Dear Interested and Affected Party,

We hope this message finds you well. We are writing to inform you about bush control activities currently underway on Farm Okauapenhuri 19, which is adjacent to your property. These activities primarily involve the harvesting of biomass and the generation of charcoal.

Our primary objective in carrying out these bush control activities is to promote a healthier and more sustainable ecosystem in our region by adhering to Forest Stewardship Council (FSC) standards. Bush encroachment can have detrimental effects on the local environment, water resources, and biodiversity. By managing and controlling bush growth, we aim to mitigate these impacts and restore the natural balance of our ecosystem.

We understand the importance of open communication and community involvement in such initiatives. Therefore, we encourage you, as an interested and affected party, to share your comments or concerns regarding these activities and their potential effects on the surrounding ecosystems.

If you wish to obtain more information about the specific methods and measures, we are implementing or if you would like to get involved in this group scheme, we welcome your inquiries and participation. Your input and engagement are highly valued as we work together to achieve our shared goals of preserving our environment and maintaining a sustainable way of life.

Please feel free to contact us at +264816697608 or send an email to mariska@eccenvironmental.com and emily@eccenvironmental.com if you have any questions or need more information. Your feedback and involvement are essential as we strive to positively impact our community and environment.

Thank you for your attention, and we look forward to your valuable input.

Monday

Who gave you my cell number?

8:04 am

I am 83 and a woman so to speak! I don't know 😊 Risser!!

8:16 am

Rather stop people felling our beautiful trees 🌳 !

8:20 am

Good morning, sir, our client's name is Risser the producer of farm Okanapehuri. When a producer joins our group scheme some of the information they need to provide is the neighbor's contact details, so that is how we came in contact with your cellphone number.
