

# 1 APPENDIX D: PRESS NOTICES (NEWSPAPER ADVERTISEMENTS)

New Era 06.10.2017

**PUBLIC NOTICE**

**ENVIRONMENTAL IMPACT ASSESSMENT OF  
STEELMAN ROAD DARTS MOVING CLUBS, EPUNIA,  
CONSTITUENCY KUNIAKI REGION**

Under the Environmental Assessment Act 1977 and the Environmental Impact Assessment Regulations 2007, the Government is seeking public input on the proposed development of the Steelman Road Darts Moving Clubs. The proposed development includes the construction of a new building and the installation of a new dartboard. The proposed development is located at Steelman Road, Epunia, in the Kuniaki Constituency. The proposed development is expected to be completed by 2018. The proposed development is expected to have a positive impact on the local community. The proposed development is expected to create jobs and provide a new facility for the local community. The proposed development is expected to be a valuable addition to the local community. The proposed development is expected to be a positive contribution to the local community. The proposed development is expected to be a valuable addition to the local community. The proposed development is expected to be a positive contribution to the local community.

**Project Name and Location of Object**  
Project Name: Steelman Road Darts Moving Clubs  
Location: Steelman Road, Epunia  
Coordinates: 40° 45' 45" S, 174° 45' 45" E

**Public Information Meetings**  
The proposed development is being assessed by the Environmental Assessment Commission. Public information meetings will be held on 20th October 2017 at 10:00am at the Epunia Community School. The proposed development is being assessed by the Environmental Assessment Commission. Public information meetings will be held on 20th October 2017 at 10:00am at the Epunia Community School. The proposed development is being assessed by the Environmental Assessment Commission. Public information meetings will be held on 20th October 2017 at 10:00am at the Epunia Community School.

**Written Submissions**  
Written submissions should be made by 15th November 2017.  
Phone: 0800 554 431

## STAR OF THE WEEK

Ella Mavulu

This week Ella Mavulu, the cluster head man of Andambombali village is our Star of the Week. Mavulu exposed 11 deeds that amount to statutory rape where a girl has been cohabiting with a 24-year-old cattle herder since she was 12 years old. The parents of the girl, who is now 16-year-old, tried to no avail to put an end to this despicable situation by reporting the matter to their constituency councilor, the police and to the Ministry of Gender and Child Welfare. No action was taken though to rescue the girl and act against the culprit. After all efforts were exhausted, Mavulu took it upon himself and physically took New Era to the cattleboos where the issue was brought to light. By yesterday morning, police and the officials from the Ministry of Gender Equality travelled to Andambombali village to attend to the matter, thanks to Mavulu.

## PUBLIC NOTICE

### ENVIRONMENTAL IMPACT ASSESSMENT OF STILLRANDBERGE BARITE MINING CLAIMS, EFUMU CONSTITUENCY, KIRURU REGION

In terms of the Environmental Management Act (No. 29 of 2002) and the Environmental Impact Assessment (EIA) Regulations (Government Notice No. 43 of 2002), notice is hereby given to all persons interested and affected parties that an application will be made to the Environmental Management Board for an Environmental License for conducting barite mining and processing within the 4 mining claims, the locations to mine the mineral resource, being that are outlined.

Figure. Project area north-west of Itauya

Project: Stillrandberge Barite Mining  
 Proponent: M/L 561  
 Coordinator: Mr. Phisoiso

**Public Information Meetings:**  
 20<sup>th</sup> October 2017 at Chikanda Primary School - 4:30pm  
 26<sup>th</sup> October 2017 at Kibanda Primary School - 9:30am

Should you require any additional information please contact Mr. Phisoiso at 081-2275235. You are hereby invited to share any comments, views or concerns related to the activity for consideration in the EIA Report (see EIA).

**Written submissions may be made before 28<sup>th</sup> November 2017**  
 Email: 204-51-229-9464

**Subject:** Public Meeting Venue

Dear Ms. Katjuongua

Please assist me with the contact number and person for the school in village Otwazumba (near Etanga) west of Opuwo on the D3703. If there is another school or hall in another village closer to Opuwo near Omukurukaze or Otjakati homesteads for example please provide these too. Many thanks for your assistance.

Dear Ms. Katjuongua

I have set a date for the public meeting at Ohundungu school, 25<sup>th</sup> October 2017. I would like to arrange a 2<sup>nd</sup> meeting at school or clinic on the 24<sup>th</sup> or 26<sup>th</sup> October depending on the availability of the venue. Have you managed to come up with a contact person at a school or clinic yet at Etanga/Otwazumba or a venue nearer to Opuwo. See the maps below. The public meetings are for for the Barite Mining Claims' EIA process.

What is important is that for the meeting in the west, we need to ensure the chiefs that are responsible for the area on top of the mountain are present at the meeting as well as any others who have responsibilities within the EPL. The focus of the meeting will be the mining claims.

Thank you.

Dear Honourable Chairperson and Councillors

Thank you for the opportunity afforded me in presenting the project description and the environmental aspects of the project. The Ministry of Environment and Tourism require that the various stakeholders are well consulted. I believe that the public meetings, focus group meetings and the site visits have amounted to a comprehensive consultation process.

I have received valuable verbal inputs from the Regional Council, traditional authorities and public ministries. What remains now is for stakeholders who hold either political, ministerial or traditional authority over the communities and area to provide written consent for the project together with particular comments, concerns and conditions to the implementation of the project activities. In light of this could I request a written acknowledgement and consent for the project to proceed.

Please note that the consent does not exempt Mr. JP Smit from attaining environmental clearance from MET and any other permits from other regulatory bodies. The final Environmental Impact Assessment (EIA) report and Environmental Management Plan (EMP) will highlight the necessary additional legal requirements which must be complied with prior to construction.

I look forward to receiving such written consent from your office. As soon as it is ready, please inform me so that I can send someone to collect it by hand.

Regards

**Philip Hooks**

## Public Meetings Minutes

**Traditional leaders of the area Ombazu/Ohandungu/Okondaurie/Otmatjanja/Otjizaa  
and  
Representatives of Gecko Namibia/Kunene Resources/Celsius Resources**

**Date: 10 June 2017**

**Place: Primary School Ohandungu**

**Attendance: 32 people, see attached attendance list**

**Meeting started at 10:45**

**Introduction**

- Jaco Burger opened the meeting and explained the background and aim of the meeting:
  - The community requested for this meeting to meet with the management of Gecko.
  - Gecko's representatives attend this meeting to listen to the community leaders' opinions, concerns and problems, to explain their plans of future work in the area and to understand how to best create win-win situations for the community and company with due regard to corporate social responsibilities.
  
- Prayer by Chief Reither
- Brief introductions of management of Gecko
- Introduction of leaders of communities in area
  - Titus Muhenje (Tom Vita Royal House - Ombazu Senior Headman) and his son Ally Muhenje (Chief Muhenje jr)
  - Tjipurua (Chief of Ohandungu);
  - Chief Reither (Royal House Thom - Chief);
  - Kathijama Thom (Royal family Thom - representation)
  
- Nekwaya mentioned that Royal Family Thom and Tom Vita Royal House are represented but not leaders of other royal houses to the south and east of Opuwo.

The traditional leaders of the area were requested to explain issues and concerns related to the activities with Gecko Exploration in the area.

**Point 1: Traditional authorities, disputed the boundaries of Chieftainships with regards to Gecko's project areas and conflicts arising out of these internal disputes between the Chiefdoms.**

Chief Reither states that the areas of the chiefdoms are not defined in detail. Where borders aren't clearly defined there is potential for conflicts as has happened recently in the Ombazu area. When the company hires local workers, the workers should come from the chieftainship where the work takes place. Overlaps have created conflicts. Further, there exist personal disputes between some chiefs, e.g. he gets well along with two of the chiefs in the Ombazu-Omatjanja area but not with the third one who is the authority in the area to the south and east.

Gideon: The chiefs largely know the boundaries of their chiefdoms but they are defined by certain mountains and rivers which are often not clear in the field. Sourcing of employees was the point of conflict.

Chief Reither: The company correctly asked the Chiefs to select the workers for the project work. We should continue like this. Gideon must tell the Chiefs if some workers don't perform.

#### Barite Project

Craig suggests that we meet with both chiefs on site and create boundary lines using the GPS and create a map.

Reither: He visited the barite project on top of the mountains. The project falls mainly in his Chiefdom but partly into the Chiefdom to the south. Unfortunately the chieftainship of the area to the south (Okanihova) is disputed in the community and family of the previous chief. He agreed with the chiefs of the Okanihova area to solve the issue of Chiefdom boundaries (Omatjanja/Okanihova) crosscutting the barite project. It was agreed to share the work offered by Gecko proportionally. This internal dispute is solved, and the company should not be affected by it anymore.

#### Ombazu East ("DOF East")

Reither: Not resolved is a conflict to the east of Ombazu (villages of Okasati and Otjongoro) and to the west of Omatjanja (Okukaru).

Junior Chief Muhenje jr: People from elsewhere moved into the Ombazu area for grazing and settled there. They try to challenge the existing leadership. It is an internal conflict. They have no right to question decisions by the traditional leaders present in this meeting.

Reither: At Ombazu there are three rivers which fall under Thom Royal house where the other groups are presently grazing cattle. They have no authority over this area, but the conflicts exist.

Rainer: We are presently panning to drill more boreholes at Okasati to the East of Ombazu. He asked whom we should approach for permission for road building and drilling in this area and what we should practically do when a conflict with the locally residing people arises.

Reither answered: The company can go and continue working there. There is no other authority over that area than his and of Chief Muhenje, both of which gave the company permission to continue work in this area. However, the company must visit and talk to the people residing directly on the ground of this project area. If they cooperate then there will be no need to go the chiefs, otherwise Chief Muhenje and Chief Reither must be called in to resolve the issues.

#### Okukaru/Omatjanja ("DOF West")

Reither: Another disputed area was the boundary between Ombazu and Omatjanja. This has been resolved. Chief Karungurungo is present in this meeting with whom all disputes are solved: The group of local workers is a mixed group from many surrounding villages.

### **Point 2: Condition of roads, especially "Barite road"**

Reither: We have a big problem with the road going to Barite. The company used the road built by the Ovahimba. Please fill up the holes in the road so that the animals are not endangered.

Rainer responded: The whole Gecko team present in this meeting assessed the condition of the road yesterday. We must admit that the road is in some sections in a bad condition and apologize for this. Damages like that we won't let happen again. For future work we will not so often use the heavy trucks. We clearly commit to improve the situation in a reasonable way. For that we need a discussion to see what makes practical sense and find out what the community wants.

Muhenje jr: We discussed several times with Gideon and Nekwaya but we are not sure if it gets to the big bosses.

Rainer: Gideon and Nekwaya did inform the management. We internally discussed about the problems and the options for solutions yesterday. The problems and risks which must be solved are: 1) Rehabilitation or construction of a functional road for the community at least as good as it was before

our activities; 2) Potholes and trenches pose a risk for cattle and goats to get stuck and injured; 3) The deep tracks could trigger the formation of water ways which erode the soil in future.

Reither: That is correct. What can be done?

Craig: The community must understand that we are only spending funds in order to try and find a mine. We don't make any money with our activities. So we can't spend big money to build a gravel road to a village. Damages are inevitable but when a mine can be started and then more money is available the sites can be rehabilitated to a greater extent.

Rainer: Building a new road with gravel will be too expensive and is unreasonable. As solutions, we propose the following options: 1) Both, the community and Gecko will use the old (pre-existing) small road which is largely in good condition. Gecko makes sure it is not deteriorated by its activities. 2) We discussed with Craig, our Executive Director about industrial type of rehabilitation: We could bring machinery to rehabilitate the road and the job can be done in a few days. However, it costs a lot of money to get a grader to Omajanja. 3) We think the damages aren't so severe, so they could be rectified by the use of local labor: Shovel, pick and wheelbarrow could do most jobs. Craig only has to send a tool for compaction and a water bowser. In this way we would create much more benefit for the community by employment of your people.

***[Resounding agreement is received from the audience]*** the Himba representatives and community present is in favour of using manual labour for any construction and repair work in order to rehabilitate the roads.

Craig: While on the big machines there is only one person employed, we can probably employ 10 or 15 people from the community to do the work. We will provide the tools. With that option, part of the responsibility for the final product lies with the community. What it should look like has to be agreed beforehand.

Chief Muhenje jr: We and the road workers won't know if their work is up to standard. We can't take this responsibility.

Craig: then a machine will be better to produce a road if they want the road to be functional according to national standards.

Chief Muhenje jr: We want employment and can take some responsibility for the condition of the road but we request a foreman from Gecko to oversee the work so the workers are told each time what they should do.

Oliver suggested: representatives of the project together with the chiefs should go to visit the road and discuss and finalise in the field how this option can be implemented. A map will need to be produced after the visit to show which rehabilitation measures will be required for the individual road segments.

Craig: we need to go to the site with chiefs and discuss each section of the road and what is required and provide the tools and the oversight as required.

Rainer: We don't just want to talk, we want to act, we want to rehabilitate the road to the Barite as quick as possible. Can we go to the site tomorrow and finalise a plan on upgrading the road and thereafter sign an agreement with the community. Tomorrow we can see what tools and how many people are needed. We must decide today who will assess the road tomorrow.

Persons to join Rainer and Oliver at the Barite road:

Chief Reither (pick up at his house),

Chief Ally Mujenje (pick up at drill camp),

Karungurungu (meet at Omatjanja water hole)

**It was agreed to by the chiefs and Gecko to meet Sunday morning, 8:00, at Omatjanja solar panel to assess the road and develop a work plan.**

Craig: Damages are inevitable when one uses machinery but they will be rehabilitated. When a mine starts and more money is available then the sites can be rehabilitated to a greater extent.

Rainer: One more point in this regard: We want to continue working at barite and must therefore use the road again. Three boreholes are planned for drilling, but we will use a different machine this time for which water will not be moved up the mountain on a continuous basis as this affects road condition. Can we continue our work there in about two weeks?

**Chiefs gave permission for resuming the work to Barite with no restrictions.**

### **Point 3: Benefits for the community at large**

Reither: We also need something, we have a community which is left behind.

Muhenje jr: The environment is damaged by Gecko's activities. What will Gecko undertake to compensate. Did the message get conveyed by Nekwaya and Gideon from the community?

Rainer: Firstly the community benefits directly from the jobs we are creating. We are planning our activities in a way that wherever possible work is done by local laborers. Secondly, we are planning our activities in a way that the impact to the environment is minimized. For example we don't cut down big trees but create roads around them. Here you must advise us where we can further improve.

Muhenje jr: Did you hear from Nekwaya and Gideon what we have requested; how can Gecko benefit the community?

Rainer: Yes, we heard what you have requested: 1) Water supply by boreholes and dams; 2) a kindergarten in Okondaurie; 3) a school.

Reither: We would like to think of a main road to Epupa and need help with a source of materials to improve the road. We don't have the expertise to find such material.

Craig: We use the expertise from Germany ourselves, when time comes and we find something of value coming from the exploration then we will meet again and discuss how we can improve the situation of the community at large. At that time in the future we can look into helping with this request of sourcing material for a major road.

Rainer addresses Chief Muhenje jr: The message reached us regarding water boreholes, schools and clinics. In the current exploration phase we won't have money for schools or clinics but can assist with water availability and perhaps a first kindergarten or school room.

Oliver: a number of selected community support projects could be viewed and included with the field trip planned for the following day.

**It was accepted that Gecko can't build a clinic or school and that the meeting should concentrate on water supply. Chief Muhenje will further explain a concept for kindergarten in the meeting on Sunday.**

### **Point 4: Water supply**

Rainer: We need to know where you need water. As a word of caution: we need approval for any new water points and permission from Department of Water Affairs. Suggest that the areas of concern can be looked at even tomorrow if the leaders wish.

Reither: On April 22, 2017 at Okathati we requested help with making two dams & two boreholes from Nekwaya.

Nekwaya: Okathati chief asked for a new dam east of Ombazu in a particular area but a borehole may be better there. 2<sup>nd</sup> area is an old earth dam which is full of sediments which could be dug out. The area of concern has very low potential for groundwater.

Craig: At the requested sites you wish to find groundwater but it might be difficult. Even if we come and drill, after many tries the drilling may not find water. We found very good water in some of our exploration holes. These can easily supply water by installing a pump.

Rainer: We need to make sure areas for requested water boreholes fall within our prospecting licences. We can't just drill at Okamwe, an area where we gave back our prospecting rights to government.

Reither: An earth dam in a river is also acceptable.

Craig: A dam can be fixed if it is off our licence but no drilling can be carried out outside our licence area; it is not legal to drill within another mineral licence.

Oliver: With a map the place can be sited and the dam cleaning option can be investigated.

Chiefs discussed and agreed to show Rainer and Oliver areas where there is water needed: Oruhona water dam, Okathati/Ombazu Northeast, Okamwe, Otjizaa.

**It was agreed that these areas will be visited on Sunday after visit of the Barite road.**

#### **Point 5: What are results of current exploration?**

Reither: We do not know what you are looking for when you explore in our area.

Rainer: in 2012 we explained that we were looking for some green rocks with copper (Ongopolo). In 2013-2014 sand samples were collected all over the area. We found some interesting mineralisations at Okondaurie and Okanihova on which we focus our work.

Reither: Why are you no longer just picking up stones? That is what I meant by the first question.

Rainer: We have pasted this stage of prospecting. We know all the area quite well now. People did bring rocks and in some places they showed us copper mineralisation like at Okamwe. Those samples you assisted us with showed that the copper minerals are there but it is too small or too low grade material to consider mining.

#### **Point 6: Request for a borehole next to homestead**

A community member present: a possible site for a water borehole was given near my home; can I be helped?

Reither: His house is 2.5km to the northwest of Ohandungu.

Rainer: it will be difficult if not in our licence and it is far from the work sites where the company is busy currently.

Nekwaya: This request was discussed previously and the distance to the existing water whole is only 2.5km, thus this is not regarded a valid request. Only when community members are at least 10 km from water should assistance be considered.

#### **The meeting adjourned: 13:25**

Location: Kunene region, Ohandungu Village, Ruiters Primary School

Date: 25-10-2017

Time: 14:00

Attendees: Gecko EIA Coordinator: Mr. Phillip Hooks, Mbazu Community Members

	Agenda	
1.	Welcome and Introduction	Mr. Philip Hooks
2.	Purpose of meeting	Mr. Phillip Hooks
3.	Discussion Session	Community Members
4.	Action List	

Commentator:	Question, query, concern Raised, Comments	Responded By:	Response:
MS. Njamee Nellie	When the project starts, will the investors ensure that the community benefits and will it well spread out?	Mr. Phillip Hooks	Investors will be notified on the appropriate social responsibility benefits it could offer to the community.
Headman Ruitter	<p>We asked gecko mining for assistance in terms of acquiring water, as the Community is lacking water in mainly four areas.</p> <p>That was last year when we asked for assistance but so far there hasn't been any aid.</p> <p>We had also asked gecko to assist the community to build two kindergartens.</p> <p>Mr. Philips bring good news once again for the new barite project, however the requested assistance mentioned has not materialized.</p> <p>Gecko could also assist in removing the enormous buildup of Sand from the water Dam.</p>	Mr. Phillip Hooks	<p>The Community in question has to draft a formal letter requesting gecko Namibia for assistance.</p> <p>The formal letter should be addressed to head office.</p> <p>There's technical issues in terms of extracting sand form the dam, is the dam legal and one needs a permit to extract the sand.</p> <p>Permit is issues by the MWAF directorate of water affairs. However this is not relevant to topic at hand, it can be disused later.</p>

<p>Patapendjo Hembinda</p>	<p>Will gecko mining recruit the youth from the community?</p>	<p>Mr. Phillips Hooks</p>	<p>I'm the EIA coordinator for gecko mining, I unfortunately don't employ anyone. Recruitment is done by the HR department.</p> <p>However the project will at some stage offer employment to the community. Skilled and Non-Skilled Workers.</p>
<p>MS. Njamee Nellie</p>	<p>Will the project give priority and offer employment to those that have attended this meeting?</p>		<p>Your question is important, it was raised in a meeting with MET, whereby the MET requested that the Investor develop a social responsibility plan that assists in employing people from the community.</p> <p>Your query has been noted and I would like to recommend that the voice of the community be heard and the community to benefit through social responsibility projects.</p> <p>However, this forum is not set for job creating, but rather its purpose is for the community to communicate their concerns about the project.</p>
<p>Patapendjo Hembinda</p>	<p>The 3 year mining duration sounds very short, and the mineral</p>	<p>Mr. Phillip Hooks</p>	<p>To test the market and to find out if there's</p>

	that's going to be extracted sound very small is this a just a trial to see if the mineral will sell?		<p>long term viability for the mineral.</p> <p>The reason for short duration is because the mine needs an environmental clearance certificate to mine, issued every 3 years.</p> <p>Another reason is that the scope of the project involves reporting actual figures that are at hand.</p> <p>The mine is not going to be a trial.</p> <p>There will be risk some risk to the community but based on the input that goes into the environmental management plan, form the stakeholders- such as yourselves, the MET and Regional council. The environmental management plan can hold the investor to strict operational guidelines.</p>
Tjisuta Tsaurosa	How big will the quarry be after 3 years?	Mr. Phillip Hooks	<p>100 000 Tons, Mr. Philip hooks demonstrated Dimensions using pictures, a quarry can be 70 meters across and 120 meters long and 10 meters deep.</p> <p>I will however note my response in order to ensure it is correct.</p>
Tjisuta Tsaurosa	Will the company replace the trees that will be cut own when the project finishes? And is there a	Mr. Phillip Hooks	<p>That is what we refer to as rehabilitation. There will be scoping</p>

	legally binding contract or letter to make sure this happens?		<p>report that will be issued in December.</p> <p>The report will outline details for legal regulations. That further outline the need for rehabilitation plans to be in place for any activity that harms the environment.</p> <p>At the beginning of the project, the ministry of environment tourism want a commitment that a rehabilitation will take place.</p> <p>The Environmental management plan (EMP) is a legally binding document that ensures the investor stays true to what is outlined in the (EMP).</p>
Michael Emany (Forestry)	I observed that There's mining activities between Ondjoze and ombazu, the activities taking place there is that the same company?	Mr. Phillip Hooks	<p>There is link between shareholding. Gecko is a company with subsidiaries, gecko exploration is one of them. Gecko exploration has a number of companies that have shares with other numerous companies. The company you observed is a joint venture between gecko exploration and another Australian company called Celsius.</p>

25 October 2017

**To: Gecko company**

On the 22 Of April 2017 we had a meeting with the kunene resource company and gecko company, we gave them our problem that we need some borehole at three different places which are, okamwe, oruhona, and okatati and also we requested two kinder garden, one at ombazu village and one at okondaurie village but until today nothing happened. Can you please attend to our request please we are in need of help.

Thanking you in advance for your help.

**From: Hoof man Karungoyo Ruitter (head man) and the entire community.**

**Contact:0812138497**

*A. Ruitter*

Location: Kunene region, Opuwo Town, Otjikaoko Traditional Authority Offices

Date: 26-10-2017

Time: 10:00

Attendees: Gecko EIA Coordinator: Mr. Phillip Hooks, Otjikaoko council members

	Agenda	
1.	Welcome and Introduction	Mr. Phillip Hooks
2.	Purpose of meeting	Mr. Phillip Hooks
3.	Discussion Session	Council Members
4.	Action List	

#### Agenda items

Commentator:	Question, query, concern Raised, Comments	Responded By:	Response:
Mr. Tjazapi Ihututa (Justice councilor for Otjikaoko T.A)	What is going to happen if there is a permanent settlement there, which is built many years ago?	Mr. Phillip Hooks	It's important that Before I hand in my final report that all issues, such as those raised by Mr. tjakkapi are considered.
Ms Elizabeth Mukuma (secretary for the Otjikaoko T.A)	The project sounds good, the project will bring opportunities to the community, and however other projects (mostly lodges) have been presented here at the Otjikaoko Authority. Those that presented gave promises that till now have not materialized.		

Location: Kunene Region, Otjivero Village K.Maundu Primary School

Date: 26-10-2017

Time: 14:00

Attendees: Gecko EIA Coordinator: Mr. Phillip Hooks, Otjivero Community Members

	Agenda	
1.	Welcome and Introduction	Mr. Phillip Hooks
2.	Purpose of meeting	Mr. Phillip Hooks
3.	Discussion Session	Community Members
4.	Action List	

#### Agenda items

Commentator:	Question, query, concern Raised, Comments	Responded By:	Response:
Velium Maundu	I would like to recommend that Gecko company should Organize a meeting for all the chiefs.  Recognized and Non-recognized chiefs in order to ensure that no conflicts arise later on.	Mr. Phillip Hooks	Yes that idea is very important as it will add transparency to the the project. This will ensure that the chief's or community member that feel like they've been cutout are involved.
Velium Maundu	How will the community benefit from the mine?  What will be the way forward?	Mr. Phillip Hooks	(your response was interupted by arrival of more community memebers)
Vehehaunge Maundu	Recommends and emphasis's that it will be wise only to include the chiefs around the mining area.		

<p>Chief Hiandi Maundu</p>	<p>The mine will bring many opportunities to the community, it will assist in reducing unemployment as well as provide the community with water.</p> <p>However When it comes to the environment, mining activities will give problems. Mining activities leave large gaping holes, Similar problems have been encountered with other previous mining activities in the region.</p> <p>Mining companies say they will rehabilitate land but that is not the case at all. All what mining will do is destroy the land.</p>		<p>Your question is important, it was raised..... (video was cut)</p>
<p>Veliem Maundu</p>	<p>Mining company roads, damage the roads, can you please ensure that you maintain the roads.</p> <p>What are the social responsibilities to the community?</p> <p>Schools don't have tents, and communities have no water, can that not be included in the social responsibility of the project.</p>	<p>Mr. Phillip Hooks</p>	<p>That's why it's really important that one reviews the environmental management plan. The EMP is a legally binding document, and some of the queries that have been raised are outlined in the EMP.</p> <p>If one is not happy with the EMP, you can make additional comments to ensure community concerns are considered before the plan is submitted.</p>

Chief Hiandi Maundu	The community would like to move forward but there is a Main concern with the conflict between the two chiefs and who controls what.	Mr. Kazeongeye Tjeundu (Councilor)	The councilor Will organize the chiefs to meet in future to resolve the jurisdiction issues.
Women Community member	Would like the mining company to include women in the future job recruitment process.  Women in the community would also like to have equal opportunities as the men.		

Action List	Date
Meet headman Ruitter and some community members, to show where claims are located.  Proposal of processing plant.	15-11-2017
Setup meeting with traditional Authority to solve the jurisdiction issues between the Otjivero and ombazu communities.	17-11-2017

Location: Kunene region, Opuwo Town, Otjikaoko Traditional Authority Offices

Date: 17-11-2017

Time: 09:00

Attendees: Gecko EIA Coordinator: Mr. Phillip Hooks, Chief of Otjikaoko, Headman and Senior members.

	Agenda	
1.	Welcome and Introduction	Mr. Kazeongere Tjeundo (Regional Councillor)
2.	Purpose of meeting	Mr. Phillip Hooks
3.	Discussion Session	Council Members
4.	Action List	

#### Agenda items

Commentator:	Question, query, concern Raised, Comments	Responded By:	Response:
Mr. Kazeongere Tjeundo (Regional Councilor)	<p>The reason why we all here is to discuss the boundaries of the two traditional authorities (Vito Traditional Authority and Otjikaoko Traditional Authority).</p> <p>Mainly to find out where the claims are exactly located.</p> <p>I called the Mbazu representative and he said he unfortunately he cannot be present as he had another meeting scheduled.</p> <p>Mr. Phillip do you want us to explain further on the background of the mine?</p>	Mr. Phillip Hooks	<p>No I don't think so, because those that have already been in the Public meetings.</p> <p>They can explain to them.</p> <p>What's important is that the issue of jurisdiction is resolved and if you could just explain that to them.</p> <p>It's important that you clarify that it was councilor Tjeundo who had called the meeting to resolve the issue.</p>
Mikambo Tjiposa (Otjikaoko councilor)	What boundaries are we talking about?	Mr. Kazeongere Tjeundo (Regional Councilor)	<p>The conservancy boundary is known to us but the Boundary that is of concern is the traditional boundaries.</p> <p>The man that is supposed to assist us in knowing where the traditional boundaries is not here and he's got the maps.</p>

			The maps are here but he's in Windhoek
Mr. Kazeongere Tjeundo (Regional Councilor)	<p>This meeting might not hold water if we continue this meeting, due to the missing persons.</p> <p>But what would be your suggestion?</p>	Mr. Phillip's	<p>From the mouth of Headman Ruitter from the previous meeting last year June 2016, a statement was made "the mining claims where the mining is to take place falls under Tom vito traditional authority, and communities from other Tradional authorities where allowed to use land across the mountain but that was just temporary.</p> <p>At this stage what I can say is that I will state in the report that the traditional Boundary issue is unresolved.</p> <p>However the claims do fall in the ombazu nature conservancy.</p>
Chief Paulus (Tjavara)	<p>It's important to note in order for issues to be resolved, there are traditional leaders who should be present.</p> <p>The meeting should be concluded by seeking another platform where we can bring all the chiefs together.</p> <p>But then also an expedition should be done by those who know the area best from both sides.</p>		
Headman Ruitter Maundu	If the claims are at Okanehova, then they are in the Otjivero (otjikaoko traditional) boundaries.		

	<p>History can tell that the old kraals (cattle posts) up on the mountains belong to their people, the people of Ombazu (Tom vito traditional Authority) have never settled there or used that part of the land without permission from the Otjivero (otjikaoko traditional authority).</p>		
Urikwami Maundu	<p>We are positive about the project and the community wants the project to begin, but we want into start in a conducive environment.</p> <p>Where everybody is at peace and have a good understating of the boundaries in question.</p>		
Mikambo-Tjiposa (Otjikaoko councilor)	<p>What will happen after you take the chiefs up the mountain, should we have another meeting after that?</p>	Mr. Phillips Hooks	<p>That will be depend on the maps. If the maps and the site visit yields results that are accepted by both parties.</p> <p>If both Parties recognize that the map will take away the conflict.</p> <p>Then there will be no need to come back again.</p> <p>A formal letter should be written in order to request the mbazu representative and Tom vito traditional authority.</p>
Mikambo-Tjiposa (Otjikaoko councilor)	<p>After the site meeting, all those that will go up the mountain need to testify what they have seen.</p> <p>If chiefs cannot go up the mountain due to their age</p>		

	and health they should send representatives.		
Urikwami Maundu	I would like to recommend an independent person who's not coming from neither traditional authorities to be present to ensure an balanced outcome.		

Meeting was arranged by Mr. Tjeundo, Honourable Councillor of the Kunene Regional Council

**Location:** The Steilrand Mountains where the 4 mining claims are situated

**Date:** 6<sup>th</sup> December 2017

**Attendees:**

Elders of the Otjivero community (Maundu) and Ombazu community (Ruiter) who represented their Traditional Authorities.

Younger members of both communities also present

Mr. Tjipepa of the Ministry of Land Reform in an unofficial capacity acting as a third party witness on behalf of the Kunene Regional Council

Charon Katjiuongua (Cultural Officer of M.Ed.) acted as official translator / interpreter

Philip Hooks (Environmental Specialist) representing Mr. JP Smit

**Discussion and Decision:**

Site of the white barite seam was shown to the persons present. The extent of the mining claims was described and demonstrated. The map showing the old traditional authority boundaries was used to illustrate the location of the mining claims in relation to the traditional authority boundaries.

It was acknowledged that in accordance with the map that the Otjivero TA has jurisdiction over the area where the four claims are situated. No dispute was raised. However, there was an agreement that the other two adjacent communities under other traditional authorities should have a share in any benefits that could potentially arise from the mining project.

Philip Hooks requested that the issue of compensation for grazing loss within communal lands be clarified.

Philip Hooks requested that a consent letter be written and signed by the representatives of the three traditional authorities concerned.

The leaders present committed to finalise the consent letter on Friday, 8<sup>th</sup> December, 2017
