

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$

Two of the most significant returns for the conservancy:
✓ cash income to the conservancy to cover running costs and invest in developments
✓ employment to conservancy residents

Conservancy income		N\$
Employment	Private Sector	
	Conservancy	

Cost of natural resource conflicts in 2017

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 0
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 0

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

Management performance in 2017

Category	Performance
1 Adequate staffing	Red
2 Adequate expenditure	Red
3 Audit attendance	Red
4 NR management plan	Red
5 Zonation	Red
6 Leadership	Red
7 Display of material	Green
8 Event Book modules	Red
9 Event Book quality	Red
10 Compliance	Red
11 Game census	Red
12 Reporting & adaptive m/ment	Red
13 Law enforcement	Green
14 Human Wildlife Conflict	Red
15 Harvesting management	Red
16 Sources of NR income	Red
17 Benefits produced	Red
18 Resource trends	Red
19 Resource targets	Red

Wildlife status summary in 2017

Human wildlife conflict

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2017			Animals actually used in 2017						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
No data available											

Potential value estimates (N\$) for species are based on:

- Potential trophy value - the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value - the average meat value for common species
- the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Key to the status barometer

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2017	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant	No data available				
Gemsbok					
Giraffe					
Jackal					
Klipspringer					
Kudu					
Mtn. zebra					
Ostrich					
Springbok					
Steenbok					

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

Landscape status – gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Sightings indicator □ 2015 □ 2016 □ 2017

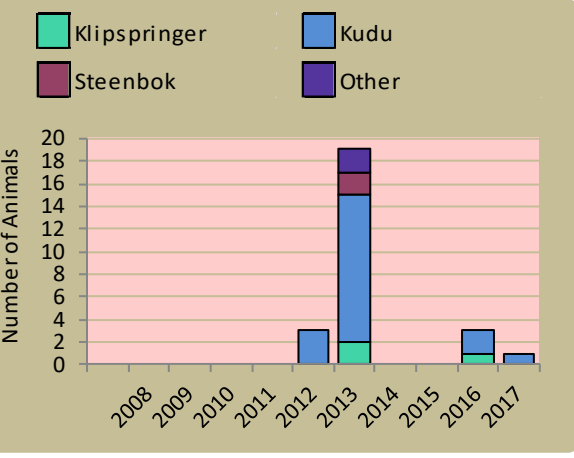

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

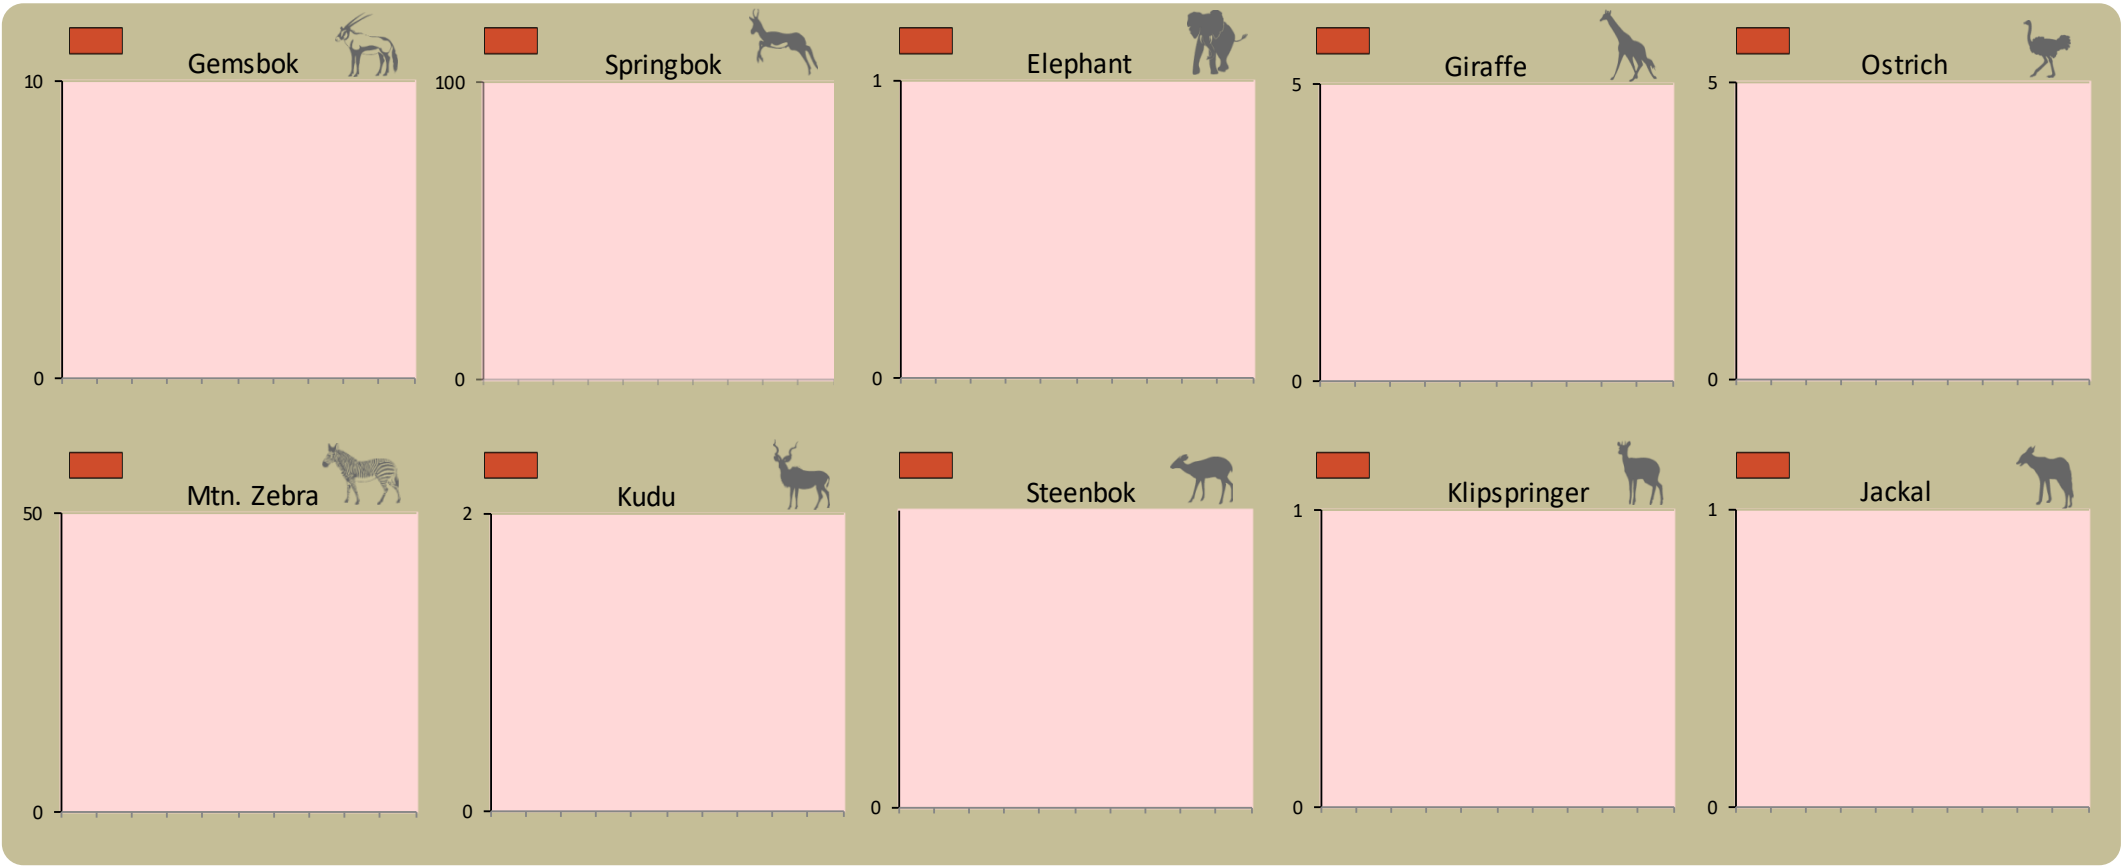

Annual rainfall

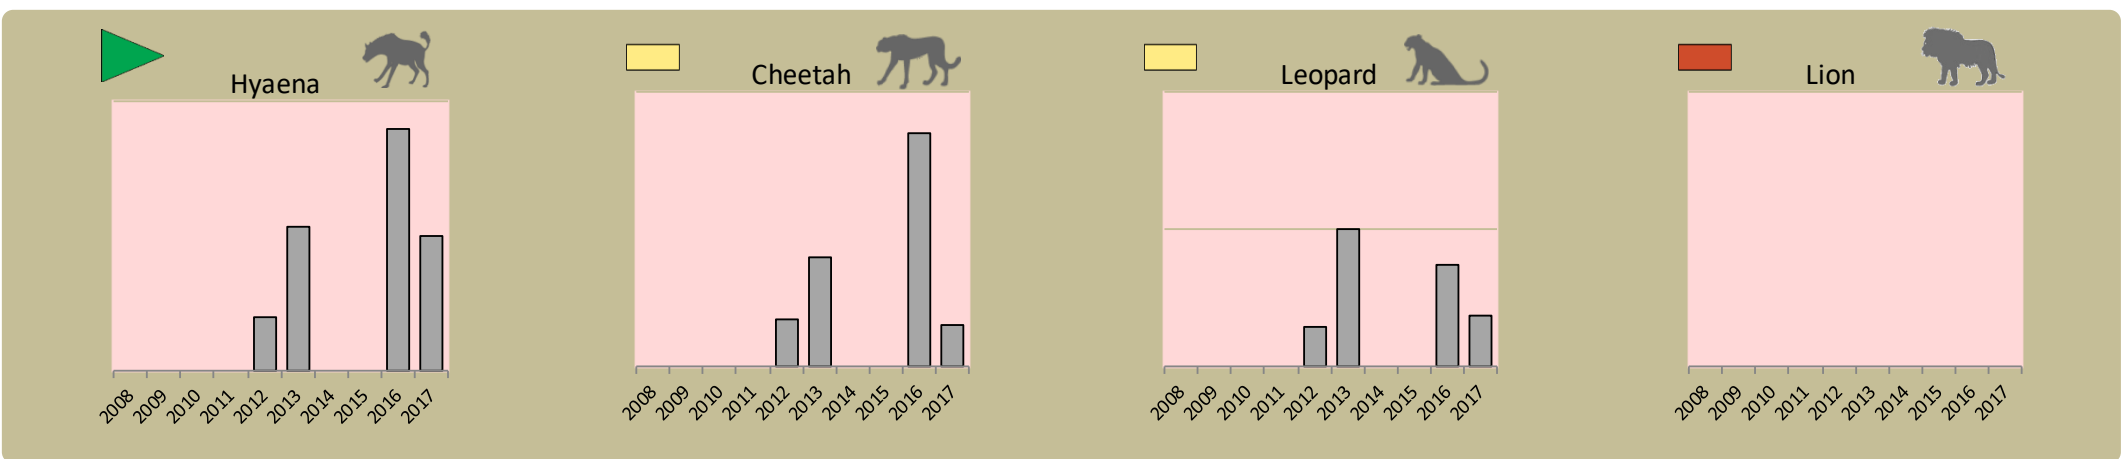

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

Predator monitoring

charts show the average number of animals seen per Event Book each year and the difference between the current year and the long term average (2001-2016)

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2016)

Population (2011 census):
Size (square kilometres):

Conservancy Governance

Number of management committee members: Men: ; Women:
Date of last AGM:
Attendance at AGM: Men: ; Women:
Date of next AGM:
Other important issues

- Financial report approved?
- Budget approved?
- Work plan approved?
- Chairperson's report approved?

Key Compliance Requirements

Was an AGM held?

Were elections held?

Is there a Benefit Distribution Plan?

Is there a Game Management and Utilisation Plan?

Was an Annual Financial Report produced?

Employment

Conservancy staff: Male	4
Female	0
Community game guards:	4
Community resource monitors:	0
Lodge staff: Male	0
Female	0

Benefits

Cash	In Kind
------	---------

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					Plan still in draft form
Zonation Plan					As the plan is in draft form, farmers don't respect zones
Benefit Distribution					
Human Wildlife Conflict Management					
Sustainable Business and Financial Planning					
Tourism					
Staff Management					
Assets Management/Register					
HIV/AIDS					
Communication
