Torra Conservancy Status Summary & Natural Resource Report

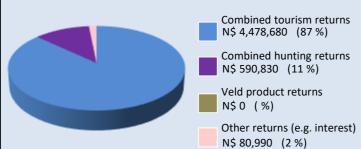

maximising wildlife returns by minimising threats...

Conservancy status summary

Returns from natural resources in 2017 the chart shows the main sources of returns and values

and their percentage of the total returns

Approximate Total Returns N\$ 5,150,500

Two of the most significant returns for the conservancy:

- √ cash income to the conservancy to cover running costs and invest in developments
- ✓ employment to conservancy residents

| Conscivancy | 149 3,304,100 | | |
|-------------|----------------|----------|---------------|
| | | | |
| | Private Sector | 34 staff | N\$ 1,394,980 |
| Employment | Conservancy | 21 staff | N\$ 1,022,870 |

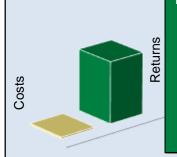

Cost of natural resource conflicts in 2017

estimates are based on average national values

| Total conflict cost estimate | N\$ 133,670 |
|--|-------------|
| Estimated poached high value species loss | N\$ 0 |
| Estimated human wildlife conflict cost | N\$ 133,670 |
| Simales are based on average national values | |

Natural resource cost—return ratio in 2017

the chart shows the approximate ratio of returns to costs

Natural resource returns outweigh approximate conflict costs

> **Total returns:** N\$ 5,150,500

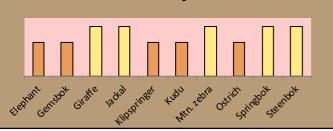

Approximate conflict costs: N\$ 133,670

Approximate positive ratio 39:1

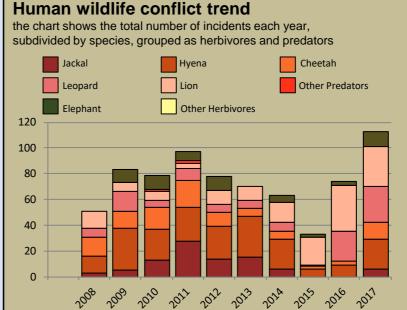

Management performance in 2017

| Category | Performance |
|--------------------------------|-------------|
| 1 Adequate staffing | |
| 2 Adequate expenditure | |
| 3 Audit attendance | |
| 4 NR management plan | |
| 5 Zonation | |
| 6 Leadership | |
| 7 Display of material | |
| 8 Event Book modules | |
| 9 Event Book quality | |
| 10 Compliance | |
| 11 Game census | |
| 12 Reporting & adaptive m/ment | |
| 13 Law enforcement | |
| 14 Human Wildlife Conflict | |
| 15 Harvesting management | |
| 16 Sources of NR income | |
| 17 Benefits produced | |
| 18 Resource trends | |
| 19 Resource targets | |

Wildlife status summary in 2017

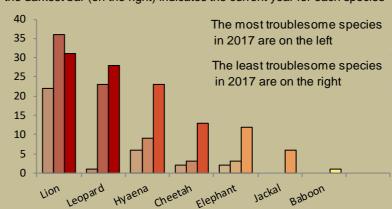

Human wildlife conflict

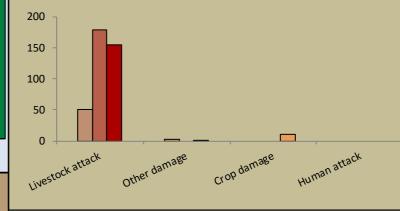

Most troublesome problem animals 2015-2017

the chart shows the number of incidents per species for the last 3 years; the darkest bar (on the right) indicates the current year for each species

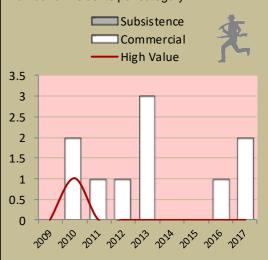

Type of damage by problem animals 2015-2017

the chart shows the number of incidents per category for the last 3 years; the darkest bar (on the right) indicates the current year for each type

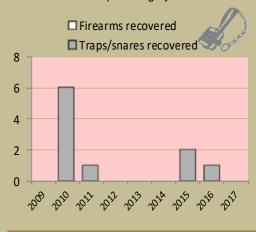

Poaching

Traps and firearms recovered

number of incidents per category

Arrests and convictions

number of incidents per category

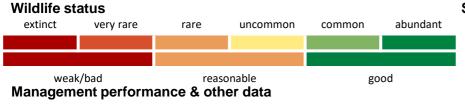

Wildlife removals – quota use and value

| | | Quota 201 | L7 | Animals actually used in 2017 | | | | Potential | Potential | | |
|--------------|-------|-----------|-----------|-------------------------------|-------------------------|-----------------|-------------------|-------------------|--------------|---------------------|------------------------|
| Species | Total | Trophy | Other Use | Trophy | Own Use & Premium | Shoot & Sell | Capture & Sale | Problem Animal | Total Use | Trophy Value N\$ | Other use Value N\$ |
| Baboon | 5 | 5 | | | | | | | | 600 | |
| Caracal | 2 | 2 | | | | | | | | 2,400 | |
| Cheetah | 1 | 1 | | | | | | | | 14,000 | |
| Gemsbok | 40 | 15 | 25 | 16 | | | | | 21 | 4,200 | 2,592 |
| Giraffe | 1 | 1 | | 1 | | | | | 1 | 10,300 | |
| Jackal | 5 | 5 | | | | | | | | 500 | |
| Klipspringer | 2 | 2 | | | | | | | | 5,200 | |
| Kudu* | 10 | 10 | | 4 | | | | | 4 | 9,400 | |
| Leopard | 1 | 1 | | | | | | | | 32,900 | |
| Lion | | | | 1 | | | | | 1 | | |
| Ostrich | 20 | 10 | 10 | | | | | | | 2,000 | 720 |
| Springbok | 100 | 30 | 70 | 28 | | | 70 | | 98 | 2,700 | 624 |
| Steenbok | 2 | 2 | | | | | | | | 3,500 | |
| Mtn Zebra | 80 | 30 | 50 | 16 | | 35 | | | 51 | 5,600 | 3,984 |
| | | | | | | | | | | | |
| | | | | | | | | | | | |
| | | | | | | | | | | | |

Potential value estimates (N\$) for species are based on:

- Potential trophy value the average trophy value for that species in the conservancy landscape
- trophy values vary depending on trophy quality, international recognition of the hunting operator and the hunting area
- Potential other use value the average meat value for common species
 - the average live sale value of each high value species (indicated with an *)[high value species are never used for meat]

Key to the status barometer

Success/threat flags

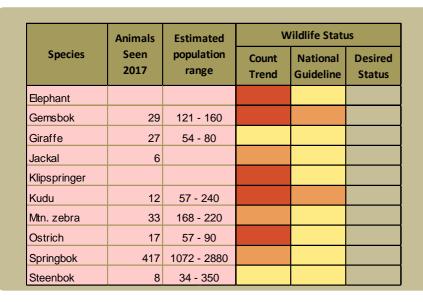

action needed

Conservancies reduce environmental costs while increasing environmental returns. Returns from wildlife can far outweigh human wildlife conflict costs.

monitoring numbers and trends for a healthy conservancy...

Current wildlife numbers and status

Wildlife Status

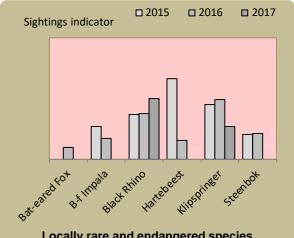

Count trend - gives the species status in the conservancy based on game count trend data.

Landscape status- gives the species status in the focal landscape; for example, lions may cause local problems, but are of high value and may be rare at landscape level.

Desired number - gives the species status in the conservancy based on what the conservancy would like to have.

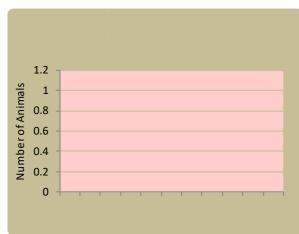

dark green (abundant) - there should be less; light green (common) – the desired number is reached; yellow (uncommon) - there should be more; **light orange** (rare) – there should be more than double; dark orange (very rare) - there should be more than triple; red (extinct) - the species needs to be reintroduced.

Locally rare species

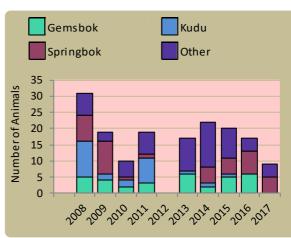

Locally rare and endangered species are not found very often in the conservancy and need special conservation attention.

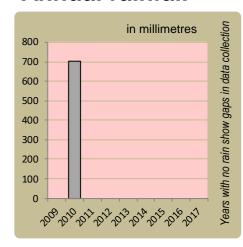

Wildlife introductions

Wildlife mortalities

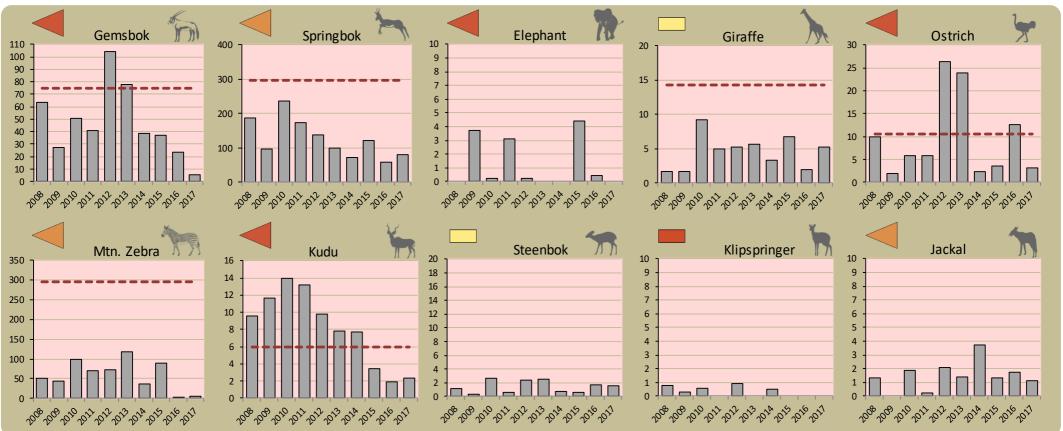

Annual rainfall

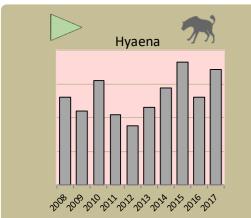

Annual game count

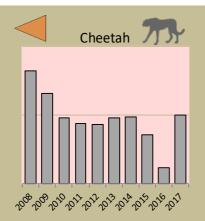

Charts show the number of animals seen each year per 100 km driven during the game count. As a point of reference the dashed horizontal line represents the combined 10 year average in Palmwag and Etendeka concessions. Status barometers reflect the general count trend over the last 5 years

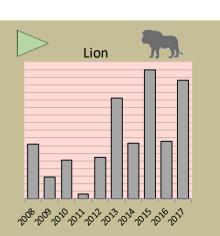

Predator monitoring

charts show the average number of animals seen per Event Book each year status barometers reflect the general sightings trend over the last 5 years

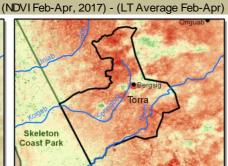

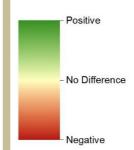

Vegetation monitoring Green vegetation index (NDVI). Maps show vegetation cover during Feb-April of the current year and the long term average (2001-2016)

0 - Sparse

By using all the available information and adapting and improving activities, wildlife conflict, poaching and other issues can be minimised

Torra Institutional Report

Enabling wise conservancy governance...

Conservancy statistics

Date Registered: June 1998

Population (2011 census): 930

Size (square kilometres): 3493

Conservancy Governance

Number of management committee

members:

Tue, November 28, 2017

Attendance at AGM: Men: ; Women:

Date of next AGM: Fri, June 1, 2018

Other important issues

Date of last AGM:

Financial report approved?

Budget approved?

Work plan approved?

Chairperson's report approved?

Key Compliance Requirements

Conservancy Self Evaluation How well does the conservancy consider it has performed in the past year?

| Effectiveness of implementation | Poor | Fair | Good | Prev. Year | Explanation of effectiveness rating |
|---|------|------|------|---------------|--|
| Game Management and Utilisation | | | | | All activities were effectively implemented |
| Zonation Plan | | | | | Zonation plan was effectively implemented |
| Benefit Distribution | | | | | All activities were effectively implemented |
| Human Wildlife Conflict Management | | | | | All activities were effectively implemented |
| Sustainable Business and Financial Planning | | | | | Most activities implemented, except for pending financial audit |
| Tourism | | | | | Most activities implemented with some activities that still need to be completed |
| Staff Management | | | | | Need to improve on some activities |
| Assets Management/Register | | | | | Need to improve on some activities |
| HIV/AIDS | | | | | Implementation was effective |
| Communication | | | | | Implementation was effective |
