

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$

Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy income	N\$
Employment	Private Sector
	Conservancy

Cost of natural resource conflicts in 2017

estimates are based on average national values

Estimated human wildlife conflict cost	N\$ 590,650
Estimated poached high value species loss	N\$ 15,500
Total conflict cost estimate	N\$ 606,150

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

Management performance in 2017

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive m/ment	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

Wildlife status summary in 2017

Key to the status barometer

Human wildlife conflict

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Poaching

Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

Wildlife removals – quota use and value

Species	Quota 2017			Animals actually used in 2017						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Baboon	5	5								600	
Cheetah	1	1								14,000	
Duiker	2	2								2,400	
B-f Impala	2	2								10,400	
Jackal	5	5								500	
Klipspringer	1	1								5,200	
Kudu*	13	6	7		1				1	9,400	54,250
Leopard	1	1								32,900	
Ostrich	15	5	10							2,000	720
Springbok	30	10	20		9				9	2,700	624
Steenbok	5	5								3,500	
Warthog	1	1								2,800	
Mtn Zebra	6	3	3		1				1	5,600	3,984

Potential value estimates (N\$) for species are based on:

- Potential trophy value - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value - the average meat value for common species - the average live sale value of each high value species (indicated with an *) [high value species are never used for meat]

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Species	Animals Seen 2017	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Dark Orange	Yellow	
Gemsbok			Dark Orange	Orange	
Giraffe			Dark Orange	Yellow	
Jackal	2		Yellow	Yellow	
Klipspringer			Dark Orange	Yellow	
Kudu	2	12 - 50	Dark Orange	Orange	
Mtn. zebra			Dark Orange	Yellow	
Ostrich	1	7 - 10	Dark Orange	Yellow	
Springbok	48	179 - 480	Dark Orange	Yellow	
Steenbok	3	19 - 200	Dark Orange	Yellow	

Wildlife Status

Count trend – gives the species status in the conservancy based on game count trend data.

Landscape status – gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

Desired number – gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) – there should be less;
light green (common) – the desired number is reached;
yellow (uncommon) – there should be more;
light orange (rare) – there should be more than double;
dark orange (very rare) – there should be more than triple;
red (extinct) – the species needs to be reintroduced.

Locally rare species

Sightings indicator □ 2015 □ 2016 □ 2017

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Wildlife introductions

Wildlife mortalities

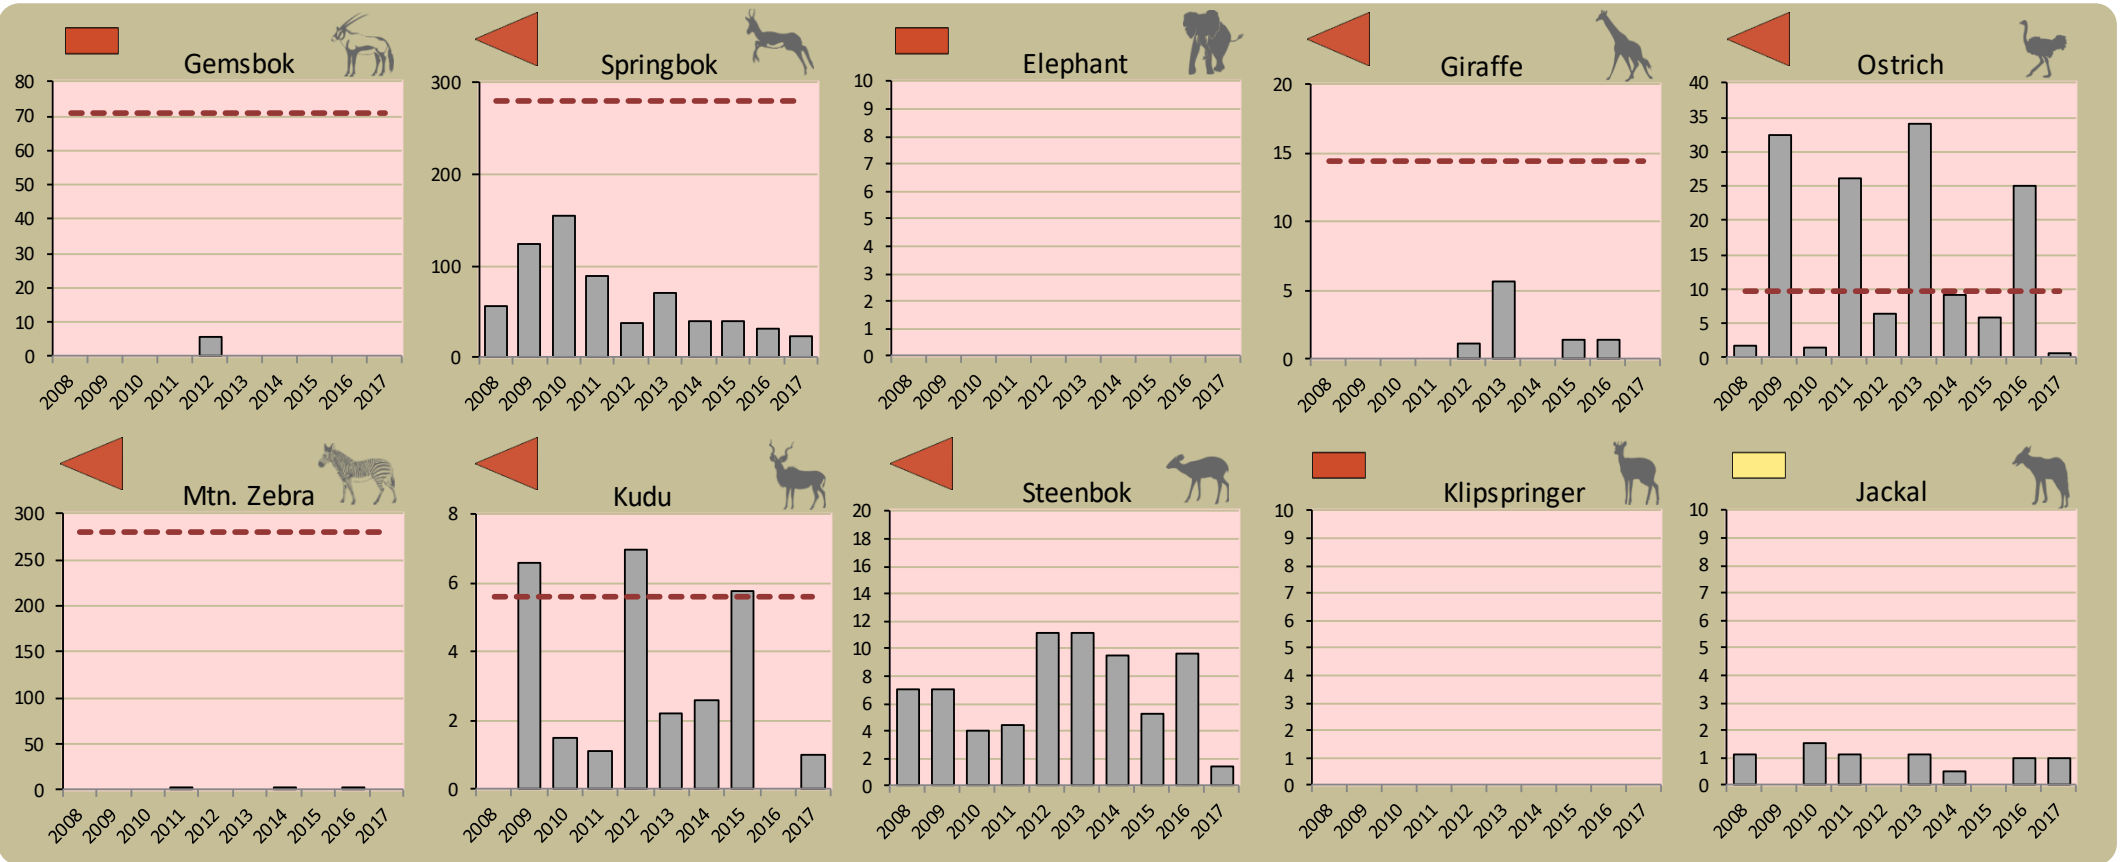

Annual rainfall

Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

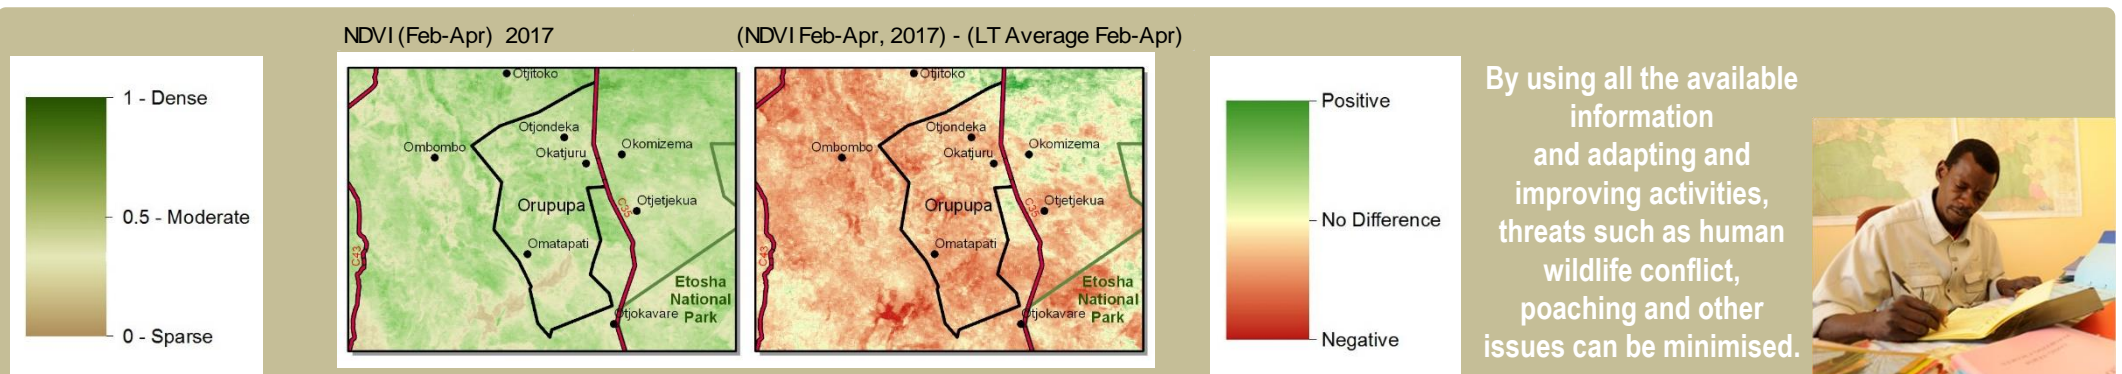

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2016)

By using all the available information and adapting and improving activities, threats such as human wildlife conflict, poaching and other issues can be minimised.

Enabling wise conservancy governance...

Conservancy statistics

Date Registered:	March 2011
Population (2011 census):	1820
Size (square kilometres):	1234

Conservancy Governance

Number of management committee members:	Men: 4; Women: 10
Date of last AGM:	Fri, September 29, 2017
Attendance at AGM:	Men: ; Women:
Date of next AGM:	Sat, July 28, 2018
Other important issues	
Financial report approved?	✓
Budget approved?	✓
Work plan approved?	✗
Chairperson's report approved?	✓

Key Compliance Requirements

Was an AGM held?	✓
Were elections held?	✗
Is there a Benefit Distribution Plan?	✗
Is there a Game Management and Utilisation Plan?	✗
Was an Annual Financial Report produced?	✓

Employment

Conservancy staff: Male	8
Female	1
Community game guards:	6
Community resource monitors:	0
Lodge staff: Male	0
Female	0

Benefits

Cash	In Kind
	Meat Distribution (springbok)
	Meat Donation (springbok)

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					GMU Plan is nowhere to be seen
Zonation Plan					
Benefit Distribution					Nothing went to members
Human Wildlife Conflict Management					No plan is in place
Sustainable Business and Financial Planning					No mismanagement of funds
Tourism					No plan in place yet
Staff Management					Nothing was done regarding staff development
Assets Management/Register					No money to buy assets
HIV/AIDS					A plan is needed
Communication					Managed to maintain communications
