Annual Conservancy Audit Report Audit Report

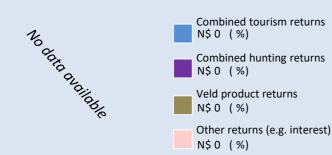

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$

Two of the most significant returns for the conservancy: ✓ cash income to the conservancy to cover running costs and invest in developments

✓ employment to conservancy residents

Conservancy	Conservancy income							
	Private Sector							
Employment	Conservancy							

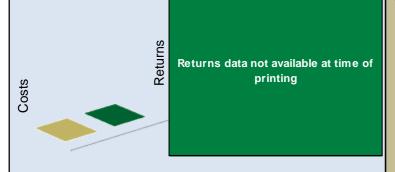

Cost of natural resource conflicts in 2017

e	stin	nate	s ar	e bas	sed or	average	e natior	nal va	alues	
	_									

Total conflict cost estimate	N\$ 0
Estimated poached high value species loss	N\$ 0
Estimated human wildlife conflict cost	N\$ 0

Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

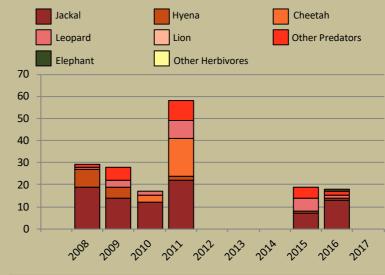

Management performance in 2017

Category	Performance
1 Adequate staffing	
2 Adequate expenditure	
3 Audit attendance	
4 NR management plan	
5 Zonation	
6 Leadership	
7 Display of material	
8 Event Book modules	
9 Event Book quality	
10 Compliance	
11 Game census	
12 Reporting & adaptive m/ment	
13 Law enforcement	
14 Human Wildlife Conflict	
15 Harvesting management	
16 Sources of NR income	
17 Benefits produced	
18 Resource trends	
19 Resource targets	

Human wildlife conflict

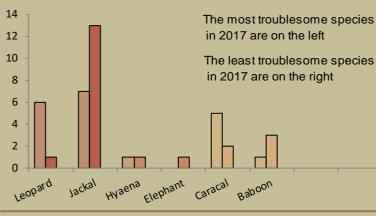

Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

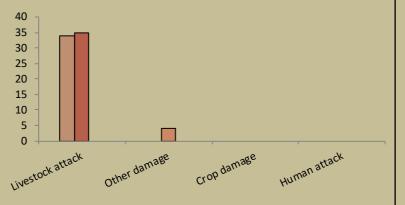

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

Type of damage by problem animals 2015-2017

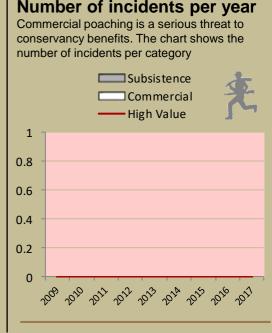

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

Wildlife removals - quota use and value

Quota 2017			Animals actually used in 2017						- Potential	Potential	
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
Baboon	5	5								100	
Caracal	1	1								2,400	
Cheetah	1	1								6,000	
Jackal	5	5								100	
Kudu*	2	1	1							4,100	7,750
Ostrich	15	5	10							700	720
Springbok	60	10	50							900	624
Warthog	3	3								2,100	

Poaching

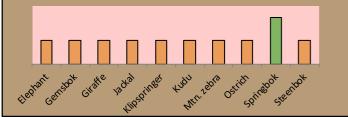

Traps and firearms recovered

Arrests and convictions number of incidents per category

Wildlife status summary in 2017

Potential value estimates (N\$) for species are based on:

• Potential trophy value - the average trophy value for that species in the conservancy landscape

- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area

· Potential other use value - the average meat value for common species

- the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

	Animals	Estimated	v	/ildlife Statu	JS
Species	Seen 2017	population range	Count Trend	National Guideline	Desired Status
Elephant					
Gemsbok					
Giraffe					
Jackal	1				
Klipspringer					
Kudu					
Mtn. zebra					
Ostrich	8	36 - 60			
Springbok	42	145 - 390			
Steenbok	1	2 - 20			

Wildlife Status

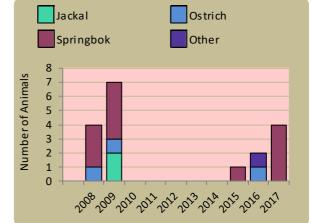

Count trend - gives the species status in the conservancy based on game count trend data.

Landscape status- gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

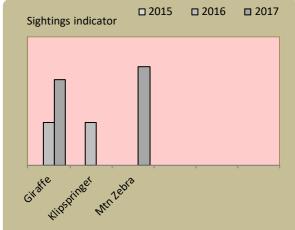

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; light orange (rare) – there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

Wildlife mortalities

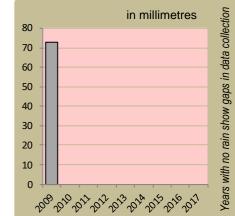

Locally rare species

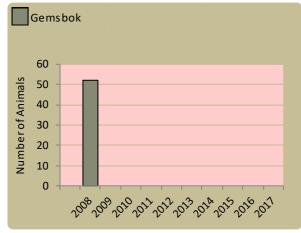

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

Annual rainfall

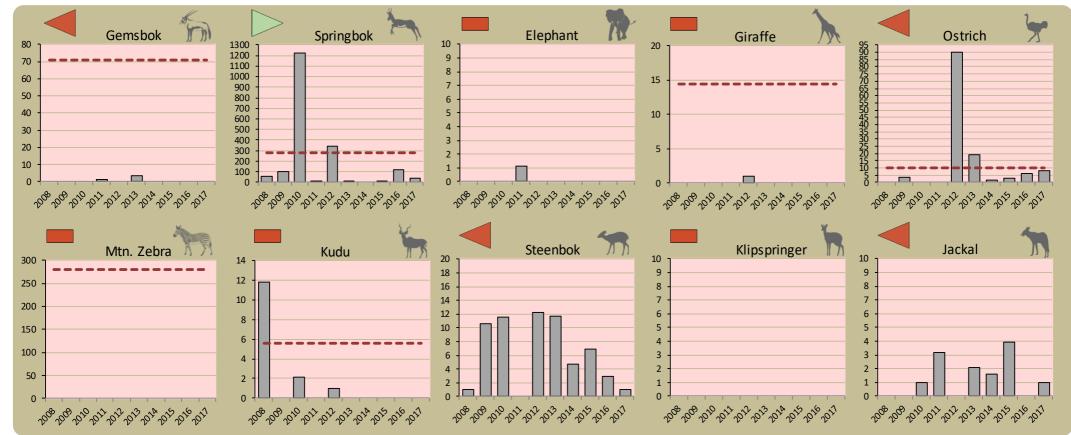

Wildlife introductions

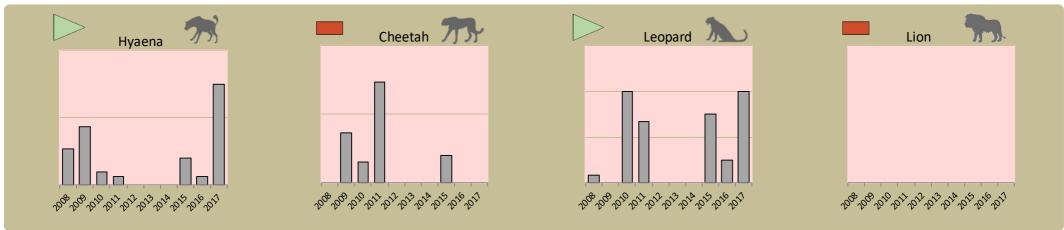

Annual game count

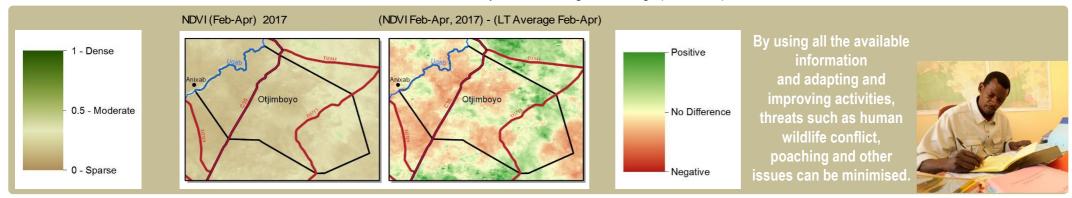

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

Predator monitoring charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

Vegetation monitoring Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2016)

Key Compliance Requirements

Was an AGM held?	«
Were elections held?	*
Is there a Benefit Distribution Plan?	 ✓
Is there a Game Management and Utilisation Plan?	v
Was an Annual Financial Report produced?	v

Employment

Conservancy staff: Male	2
Female	0
Community game guards:	2
Community resource monitors:	0
Lodge staff: Male	0
Female	0

Benefits

Cash	In Kind
	Meat Distribution

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					Need training and funds for fixed route patrols
Zonation Plan					Fully implemented according to the plan
Benefit Distribution					Fully implemented according to the plan
Human Wildlife Conflict Management					Lack of funds
Sustainable Business and Financial Planning					
Tourism					
Staff Management					
Assets Management/Register					
HIV/AIDS					
Communication
