Subject: RE: Application for an ECC for EPLs 7414 AND 7415

Good morning Anna

Thank you for the feedback, much appreciated.

I will make reference to this communication as part of our final submission to the Environmental Commissioner's office.

Thanks and regards

Sheldon

Good morning,

I can confirm that according to our register, the application was handed over to MET via our Mineral Rights official and signed off by Maggy.

Regards,

Anna Gideon

Good day Mr Shivolo

Thank you for your response.

I will contact the relevant representatives at the Environmental Commissioner's office and let you know if they have not received correspondence from your office regarding the ECC applications for EPL 7414 and EPL 7415.

Thanks and regards

Subject: Application for an ECC for EPLs 7414 AND 7415

Good afternoon,

I have today received a copy of an email send to our ED regarding the above.

If the applications were duly submitted to this office in December 2020, I expect that we would have assessed them already and forwarded our observations to MEFT. However if that is not the case, and before we repeat the same exercise, can we please receive confirmation from MEFT that we did not submit our assessment to the Office of the Environmental Commissioner?

Erasmus I. Shivolo

Deputy Executive Director / Mining Commissioner

Ministry of Mines and Energy

Good day Leah

Thank you for taking my call earlier. I understand that Ms Kooper is currently out of office, but that you are able to attend to my query.

Please see email below sent earlier today to Mr Negumbo and documents attached for reference.

Please send us a “support letter” if the MME has no comments on the two EPLs in question.

If you need anything from our side please feel free to call.

Thanks and regards
Sheldon

Subject: RE: Application for an Environmental Clearance Certificate for Proposed Exploration Activities on EPLs 7414 & 7415 near Gobabis, Omaheke Region

Good day Mr Negumbo

I hope you are well.

Resilient Environmental Solutions cc (RES) has been appointed by Heyn Ohana Investment cc to apply for an Environmental Clearance Certificate for the proposed exploration activities on EPL 7414 and 7415 (see email below and background information attached for more context).

In accordance with the current MEFT application procedure, my colleague John Pallett delivered a copy of Form 1 (registration of an application for an ECC), which was first submitted to the Environmental Commissioners office (see attached) and then subsequently to the Competent Authority for this ECC application – i.e. the MME/your office on 18 December 2020.

The required EIA process is now complete and we are ready to submit the final scoping report to the Environmental Commissioner's office. However, we need a "support letter" from your office to accompany our final submission. **Therefore, if your office has no comments regarding the two EPLs in question please send us via email a scanned copy of a "support letter"?**

Thanks and regards

Subject: Application for an Environmental Clearance Certificate for Proposed Exploration Activities on EPLs 7414 & 7415 near Gobabis, Omaheke Region

Dear Interested and Affected Party

This email serves to inform you (and/or the organisation you represent) of Heyn Ohana Investment cc's (the Proponent) intention to carry out exploration activities on two Exclusive Prospecting Licenses (EPLs), EPL 7414 and EPL 7415, located approximately 60 km north of Gobabis in the Omaheke Region (hereafter referred to as the project). Carrying out minerals exploration activities is a 'listed activity' as per Government Notice No. 29 of 6 February 2012, which requires an Environmental Clearance Certificate (ECC) (and therefore an Environmental Assessment (EA)) from the Environmental Commissioner before exploration activities may commence.

The Proponent, commissioned this Environmental Impact Assessment (EIA) and appointed Resilient Environmental Solutions cc (the EAP) to undertake it, as required by the EIA Regulations (GN. 30 of 2012). This EIA will form part of an application for an ECC to the Environmental Commissioner as required by Section 27(3) of the Environmental Management Act (No. 7 of 2007).

You (and/or the organisation you represent) have been identified as an Interested and Affected Party (I&AP) for this project. Please find attached a background information document about the project.

You are also hereby invited to submit comments or concerns about the proposed exploration activity. Comments received at a meeting (see details below), or in writing will be considered as part of the scoping study.

You (and/or the organisation you represent) are invited to attend the following public consultation meeting:

- **Thursday, 18 February 2021:**

- **Venue: Xain Quaz Camp, located 5km west of Gobabis on the B6.**
- **Time: 15:00**
- **Tea and coffee will be provided**
- **Please confirm attendance for catering and COVID-19 related purposes by 16 February 2021**

Please take note that the deadline for registration and submission of comments is 1 March 2021.

Please feel free to forward this email to anyone else you think would like to register as an interested or affected party for this project.

If you wish to unsubscribe from this I&APs list, please let me know.

Kind regards
Sheldon
