

maximising wildlife returns by minimising threats...

### Conservancy status summary

#### Returns from natural resources in 2017

the chart shows the main sources of returns and values and their percentage of the total returns

Approximate Total Returns N\$ 91,750

#### Two of the most significant returns for the conservancy:

- ✓ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

Conservancy income	N\$ 91,750
--------------------	------------

Employment	Private Sector		
	Conservancy	6 staff	N\$ 50,850

#### Cost of natural resource conflicts in 2017

estimates are based on average national values

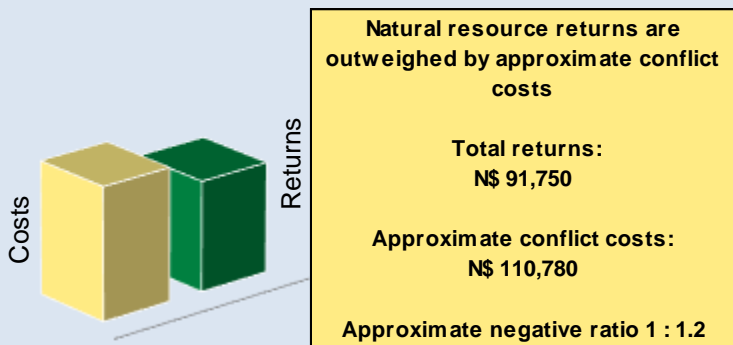

Estimated human wildlife conflict cost	N\$ 110,780
--	-------------

Estimated poached high value species loss	N\$ 0
---	-------

<b>Total conflict cost estimate</b>	<b>N\$ 110,780</b>
-------------------------------------	--------------------

#### Natural resource cost-return ratio in 2017

the chart shows the approximate ratio of returns to costs

#### Management performance in 2017

Category	Performance
1 Adequate staffing	Good
2 Adequate expenditure	Good
3 Audit attendance	Reasonable
4 NR management plan	Good
5 Zonation	Weak/Bad
6 Leadership	Good
7 Display of material	Good
8 Event Book modules	Good
9 Event Book quality	Good
10 Compliance	Good
11 Game census	Good
12 Reporting & adaptive m/ment	Good
13 Law enforcement	Good
14 Human Wildlife Conflict	Good
15 Harvesting management	Good
16 Sources of NR income	Good
17 Benefits produced	Good
18 Resource trends	Weak/Bad
19 Resource targets	Good

#### Wildlife status summary in 2017

### Key to the status barometer

#### Wildlife status

extinct very rare rare uncommon common abundant

#### Management performance & other data

weak/bad reasonable good

#### Success/threat flags

- success/benefit created
- weakness/action needed

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

### Human wildlife conflict

#### Human wildlife conflict trend

the chart shows the total number of incidents each year, subdivided by species, grouped as herbivores and predators

#### Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

#### Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

### Poaching

#### Number of incidents per year

Commercial poaching is a serious threat to conservancy benefits. The chart shows the number of incidents per category

#### Traps and firearms recovered

number of incidents per category

#### Arrests and convictions

number of incidents per category

### Wildlife removals – quota use and value

Species	Quota 2017			Animals actually used in 2017						Potential Trophy Value N\$	Potential Other use Value N\$
	Total	Trophy	Other Use	Trophy	Own Use & Premium	Shoot & Sell	Capture & Sale	Problem Animal	Total Use		
Baboon	5	5								600	
Cheetah	1	1								14,000	
Gemsbok	40	15	25			2			2	4,200	2,592
Giraffe	1	1								10,300	
Jackal	5	5								500	
Ostrich	15	5	10							2,000	720
Springbok	100	20	80	1		1			2	2,700	624
Steenbok	2	2								3,500	
Mtn Zebra	50	5	45	1					1	5,600	3,984

#### Potential value estimates (N\$) for species are based on:

- Potential trophy value - the average trophy value for that species in the conservancy landscape - trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value - the average meat value for common species - the average live sale value of each high value species (indicated with an \*) [high value species are never used for meat]

# monitoring numbers and trends for a healthy conservancy...

## Current wildlife numbers and status

Species	Animals Seen 2017	Estimated population range	Wildlife Status		
			Count Trend	National Guideline	Desired Status
Elephant			Red	Yellow	
Gemsbok	43	222 - 290	Red	Orange	
Giraffe	2	4 - 10	Red	Yellow	
Jackal			Red	Yellow	
Klipspringer			Red	Yellow	
Kudu			Red	Orange	
Mtn. zebra	63	259 - 340	Red	Yellow	
Ostrich	17	89 - 140	Green	Yellow	
Springbok	71	278 - 750	Red	Yellow	
Steenbok	4	21 - 220	Yellow	Yellow	

### Wildlife Status

**Count trend** – gives the species status in the conservancy based on game count trend data.

**Landscape status** – gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

**Desired number** – gives the species status in the conservancy based on what the conservancy would like to have.

**dark green** (abundant) – there should be less;  
**light green** (common) – the desired number is reached;  
**yellow** (uncommon) – there should be more;  
**light orange** (rare) – there should be more than double;  
**dark orange** (very rare) – there should be more than triple;  
**red** (extinct) – the species needs to be reintroduced.

## Locally rare species

Sightings indicator

**Locally rare and endangered species** are not found very often in the conservancy and need special conservation attention.

## Wildlife introductions

## Wildlife mortalities

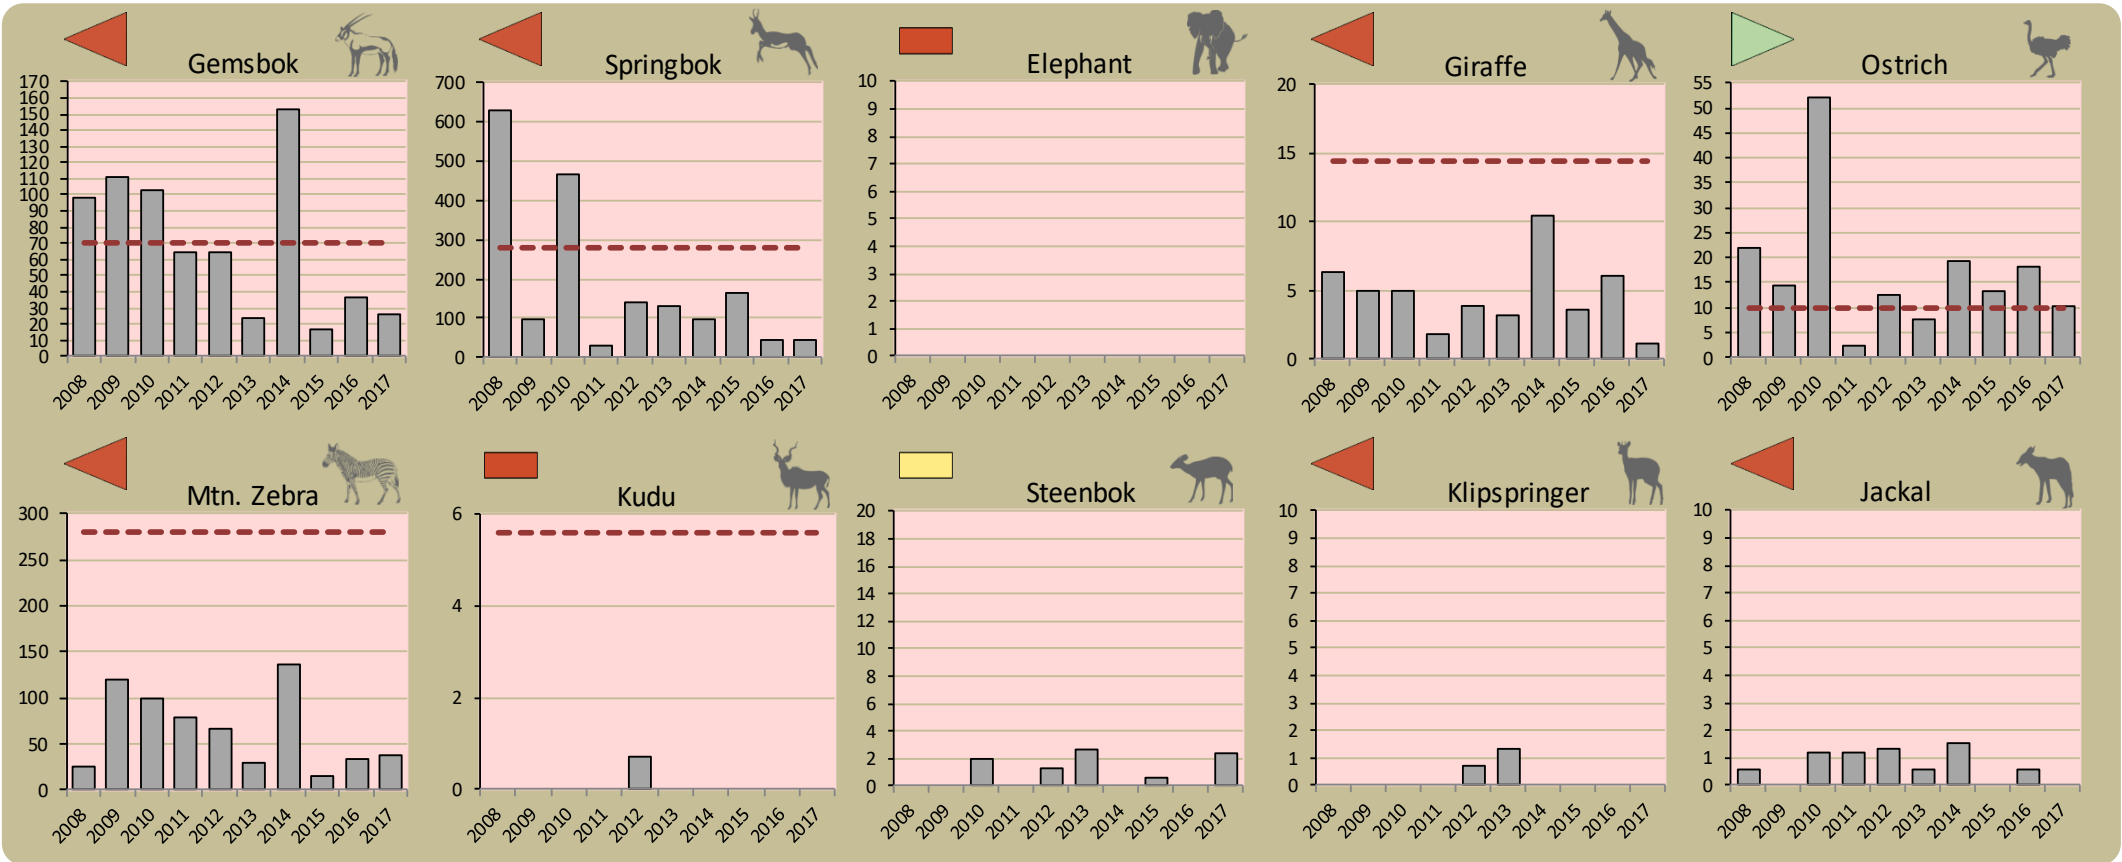

## Annual rainfall

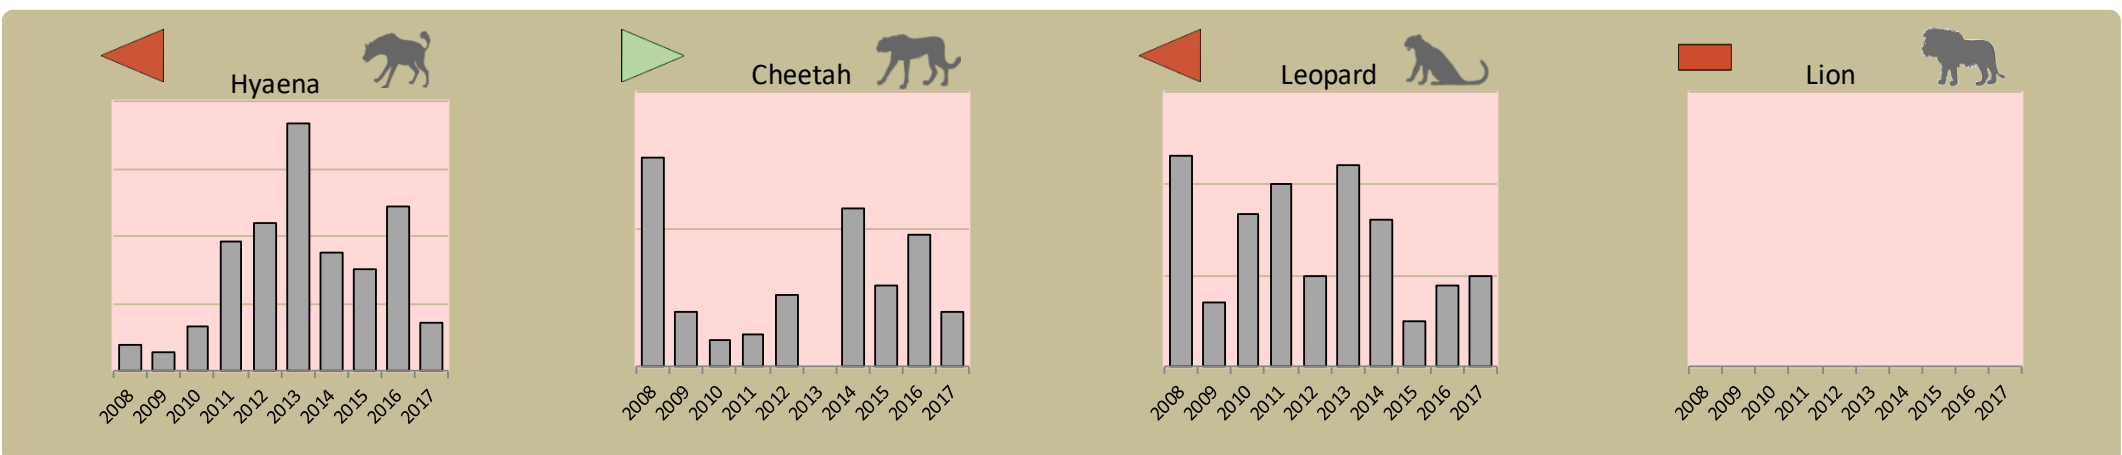

## Annual game count

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

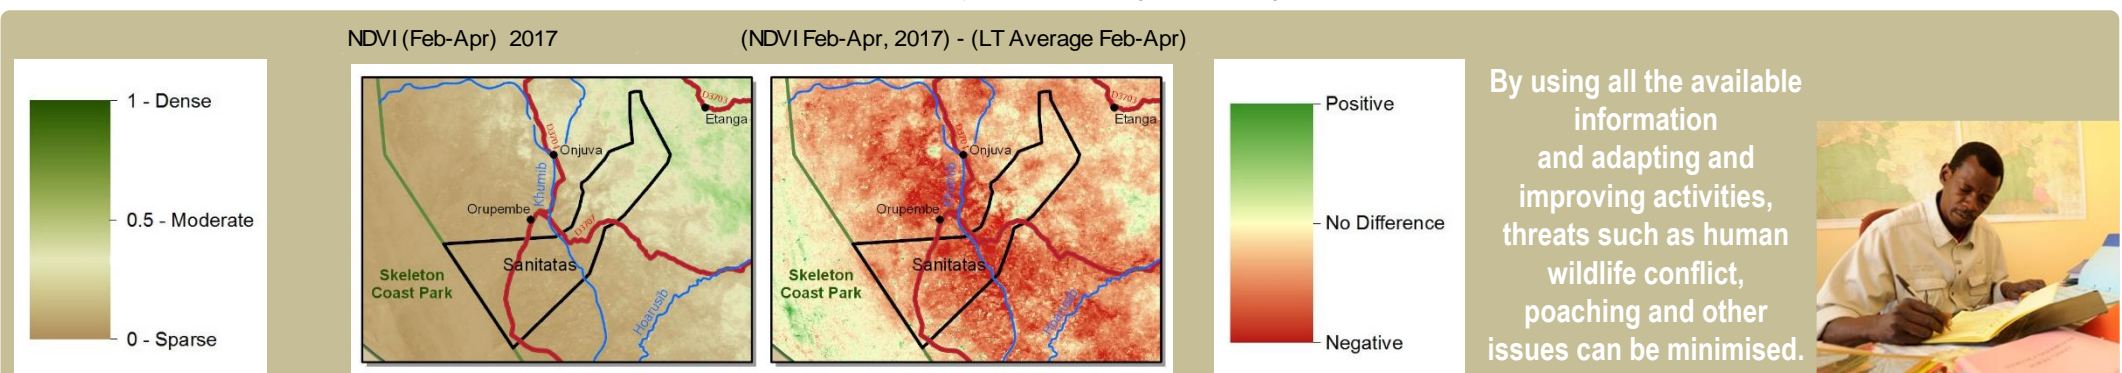

## Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

## Vegetation monitoring

Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the difference between the current year and the long term average (2001-2016)

## Enabling wise conservancy governance...

### Conservancy statistics

<b>Date Registered:</b>	July 2003
<b>Population (2011 census):</b>	110
<b>Size (square kilometres):</b>	1446

### Conservancy Governance

<b>Number of management committee members:</b>	Men: 2; Women: 5
<b>Date of last AGM:</b>	
<b>Attendance at AGM:</b>	Men: ; Women:
<b>Date of next AGM:</b>	Thu, May 31, 2018
<b>Other important issues</b>	
Financial report approved?	✗
Budget approved?	✗
Work plan approved?	✓
Chairperson's report approved?	✗

### Key Compliance Requirements

Was an AGM held?	✗
Were elections held?	✗
Is there a Benefit Distribution Plan?	✗
Is there a Game Management and Utilisation Plan?	✗
Was an Annual Financial Report produced?	✗

### Employment

<b>Conservancy staff: Male</b>	6
<b>Female</b>	0
<b>Community game guards:</b>	6
<b>Community resource monitors:</b>	0
<b>Lodge staff: Male</b>	0
<b>Female</b>	0

### Benefits

Cash	In Kind
	Meat Distribution

### Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

Effectiveness of implementation	Poor	Fair	Good	Prev. Year	Explanation of effectiveness rating
Game Management and Utilisation					
Zonation Plan					
Benefit Distribution					
Human Wildlife Conflict Management					
Sustainable Business and Financial Planning					
Tourism					
Staff Management
