# Conservancy Status Summary & Natural Resource Report

### maximising wildlife returns by minimising threats...

### Conservancy status summary

Returns from natural resources in 2016 the chart shows the main sources of returns and values and their percentage of the total returns

#### Approximate Total Returns N\$

- Combined tourism returns N\$ 0 (%)
- Combined hunting returns N\$ 0 (%)

  Veld product returns
- Other returns (e.g. interest)

N\$0 (%)

### Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

	•
Private Sect	tor
Employment Conservanc	y

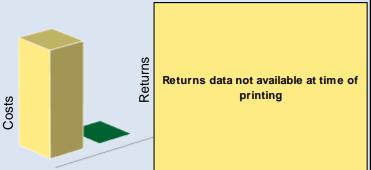

#### Cost of natural resource conflicts in 2016

estimates are based on average national values

Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 35,450

#### Natural resource cost-return ratio in 2016

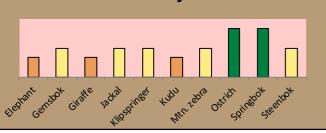

the chart shows the approximate ratio of returns to costs

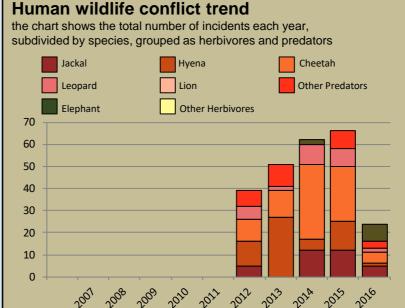

### Management performance in 2016

Category	Performance			
1 Adequate staffing				
2 Adequate expenditure				
3 Audit attendance				
4 NR management plan				
5 Zonation				
6 Leadership				
7 Display of material				
8 Event Book modules				
9 Event Book quality				
10 Compliance				
11 Game census				
12 Reporting & adaptive m/ment				
13 Law enforcement				
14 Human Wildlife Conflict				
15 Harvesting management				
16 Sources of NR income				
17 Benefits produced				
18 Resource trends				
19 Resource targets				

### Wildlife status summary in 2016

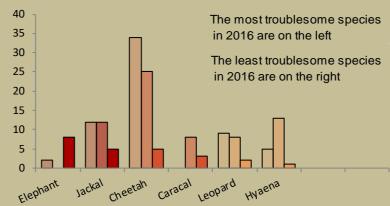

### **Human wildlife conflict**

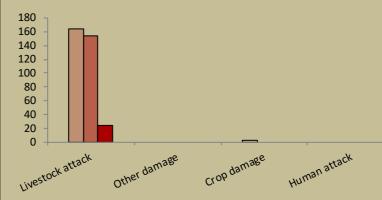

### Most troublesome problem animals 2014-2016

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

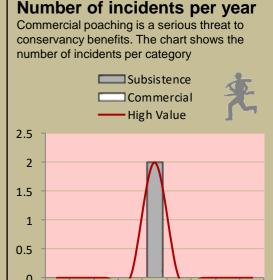

### Type of damage by problem animals 2014-2016

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

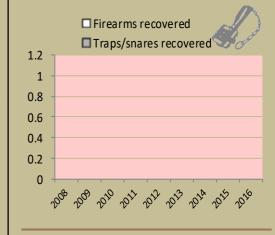

### **Poaching**

### Traps and firearms recovered

po 20 20 201 201 202 202 201 2015 2016

number of incidents per category

#### **Arrests and convictions**

number of incidents per category

### Wildlife removals - quota use and value

	Quota 2016			Animals actually used in 2016						- Potential	Potential	
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$	
Baboon	5	5								700		
Caracal	1	1								2,900		
Cheetah	1	1								16,300		
Duiker	1	1								1,900		
Jackal	5	5								700		
Klipspringer	1	1								6,600		
Kudu*	2	2								8,100		
Ostrich	6	2	4							2,400	600	
Springbok	12	4	8							2,900	520	
Steenbok	1	1								1,600		
Mtn Zebra	12	4	8							7,400	3,320	

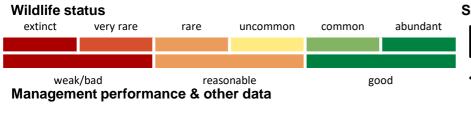

### Potential value estimates (N\$) for species are based on:

weakness/

action needed

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species
  - the average live sale value of each high value species (indicated with an \*)[high value species are never used for meat]

### Key to the status barometer

# Success/threat flags success/ benefit created Conservancies reduce environmental costs while increasing environmental returns.

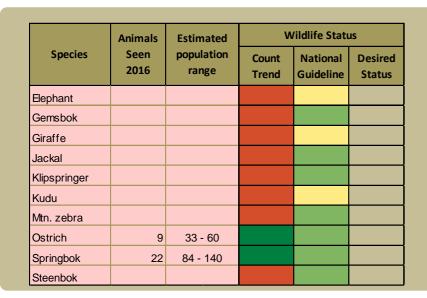

while increasing environmental returns.

Returns from wildlife can far outweigh human wildlife conflict costs.

## monitoring numbers and trends for a healthy conservancy...

### **Current wildlife numbers and status**

#### Wildlife Status

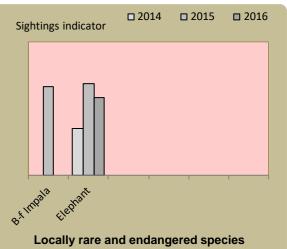

Count trend - gives the species status in the conservancy based on game count trend data.

National guideline - gives the species status in the conservancy using national guidelines for the conservancy; for example, lions may cause local problems, but are of high value and are rare at landscape level.

**Desired number** – gives the species status in the conservancy based on what the conservancy would like to have.

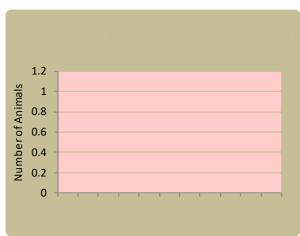

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) - there should be more than double; dark orange (very rare) – there should be more than triple; red (extinct) - the species needs to be reintroduced.

### Locally rare species

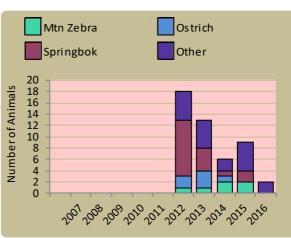

are not found very often in the conservancy and need special conservation attention.

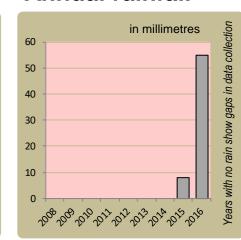

### Wildlife introductions

### Wildlife mortalities

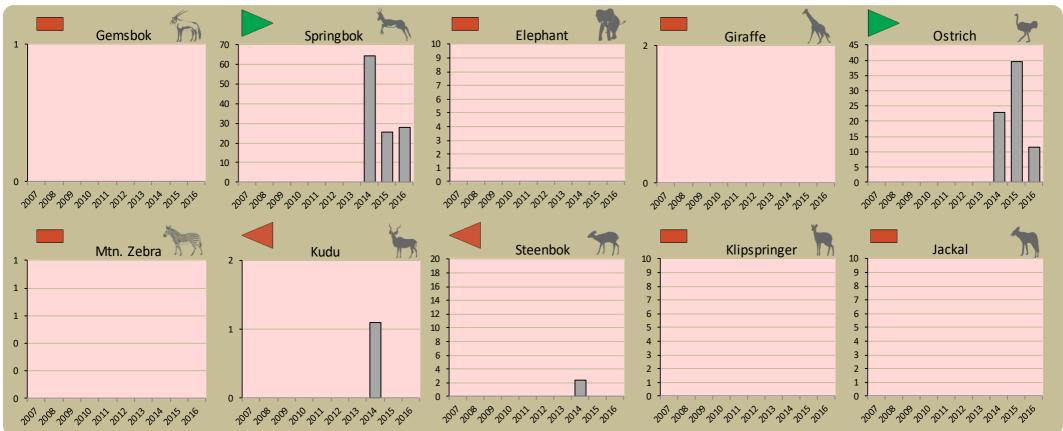

### Annual rainfall

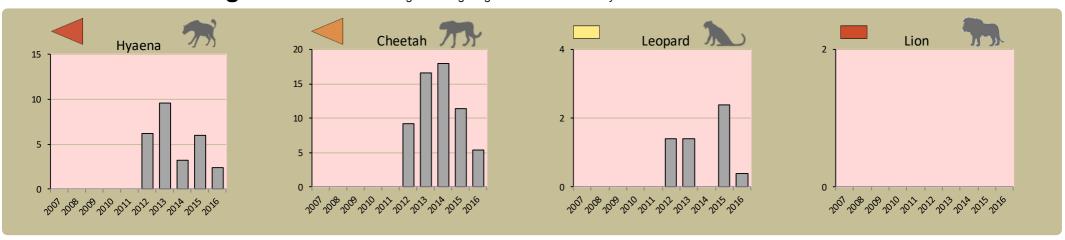

### **Annual game count**

charts show the number of animals seen each year per 100 km driven during the game count status barometers reflect the general count trend over the last 5 years

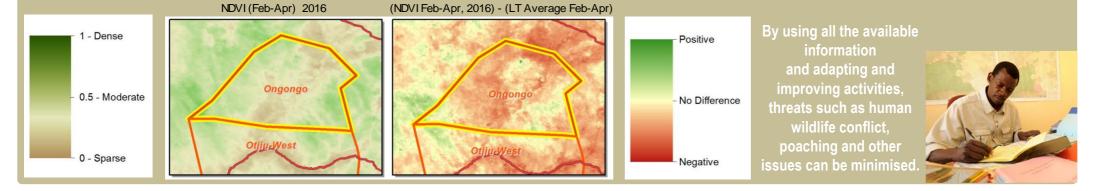

### **Predator monitoring**

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

**Vegetation monitoring** Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the long term average (2001-2015)

# Ongongo Institutional Report

### Enabling wise conservancy governance...

### **Conservancy statistics**

**Date Registered:** February 2012

Population (2011 census): 680

Size (square kilometres): 501

### **Conservancy Governance**

Number of management committee members:

Date of last AGM: Thu, August 11, 2016

Attendance at AGM: Men: 30; Women: 30

Date of next AGM: Sat, July 1, 2017

Other important issues

Budget approved?

Work plan approved?

### **Constitutional adherence**

Approved constitution

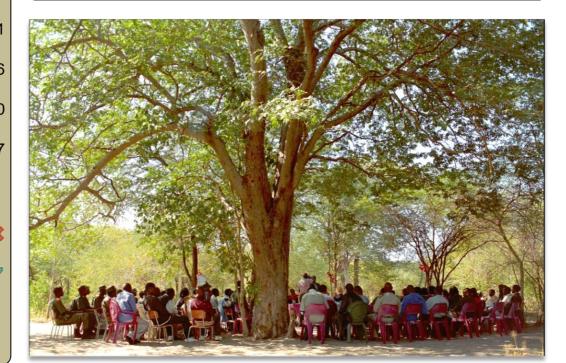

AGM held

Management and utilisation plan

Financial annual report approved at AGM

Financial report external review

Benefit distribution plan

### **Employment**

Conservancy staff: Male	5
Female	0
Community game guards:	5
Community resource monitors:	0
Lodge staff: Male	0
Female	0

### **Benefits**

Cash	In Kind
	Social Benefits

### Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Explanation of effectiveness rating
Game Management and Utilisation				Fixed route patrols were not conducted monthly.
Zonation Plan				
Benefit Distribution				
Human Wildlife Conflict Management				The activities were implemented as planned and incidents were reduced.
Sustainable Business and Financial Planning				We don't have a source of income.
Tourism				Construction of our campsite is not completed yet.
Staff Management				The game guards were trained.
Assets Management/Register				No assets register.
HIV/AIDS				Well implemented
Communication				Well implemented.
