Comments/Suggestions and Questions:

The Oshakati does not object against the proposed EIA

Council would however like to raise the following points:

- According to Environmental Management Act No. 7 of 2007, subdivision of residential erven has not been listed as one of the activities requiring an EIA, unless you are creating a street;
- Alternatively the EIA should be the activities that have been listed under Column 2 of Table (Description of activity);
- However, that would be contradictory to section 4 of page 5 (Engineering services) as you state that, "It is the intention of the proponent to connect the Erf No.150 A Ekuku and Erf No 150 B Ekuku to the existing bulk services of the town as the erven are in close proximity to the services. These will consist of water, sewage and electricity".

Please fill in particulars and return completed document to be registered as an Interested & Affected Parties (I&AP) to:
