**RE: EMERGENCY REGRAVELLING WORKS ON DISTRICT ROAD DR3635  
(OKAHAO – AMWAANDA) IN OKAHAO CONSTITUENCY**

The Maintenance Division of the Roads Authority is mandated to maintain the National Road Network through the Roads Authority Act No. 17 of 1999, as promulgated by Parliament. While the primary function of the Maintenance division is to maintain the road network in order to achieve a safe and efficient road transport sector, the maintenance of roads further helps to enhance socio-economic growth and development, by improving the rural communities' access to regional economic centers, whilst providing numerous work opportunities to local contractors.

It is against this background that the Roads Authority has appointed a local Contractor "Kambwa Construction (Pty) Ltd" to execute re-gravelling and repair works on DR3635 in the Okahao Constituency as a matter of urgency for 3 months, effective from 01 September 2020.

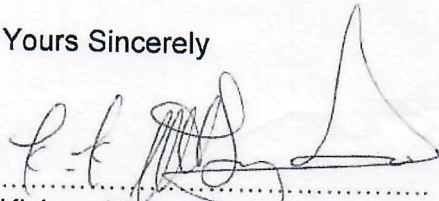

Kambwa Construction (Pty) Ltd has already commenced with the re-gravelling work and so far he has covered a section of about 9km out of 14km he was contracted. The gravel materials for the construction a 9 km section has been mined from a quarry at Omuthitu Borrow Pit. The cost for hauling material from Omuthitu borrow pit has increased which make it too costly for the project due to long haulage distance.

We draft this letter to seek your support as primary stakeholder in the project to provide us with land for the purpose of quarrying materials to complete the remaining 5km. The proposed land for quality materials is located at Oshilulu village of Ongandjera Traditional Authority.

Thank you for your time, and I look forward to hearing your response at your earliest convenience.

Yours Sincerely
