#### Annual Conservancy Audit Report Status Summary & Natural Resource Report

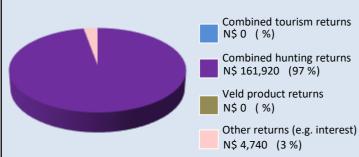

# maximising wildlife returns by minimising threats...

# **Conservancy status summary**

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

#### Approximate Total Returns N\$ 166,660

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ employment to conservancy residents

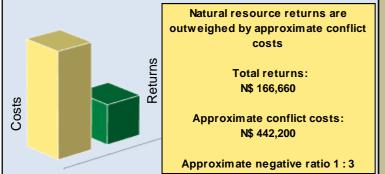

Conservancy income			N\$ 166,660
	Private Sector		
Employment	Conservancy		

#### Cost of natural resource conflicts in 2017

Estimated human wildlife conflict cost	N\$ 434,450
Estimated poached high value species loss	N\$ 7,750
Total conflict cost estimate	N\$ 442,200

#### Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

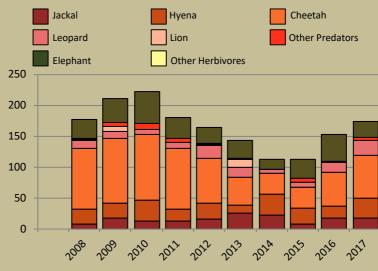

#### Management performance in 2017

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive m/ment	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

# Human wildlife conflict

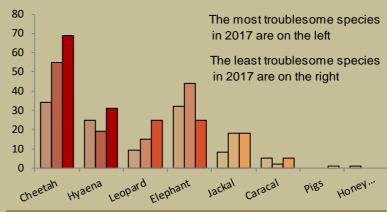

#### Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

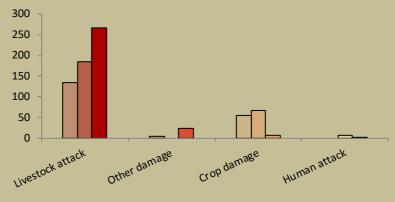

#### Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

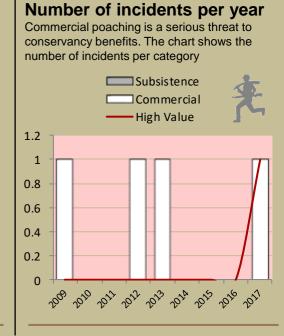

#### Type of damage by problem animals 2015-2017

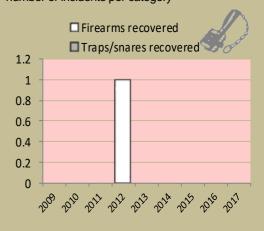

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

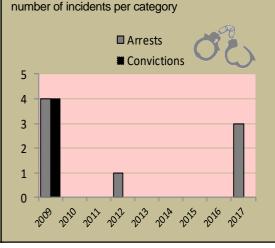

# Poaching

#### Traps and firearms recovered number of incidents per category

### Arrests and convictions

## Wildlife removals - quota use and value

		Quota 201	17	Animals actually used in 2017			- Potential	Potential				
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$	
Baboon	5	5								600		
Cheetah	1	1								14,000		
Duiker	2	2								2,400		
Gemsbok	1	1								4,200		
Hyaena	1	1								9,100		
Jackal	5	5								500		
Klipspringer	2	2								5,200		
Kudu*	12	6	6		1				1	9,400	46,500	
Leopard	0.33	0.33								32,900		
Ostrich	20	5	15		3				3	2,000	720	
Springbok	100	15	85		26	30			66	2,700	624	
Steenbok	3	3								3,500		
Mtn Zebra	2	2								5,600		

Wildlife status summary in 2017

#### Potential value estimates (N\$) for species are based on:

• Potential trophy value - the average trophy value for that species in the conservancy landscape

- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

- · Potential other use value the average meat value for common species
- the average live sale value of each high value species (indicated with an \*)[high value species are never used for meat]

### Key to the status barometer

# monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

	Animals	Estimated	v	/ildlife Statu	ıs
Species	Seen 2017	population range	Count Trend	National Guideline	Desired Status
Elephant					
Gemsbok					
Giraffe					
Jackal					
Klipspringer					
Kudu					
Mtn. zebra					
Ostrich	14	80 - 120			
Springbok	74	420 - 1130			
Steenbok	4	24 - 250			

#### Wildlife Status

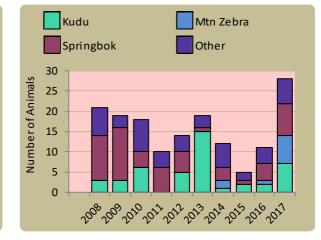

Count trend - gives the species status in the conservancy based on game count trend data.

Landscape status- gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

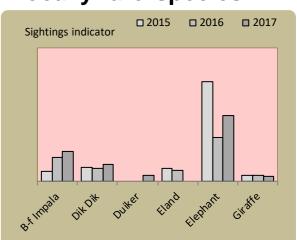

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) – there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

#### Wildlife mortalities

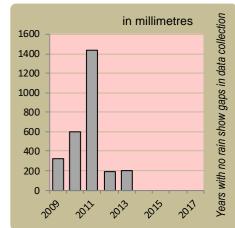

Locally rare species

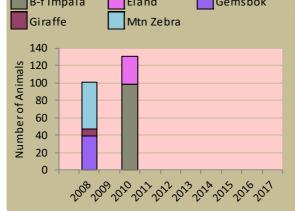

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

### Annual rainfall

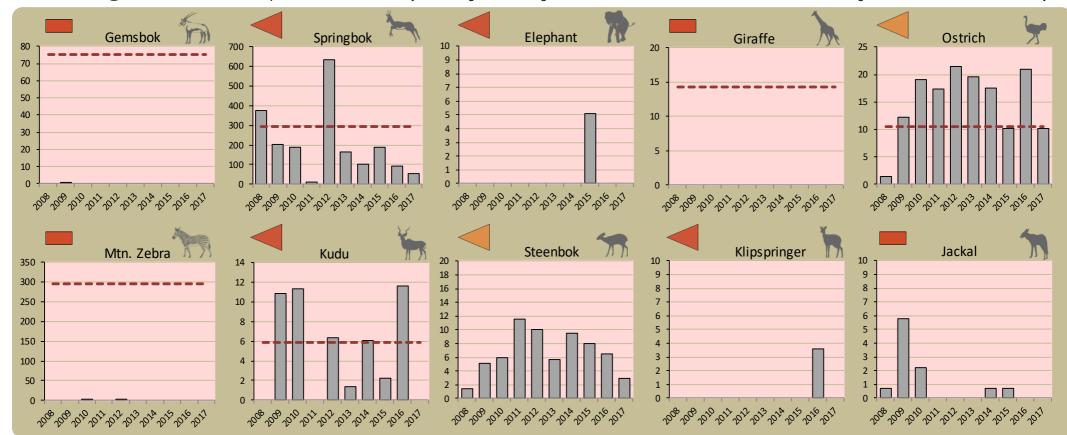

Wildlife introductions

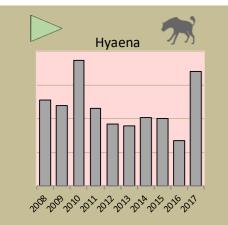

#### Annual game count

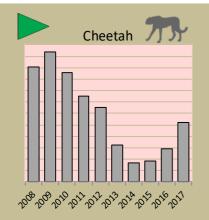

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

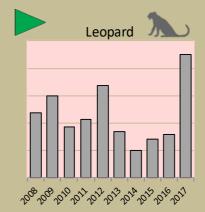

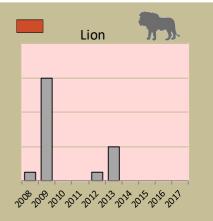

## **Predator monitoring**

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

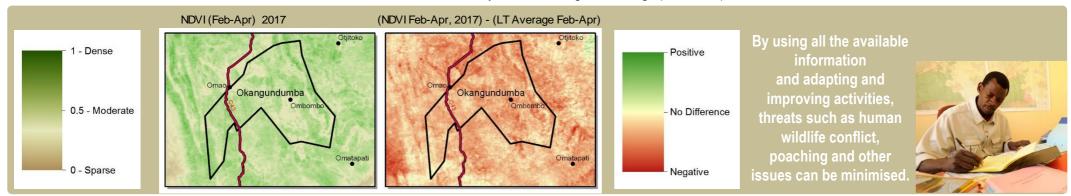

**Vegetation monitoring** Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2016)

Conservancy Audit Report

Annual

20

17

Date Registered:	July 2003
Population (2011 census):	1670
Size (square kilometres):	1131

# **Conservancy Governance**

Number of management committee members:	Men: 2; Women: 14
Date of last AGM:	Thu, August 31, 2017
Attendance at AGM:	Men: ; Women:
Date of next AGM:	Fri, July 6, 2018
Other important issues	
Financial report approved?	✓
Budget approved?	×
Work plan approved?	×
Chairperson's report approved?	×

# **Key Compliance Requirements**

Was an AGM held?	<b>V</b>
Were elections held?	*
Is there a Benefit Distribution Plan?	*
Is there a Game Management and Utilisation Plan?	<b>v</b>
Was an Annual Financial Report produced?	<b>v</b>

#### **Benefits**

Cash	In Kind
Traditional Authority Community Projects	
Community Frojects	

**Conservancy Self Evaluation** How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					All members following the plans; made changes to the management plan.
Zonation Plan					Changes made need to be approved by members
Benefit Distribution					No implementation done
Human Wildlife Conflict Management					No implementation done
Sustainable Business and Financial Planning					No implementation done
Tourism					No implementation done
Staff Management					No implementation done
Assets Management/Register					No implementation done
HIV/AIDS					No implementation done
Communication					No implementation done
