

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 530,730

Two of the most significant returns for the conservancy:
 ✓ cash income to the conservancy to cover running costs and invest in developments
 ✓ Employment to conservancy residents

Conservancy income		N\$ 429,930	
Employment	Private Sector	3 staff	N\$ 100,800
	Conservancy	12 staff	N\$ 332,530

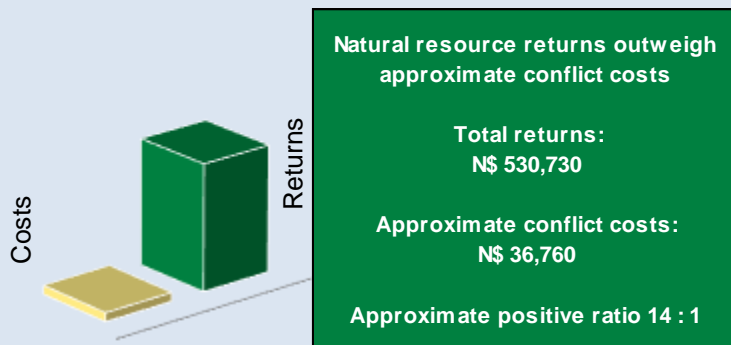

Cost of natural resource conflicts in 2017

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 36,760
Estimated poached high value species loss	N\$ 0
Total conflict cost estimate	N\$ 36,760

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

Management performance in 2017

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Good
4 NR management plan	Good
5 Zonation	Good
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Good
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Good
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Good
19 Resource targets	Good

Wildlife status summary in 2017

Key to the status barometer

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

Human wildlife conflict

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2017			Animals actually used in 2017						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Caracal	1	1								2,400	
Duiker	2	1	1							1,800	168
Eland*	1	1								10,900	
Elephant*	3	1	2		1				1	142,300	180,000
Gemsbok	5	2	3		2				2	2,600	2,592
Giraffe	1		1						1		13,440
Hyaena	1	1								3,000	
Impala	2	1	1							2,600	816
Kudu*	5	1	4		2				3	6,200	31,000
Leopard	0.167	0.167								11,700	
Roan*	1	1								64,900	
Warthog	2	1	1							1,600	480

Potential value estimates (N\$) for species are based on:

- **Potential trophy value** - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- **Potential other use value** - the average meat value for common species - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Not all data or species are shown on this report; use your Event Book for more information

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen	Estimate*	Wildlife Status		
			Count Trend	Landscape Status	Desired Number
B. Zebra					
Duiker	18				
Elephant	36				
Giraffe	12				
Impala					
Kudu	23	152			
Roan	13	114			
Sable					
Steenbok	3				
Warthog	1				

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

Landscape status– gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

* Estimates are for the focal conservancy and neighbouring conservancies combined

Locally rare species

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

Annual rainfall

Fixed route patrols

charts show the number of sightings of each species per fixed route foot patrol each year

Predator monitoring

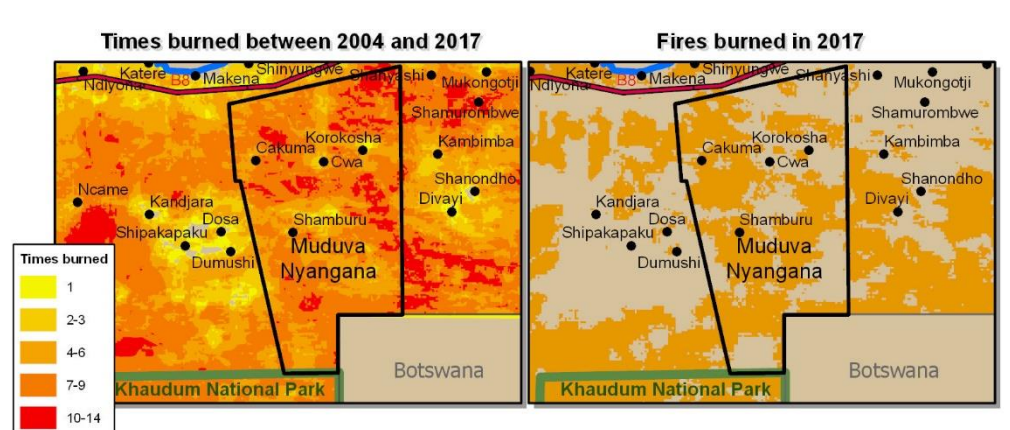

charts show the average number of animals seen per Event Book each year
 status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Fire monitoring

Wildlife provides a wide range of benefits. Some wildlife can cause conflicts, but all wildlife is of value to tourism, trophy hunting and a healthy environment.

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy Statistics

Date Registered:	September 2005
Population (2011 census):	1730
Size (square kilometres):	615

Conservancy Governance

Number of management committee members:	Men: 1; Women: 7
Date of last AGM:	Mon, November 20, 2017
Attendance at AGM:	Men: 111; Women: 117
Date of next AGM:	Thu, November 15, 2018
Other important issues	
Financial report approved?	✓
Budget approved?	✓
Work plan approved?	✓
Chairperson's report approved?	✓

Key Compliance Requirements

Was an AGM held?	✓
Were elections held?	✓
Is there a Benefit Distribution Plan?	✓
Is there a Game Management and Utilisation Plan?	✓
Was an Annual Financial Report produced?	✓

Employment

Conservancy staff: Male	10
Female	2
Community game guards:	9
Community resource monitors:	0
Lodge staff: Male	0
Female	0

Benefits

Cash	In Kind
Funeral Assistance	Cash Benefit
Community Projects	Hwc Members
Haccis	Meat Distribution
Hwc Offset	Members Wages
	Training

Conservancy Self Evaluation

How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					Lack of transport for fire management activities
Zonation Plan					The MC gave advice on mitigation but there are some members who are not adhering to these conditions
Benefit Distribution					The benefits are reaching members and the conservancy management is doing their best to implement
Human Wildlife Conflict Management					Lack of resources to successfully implement these activities
Sustainable Business and Financial Planning					All accounts are accounted for
Tourism					Not all species on the quota are hunted
Staff Management					Staff members who disobey instructions
Assets Management/Register					Assets are not properly managed
HIV/AIDS					Not all activities were implemented, even though facilitator is at the office
Communication					Members are informed about the benefits within conservation
