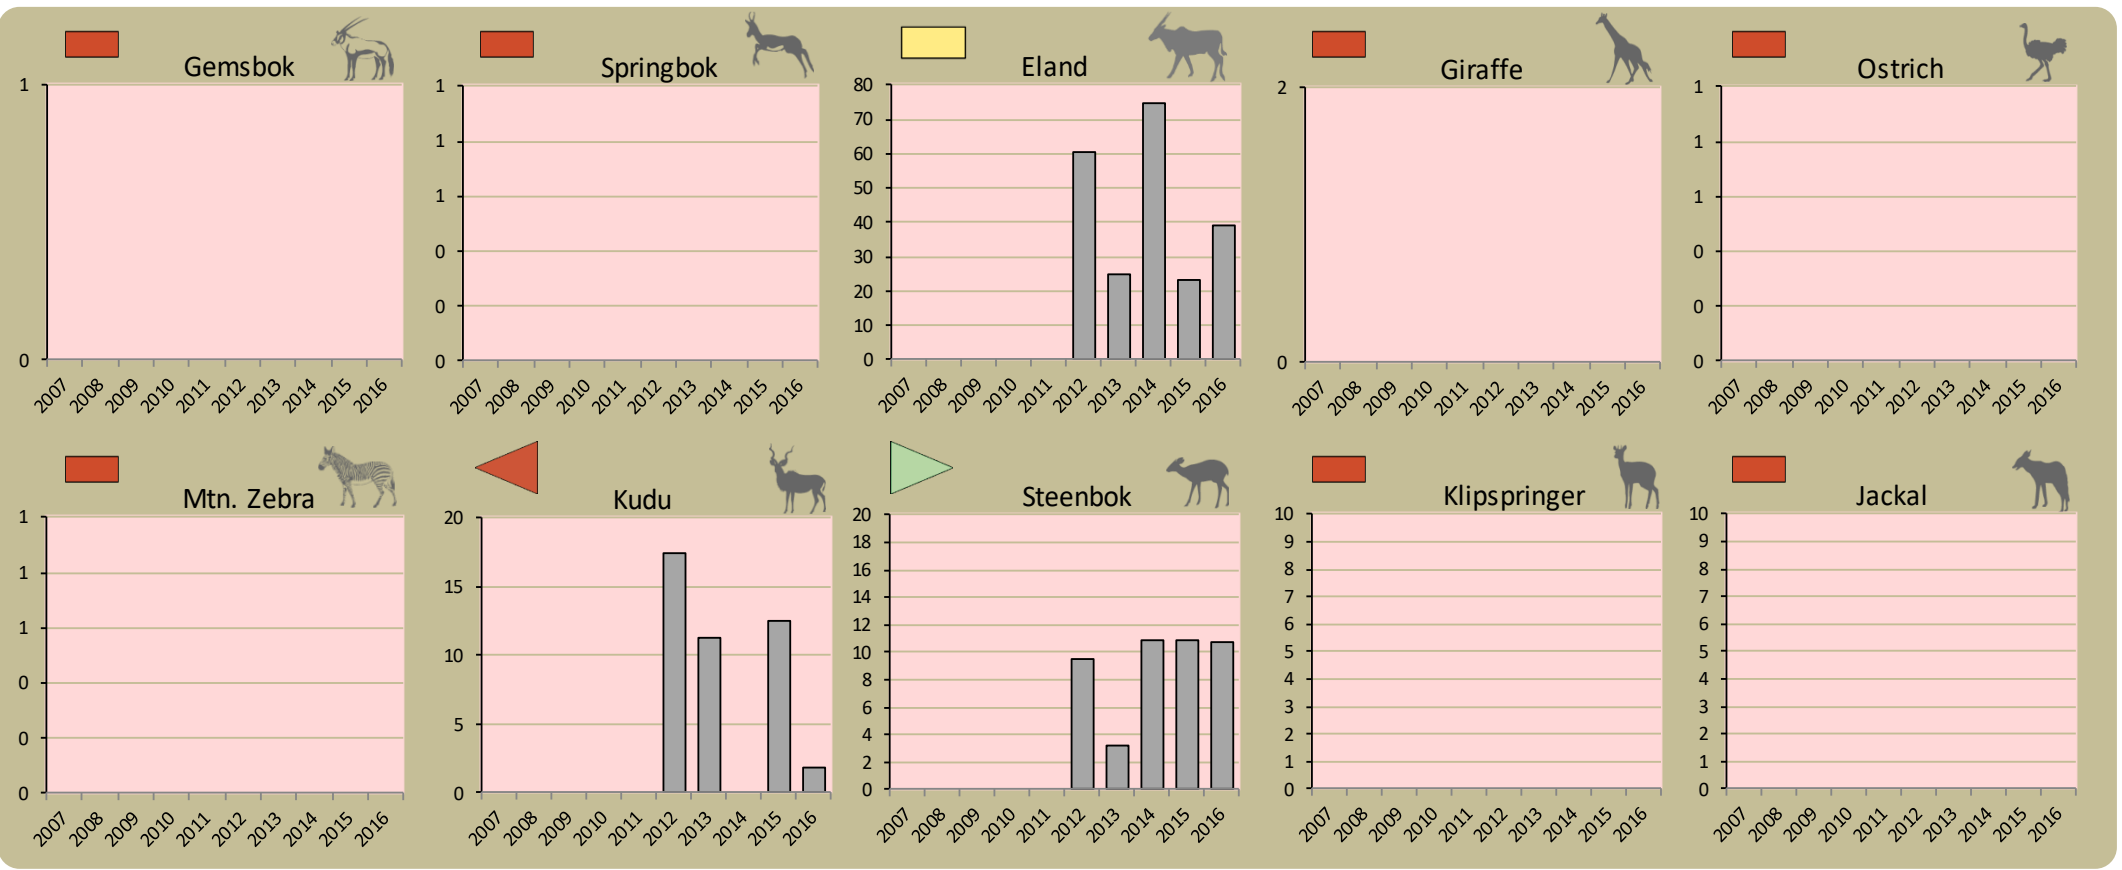

Annual rainfall

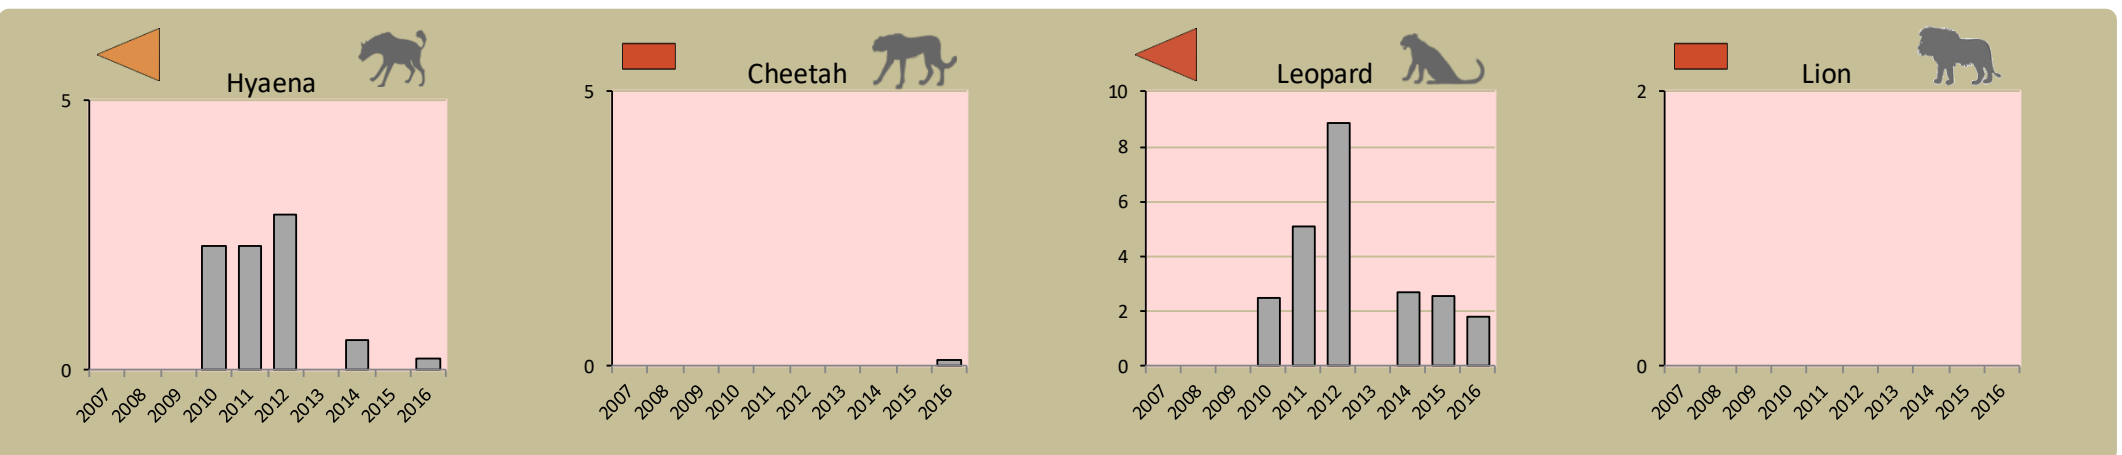

Annual game count

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy statistics

Date Registered:	September 2009
Population (2011 census):	2500
Size (square kilometres):	1339

Conservancy Governance

Number of management committee members:	16
Date of last AGM:	Sat, November 26, 2016
Attendance at AGM:	Men: ; Women:
Date of next AGM:	Wed, November 1, 2017

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Management and Utilisation			Good	Implemented all planned activities.
Zonation Plan	Poor			Have only implemented one activity.
Benefit Distribution	Poor			There was no benefit distribution due to lack of income and no hunting done due to game being introduced last year.
Human Wildlife Conflict Management	Poor			The review panel committee did not attend meetings.
Sustainable Business and Financial Planning			Good	Implemented all planned activities.
Tourism		Fair		Not many activities done.
Staff Management	Poor			Only one activity was done.
Assets Management/Register	Poor			No activities done.
HIV/AIDS	Poor			No activities done.
Communication		Fair		Only few activities done.
