## 1. BACKGROUND

### 1.1 INTRODUCTION

Mr Jeano Foelscher, (**the proponent**) is a small-scale miner (SSM) who has been mining semi-precious stones (SPS) from four Mining Claims for nearly seventeen years (since 2007). The MCs are pegged and registered with the Ministry of Mines and Energy (MME) in full compliance with the provisions of the Minerals (Prospecting and Mining) Act. These numbers have been assigned to the mining claims by MME:

MC-68561

MC-68562

MC-67922

MC-67923

During the course of SPS mining, traces of Industrial Mineral Groups (IMGs), e.g. Tin (Sn) and Tantalite (TO2O6) and Base and Rare Metals Group (BRMG), e.g. Lithium (Li) were discovered. All minerals indicated good grades that warrant further investigation. The SSM would like to conduct exploration so as to ascertain the extent of BRMG and IMG mineralisation on all four MCs. However, BRMG and IGM are not registered on the Mining Claim Certificate (MCC) held by SSM.

Upon inquiry from the Mining Commissioner to have such mineral groups added on the MCC, the SSM was advised to obtain an ECC which allowed exploration of such minerals. Accordingly, a scoping assessment and an Environmental Management Plan (EMP) were undertaken.

Whilst the MCs are pegged on a private commercial farm and SPS mining has been conducted since 2007, the Environmental Commissioner has asked for a public consultation to be carried out. This report is therefore the outcome for the public consultation process.

### 1.2 DETAILS AND STATUS OF MINING CLAIMS

The details of the four MCs are presented in **Table 1** below. The proposed exploration will have a footprint of about 5.7% (about 4 ha) of the total geographical area covered by the four MCs as shown in the table. In the event of any mineral discovery, the mining operation is projected to have a footprint of about 60% of 40 ha of the mining claim area.

**Table 1:** Details of the Mining Claims Held by the SSM

MC Registered No.	Date MC Pegged	Current MC Status	Coverage (ha)	Current Mineral Group	Proposed Mineral Groups
MC-67922	4 Oct 2007	Pending Renewal	15.22	SPS	BRMG & IMG
MC-67923	4 Oct 2007	Pending Renewal	19.53	SPS	BRMG & IMG
MC-68561	27 Oct 2010	Pending Renewal	18.51	SPS	BRMG & IMG
MC-687562	27 Oct 2010	Pending Renewal	17.70	SPS	BRMG & IMG
Total (ha)			70.21		
Exploration Core Drill Hole Footprint (5.70%)			4		
Estimated potential mining footprint – 60%			42	Exact footprint will be determined after exploration	

### 1.3 ENVIRONMENTAL CLEARANCE CERTIFICATE

An Environmental Clearance Certificate (ECC – AP10483) allowing SPS mining was granted to the proponent 14 September 2022 and is valid until 14 September 2025.

## 2. PUBLIC PARTICIPATION PROCES

### 2.1 INTRODUCTION

Public Participation Process (PPP) is an integral part of the EIA process, as outlined in section of 27(1) (h) of the Environmental Management Act and section 32 of Environmental Impact Assessment Regulations. Experience has demonstrated that effective Environmental Impact Assessment (EIA) is depended upon the full and rigorous participation of the community in which the proposed project, in this case the exploration of IMG and BRMG on the aforesaid four MCs.

The exploration activities will take place on brownfield sites – comprising of four MCs on which mining for SPS has been in operation since 2007. Therefore the EIA has been approached and conducted with that understanding in mind.

One of the key objectives of the Scoping Assessment is to identify stakeholders or Interested and Affected Parties (IAPs), and to invite such IAPs to participate in the EIA process. Through the PPP, IAPs are provided an opportunity to express their concerns, make contributions and input and or to propose workable solutions. In broader terms, the objectives of the PPP are, amongst others, the following:

- To sensitize and to make the general public aware of the proposed exploration activities to define minerals classified in these categories - IMG and BRMG that can be mined economically.
- To outline the environmental impacts associated with the envisaged exploration and how such impacts can be minimised to acceptable levels.
- To ensure transparency and accountability in the decision-making process and therefore reducing conflict and misunderstanding, since decisions (i.e. granting of mineral rights and ECC) are deemed to have been made through a process which ensured transparency involving all the parties, the landowners and SSM.
- To ensure that the SSM secure the approval of the landowner which gives the proponent some measures of assurance and a sense of partnership with the landowner and in so doing to prevent unnecessary disputes and costs associated with litigations.

### 2.2 EIA ANNOUNCEMENT

The EIA was announced in the local newspapers on the dates as shown in the Table 2 below. Given that the MCs are located on a private commercial farm, and the proponent having held the four MCS for close to eighteen years the need to have a public meeting at Karibib or Omaruru was waived.

### 2.3 BACKGROUND INFORMATION DOCUMENT

A Background Information document (BID) on the project was prepared and made available to everyone who responded to the EIA and requested the document. The BID was made available to landowner. The EIA was announced in the media on the date as shown in Table 2.

### 2.4 NEWSPAPER ADVERTISEMENTS

## 2.5 IDENTIFICATION OF STAKEHOLDERS

One of the objectives of the PPP is to identify all possible stakeholders to the EIA. Listed in Table 2 below, are names of public officials representing Organs of State who have a direct bearing to the listed activity being assessed.

For this Scoping Assessment, interested and affected parties have been identified as landowners, neighbouring farms (as affected parties) and the holders of mineral rights or Mining Claim holders who are both interested and affected parties.

Hon Melanie Ndjago	ERC	Karibib Constituency Councillor	BID
Ms L H Doëses	ERC	Chief Regional Officer	
Ms S Kauari	ERC	Director: Development Planning	BID

## 2.6 ENGAGEMENT WITH IAPS

Communication was held with the Farm Manager of Farm Omapyu Sud, Mr Willem Alweendo who confirmed that Mr Jeano Foelscher has been mining SPS on his MCs for many years. In fact, the farm was purchased by the Ministry of Defense about ten years ago and all existing mineral rights were retained and respected by the new landowner. The farm is operated as game farm and has a small lodge where hunting guests are accommodated.

According to Mr Alweendo – the farm management has good working relationship with all SSMs mining tourmalines on the property.

lipumbu said these steps show the importance of combined joint efforts by all stakeholders to improve Namibia’s business and trade competitiveness in the global market.

“These initiatives are a testament to Namibia’s trade and manufacturing sector’s rapid development with the vision to identify new ideas and trends that shall harness our capabilities, to deliver more benefits to our people,” she said.

According to research, about 6,000 people in rural communities get their income from the harvesting of Marula nuts, of which 90% are women.

Co-founder and CEO of Saneta Investment Nampa Nengola said, as a cosmetic producing company and exporter, they face several challenges when it comes to exporting their products, the biggest one being shipping costs and tariff.

“The clients have to pay several import duties depending on the country they are exporting from,” she explained. The company exports to countries like Germany, Spain and France.

Nengola said access to capital is also hampering their ability to export their products to the European market.

She further stated that the excitement comes when their local products are being sold outside the country and making an income in foreign currency.

“But I think the challenges are much more than what is exciting. So if there was more support we could increase our product volumes because even though I told you that we do export, we are not exporting at the volumes that are sufficient to sustain us as a business,” she pointed out.

Nengola said that opportunities are there for other local producers if the challenges can be navigated together with the SMSEs and the government. “Yes, there is more potential, there are more opportunities as long as cosmetic producers are given more support to get over those challenges. But the opportunities are definitely there”.

The company exports its products via both airfreight and ocean-freight, depending on the customers request.

However, she said the inconvenience only comes when there are additional charges that the customer did not expect.

Fruit Trees

per seedling.

Overall, fruit tree seedlings that are grafted and imported cost much higher than those directly grown from seedlings locally.

Most of the fruit farmers in the country procure their seedlings directly from nurseries outside of Namibia, or otherwise from local nurseries that also import these seedlings from other countries. However, if one zoom in on the country's fruits trade, Namibia is a net exporter of fruits, this is mainly due to the high production of table grapes that are targeted for export markets.

Namibia was the 20th country with high export growth in 2019, having exported about N\$944,4 million worth of fruits and nuts, dominated by grapes, and slightly by mangoes.

South Africa accounted for 97% of the fruits and nuts imported by Namibia, whereas, 3% was imported from Spain, and the rest from Israel, Botswana, Zambia, China, Angola, Germany, Panama, Portugal, and Vietnam, the researchers found.

On average, China has been the fastest-growing worldwide import market for fruits and nuts for the last three years.

Nigeria and Senegal are the only African countries appearing in the top ten (10) world's fast-growing import markets of fruits and nuts in terms of value, whereas Namibia is the 23rd country on the list of the world's import-growing markets, the research found.
