# maximising wildlife returns by minimising threats...

# **Conservancy status summary**

Returns from natural resources in 2017 the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 332,590

#### Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

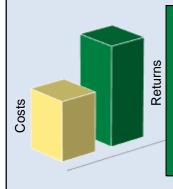

Conscivancy	14φ 332,330		
<b>Employment</b>	Private Sector		
	Conservancy	6 staff	N\$ 56,950

#### Cost of natural resource conflicts in 2017

estimates are based on average national values

#### Natural resource cost—return ratio in 2017

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

> **Total returns:** N\$ 332,590

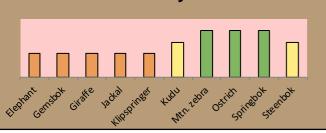

Approximate conflict costs: N\$ 197,540

Approximate positive ratio 1.7:1

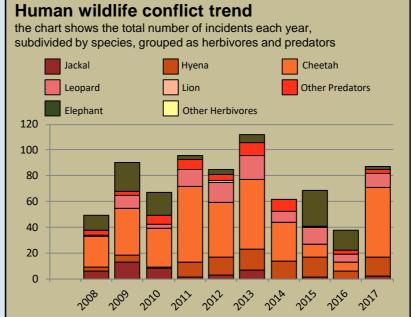

#### Management performance in 2017

#### Wildlife status summary in 2017

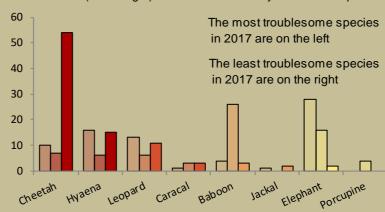

### **Human wildlife conflict**

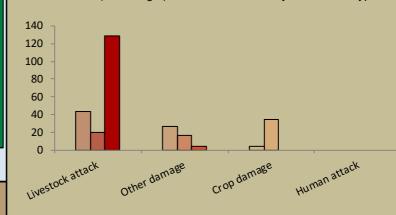

#### Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

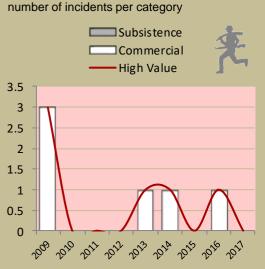

#### Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

# **Poaching**

#### Traps and firearms recovered

number of incidents per category

#### **Arrests and convictions**

number of incidents per category

# Wildlife removals - quota use and value

		Quota 201	L <b>7</b>	Animals actually used in 2017					- Potential	Potential	
Species	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use	Trophy Value N\$	Other use Value N\$
Baboon	5	5		5					5	600	
Caracal	1	1								2,400	
Cheetah	0.667	0.667		1					1	14,000	
Duiker	1	1		1					1	2,400	
Gemsbok	4	2	2							4,200	2,592
Hyaena	0.33	0.33								9,100	
B-f Impala	1	1		1					1	10,400	
Jackal	5	5		5					5	500	
Klipspringer	2	2		2					2	5,200	
Kudu*	25	7	18	7	9	6			22	9,400	139,500
Leopard	1	1		1					1	32,900	
Ostrich	8	3	5	3	3	3			9	2,000	720
Springbok	20	5	15	5	5	5			15	2,700	624
Steenbok	2	2		2					2	3,500	
Mtn Zebra	8	5	3	5	2	3			10	5,600	3,984

#### Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- · Potential other use value the average meat value for common species
  - the average live sale value of each high value species (indicated with an \*)[high value species are never used for meat]

# Key to the status barometer

Wildlife status extinct very rare rare uncommon common abundant reasonable weak/bad good Management performance & other data

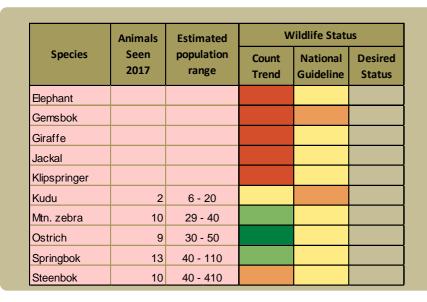

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

# Natural Resource Repo

# monitoring numbers and trends for a healthy conservancy...

### **Current wildlife numbers and status**

#### Wildlife Status

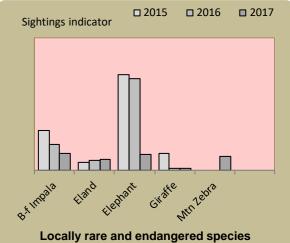

Count trend - gives the species status in the conservancy based on game count trend data.

Landscape status- gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

**Desired number** – gives the species status in the conservancy based on what the conservancy would like to have.

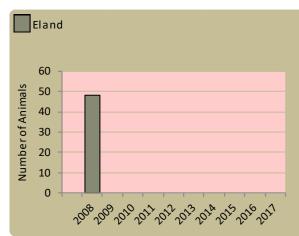

dark green (abundant) - there should be less; light green (common) - the desired number is reached; yellow (uncommon) - there should be more; **light orange** (rare) – there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

# Locally rare species

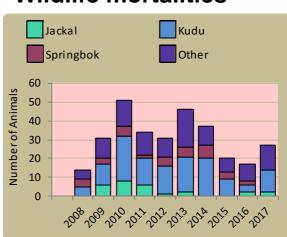

are not found very often in the conservancy and need special conservation attention.

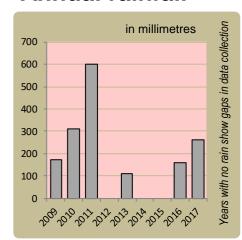

### Wildlife introductions

### Wildlife mortalities

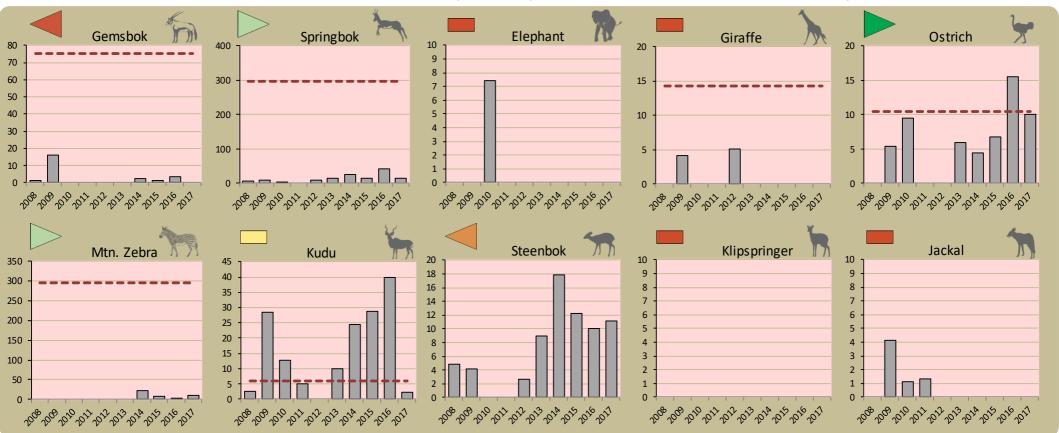

### **Annual rainfall**

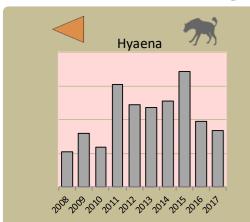

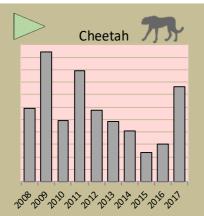

## **Annual game count**

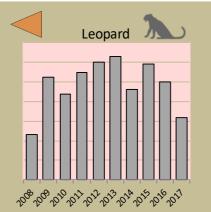

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

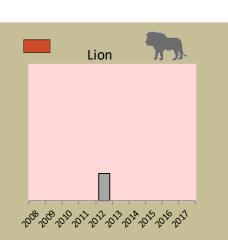

Predator monitoring charts show the average number of animals seen per Event Book each year staffus harometers reflect the general staffus and the staffus harometers reflect the general staffus harometers haro

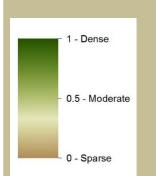

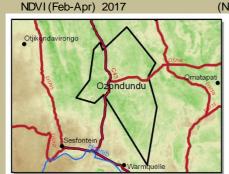

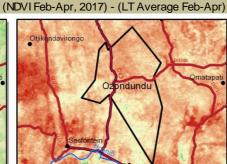

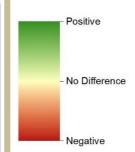

**Vegetation monitoring** Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the long term average (2001-2016)

By using all the available information and adapting and improving activities, poaching and other issues can be minimised

# Ozondundu Institutional Report

# Enabling wise conservancy governance...

## **Conservancy statistics**

**Date Registered:** July 2003

Population (2011 census): 410

Size (square kilometres): 745

### **Conservancy Governance**

**Number of management committee** 

members:

Sat, September 30, 2017 Date of last AGM:

**Attendance at AGM:** Men: ; Women:

Date of next AGM: Tue, July 31, 2018

Other important issues

Financial report approved?

Budget approved?

Work plan approved?

Chairperson's report approved?

## **Key Compliance Requirements**

Was an AGM held?	
Were elections held?	*
Is there a Benefit Distribution Plan?	✓ .
Is there a Game Management and Utilisation Plan?	✓
Was an Annual Financial Report produced?	✓

### **Employment**

Conservancy staff: Male	5
Female	1
Community game guards:	5
Community resource monitors:	0

Lodge staff: Male

**Female** 

0

### **Benefits**

Cash	In Kind
Traditional Authority	
Community Projects	

#### **Conservancy Self Evaluation** How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					Illegal settlers in the conservancy; court case underway to have them evicted
Zonation Plan					Illegal settlers in the conservancy; court case underway to have them evicted
Benefit Distribution					It was recently implemented so its not yet fully functional
Human Wildlife Conflict Management					
Sustainable Business and Financial Planning					
Tourism					
Staff Management					
Assets Management/Register					
HIV/AIDS					
Communication
