PROJECT: ENVIRONMENTAL IMPACT ASSESSMENT FOR THE PROPOSED SAND MINING ON RUNDU FLOODPLAINS IN RUNDU, KAVANGO EAST REGION-NAMIBIA.

DOCUMENT: PROJECT CONSENT

TO WHOM IT MAY CONCERN

Dear Sir/Madam

Rundu Town Council intends to formalise sand mining operations occurring within its townlands boundaries. In this respect, the Council identified sand mining sites that can be formalised and ensure sustainable sand abstraction. As such, the Rundu floodplains which have been historically used for sand mining in the town were proposed for formalisation and control.

Rundu Town Council intends to take control and ownership of sand mining operations occurring at the Rundu floodplains condition to:

1. An Environmental Impact Assessment for the project
2. Awarding of Environmental Clearance Certificate from MEFT.
3. Full implementation of the approved Environmental Management Plan

I trust that you find the above in order and should you require any further information, and advice on the project, please contact the undersigned;

Sincerely,

Olavi V.E. Nathanael (Mr.)
CHIEF EXECUTIVE OFFICER
