maximising wildlife returns by minimising threats...

Summarv &

Conservancy status summary

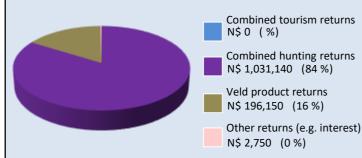

Returns from natural resources in 2017 the chart shows the main sources of returns and values

Conservancy

and their percentage of the total returns

Approximate Total Returns N\$ 1,230,040

20

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ Employment to conservancy residents

Total conflict cost estimate

| Conservancy | Conservancy income | | | | | |
|----------------------------|--------------------|----------|-------------|--|--|--|
| F ormal a sum a suf | Private Sector | 10 staff | | | | |
| Employment | Conservancy | 24 staff | N\$ 602,130 | | | |

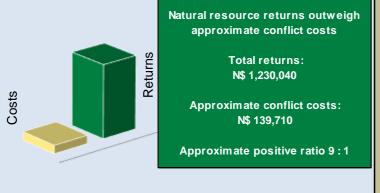

Cost of natural resource conflicts in 2017

| e | stimates are based on average national values | |
|---|---|-------------|
| | Estimated human wildlife conflict cost | N\$ 139,710 |
| | Estimated poached high value species loss | N\$ 0 |
| | | |

N\$ 139,710

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

Management performance in 2017

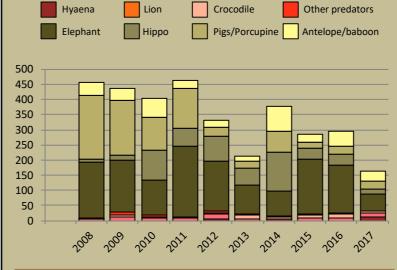

| Category | Performance |

Human wildlife conflict

Human wildlife conflict trend the chart shows the total number of incidents each year,

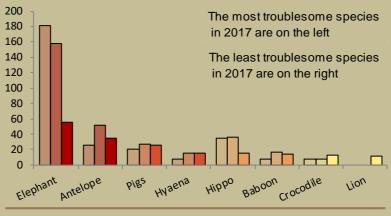

wandu

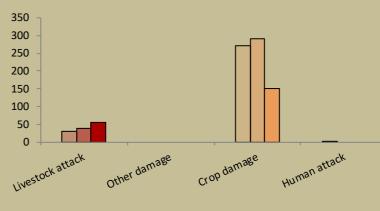

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

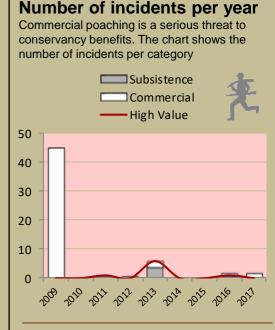

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

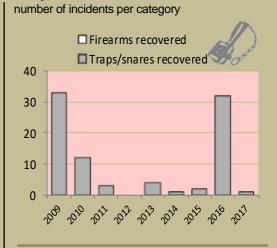

Poaching

Natural Resource

Traps and firearms recovered

Arrests and convictions

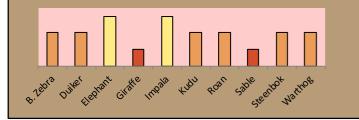

number of incidents per category

Wildlife removals - quota use and value

| | | Quota 2017 | | | Animals actually used in 2017 | | | | | | Potential |
|-----------|-------|------------|-----------|--------|-------------------------------|-----------------|-------------------|-------------------|--------------|----------------------------------|------------------------|
| Species | Total | Trophy | Other Use | Trophy | Own Use & Premium | Shoot & Sell | Capture & Sale | Problem Animal | Total Use | Potential Trophy Value N\$ | Other use Value N\$ |
| Bushpig | 1 | 1 | | 1 | | | | | 1 | 3,400 | |
| Crocodile | 2 | 1 | 1 | 1 | | | | | 1 | 26,200 | |
| Duiker | 7 | 2 | 5 | | | | | | | 1,900 | 168 |
| Eland* | 1 | 1 | | | | | | | | 10,900 | |
| Elephant* | 5 | 3 | 2 | | 1 | | | | 1 | 210,000 | 180,000 |
| Нірро | 6 | 3 | 3 | 3 | 2 | | | | 5 | 36,000 | 6,600 |
| Impala | 5 | 1 | 4 | 1 | 3 | | | | 4 | 2,600 | 816 |
| Kudu* | 6 | 3 | 3 | | 2 | | | | 2 | 5,800 | 23,250 |
| Lechwe | 6 | 6 | | 5 | | | | | 5 | 18,700 | |
| Reedbuck | 3 | 3 | | 3 | | | | | 3 | 7,500 | |
| Roan* | 1 | 1 | | | | | | | | 64,900 | |
| Sable* | 0.33 | 0 | | | | | | | | 64,400 | |

| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |

Wildlife status summary in 2017

Potential value estimates (N\$) for species are based on:

· Potential trophy value - the average trophy value for that species in the conservancy landscape

- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

- · Potential other use value the average meat value for common species
- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

| | Animals | | Wildlife Status | | | | | |
|----------|---------|-----------|-----------------|---------------------|-------------------|--|--|--|
| Species | Seen | Estimate* | Count Trend | Landscape Status | Desired Number | | | |
| B. Zebra | | | | | | | | |
| Duiker | 4 | 694 | | | | | | |
| Elephant | | | | | | | | |
| Giraffe | | | | | | | | |
| Impala | 1 | | | | | | | |
| Kudu | | | | | | | | |
| Roan | | | | | | | | |
| Sable | | | | | | | | |
| Steenbok | | | | | | | | |

Number of Animals

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

Landscape status- gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) - there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

* Estimates are for the focal conservancy and neighbouring conservancies combined

Sightings indicator

□ 2015

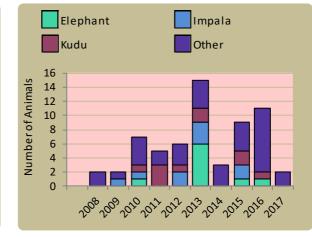

□ 2016 □ 2017

Locally rare species

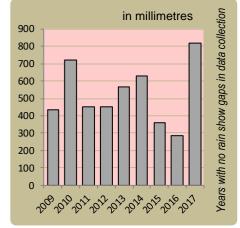

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

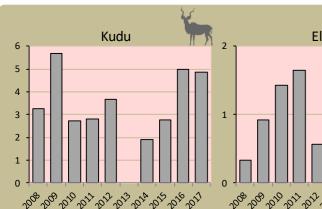

Wildlife mortalities

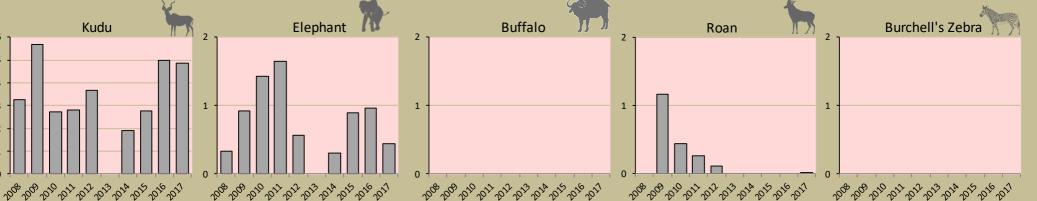

Annual rainfall

Fixed route patrols

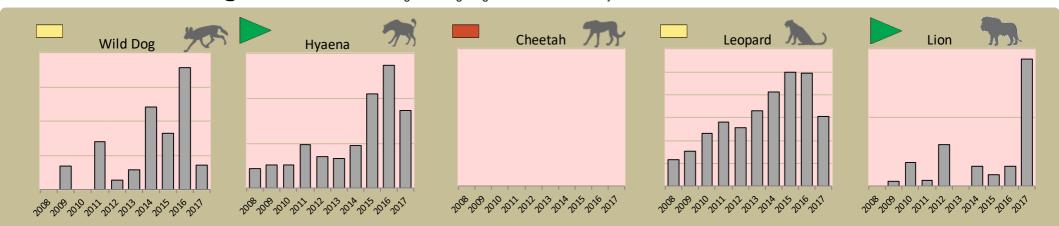

charts show the number of sightings of each species per fixed route foot patrol each year

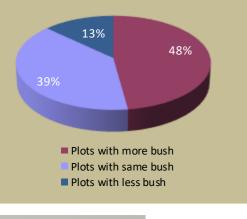

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Change in bush cover since monitoring began

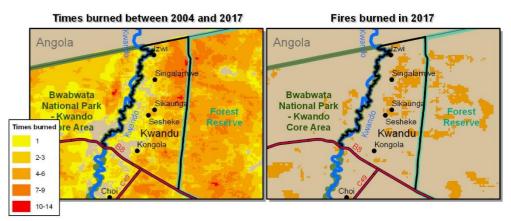

Percent tree cover / average biomass per hectare

25 Kilogrammes per hectare 20 0.8 15 0.6 10 0.4 0.2 0 Ω 2015 2016 2017 2013 2014

□ Tree cover (%) □ Average biomass (Kg/ha)

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

Percent

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

| Date Registered: | December 1999 |
|---------------------------|---------------|
| Population (2011 census): | 3520 |
| Size (square kilometres): | 190 |

Conservancy Governance

| Number of management committee | |
|--------------------------------|-----------------------|
| members: | Men: 4; Women: 9 |
| Date of last AGM: | Wed, December 6, 2017 |
| Attendance at AGM: | Men: ; Women: |
| | |
| Date of next AGM: | Thu, December 6, 2018 |
| Other important issues | |
| Financial report approved? | × |
| Budget approved? | ✓ |
| Work plan approved? | ~ |
| Chairperson's report approved? | ~ |

Key Compliance Requirements

| Was an AGM held? | ~ |
|--|----------|
| Were elections held? | v |
| Is there a Benefit Distribution Plan? | * |
| Is there a Game Management and Utilisation Plan? | ~ |
| Was an Annual Financial Report produced? | v |

Employment

| Conservancy staff: Male | 15 |
|------------------------------|----|
| Female | 9 |
| Community game guards: | 9 |
| Community resource monitors: | 5 |
| Lodge staff: Male | 0 |
| Female | 0 |

Benefits

| Cash | In Kind |
|-----------------------|-------------------|
| Traditional Authority | Build Structures |
| Funeral Assistance | Transformers |
| Community Projects | Cash Benefits |
| | Meat Distribution |
| | |
| | |
| | |

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

| Effectiveness of implementation | Poor | Fair | Good | Prev. Year | Explanation of effectiveness rating |
|---|------|------|------|---------------|---|
| Game Management and Utilisation | | | | | Not all trophy animals were seen or hunted |
| Zonation Plan | | | | | More awareness to local members is needed as some are eager to settle in the wildlife corridors |
| Benefit Distribution | | | | | Still need more benefits to go to the people |
| Human Wildlife Conflict Management | | | | | Not enough funds for the payment of offsets |
| Sustainable Business and Financial Planning | | | | | Still need to work towards reducing expenditure and distributing benefits to members |
| Tourism | | | | | Currently the conservancy is in the process of terminating the contract with its partner and looking for a new investor |
| Staff Management | | | | | More training is needed for the treasurer and the CGs on investigation in illegal activities |
| Assets Management/Register | | | | | All the assets are accounted for and are within the conservancy |
| HIV/AIDS | | | | | More information booklets in vernacular language are needed |
| Communication | | | | | Radio communication to members is needed |
