### Nigeria creates US\$2.6 bn infrastructure company

Nigerian President Muhammadu Buhari's government has approved the creation of a company to fast-track development of critical infrastructure, with around US\$2.6 billion in initial financing. Africa's most populous country slipped into recession in its third quarter for the second time in four years, hit by the coronavirus pandemic and a fall in oil prices, and faces a huge infrastructure deficit. "It is envisaged that, over time, the entity will grow to naira 15 trillion (US\$39.3 billion), in assets and capital," a spokesman for Vice President Yemi Osinbajo said in a statement on Friday.

The company, Infra-Co, will be one of the top infrastructure finance entities in Africa and will be wholly dedicated to Nigeria's infrastructure development, the statement said.

Infra-Co will operate as a public-private partnership and will be initially funded by the Central Bank of Nigeria, the Nigerian Sovereign Investment Authority and the Africa Finance Corporation. It will focus on developing public assets and reconstruction as well as new roads, rail, power and other key infrastructure sector projects. The IMF expects Nigeria's economy to contract by at least 3 percent this year, a situation many fears will further deepen the country's infrastructure crisis and worsen an economy already struggling with the impact of the pandemic.

Nigeria's senate last year approved nearly US\$23 billion (18.9 billion euros) in foreign loan requests by Buhari to support a series of large-scale projects, which the government hopes will revamp the country's crumbling infrastructure. Buhari early this week also launched a US\$1.96 billion rail project linking to neighbouring Niger as the country looks to boost its growth.

The agriculture sector is at the heart of Namibia's development agenda going forward.

With nine years to go before the expiration of Namibia's grand development plan, Vision 2030, the government is reviewing the plan with a view to replacing it with one that speaks to the realities of the day.

This was announced by National Planning Commission (NPC) director, Obeth Kandjoze, at a recent media conference meant to inform the nation about the government's decision to liquidate the cash-strapped Air Namibia.

At this event, Kandjoze said: "We must actually craft a grand-visioning statement that will replace Vision 2030. We must review NDP 5 to be able to fit into the economy post-Covid-19."

bility by 2030. "We have assembled a team of experts led by the National Planning Commission, assisted by the Ministry of Finance and Bank of Namibia.

We have solicited the efforts and advice of Harvard University Growth Lab experts led by Professor Ricardo Hausmann, a very well renowned

professional in the business of helping countries identify pitfalls in their setups from an economic structural point of view," Kandjoze said.

The growth lab works to understand the dynamics of growth and to translate those insights into more effective policymaking in developing countries.

### Agriculture

Kandjoze also said Namibia must position itself strategically to benefit from the African Continental Free Trade Area Agreement (AfCFTA).

The former mines minister added: "We must have a stake in that vision. Going forward the economy is actually put at a display as to "what is agriculture achieving?"

"Agriculture was contributing between 12 to 15 percent of GDP. Today agriculture is reduced to less than 4 percent. What are the structural policy changes that should come in to begin to help the sector," he questioned? Additionally, he said agriculture is at the heart of Namibia's development agenda going forward. Other sectors such as mining are also under review.

"The idea is to understand where the impediments are in our economic structural set-up so we can do away with those impediments, review the policies, understand the future of the particular sort of market in agriculture, mining and so forth so that we can position the economy post-Covid-19," he noted.
