Request for Meeting

11 messages

Red Dunes <reddunes18@gmail.com>
To: Piet & Christine Stoman <stoman@afol.com.na>

9 October 2023 at 03:55

Dear Christine

We last spoke in 2019. I am Ipeinge Mundjulu, an Environmental consultant representing Red-Dune Consultant. I contracted to undertake an EIA for the proposed exploration activities for EPLs 7850 & 8898 (please see attached map). They are opposite B2GOLD mine. As usually, I would like to undertake a stakeholder consultation of I am proposing the following dates:
20th October or 21st October
Please assist me in disseminating this information to the farmers if the dates are suitable and their preference of venue. I am sure they are familiar with this type of meeting.

Thank you in advance

Regards
Ipeinge

Dear Sir

Please send a full and professional presentation which I can then forward to the farmers involved. They can then contact you.

As part of NAU policy, I may not divulge the contact details of my members.

It may of course be that the farms involved are not part of the NAU membership.

Nevertheless, we try and inform all neighbours.

Do you know what the NAU is?

Regards

Christine Stoman

Dear Sir

1. Thank you for your speedy reply and the documents you attached.
2. How, exactly, do you spell your name? Your name below differs from the rest. Kindly send your ID as well as proof of professional affiliation.
3. EPL 7850 has expired.
4. You will be dealing with the Founding Father and with his son, the Minister of Labour.

Kindly do some fine-tuning before I disseminate any information to the parties involved.

3. EPL 7850 has expired.

Yes, the owner is aware of the expiry, hence the application for renewal has been launched with the Ministry of Mines and Energy (Attached of submission to MME)

- 1.
2. You will be dealing with the Founding Father and with his son, the Minister of Labour.

Thank you for the information, I presume they will have their representative attend the meeting. The EIA stage will not be so critical for them. Farm access agreement for geological sampling will be critical. In this regard, the owner of EPL and his contractor will follow necessary steps.

Dear Ms. Stoman,

I trust you have been well. In am proposing a meeting at Otavi between Friday 17th or Saturday 18th November (earlier than that will be more than fine with me as well). Farmers that will not be able make can always contact me for comments. I am sure you are aware, after this process, each farmer will need to enter into an access agreement with the EPL owner for exploration.

I am open for suggestions on the place and venue for the meeting.

Dear Ausiku

Your letter below refers. Sorry for the confusion; I sent Mr Shipale a screenshot which I think he could not view.

Please contact Red Dunes Consultancy, that will be the best plan.

Mr Ipeinge Mundjulu can explain everything from A-Z.

He needs a meeting with the landowners involved to discuss EPLs 7580 and 8898. Perhaps Farm Etunda's hall could be considered as the venue?

Like all the landowners, the Founding Father (and his son Hon Min Utoni Nujoma) will need to have a written agreement with the EPL holder.

Please see the attached document.

Regards

Mrs Christine Stoman

No more... Natanael Nghihalwa was fatally shot by unknown suspect/s in his home.

Photo: Contributed

Investigations ongoing in teacher's death

■ Festus Hamalwa

The Namibian Police deputy commissioner for Ohangwena region, Zachariah Amakali said they are still investigating the assassination of teacher Natanael Nghihalwa despite having obtained several witness statements.

"We will continue with the further investigations according to the information we obtained from the members of the public," he said.

Amakali told *New Era* yesterday that it is helpful when members of the public provide information to the police as it makes the investigation process faster and smoother.

Nghihalwa (39) was reportedly shot and killed by an unknown suspect on the night of 11 November at his home in Oshikwiyu village in the Ohangwena region.

Nghihalwa was employed as a teacher at the Oshali West Combined School.

The police at the time reported that Nghihalwa allegedly came home from his bar located in Omungwelume and got shot while in his bedroom.

He was, however, found dead outside the room with a gunshot wound by his cousin.

According to Amakali, they are still requesting the members of the public to report any information relating to the shooting of Nghihalwa.

He said anyone with such information would be protected, thus members of the public must feel free to share any bit of information they have with the police so the shooter or shooters can be brought to book.

So far, no arrests have been made in the matter.

"We thank the members of the public for always sharing information with the police," said Amakali.

Nghihalwa will be laid to rest on Saturday at Oshikwiyu village.

- fhamalwa@nepc.com.na

City Police officer shoots assailant during robbery

Two male suspects reportedly attacked a City Police officer and his partner in the Soweto residential area of Windhoek on Friday.

According to the Namibian Police in a crime report on Sunday, the two armed attackers allegedly approached the vehicle the officers were in around 00h45 from both sides.

One of the attackers reportedly opened the door of the female driver's side and held

her at knifepoint while taking her property.

At the same time, the other suspect threatened the passenger with a knife in an attempt to rob him.

"The passenger (City Police member) reached for his service pistol and resisted the assailant's demand. In the process, one of the assailants was shot and succumbed to his injuries," the crime report said.

In an unrelated incident, a warehouse in Ausspanplatz, Windhoek was broken

into and property worth N\$150 000 stolen between 04h00 and 05h00 on Friday.

The stolen items amongst others included a welder, a drill machine, a grinder, three bicycles, a battery charger, and a rivet gun.

No items have been recovered, and no arrests have been made.

Police investigations in both matters continue.

- Nampa

Treason trial on last stretch

■ Roland Routh

The trial of seven men accused of trying to secede the then Caprivi Strip from Namibia in August 1999, is in its last stretch in the Windhoek High Court operating from the Windhoek Correctional Facility.

State advocate Laurens Campher, who took over the trial last year, is busy with his submissions on why the accused should be convicted.

Progress Kenyoka Munuma (62), Shine Samulandela (55), Manuel Manepelo Makendano (69), Diamond Samunzala Salufu (59), Alex Mushakwa (59), Frederick Isaka Ntambila (57), and John Mazila Tembwe (54) face charges of high treason, murder, attempted murder, sedition, public violence and the illegal importation of weapons and ammunition. The charges stem from an alleged failed attempt to secede the then Caprivi from Namibia.

Campher told Windhoek High Court Acting Judge Petrus Unengu that the State proved the allegations against the accused beyond a reasonable doubt, and that they should be convicted as such. He, however, conceded that the counts of sedition and public violence are a duplication of the main count of treason. He submitted that some of the accused made confessions, which they now dispute. This, he added, makes them dishonest. Furthermore, he said, the accused collectively lodged a special plea against the jurisdiction of the High Court to try them as they claimed the former Caprivi Strip, now the Zambezi region, was never part of Namibia. They lost that plea. Campher

Waiting... The remaining treason trial accused. Photo: File

reiterated that the State has adduced a very strong case against the accused.

Defence lawyers Ilse Aggenbach and Jorge Neves, who act for the accused on instructions of the Legal Aid directorate, will give their oral submissions afterward.

The accused were first convicted and sentenced to jail terms ranging from 30 to 32 years by the late justice John Manyara in 2007. Those convictions and sentences were, however, set aside by the Supreme Court on appeal in July 2013, and the trial was ordered to start afresh before a new judge. The eight accused, arrested between July 2002 and December 2003, have been in

custody now for the past 21 years, pending the finalisation of their trial.

One of their co-accused, Hoster Simasiku Ntombo (59), was released after the Supreme Court found he was illegally abducted from Botswana by security forces.

Judge Unengu already dismissed a section 174 application that the accused lodged after the State closed its case, and ruled that they have a case to answer. The accused denied that they were ever involved with the attacks on Katima Mulilo, or that they planned it with anyone.

The matter is continuing, and the accused remain in custody. - rrouth@nepc.com.na

Mutorwa: Stakeholders vital in road safety implementation

SWAKOPMUND - Minister of Works and Transport John Mutorwa emphasised that the effective practical implementation of the Second Decade of Action for Road Safety 2021-2030 will only be achieved through robust collaboration and cooperation among stakeholders.

Speaking at the launch of the Festive Season Road Safety Campaign in Swakopmund on Friday, he highlighted the significance of the goals, targets and objectives embedded and articulated in the aforementioned action plan.

"This action plan should not merely exist on paper; it should be tangibly translated into projects and programmes, aiming to significantly enhance the socio-economic, educational and cultural well-being of Namibians, residents and visitors to our country," the minister said.

Conrad Lutombi, CEO of the Roads Authority, expressed concern about the

rising prevalence of fraudulent activities involving fake driving licences and vehicle licence discs within the community.

He said officials will be deployed during this festive campaign, equipped with special instruments to urgently address this issue. Drivers should thus be cautioned to ensure that all their documentation is in order to avoid potential consequences.

"In addition, our mobile vehicle testing station will be utilised at various roadblocks as part of the road safety campaign. This testing station is equipped with state-of-the-art technology and equipment, ensuring the accurate and efficient testing of multiple aspects, including vehicle emissions, brakes, lights and overall safety compliance," Lutombi stated.

He was furthermore confident that this comprehensive testing unit will elevate

road safety standards, and decrease the risk of road crashes resulting from poorly-maintained or non-compliant vehicles.

Rosalia Martins-Hausiku, CEO of the Motor Vehicle Accident Fund, acknowledged a decline in the number of road traffic crashes during the last festive season. However, she noted that on an annual basis, the fund spends an average of N\$200 million on medical costs, and another N\$80 million on other direct claims.

"The medical costs linked to these road crashes, alongside subsequent deaths and injuries, encompass various expenses from on-scene attendance to recovery or death. They include first aid and rescue services (ambulance services), hospital costs, and the final stage of rehabilitation, care and life enhancement," she added. The campaign will run until 17 January 2024. - Nampa

PUBLIC NOTICE:

ENVIRONMENTAL IMPACT ASSESSMENT FOR THE PROPOSED EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENSES 7850 AND 8898, ABOUT 50KM SOUTH OF OTAVI TOWN, OTJONZONDJUPA REGION & INVITATION TO A PUBLIC MEETING

CEO OF MY CAREER ...for graduates & young professionals

Ipupa Fadeyi

Strategic job search techniques for 2024

In the fast-paced and ever-changing landscape of the job market, staying ahead of the curve is crucial for a successful job search. The year 2024 brings with it a dynamic mix of remote, hybrid and onsite job opportunities, reflecting the evolving nature of work. To navigate this shifting terrain effectively, job seekers need to adopt winning strategic techniques that align with the demands of the contemporary workplace.

Mastering the hybrid work model

The rise of remote and hybrid work has become a defining feature of the modern workplace. To thrive in 2024, job seekers must adapt to this paradigm shift. Start by showcasing your proficiency in remote collaboration tools, such as video conferencing platforms and project management tools. Emphasise your ability to work independently while highlighting past experiences of successfully contributing to virtual teams. This not only demonstrates your adaptability but also positions you as an asset in the flexible world of hybrid work.

Building a robust online presence

In today's digital age, an online presence is a non-negotiable aspect of job searching. Beyond a polished LinkedIn profile, consider

creating a personal website or blog to showcase your professional achievements, projects and industry insights. Engaging with relevant online communities, participating in discussions and sharing your expertise can also boost your visibility. Employers in 2024 are likely to be impressed by candidates who not only have the right skills but also actively contribute to and stay informed about their respective industries.

Leveraging Artificial Intelligence in job searches

As technology continues to advance, artificial intelligence (AI) is playing an increasingly prominent role in recruitment processes. Job seekers can harness the power of AI to their advantage by optimising their resumes for applicant tracking systems (ATS). Ensure that your CV includes relevant keywords and phrases specific to your industry. Additionally, explore AI-driven job matching platforms that use algorithms to connect candidates with suitable job opportunities based on their skills, experience and preferences.

Networking in the digital age

Networking remains a cornerstone of successful job searches, but the methods have evolved. In 2024, networking goes beyond traditional face-to-face events. Virtual

networking events, webinars and online conferences offer valuable opportunities to connect with professionals in your industry. Actively participate in these events, join relevant social media groups and engage in conversations with industry leaders. A well-nurtured digital network can open doors to hidden job opportunities and provide valuable insights into the current job market trends.

Continuous learning and skills development

The rapid pace of technological advancement requires job seekers to be agile and continuously upskill. Take advantage of online courses, certifications and workshops to stay abreast of industry trends. Showcase your commitment to professional development on your CV, and be prepared to discuss how you have applied new skills in your previous roles. Employers in 2024 are likely to value candidates who demonstrate a proactive approach to learning and adapting to the evolving demands of their respective fields.

Showcasing soft skills and emotional intelligence

While technical skills are crucial, employers are placing increasing importance on soft skills and emotional intelligence. In the diverse and dynamic workplace of 2024, the ability to communicate effectively, collaborate with diverse teams and demonstrate empathy are highly valued. Highlight instances where you've successfully navigated challenging interpersonal situations or led teams through periods of change. A well-rounded skill set that includes

both technical and soft skills will set you apart in the competitive job market.

Customising application materials for each opportunity

Gone are the days of one-size-fits-all CV and cover letters. In 2024, tailoring your application materials for each opportunity is essential. Carefully read the job description, research the company culture and align your CV and cover letter with the specific needs of the employer. Showcase how your unique skills and experiences make you the ideal candidate for the role. Personalisation demonstrates your genuine interest in the position and increases your chances of standing out among other applicants.

Embracing cultural intelligence

In an era of global connectivity, cultural intelligence is becoming increasingly important. Companies in 2024 are seeking candidates who can thrive in diverse and multicultural environments. Showcase your cultural awareness and adaptability by highlighting experiences where you've successfully collaborated with individuals from different backgrounds. Fluency in multiple languages, an understanding of international business etiquette and a global mindset can set you apart in a competitive job market.

Prioritising mental well-being

The awareness of mental health in the workplace has gained significant traction in recent years and this trend is likely to continue in 2024. Employers are looking for candidates who prioritize their well-being and can contribute to a positive and supportive work environment. Highlight any initiatives you have taken to promote mental health in your previous roles, such as organising wellness programmes or participating in employee assistance programs. Emphasise your ability to manage stress and maintain work-life balance, showcasing that you are not only an asset to the company but also an advocate for a healthy work culture.

Agility in adapting to industry trends

Industries are evolving at an unprecedented pace, and companies are seeking employees who can adapt quickly to emerging trends. Stay informed about the latest developments in your industry and be prepared to discuss how you've adapted your skills and strategies accordingly. Demonstrating your ability to stay ahead of industry trends positions you as a forward-thinking candidate who can contribute to the long-term success of the organisation.

Conclusion

Job seekers in 2024 need to embrace a holistic approach to their job search, incorporating not only technical skills and experience but also a keen awareness of the evolving workplace landscape. By emphasising cultural intelligence, prioritising mental well-being and showcasing agility in adapting to industry trends, candidates can position themselves as well-rounded professionals ready to excel in the dynamic world of work. As the job market continues to evolve, staying proactive, adaptable, and attuned to the needs of employers will remain the key to a successful job search in 2024 and beyond.

HORSE SHOE MARKET - STALL 81, MUNGUNDA STREET, SINGLE QUARTER, WINDHOEK

**Environmental Impact Assessment for the Proposed Exploration Activities of
Base and Rare Metals, Industrial Minerals, Precious Metal On Exclusive
Prospecting Licenses 7850 & 8898 Between Otavi and Otjiwarongo,
Otjozondjupa Region
23 November 2023**

Presenter:

Mr. Ipeinge Mundjulu
Red-Dune Consulting CC
[reddunes18@gmail.com](mailto:redunes18@gmail.com)
+264 81 1477 889

Purpose of the meeting

- To Inform public, land owners, and interested stakeholder on the proposed Exploration Activities on EPLs 7850 & 8898
- Issues to be raised includes
 - i. Site access / Farm access
 - ii. Environmental Protection
 - iii. The Environmental Impact Assessment Process
 - iv. Project Operation

Background

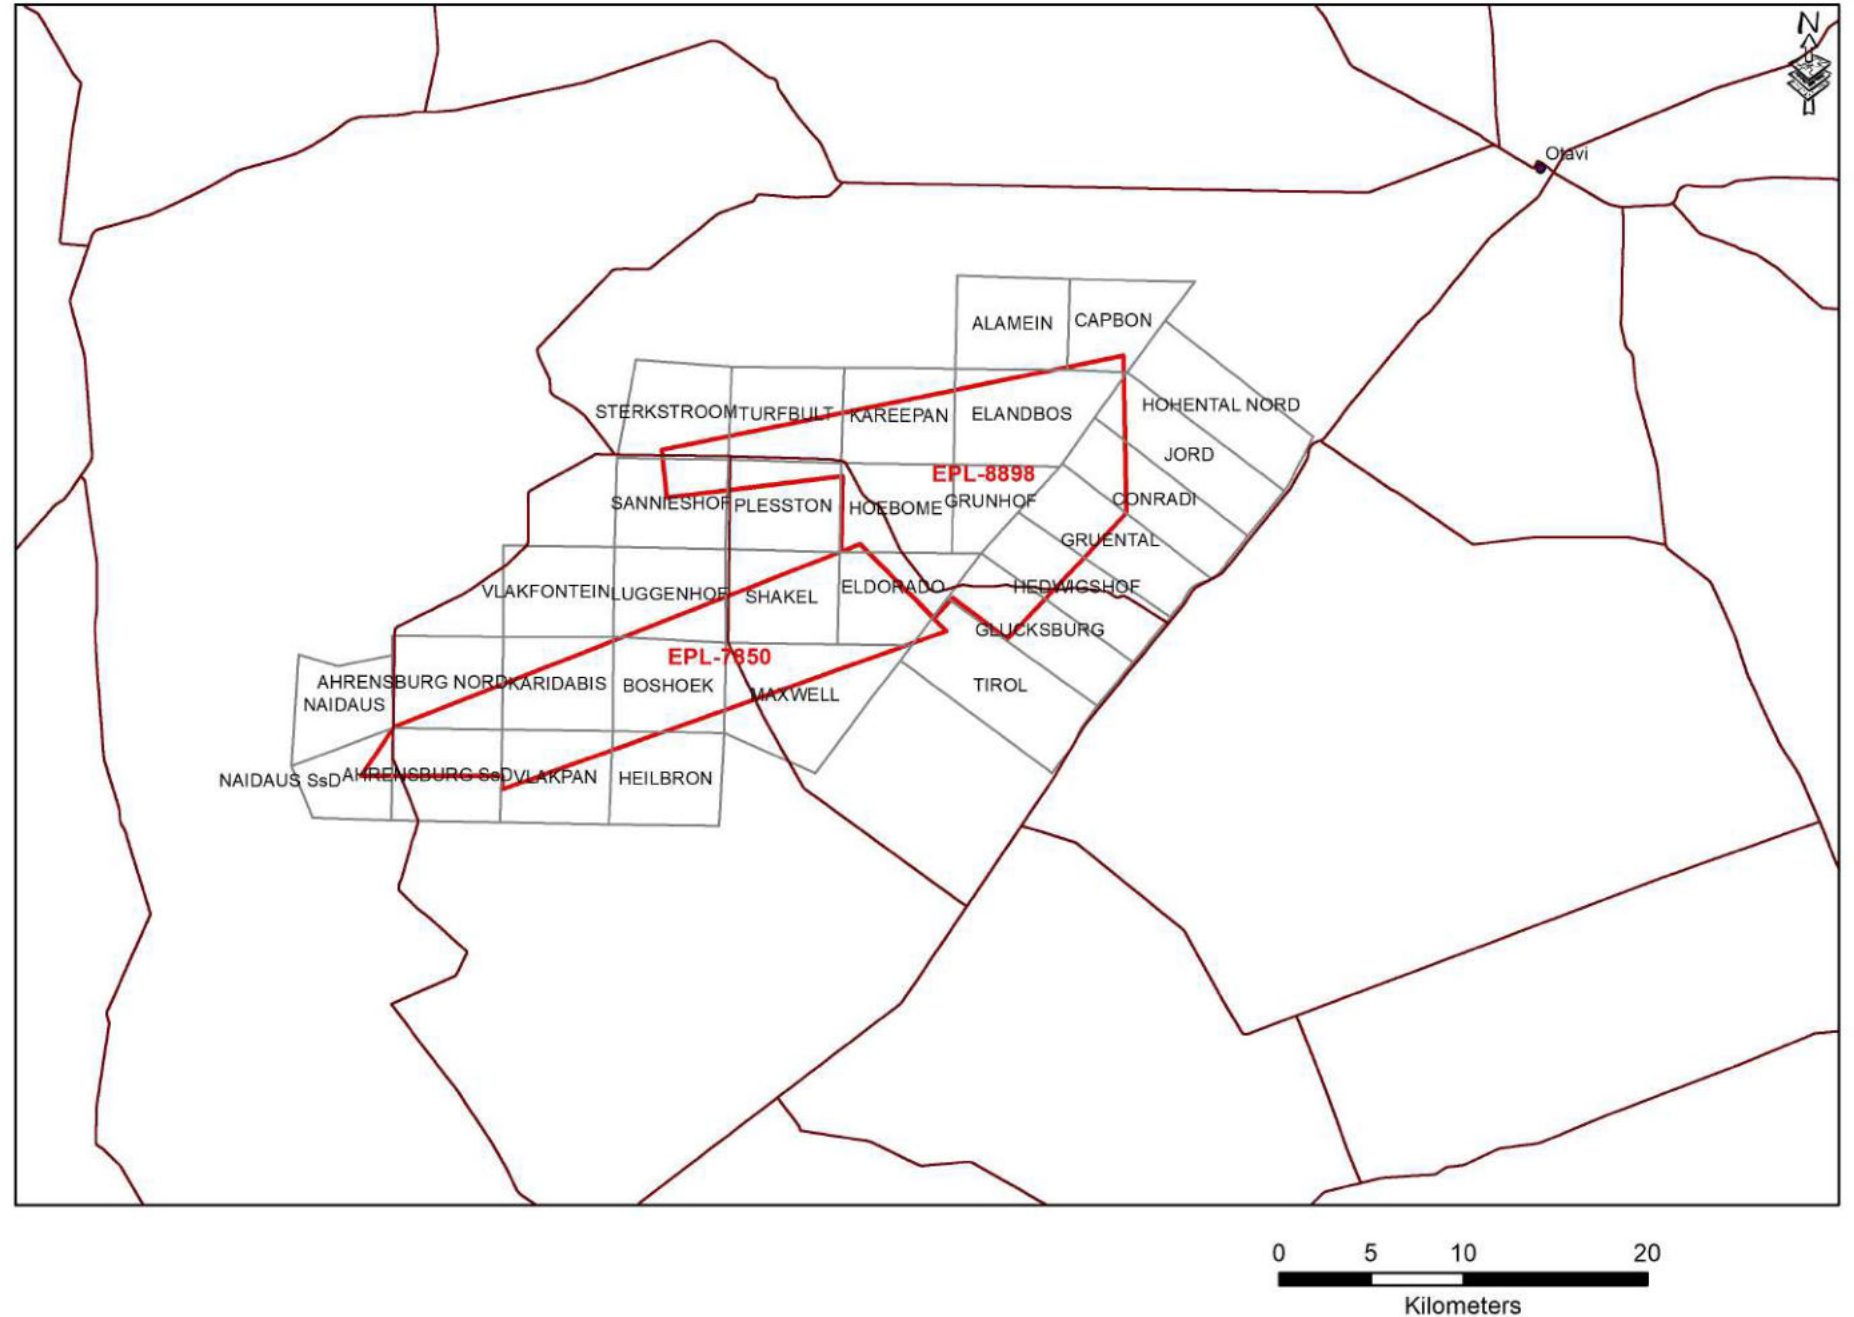

- Mineral Exploration is a widely practised method of searching for minerals
- There are several techniques used
 - I. Geological studies and field mapping (Aerial photographs)
 - II. Soil surveys (Air, Radar, magnetic and electromagnetic)
 - III. Geophysical surveys (Magnetic and electromagnetics)
 - IV. Drilling (The only evasive process of collecting geochemical samples from target sites)

Statutory Requirements

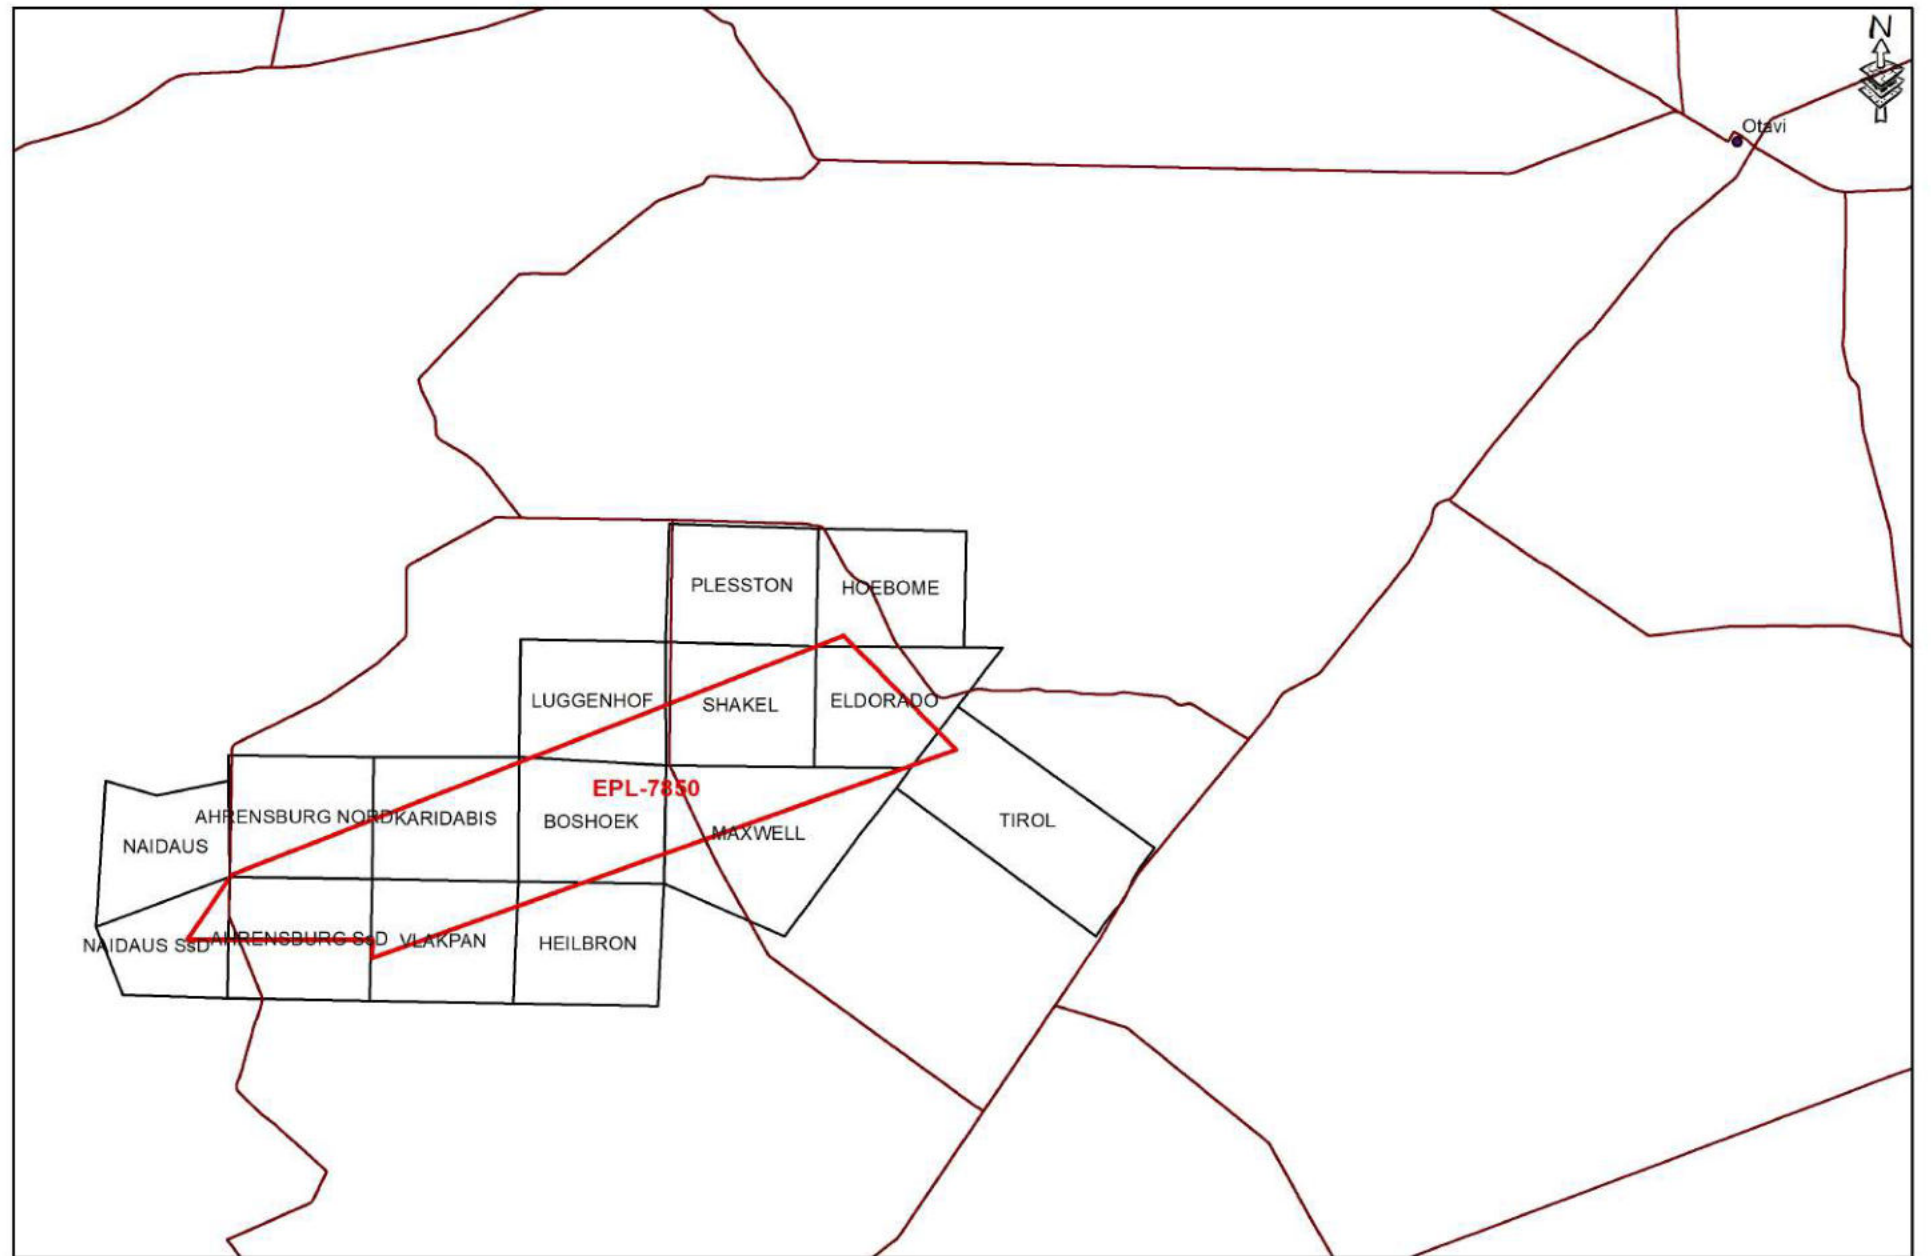

- The Namibian regulatory framework under Section 27 (2) of the Environmental Management Act (No. 7 of 2007) (EMA), has listed activities that may not be undertaken without an Environmental Clearance Certificate (ECC)
- *“The construction of facilities for any process or activities which requires a license, right or other form of authorization, and the renewal of a license, right or other form of authorization, in terms of the Minerals (Prospecting and Mining Act), 1992”*

Potential Environmental and Social Impacts

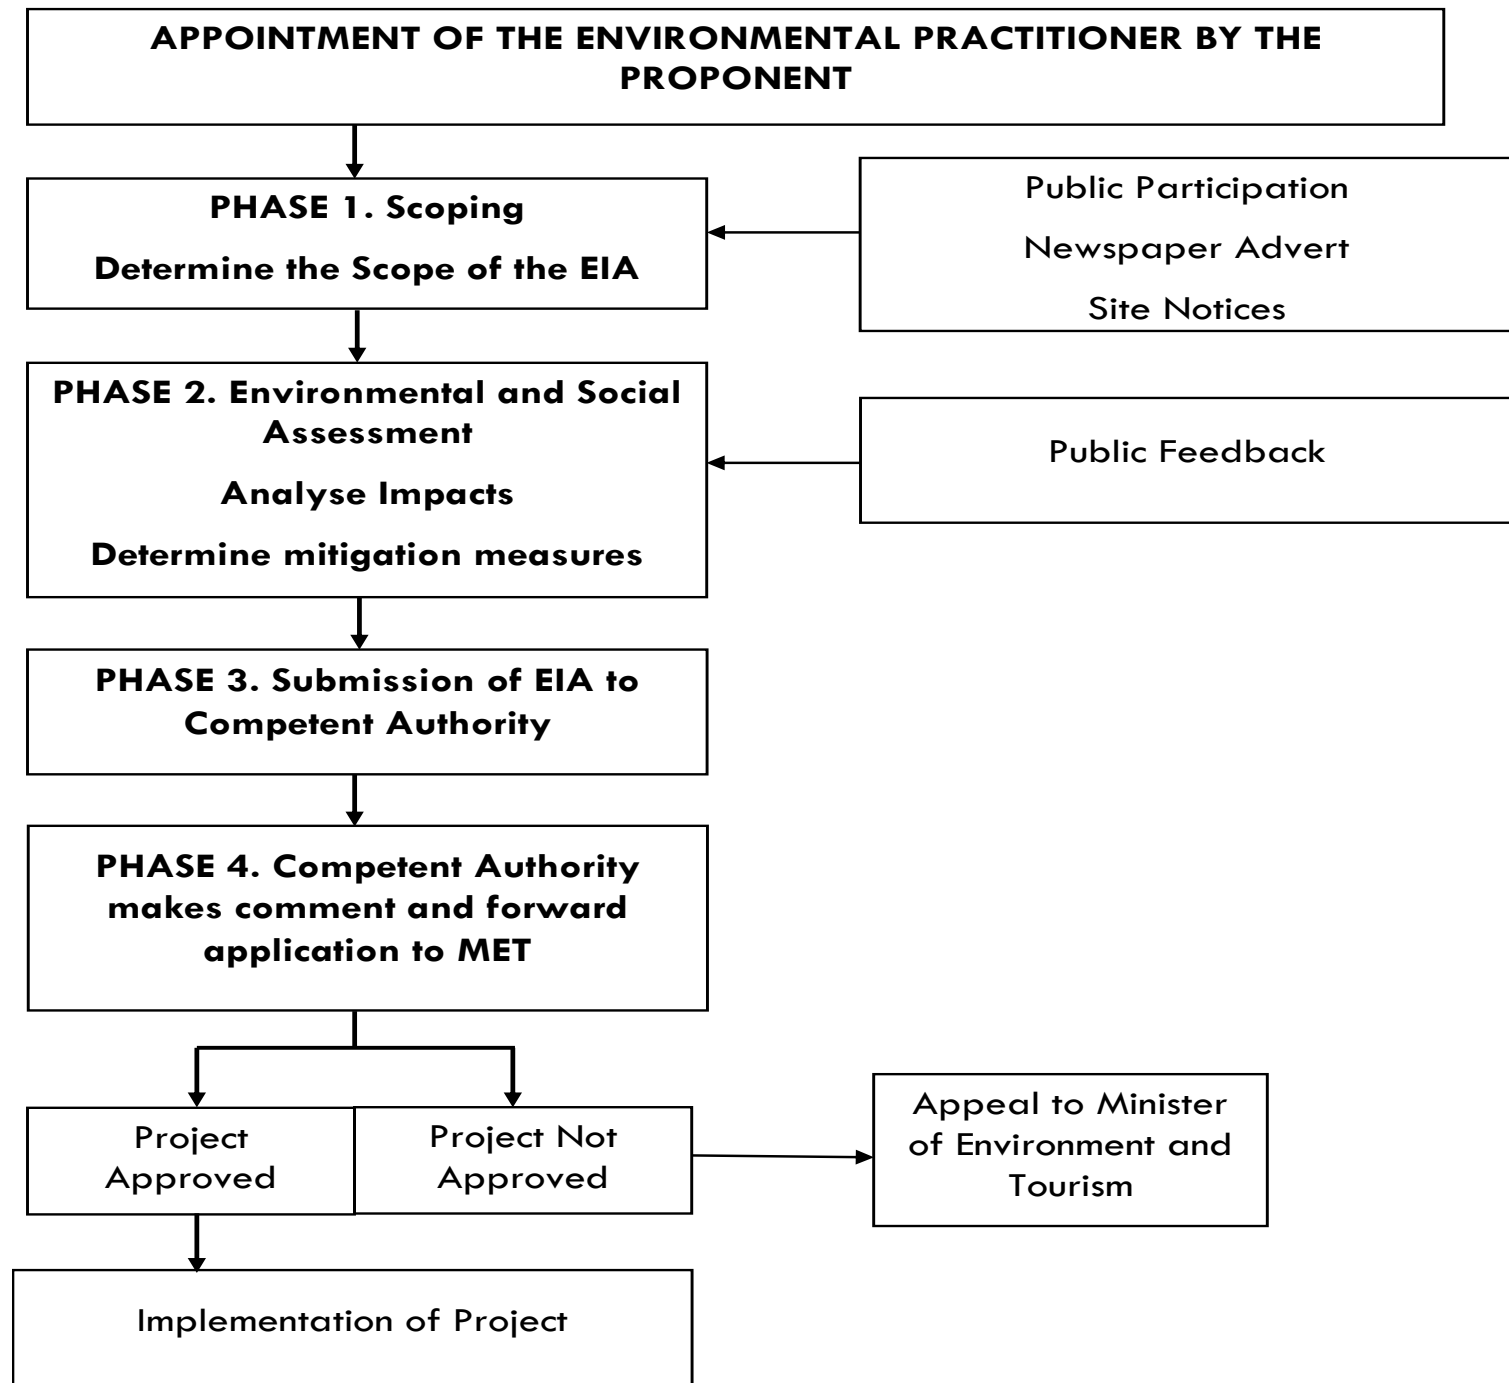

- **Soil and Ground Water pollution:** Fuel, Oil, and Lubricants spillages
- **Drilling activities:** Dust creation, noise and wild life disturbances and spill of Hydraulic Fluids,
- **Biodiversity Loss,** clearing of vegetation to make way for vehicles, camping sites and drilling.

Potential Environmental and Social Impacts

- **Human Health & Safety Risk:** Dust from drilling, accidents and Sanitation
- **Human Wildlife conflict and Poaching**
- **Land Degradation:** Off-road driving
- **Pollutions:** Solid waste generated by workers, ablution facilities

Depending on the various land use, socio-economic impacts may be different i.e. *Tourism vs Farming*
