

ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT FOR THE EXPLORATION OF NUCLEAR FUEL MINERALS (URANIUM) ON EXCLUSIVE PROSPECTING LICENSE (EPLS) 7297,8026, 8290 & 8298 IN THE ERONGO REGION, NAMIBIA.

UNDERTAKING OF PUBLIC CONSULTATION MEETING – KLEIN SPITZKOPPE

VENUE: KLEIN SPITZKOPPE MEETING TREE, SPITZKOPPE IN THE ERONGO REGION

DATE: THURSDAY, 21 APRIL 2022

TIME: 11:00 (STARTING TIME 11:40 – 13:30)

ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) / CONSULTANT:

Mr. Tendai E. Kasinganeti – EnviroPlan Consulting CC (Lead EAP), Ms. Fredrika Shagama (Consultation Meeting Facilitator)

Attendees:

The meeting was attended by 14 people including the two Environmental Consultants from EnviroPlan Consulting. One of the community members insisted on adding four names of other community members who were supposed to attend the meeting, but they could not make it. Please refer to the Attendance register attached at the end of this document.

Proceedings:

| ITEM | DESCRIPTION | PERSON |
|----------|--|--|
| 1 | Welcome and Introductions | |
| | All in attendance were welcomed by the Environmental Consultant on behalf of EnviroPlan Consulting. | Ms. Fredrika Shagama |
| 2 | Purpose of Meeting | |
| | -Ms. Shagama presented the agenda of the meeting to the community members in attendance. There were some elderlies from the community who only spoke Damara Nama language. Therefore, for inclusivity and transparency, Mr. Richardo Maletsky provided translations of the meeting proceedings from English to Damara Nama and vice versa for the community members (attendees). -The meeting was aimed at allowing the local communities an opportunity to learn about the project and what is planned in that regard. To allow the public an opportunity to provide their comments, questions, and concerns directly to the project team and open dialogue for questions and answers. | Ms. Fredrika Shagama Mr. Ricardo Maletsky |

| ITEM | DESCRIPTION | PERSON |
|----------|---|--|
| | <p>-EnviroPlan Consulting is undertaking this process in compliance with the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations and apply for the environmental clearance for the project with the Ministry of Environment, Forestry and Tourism. Public Consultation and Engagement is one of the requirements under Section 21 to 24, hence the need for full participation of local communities and any other interested and affected parties to raise issues and comment on the proposed project activities.</p> <p>-The Environmental Impact Assessment process in Namibia was explained to the members in attendance.</p> | |
| 3 | Background and overview of the project | |
| | <ul style="list-style-type: none"> • The map of the EPLs was distributed to the meeting attendees for orientation and the copies of the printed Background Information Documents (BIDs) comprising the proposed mineral activities. • The Environmental Consultant also presented the planned activities associated with the exploration works. • All anticipated positive and negative environmental impacts were thoroughly disclosed and discussed by the Environmental Consultant so that the community members would understand the implications of the project activities. • The Consultant concluded the presentation and encouraged the attendees to ask questions, raise issues and any input they would like to be considered in the Environmental documents (Environmental & Social Impact Report (ESIA) Report and Environmental & Social Management Plan (ESMP)). The ESMP will be developed to provide remediation and action measures. | <p>Ms. Fredrika Shagama Mr. Ricardo Maletsky</p> |
| 4 | Open Discussion: Comments, issues, concerns, and Questions & Answer Session | |
| | <p>-The meeting attendees were requested to raise their hands, introduce themselves and raise their comments/issues and or suggestion so that the Consultant could take note of the inputs for incorporation into the meeting minutes and environmental reporting.</p> | <p>All</p> |

The Summary of issues and comments raised during the Consultation Meeting in Klein Spitzkoppe on 21 April 2022 are presented below.

| ASPECT | COMMENTATOR / I&AP | COMMENT, QUESTION, CONCERN RAISED |
|--|---------------------|--|
| Environmental Preservation | Mr. Michael Nawaseb | -The Proponent should preserve the natural and social environment during their works in the area. -The exploration and related works should not be conducted on the mountains because of the presence of rock paintings that are found on almost every mountain in the area. |
| Corporate Social Responsibility | | -The Proponent should try to help the community with improving the water supply, by drilling even and equipping one borehole for them during exploration and even provide solar energy (electricity) to the communities. |
| Appropriate engagement procedures and channels | | The Proponent should come to the Klein Spitzkoppe community through the elected committee development leaders and not through individuals in the communities or traditional authorities only. |
| Corporate Social Responsibility | Mr. Hansie Geiseb | -The Proponent should try to invest in the community the community development trust (CDT) so that the funds can be used for different community projects such as aiding vulnerable children and setting up a community campsite for tourism purposes. Furthermore, the funds donated to the CDT can also be used to build better shelters for the communities. |
| Transparency and inclusivity of locals | | From experience, some project owners do not notify the local communities (properly involve them) prior to the commencement of their work and not communities mostly waking up to equipment or vehicles in the area and they have no idea what they are all about. It could also be a case of the EIA Studies not conducted properly from the beginning to include locals. This should be changed and upheld, not only during EIA Studies but also during project implementation. |
| History of Mining and benefiting other communities | | The history mining related activities in the area had just been benefiting the communities in Great Spitzkoppe and leaving out the communities in and around Klein Spitzkoppe where the actual work is done and the affected area. This needs to change. |

| ASPECT | COMMENTATOR / I&AP | COMMENT, QUESTION, CONCERN RAISED |
|---|-------------------------|---|
| Corporate Social Responsibility | | <p>-The project owner should consider investing in community education through scholarships to further studies or small businesses, and other community projects.</p> <p>-If the ECC is granted, they should also consider drilling water for the community.</p> |
| Priority of employment to local communities | Ms. Hildegard Pietersen | -The work that can be done by the locals should be given to them and priority given to the locals for all jobs that they can perform. |
| Improvement of services infrastructure | Mr. Roveh Pala | <p>-If and where possible, consider establishing infrastructure such as local health centres because there is nothing in the community.</p> <p>-They should also consider investing in the local schools through donating school uniforms</p> |
| Groundwater quality issues in the area | Mr. Richardo Maletsky | <p>-The community does not have water because it is polluted by the natural uranium encountered in the areas' groundwater. The water quality is bad, and this is a health risk to us.</p> <p>-The community has been relying on rainwater recently because the mono pump of the community borehole is broken. The borehole was drilled and donated by Africa Granite Mine when they were operating in the area, and they are no longer in the area to assist.</p> |
| <p>The above issues raised, comments and suggestions provided were recorded to form basis of the ESIA and ESMP</p> | | |
| <p>CONCLUSION AND CLOSING REMARKS</p> | | |
| <ul style="list-style-type: none"> Ms. Shagama posed a question to the attendees if they know of significant heritage sites in the area. They acknowledged and confirmed that the mountain in the area are homes to many rock paintings and other sites or objects of heritage significance. Therefore, the proposed exploration activities should stay off the mountains to preserve these sites. Ms. Shagama thanked the community for their attendance and inputs (comments, questions, and suggestions) and closed the meeting The meeting was adjourned at 13h30. | | |

Notice of Scoping and Environmental and Social Impact Assessment (ESIA) Process Invitation to register as an Interested and Affected Party for the proposed Erongo Substation and associated infrastructure

D&P Engineers and Environmental Consultants hereby gives notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the proposed Erongo Substation.

NamPower intends to construct and operate the proposed Erongo Substation and associated infrastructure (powerlines, transformers, access roads) due to the envisaged load growth in the Navachab / Karibib area. The proposed development entails developing an in and out substation on the Omburu-Khan 1 - 220kV line and stepping down to 66kV to ensure that more capacity is available.

The proposed substation will be located on Portion 22 Karibib 54 (20 Hectares) and Remainder Portion A Karibib (25 hectares) with a total land footprint of 45 hectares. NamPower thus purchased the 45 Hectares land for the proposed development.

NamPower (the proponent) has appointed D&P Engineers and Environmental Consultants to conduct the ESIA process for the Project. The ESIA is being conducted to satisfy the Namibian environmental legislative requirements. The general public as well as any Interested and Affected Parties (I&APs) are hereby invited to attend the public meeting during which the potential environmental and social impacts of the project will be presented for comments and inputs from the public. The meeting is scheduled to take place as follows:

Date: Wednesday 06 April 2022
Time: 11:00 AM
Venue: Klippenberg Country Club & Guesthouse Conference Room, Karibib

Interested & Affected Parties (I&AP) Registration and submission of comments: To comment or receive further information on the project, please register with the consultant (contact details below) as an I&AP before end of business on 27 April 2022. A Background Information Document (BID) has been compiled for the project and is available upon request to the consultant, contact below. All registered I&APs will be informed throughout the assessment process and will be provided with further opportunities for review and submission of comments. Comments can also be lodged via the online form given:

NOTICE OF ENVIRONMENTAL ASSESSMENT AND PUBLIC PARTICIPATION PROCESS

Junior Baiano Industrial Consultants cc hereby gives notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the following activity:

Project Title: Proposed construction and operation of a commercial Fuel Retail Facility.

Project Description: The proposed construction and operation of a Namcor commercial fuel retail facility on the existing TransNamib premises in Otjiwarongo.

Project Location: The proposed project site is located at the Otjiwarongo TransNamib Warehouse, sandwiched between Einstein Street and the B1 National Road.

Proponent: Namcor

I&APs are invited to register with the consultant and give their comments and concerns in writing.

Please take note of the following:

PUBLIC MEETING
Date: 08 April 2022
Venue: Transnamib Locomotive Depot, Otjiwarongo
Time: 13h00 pm

To register or request documents please submit your name, contact information and interest in the project, in writing to:

Mr. Fredrich Nghiyolwa

Notice of Scoping and Environmental and Social Impact Assessment (ESIA) Process Invitation to register as an Interested and Affected Party for the proposed Erongo Substation and associated infrastructure

D&P Engineers and Environmental Consultants hereby gives notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the proposed Erongo Substation.

NamPower intends to construct and operate the proposed Erongo Substation and associated infrastructure (powerlines, transformers, access roads) due to the envisaged load growth in the Navachab / Karibib area. The proposed development entails developing an in and out substation on the Omburu-Khan 1 - 220kV line and stepping down to 66kV to ensure that more capacity is available.

The proposed substation will be located on Portion 22 Karibib 54 (20 Hectares) and Remainder Portion A Karibib (25 hectares) with a total land footprint of 45 hectares. NamPower thus purchased the 45 Hectares land for the proposed development.

NamPower (the proponent) has appointed D&P Engineers and Environmental Consultants to conduct the ESIA process for the Project. The ESIA is being conducted to satisfy the Namibian environmental legislative requirements.

The general public as well as any Interested and Affected Parties (I&APs) are hereby invited to attend the public meeting during which the potential environmental and social impacts of the project will be presented for comments and inputs from the public. The meeting is scheduled to take place as follows:

Date: Wednesday 06 April 2022

Time: 11:00 AM

Venue: Klippenberg Country Club & Guesthouse Conference Room, Karibib

Interested & Affected Parties (I&AP) Registration and submission of comments: To comment or receive further information on the project, please register with the consultant (contact details below) as an I&AP before end of business on 27 April 2022. A Background Information Document (BID) has been compiled for the project and is available upon request to the consultant, contact below. All registered I&APs will be informed throughout the assessment process and will be provided with further opportunities for review and submission of comments. Comments can also be lodged via the online form given:

<https://forms.gle/PhfCoqbnQPXu8qqi6>

NOTICE FOR ENVIRONMENTAL IMPACT ASSESSMENT

Healthy Earth Environmental Consultants CC (HEEC) hereby gives notice to all potentially Interested and Affected Parties (I&APs) that an application will be made to the Environmental Commissioner in terms of the Environmental Management Act (No 7 of 2007) and Environmental Impact Assessment Regulations (GN 30 of 6 February 2012) for the following:

PROJECT NAMES:

- Environmental Impact Assessment (EIA) for the establishment and operation of an Agricultural Training Facility at Oshifukwa Village, Omuthiya constituency, Oshikoto Region.
- Environmental Impact Assessment (EIA) for the establishment and operation of an abattoir at Okaale Village, Omuthiya Constituency, Oshikoto Region.

PROJECTS LOCATION:

- The proposed Agricultural Training Facility will be situated at Oshifukwa Village approximately 3 Km West of Omuthiya, in Oshikoto Region
- The proposed abattoir will be situated at Okaale Village approximately 8 Km North-West of Omuthiya, in Oshikoto Region.

PROJECT DESCRIPTION:

- The project involves conducting an Environmental Impact Assessments (EIAs) for the establishment and operation of an Agricultural Training Facility at Oshifukwa Village, Omuthiya Constituency, Oshikoto Region.
- The project involves conducting an Environmental Impact Assessment (EIA) for the establishment and operation of an abattoir at Okaale Village, Omuthiya Constituency, Oshikoto Region.

PROJECT INVOLVEMENT:

Proponent: Namibia College of Technology and Vocational Training (NCTVT)

Environmental Assessment Practitioner (EAP): Healthy Earth Environmental Consultants CC (HEEC)

REGISTRATION OF I&APs AND SUBMISSION OF COMMENTS: In line with Namibia's Environmental Management Act (No. 7 of 2007) and EIA regulations (GN 30 of 6 February 2012), all I&APs are hereby invited to register and submit their comments, concerns or questions in writing via: Email: askheec@gmail.com on or before Friday 08th April 2022.

A public participation meeting will only be held if there is interest from registered I&APs: Should a public participation meeting be held all registered I&APs will be informed accordingly.

Qualification for Qatar ends a 36-year wait to return to the World Cup for Canada

Canada reach first men's World Cup since 1986

Canada beat Jamaica 4-0 to reach their first men's World Cup in 36 years.

Victory in Toronto means Canada are assured of finishing in one of the top three places in the final stage of Concacaf qualifying for Qatar 2022.

Their last World Cup appearance came at Mexico 1986, where they finished bottom of their group without scoring.

Cyle Larin and Tajon Buchanan put Canada 2-0 up at half-time before Junior Hoilett and an Adrian Mariappa own goal sealed the victory.

It led to joyous celebrations from the sell-out crowd at BMO Field as Canada clinched World Cup qualification for only the second time.

English coach John Herdman, who led the Canadian women's

team to successive Olympic bronze medals in 2012 and 2016, has guided Les Rouges to Qatar in his first qualifying campaign in charge.

"We just qualified for the World Cup, this is a legit football country," said Herdman, who last worked in England as an academy coach at Sunderland more than 20 years ago.

"When I first took over and I said, 'We're going to qualify for the World Cup', I don't think they believed us. I'm happy for them because all of these fans have waited and waited and waited, and hung in with us - and we're going.

"I think this country never believed in us because we've given them nothing to believe in. They believe now.

"This is the time for everyone to get behind football and unite

because we can be a powerhouse." The United States, Mexico, Costa Rica and Panama are all in contention for the final two automatic Concacaf qualification spots for the 2022 World Cup, which starts on 21 November.

Mexico and the US, who face El Salvador and Costa Rica respectively on Wednesday, need only a draw from their final qualification game to book their spots in Qatar.

Costa Rica, in fourth place, would need a big win against the US and for results to go their way to finish in the top three.

The fourth-placed country in the eight-team table earns a play-off against the winner of Wednesday's final of Oceania qualifying between the Solomon Islands and New Zealand.

Notice of Scoping and Environmental and Social Impact Assessment (ESIA) Process

EnviroPlan Consulting cc hereby gives notice to all potential Interested and Affected Parties (I&APs), that an application for Environmental Clearance certificate will be made to the Environmental Commissioner in terms of the Environmental Management Act (No. 7 of 2007) as follows;

Project: Environmental Impact Assessment (EIA) for Mineral Exploration activities for dimension stone, base and rare metals, industrial minerals, nuclear fuel minerals and precious metals on EPLs 8026, 8290, 8298, 7297 in Erongo Region, Namibia.

Proponents:

| | |
|--|---|
| a.) EPL 8026: Mr. Eino Efeinge Talela Shaanika. Lat: - 21.986608°, Long: 14.869297° | b.) EPL 8290: Ms. Vivienne Ndatenga Ndahambela Aluteni Lat: - 22.207821°, Long: 14.929943° |
| c.) EPL 8298: Mr. Sion Dimbulukweni Mwatukange Lat: -22.067018°, Long: 14.907476° | d.) EPL 7297: Mr. Aron lungameni Haludilu Lat: -22.607222°, Long: 14.755260° |

Environmental Assessment Practitioner: EnviroPlan Consulting cc.

Project Description and Location:

EPLs 8026, 8290 and 8298 are located between Trekopje and Spitzkoppe, approximately 15 km North of Trekopje and 10km South of Spitzkoppe

EPL 7297 is located near Birkenfels, approximately 15 km East of Swakopmund and 20 km West of Khan Mine

Public participation process: Interested and Affected Parties (I&APs) are hereby notified of the ongoing public participation process. Public meetings will be conducted as follows:

| EPL | Date and Time | Venue/Place |
|-----------------------|---------------------------|---|
| EPLs 8026, 8290, 8298 | 21 April 2022 11:00 am | Klein Spitzkoppe Public Meeting Tree, Spitzkoppe |
| EPL 7297 | 22 April 2022 10:30 AM | Atlantic Villa Guesthouse Conference Centre, Swakopmund |

The participation and commenting period extend until 15 May 2022.

ENVIRONMENTAL AND SOCIAL IMPACT ASSESSMENT FOR THE EXPLORATION OF NUCLEAR FUEL MINERALS (URANIUM) ON EXCLUSIVE PROSPECTING LICENSE (EPLS) 7297,8026, 8290 & 8298 IN THE ERONGO REGION, NAMIBIA.

UNDERTAKING OF PUBLIC CONSULTATION MEETING – KLEIN SPITZKOPPE

VENUE: KLEIN SPITZKOPPE MEETING TREE, SPITZKOPPE IN THE ERONGO REGION

DATE: THURSDAY, 21 APRIL 2022

TIME: 11:00 (STARTING TIME 11:40 – 13:30)

ENVIRONMENTAL ASSESSMENT PRACTITIONER (EAP) / CONSULTANT:

Mr. Tendai E. Kasinganeti – EnviroPlan Consulting CC (Lead EAP), Ms. Fredrika Shagama (Consultation Meeting Facilitator)

Attendees:

The meeting was attended by 14 people including the two Environmental Consultants from EnviroPlan Consulting. One of the community members insisted on adding four names of other community members who were supposed to attend the meeting, but they could not make it. Please refer to the Attendance register attached at the end of this document.

Proceedings:

| ITEM | DESCRIPTION | PERSON |
|----------|--|--|
| 1 | Welcome and Introductions | |
| | All in attendance were welcomed by the Environmental Consultant on behalf of EnviroPlan Consulting. | Ms. Fredrika Shagama |
| 2 | Purpose of Meeting | |
| | -Ms. Shagama presented the agenda of the meeting to the community members in attendance. There were some elderlies from the community who only spoke Damara Nama language. Therefore, for inclusivity and transparency, Mr. Richardo Maletsky provided translations of the meeting proceedings from English to Damara Nama and vice versa for the community members (attendees). -The meeting was aimed at allowing the local communities an opportunity to learn about the project and what is planned in that regard. To allow the public an opportunity to provide their comments, questions, and concerns directly to the project team and open dialogue for questions and answers. | Ms. Fredrika Shagama Mr. Ricardo Maletsky |

| ITEM | DESCRIPTION | PERSON |
|----------|---|--|
| | <p>-EnviroPlan Consulting is undertaking this process in compliance with the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations and apply for the environmental clearance for the project with the Ministry of Environment, Forestry and Tourism. Public Consultation and Engagement is one of the requirements under Section 21 to 24, hence the need for full participation of local communities and any other interested and affected parties to raise issues and comment on the proposed project activities.</p> <p>-The Environmental Impact Assessment process in Namibia was explained to the members in attendance.</p> | |
| 3 | Background and overview of the project | |
| | <ul style="list-style-type: none"> • The map of the EPLs was distributed to the meeting attendees for orientation and the copies of the printed Background Information Documents (BIDs) comprising the proposed mineral activities. • The Environmental Consultant also presented the planned activities associated with the exploration works. • All anticipated positive and negative environmental impacts were thoroughly disclosed and discussed by the Environmental Consultant so that the community members would understand the implications of the project activities. • The Consultant concluded the presentation and encouraged the attendees to ask questions, raise issues and any input they would like to be considered in the Environmental documents (Environmental & Social Impact Report (ESIA) Report and Environmental & Social Management Plan (ESMP)). The ESMP will be developed to provide remediation and action measures. | <p>Ms. Fredrika Shagama Mr. Ricardo Maletsky</p> |
| 4 | Open Discussion: Comments, issues, concerns, and Questions & Answer Session | |
| | <p>-The meeting attendees were requested to raise their hands, introduce themselves and raise their comments/issues and or suggestion so that the Consultant could take note of the inputs for incorporation into the meeting minutes and environmental reporting.</p> | <p>All</p> |

The Summary of issues and comments raised during the Consultation Meeting in Klein Spitzkoppe on 21 April 2022 are presented below.

| ASPECT | COMMENTATOR / I&AP | COMMENT, QUESTION, CONCERN RAISED |
|--|---------------------|--|
| Environmental Preservation | Mr. Michael Nawaseb | -The Proponent should preserve the natural and social environment during their works in the area. -The exploration and related works should not be conducted on the mountains because of the presence of rock paintings that are found on almost every mountain in the area. |
| Corporate Social Responsibility | | -The Proponent should try to help the community with improving the water supply, by drilling even and equipping one borehole for them during exploration and even provide solar energy (electricity) to the communities. |
| Appropriate engagement procedures and channels | | The Proponent should come to the Klein Spitzkoppe community through the elected committee development leaders and not through individuals in the communities or traditional authorities only. |
| Corporate Social Responsibility | Mr. Hansie Geiseb | -The Proponent should try to invest in the community the community development trust (CDT) so that the funds can be used for different community projects such as aiding vulnerable children and setting up a community campsite for tourism purposes. Furthermore, the funds donated to the CDT can also be used to build better shelters for the communities. |
| Transparency and inclusivity of locals | | From experience, some project owners do not notify the local communities (properly involve them) prior to the commencement of their work and not communities mostly waking up to equipment or vehicles in the area and they have no idea what they are all about. It could also be a case of the EIA Studies not conducted properly from the beginning to include locals. This should be changed and upheld, not only during EIA Studies but also during project implementation. |
| History of Mining and benefiting other communities | | The history mining related activities in the area had just been benefiting the communities in Great Spitzkoppe and leaving out the communities in and around Klein Spitzkoppe where the actual work is done and the affected area. This needs to change. |

| ASPECT | COMMENTATOR / I&AP | COMMENT, QUESTION, CONCERN RAISED |
|---|-------------------------|---|
| Corporate Social Responsibility | | <p>-The project owner should consider investing in community education through scholarships to further studies or small businesses, and other community projects.</p> <p>-If the ECC is granted, they should also consider drilling water for the community.</p> |
| Priority of employment to local communities | Ms. Hildegard Pietersen | -The work that can be done by the locals should be given to them and priority given to the locals for all jobs that they can perform. |
| Improvement of services infrastructure | Mr. Roveh Pala | <p>-If and where possible, consider establishing infrastructure such as local health centres because there is nothing in the community.</p> <p>-They should also consider investing in the local schools through donating school uniforms</p> |
| Groundwater quality issues in the area | Mr. Richardo Maletsky | <p>-The community does not have water because it is polluted by the natural uranium encountered in the areas' groundwater. The water quality is bad, and this is a health risk to us.</p> <p>-The community has been relying on rainwater recently because the mono pump of the community borehole is broken. The borehole was drilled and donated by Africa Granite Mine when they were operating in the area, and they are no longer in the area to assist.</p> |
| <p>The above issues raised, comments and suggestions provided were recorded to form basis of the ESIA and ESMP</p> | | |
| <p>CONCLUSION AND CLOSING REMARKS</p> | | |
| <ul style="list-style-type: none"> Ms. Shagama posed a question to the attendees if they know of significant heritage sites in the area. They acknowledged and confirmed that the mountain in the area are homes to many rock paintings and other sites or objects of heritage significance. Therefore, the proposed exploration activities should stay off the mountains to preserve these sites. Ms. Shagama thanked the community for their attendance and inputs (comments, questions, and suggestions) and closed the meeting The meeting was adjourned at 13h30. | | |

3 things the world's oldest people regret, according to longevity researchers

Notice of Scoping and Environmental and Social Impact Assessment (ESIA) Process

EnviroPlan Consulting cc hereby gives notice to all potential Interested and Affected Parties (I&APs), that an application for Environmental Clearance certificate will be made to the Environmental Commissioner in terms of the Environmental Management Act (No. 7 of 2007) as follows;

Project: Environmental Impact Assessment (EIA) for Mineral Exploration activities for dimension stone, base and rare metals, industrial minerals, nuclear fuel minerals and precious metals on EPL 8995, in Erongo Region, Namibia.

Proponent: Mr. Eino Efeinge Talela Shaanika

Environmental Assessment Practitioner: EnviroPlan Consulting cc.

Project Location and Description: Lat:-21.986608°, Long:14.869297°. EPL 8995 is located between Trekopje and Spitzkoppe, approximately 15 km North of Trekopje and 10 km South of Spitzkoppe.

Public participation process: Interested and Affected Parties (I&APs) are hereby notified of the on-going public participation process. Public meeting will be conducted as follows:

Date: 15/12/23 **Venue:** Klein Spitzkoppe Public Meeting Tree

The participation and commenting period extend until 17 December 2023.

To register or request for documents submit your details in writing to the Environmental Consultant and contact details given;

EnviroPlan Consulting cc

EAPAN Membership No: 219

As people journey through life, it is common for them to reflect on past decisions and actions, often leading to feelings of regret.

This phenomenon has intrigued researchers and psychologists for decades, and there is a growing understanding of the science behind why people experience regret as they grow older.

Regret can be defined as a negative emotion associated with a person's belief that they could have achieved a better outcome if they had chosen differently in the past.

It often arises from unmet expectations, perceived mistakes, or the feeling of wasted opportunities.

Anyone may experience regret about various facets of their lives, including relationships, career choices, educational pursuits, and personal achievements.

One of the key components of regret is memory, particularly the phenomenon of selective recall. This selective recall can magnify the significance of missed opportunities or poor decisions, intensifying the emotional impact of regret.

According to Ben Meyers and Fabrizio Villatoro, researchers at LongeviQuest, an organisation that verifies the ages of supercentenarians (people who live to 110 or older) worldwide, the oldest individuals have shared their most common regrets.

Meyers, CEO of LongeviQuest, and Villatoro, Latin America research president, have had the opportunity to speak with these remarkable individuals, gathering insights on longevity and the things they wish they had done differently.

Meyers noted that many of the centenarians they spoke to had endured incredibly challenging lives, having lived through significant events such as war, the Great Depression, and decolonisation.

Despite this, he pointed out that their regrets were relatable and "pretty human", much like those of the general population.

Working too hard

One common regret expressed by centenarians was not spending enough time with family. Meyers described this as a "typical" regret

among the supercentenarians they encountered.

Villatoro added that some regretted life's hardships and world events that disrupted their stability and prevented them from having more children.

Another regret that emerged was working too hard. Villatoro shared the story of Juan Vicente Pérez Mora from Venezuela, the oldest validated person ever at the age of 114.

Quality time with loved ones

Mora had wished he had worked less, as he had dedicated his life to hard physical labour on his family's farm.

Villatoro explained that Mora's family had spoken about his regrets of not exploring different career paths, which would have allowed him to spend more time with his loved ones.

This sentiment resonates with findings from previous studies, which indicated that many individuals in hospice and palliative care also regretted prioritising work over family time.

Not travelling more

Not travelling more was another common regret expressed by centenarians. For instance, Evangelista Luisa López, who grew up in Santa Fe province, Argentina, and later moved to Mar del Plata, wished she had travelled more throughout her life.

This sentiment aligns with the findings of Karl Pillemer, a professor of gerontology in medicine at Weill Cornell Medicine. In his book "30 Lessons for Loving: Advice from the Wisest Americans on Love, Relationships, and Marriage", Pillemer highlighted that older Americans also regretted not having travelled more, particularly during their younger years.

Despite the intrinsic challenges associated with regret, ageing also offers the potential for wisdom and self-reflection.

Coping with regret can be a challenging and emotionally taxing experience. However, there are several effective coping mechanisms that individuals can employ to navigate and manage feelings of regret.

Coping strategies

Understanding and implementing these coping strategies can help individuals cultivate resilience, promote self-growth, and ultimately move forward in a constructive and empowered manner.

Reflecting on experiences

Thinking about past experiences can help you see regret as a way to learn and grow, rather than just something negative.

Being kind to yourself

Treating yourself with kindness and understanding, especially when facing challenges or regret, can help you acknowledge mistakes without being too hard on yourself. This can build resilience and improve how you see yourself.

Embracing mindfulness and acceptance

Practising mindfulness, like meditation and deep breathing, can help you stay present and be aware of your thoughts and emotions without being judgmental.

Set realistic expectations

Recognising and managing your expectations is important when dealing with regret. Having realistic expectations and letting go of perfectionism can ease the weight of regret and strengthen your self-acceptance and emotional strength.

Doing things that matter

Getting involved in activities that bring joy and fulfilment can help manage regret. Hobbies, volunteering, or creative pursuits can boost your self-worth and shift your focus to positive experiences and personal growth.

Get help from a professional

If regret affects your mental well-being, talking to a therapist or counsellor can offer valuable support and guidance. Professional interventions like cognitive-behavioural therapy can provide effective strategies to deal with regret and its emotional impact. Talking to friends, family, or others in your support network can give you comfort, different perspectives, and valuable insights. Sharing your feelings can offer understanding and help you heal.

LAUNCHES 15 NOVEMBER

Available on Google Play and the App Store.

sibility to engage its Higher Education counterpart to determine if there's an alignment with the teachers' education curriculum in the country.

She said the government cannot employ all unemployed teachers.

"The demand and supply that we currently have is problematic. We need specific teachers at the secondary level in specific subjects. Pre-primary and primary are saturated and if there needs to be an interaction then we need more teachers for pre-primary which could be a possibility for employment," she explained.

Steenkamp outlined the ministry's efforts, including the allocation of principal and head of department positions based on regional needs.

She explained that 723 teachers were allocated across 14 regions, and additional positions would be considered based on future needs.

Responding to the protesters' demands, Steenkamp detailed the allocation of various positions, including administration officers, matrons, and cleaners.

"There was a request for 69 administration officers and all 69 have been appointed. Three libraries were requested and we have allocated the libraries and administration's offices already to the regions," she said.

She emphasised the significant financial commitment, revealing that the ministry would spend N\$295 million in 2024 alone on the employment of educators, covering salaries, bonuses, social security, GIFP contributions, and housing.

Looking ahead, Steenkamp mentioned the creation of new vacancies, with an expenditure of N\$73.9 million in the first three months of the year.

The ministry had faced criticism for allocating 80.3% of its N\$20.3 billion 2023/2024 budget to salaries.

The protests, staged by hundreds of unemployed graduate teachers, called for mass recruitment of teachers nationwide and the full implementation of the teacher-learner ratio policy.

The group expressed frustration over the lack of teaching opportunities in government schools and criticised the Ministry of Basic Education for what they perceived as poor planning.

Louw emphasised the critical role water plays in communities globally, asserting that its scarcity poses a risk to economic, social, and environmental well-being.

He underscored the challenges faced by Namibia, ranking as one of the world's 30 driest countries, with water scarcity being a significant concern.

Particularly in areas like Five Rand and Vergenoeg in Okahandja, water sources are scarce, impacting underprivileged communities.

In October, reports surfaced that residents of Okahandja's informal settlements such as Five Rand had been utilising wastewater from the NamWater industrial pipeline, which flows into the riverbed adjacent to the settlement.

This water was untreated according to NamWater's Chief Strategic Officer Kadiva Hamutumwa.

Hamutumwa emphasised the need for residents to refrain from using this water for anything other than gardening purposes, underscoring its lack of suitability for domestic consumption.

These reports were some of the factors that prompted ABI to invest in the municipality's Water Stewardship initiative, according to the company's plant manager, Choolwe Mudenda

Strategically utilising identified boreholes owned by the Municipality and a nearby water storage facility, this project aims to integrate these resources into the reticulation system.

"These boreholes, in conjunction with an existing reservoir, will be integrated into the reticulation system." ABI Namibia and the Okahandja Municipality formalised their collaboration through signing a Memorandum of Understanding (MoU)," Mudenda said.

She also explained the details of the agreement between ABI and the municipality.

According to her, the comprehensive approach involves water extraction, treatment, and storage, addressing the unique challenges faced by Okahandja.

"This document outlines the terms of the working relationship, the project's objectives, and the respective obligations of both parties in achieving these goals," she said.

Otjzondjupa regional governor, James Uerikua, commended AB InBev's significant investment in Okahandja, aligning with the government's push for Public-Private Partnerships to address national issues.

Uerikua emphasised the potential positive impact of the project on reducing water costs and ensuring water availability for low-income communities, further noting the brewery's contribution to job creation and economic development in the town.

LAUNCHES 15 NOVEMBER

A Call for Public Participation & Engagement on the Environmental Impact Assessment (EIA) Study: The Existing and Proposed Groundwater Abstraction and Use within the Omaruru Townlands of Omaruru Town in the Erongo Region

The public is hereby notified that an application for an Environmental Clearance Certificate (ECC) will be submitted to the Environmental Commissioner as per the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations. Water resources development are listed activities in the EIA Regulations that cannot be undertaken without an ECC. Thus, the EIA Study is required to apply for and obtain the ECC.

Project Nature (Activities): The project activities entail the abstraction and use of groundwater from the Omaruru Municipality boreholes to supply water to its growing population (residents and business community). The Municipality currently abstracts water from nine production boreholes. To meet the water demands of the Town, the Municipality proposes to add two more boreholes to the abstraction scheme.

Proponent: Municipality of Omaruru

Appointed Environmental Consultant: Popeti Investment CC

Therefore, members of the public are invited to register as Interested and Affected Parties (I&APs) to submit comments, issues and or to receive further information on the EIA Study process. The request for registration as I&APs and to submit comments should be done in writing **before or on Friday, 24**

A Public Consultation Meeting will be held in Omaruru and meeting details will be shared in due time with all registered I&APs/stakeholders.

Contact Person: Ms. Fredrika Shagama

Dear EnviroPlan Consultancy

This is a resend

I hereby request to be registered as an I&AP for the EIA:

-Environmental Impact Assessment for the exploration activities on EPL 8995, located between Trekopje and Spitzikoppe, as issued in your public notice in The Villager newspaper on the 4th of December 2023.

Kindly forward me the Background Information Documents (BID).

Regards

to ndeliimonachox, tendai

Good morning, stakeholders!

I am providing you with the BID for the Environmental Impact Assessment being undertaken for EPL 8995 in the Erongo Region as requested.

Therefore, we will register you as an I & A P as soon as you fill in the attached form and send back to us.

Kindy let us know if you have any questions.

Regards

Talent Nyungu (EAP)
