

PUBLIC NOTICE

APPLICATIONS FOR ENVIRONMENTAL CLEARANCE CERTIFICATES (EECs) FOR MINERALS PROSPECTING ACTIVITIES BY GMA MINING CC EPL 7876 AND BLUESTATE INVESTMENTS (Pty) Ltd EPL 8075, OMARURU DISTRICT, ERONGO REGION

GMA Mining CC and Bluestate Investments (Pty) Ltd (the Proponents) have applied for minerals rights under the EPLs Nos. 7876 and 8075 respectively, situated in the communal land west of Otjivero and northwest of Omatjetje settlements. The Proponents intend to conduct prospecting activities for base and rare metals, dimension stone, industrial minerals and precious metals, starting with desktop studies, followed by regional field-based reconnaissance work and if the results are positive, implement detailed site-specific field-based activities such as geological mapping, geophysical surveys, trenching, drilling, and sampling for laboratory tests for feasibility reporting. The proposed prospecting activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without Environmental Clearance Certificates (EECs). In fulfillment of the environmental requirements, the Proponents have appointed Risk-Based Solutions CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the applications for EECs. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A Background Information Document (BID) is available upon registration.

DEADLINE FOR WRITTEN SUBMISSIONS IS: FRIDAY 5th NOVEMBER 2021

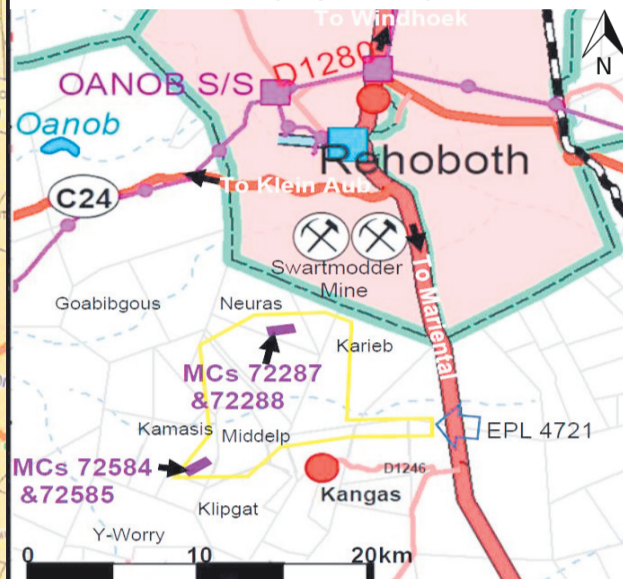

PUBLIC NOTICE

APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATE FOR MINERALS PROSPECTING / QUARRYING ACTIVITIES BY JOINTMEN INVESTMENTS CC FOR MINING CLAIMS Nos. 72287, 72288, 72584 AND 72585, REHOBOTH DISTRICT, HARDAP REGION

Jointmen Investments CC (the Proponent) has applied for dimension stone minerals rights under the Mining Claims (MCs) Nos. 72287, 72288, 72584 and 72585 falling within the EPL 4721. The MCs falls within Farms Neuras and Kamasis, south of Swartmodder Mine near Rehoboth. The Proponent intends to conduct prospecting and possible mining activities in the MCs starting with desktop studies, followed by regional field-based reconnaissance work, geological mapping, drilling, and sampling for laboratory tests for feasibility assessments leading to possible small-scale quarrying operations if the results are positive. The proposed prospecting and possible mining activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). In fulfillment of the environmental requirements, the Proponent has appointed Risk-Based Solutions (RBS) CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare Environmental Assessment and Management Reports to support the application for ECC. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities and possible mining activities. A Background Information Document (BID) is available upon registration.

PUBLIC NOTICE

APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATE (ECC) FOR MINERALS PROSPECTING ACTIVITIES BY PRIMARY RESOURCES NAMIBIA CC, EPL 8220, KARIBIB / OKAHANDJA DISTRICTS ERONGO / OTJOZONDJUPA REGIONS

Primary Resources Namibia CC (the Proponent) has applied for minerals rights under the EPL No. 8220. The 64995 Ha area covers Farms: Ombujomaere Sud, Okanapehuri, Bergweiher, Otjiundu, Okongwekuppe, Okombahe, Okaimpuro, Okatjiho, Otjombakata, Amatozu-ohumbunguru, Omusera Komba, Okamongongua, Orutjiva, Ongombombero, Ozombanda, and Okaukondou Nord. The Proponent intends to conduct prospecting activities for base, and rare metals, dimension stones, industrial minerals, nuclear fuels, precious metals, and precious stones. The prospecting activities will initially focus on desktop studies and interpretation of existing Government owned high resolution airborne geophysical data sets, followed by regional field-based reconnaissance work. If the results of the desktop work prove positive, regional, and local field-based activities such as geological mapping, trenching, drilling, sampling, and testing for feasibility reporting and assessments may be conducted. The proposed prospecting activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). In fulfillment of the environmental requirements, the Proponent has appointed Ms. Emerita Ashipala as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the application for ECC. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A Background Information Document (BID) is available upon registration.

PUBLIC NOTICE

APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATE (ECC) FOR MINERALS PROSPECTING ACTIVITIES BY PRIMARY RESOURCES NAMIBIA CC, EPL 8220, KARIBIB / OKAHANDJA DISTRICTS ERONGO / OTJOZONDJUPA REGIONS

Primary Resources Namibia CC (the Proponent) has applied for minerals rights under the EPL No. 8220. The 64995 Ha area covers Farms: Ombujomaere Sud, Okanapehuri, Bergweiher, Otjiundu, Okongwekuppe, Okombahe, Okaimpuro, Okatjiho, Otjombakata, Amatozu-ohumbunguru, Omusera Komba, Okamongongua, Orutjiva, Ongombombo, Ozombanda, and Okauakundu Nord. The Proponent intends to conduct prospecting activities for base, and rare metals, dimension stones, industrial minerals, nuclear fuels, precious metals, and precious stones. The prospecting activities will initially focus on desktop studies and interpretation of existing Government owned high resolution airborne geophysical data sets, followed by regional field-based reconnaissance work. If the results of the desktop work prove positive, regional, and local field-based activities such as geological mapping, trenching, drilling, sampling, and testing for feasibility reporting and assessments may be conducted. The proposed prospecting activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). In fulfillment of the environmental requirements, the Proponent has appointed Ms. Emerita Ashipala as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the application for ECC. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A Background Information Document (BID) is available upon registration.

PUBLIC NOTICE

APPLICATIONS FOR ENVIRONMENTAL CLEARANCE CERTIFICATES (ECCs) FOR MINERALS PROSPECTING ACTIVITIES BY GMA MINING CC EPL 7876 AND BLUESTATE INVESTMENTS (Pty) Ltd EPL 8075, OMARURU DISTRICT, ERONGO REGION

GMA Mining CC and Bluestate Investments (Pty) Ltd (the Proponents) have applied for minerals rights under the EPLs Nos. 7876 and 8075 respectively, situated in the communal land west of Otjivero and northwest of Omatjette settlements. The Proponents intend to conduct prospecting activities for base and rare metals, dimension stone, industrial minerals and precious metals, starting with desktop studies, followed by regional field-based reconnaissance work and if the results are positive, implement detailed site-specific field-based activities such as geological mapping, geophysical surveys, trenching, drilling, and sampling for laboratory tests for feasibility reporting. The proposed prospecting activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without Environmental Clearance Certificates (ECCs). In fulfillment of the environmental requirements, the Proponents have appointed Risk-Based Solutions CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the applications for ECCs. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A Background Information Document (BID) is available upon registration.

APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATE FOR MINERALS PROSPECTING / QUARRYING ACTIVITIES BY JOINTMEN INVESTMENTS CC FOR MINING CLAIMS Nos. 72287, 72288, 72584 AND 72585, REHOBOTH DISTRICT, HARDAP REGION

Jointmen Investments CC (the Proponent) has applied for dimension stone minerals rights under the Mining Claims (MCs) Nos. 72287, 72288, 72584 and 72585 falling within the EPL 4721. The MCs falls within Farms Neuras and Kamasis, south of Swartmodder Mine near Rehoboth. The Proponent intends to conduct prospecting and possible mining activities in the MCs starting with desktop studies, followed by regional field-based reconnaissance work, geological mapping, drilling, and sampling for laboratory tests for feasibility assessments leading to possible small-scale quarrying operations if the results are positive. The proposed prospecting and possible mining activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). In fulfillment of the environmental requirements, the Proponent has appointed Risk-Based Solutions (RBS) CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare Environmental Assessment and Management Reports to support the application for ECC. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities and possible mining activities. A Background Information Document (BID) is available upon registration.

Risk-Based Solutions (RBS) CC (the Proponent) has applied for minerals rights under the EPLs Nos. 8221 and 8223. The 97168 Ha area of the EPL 8221 covers Farms: Diergaard Aub, Groendraai, Nakaeis, Nakaeis Suid, Farm 682, Witkop Suid, Farm No. 673, Naris, Tsumis, Gous, Izaakrus, Kurunap, Geluksoord, Te-Laai, Karagab, Jacobsdal, Waterval, Vredesrus, Vrede, Soutrivier, Vlakplaat, Langverwad, Moeilikheid, Goabgous, Gauchas, Steenkop, Samaubs, Oas, Vulkaan, Good Hope and Siverbron. The 84265 Ha area of the EPL 8223 covers Farms: Nagenoeg, Robertson, Aubgous, Omamas, Vulkaan, Oas, Erwina, Kakoes, Stofpan, Mon Repos, Denksrus, Voigtskub, Gras, Gras-Sud, Farm No. 890, Arurueis, and Schlipmundung. The Proponent intends to conduct prospecting activities for base, and rare metals, dimension stones, industrial minerals, non-nuclear fuels, nuclear fuels, precious metals, and precious stones. The prospecting activities will initially focus on desktop studies and interpretation of existing high resolution airborne geophysical data sets and regional field-based reconnaissance work. If the results of the desktop work prove positive, regional, and local field-based activities such as geological mapping, trenching, drilling, sampling, and testing for feasibility reporting and assessments may be conducted. The proposed prospecting activities cannot be undertaken without ECCs. The Proponent has appointed Ms. Emerita Ashipala as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the applications for ECCs. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A BID is available upon registration.

PUBLIC NOTICE

APPLICATIONS FOR ENVIRONMENTAL CLEARANCE CERTIFICATES (ECCs) FOR MINERALS PROSPECTING ACTIVITIES BY GMA MINING CC EPL 7876 AND BLUESTATE INVESTMENTS (Pty) Ltd EPL 8075, OMARURU DISTRICT, ERONGO REGION

GMA Mining CC and Bluestate Investments (Pty) Ltd (the Proponents) have applied for minerals rights under the EPLs Nos. 7876 and 8075 respectively, situated in the communal land west of Otjivero and northwest of Omatjette settlements. The Proponents intend to conduct prospecting activities for base and rare metals, dimension stone, industrial minerals and precious metals, starting with desktop studies, followed by regional field-based reconnaissance work and if the results are positive, implement detailed site-specific field-based activities such as geological mapping, geophysical surveys, trenching, drilling, and sampling for laboratory tests for feasibility reporting. The proposed prospecting activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without Environmental Clearance Certificates (ECCs). In fulfillment of the environmental requirements, the Proponents have appointed Risk-Based Solutions CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare the Environmental Assessment and Management Reports to support the applications for ECCs. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities. A Background Information Document (BID) is available upon registration.

APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATE FOR MINERALS PROSPECTING / QUARRYING ACTIVITIES BY JOINTMEN INVESTMENTS CC FOR MINING CLAIMS Nos. 72287, 72288, 72584 AND 72585, REHOBOTH DISTRICT, HARDAP REGION

Jointmen Investments CC (the Proponent) has applied for dimension stone minerals rights under the Mining Claims (MCs) Nos. 72287, 72288, 72584 and 72585 falling within the EPL 4721. The MCs falls within Farms Neuras and Kamasis, south of Swartmodder Mine near Rehoboth. The Proponent intends to conduct prospecting and possible mining activities in the MCs starting with desktop studies, followed by regional field-based reconnaissance work, geological mapping, drilling, and sampling for laboratory tests for feasibility assessments leading to possible small-scale quarrying operations if the results are positive. The proposed prospecting and possible mining activities are listed in the Environmental Management Act, 2007, (Act No. 7 of 2007) and the EIA Regulations 30 of 2012 and cannot be undertaken without an Environmental Clearance Certificate (ECC). In fulfillment of the environmental requirements, the Proponent has appointed Risk-Based Solutions (RBS) CC as the Environmental Consultant, led by Dr Sindila Mwiya as the Environmental Assessment Practitioner (EAP) to prepare Environmental Assessment and Management Reports to support the application for ECC. Interested and Affected Parties (I&APs) are hereby invited to register and submit written comments / objections / inputs with respect to the proposed prospecting activities and possible mining activities. A Background Information Document (BID) is available upon registration.

Subject: RE: Registration as affected Stakeholder - EPL 8158 (Farm Güldenboden)
Importance: High

Attention: Martin Hilbert

As per your email request below, I hereby confirm your registration as an Interested and Affected Party (I&AP) with respect to the application for Environmental Clearance Certificates (ECC) for the proposed minerals prospecting / exploration activities for the EPL No. 8158 with respect to your Farm Güldenboden, No 280 Okahandja. Please find attached to this message the BID for more information with respect to the environmental assessment process to be undertaken in support of the application for ECC for the proposed prospecting activities.

Our study covers environmental assessment work aimed at supporting the application for ECC for this specific license EPL that will enable the minerals rights holder to undertake field-based exploration activities if potential prospective targets are delineated during the desktop study phase. Access to private farmland to undertake field-based exploration activities by the Proponent (subsurface rights holder) may only be undertaken with the consent of the land owner (surface rights holder) and as may be agreed in the Access Agreement to be negotiated as may be applicable. Issues and conditions that related to the Access Agreement to be negotiated and signed between the Proponent (subsurface mineral rights holder) and the land owner/s (surface land rights holder/s) are beyond the scope of our work and not part of the ECC application process.

If commercial minerals resources are discovered during the exploration process, which can take many years to achieve, the Proponent will need to prepare a feasibility study, obtain all the other applicable permits from various Ministries and sign an Access Agreement with the land owner/s (surface rights holder) in order to apply for Mining License (ML) and undertake mining operations.

The current EPL 8158 only allows the Proponent to undertake exploration aimed at collection and assessment of data in order to determine the mineral prospectivity of the license area.

Please, contact me if you require any further clarifications. I will keep you updated on the progress of the ECC application process.

For your information, please follow the link below to have a look at all the minerals licenses issued by MME in Namibia <https://maps.landfolio.com/Namibia/>

Many thanks,

Dr Sindila Mwiya

Subject: RE: Public Notice: Application for environmental clearance certificates for minerals prospecting activities by Martha N. Daweti - EPLs Nos. 8158 - In Re: Otjombali

Good afternoon,

As per your email request below, I hereby confirm the registration as a stakeholders or representative with respect to the application for Environmental Clearance Certificaten (ECC) for the proposed minerals prospecting / exploration activities for the EPL No. 8158 n Re: Otjombali. Please find attached to this message the BID for more information with respect to the environmental assessment process to be undertaken in support of the application for ECC for the proposed prospecting activities.

Our study covers general work aimed at supporting the application for ECC for this specific license that will enable the EPL holder to undertake field-based exploration activities if potential targets are delineated during the desktop study phase. Access to private or communal lands to undertake field-based exploration activities by the Proponent may only be undertaken with the consent of the land owner/s or traditional authority respectively and as may be agreed in the Access Agreement to be negotiated as may be applicable.

The EPL allows the Proponent to only conduct exploration/ prospecting activities. If there is a discovery of commercial minerals resources which can take many years to achieve, the Proponents will need to prepare a feasibility study to apply for a Mining Licenses (MLs) in order to undertake mining operations. Separate site-specific studies will be required in order to support the ML and all the other applicable permits from various Ministries. Furthermore, before an ML is granted, an Access Agreement with the land owner or land rights holders is required by the Ministry of Mines and Energy.

Therefore, for now, the EPL is only focused on research / collection of data in order to determine the mineral prospectivity of the license area.

Please, contact me if you require any further clarifications. I will keep you updated on the progress of the ECC application process.

Many thanks,

Dr Sindila Mwiya

To: Tanja Dahl <nau@nau.com.na>

Subject: RE: Confirmation of Your Registration as a Stakeholder for ECCs Applications

Importance: High

Good afternoon,

I hereby confirm your registration as a stakeholder for the following ECCs applications:

- 7876 & 8075 Erongo Region
- 72287, 72288, 72584 & 72585 Hardap Region
- 8156, 8158 & 8157 Otjozondjupa Region

Please find attached to this message the BIDs for more information with respect to the environmental assessments processes being undertaken in support of the applications for ECCs for the proposed prospecting for all EPLs and prospecting and possible small scale quarrying activities in the MCs.

Our study covers general work aimed at supporting the applications for ECCs for this specific licenses that will enable the holders to undertake field-based exploration activities, if potential targets are delineated during the desktop study phases. Access to private or communal lands to undertake field-based exploration activities by the Proponents may only be undertaken with the consents of the land owner/s or traditional authority respectively and as may be agreed in the Access Agreements to be negotiated as may be applicable.

The EPL allows the Proponent to only conduct exploration/ prospecting activities. The MCs allows the holder to undertake prospecting and small scale mining activities in an event of a commercial discovery. If there is a discovery of commercial minerals resources which can take many years to achieve, the Proponents will need to prepare feasibility studies to apply for a Mining Licenses (MLs) in order to undertake large-scale commercial mining operations. Separate site-specific studies such as EIA, EMP, social, fauna, flora, water and other linear infrastructure needs will be required as part of the feasibility study in order to support the ML applications. Furthermore, before an ML is granted, an Access Agreement with the land owner or land rights holders is required by the Ministry of Mines and Energy.

Therefore, for now, the EPLs and MCs are only focused on research / collection of data in order to determine the mineral prospectivity of the license areas covered. The probability of any EPL to advance to a mining project is 0.001 or equal to zero and that means most EPLs just expires. It is only the Government that always makes the money inform of subsurface minerals rights rentals. Minerals exploration activities are highly important sources of critical data sets that keeps on enriching our geological subsurface national knowledge-base and highly critical in the ongoing search and management of other subsurface resources such as water and energy sources and all vital for our socioeconomic development, environmental protection and management balanced spheres.

Your inputs are important to us and please, contact me if you require any further clarifications. I will keep you updated on the progress of the ECCs applications processes.

Many thanks,

Dr Sindila Mwiya

The MCs allows the holder to undertake prospecting and small scale mining activities in an event of a commercial discovery. If there is a discovery of commercial minerals resources which can take many years to achieve, the Proponents will need to prepare feasibility studies to apply for a Mining Licenses (MLs) in order to undertake large-scale commercial mining operations. Separate site-specific studies such as EIA, EMP, social, fauna, flora, water and other linear infrastructure needs will be required as part of the feasibility study in order to support the ML applications. Furthermore, before an ML is

granted, an Access Agreement with the land owner or land rights holders is required by the Ministry of Mines and Energy.

Therefore, for now, the EPLs and MCs are only focused on research / collection of data in order to determine the mineral prospectivity of the license areas covered. The probability of any EPL to advance to a mining project is 0.001 or equal to zero and that means most EPLs just expires. It is only the Government that always makes the money inform of subsurface minerals rights rentals. Minerals exploration activities are highly important sources of critical data sets that keeps on enriching our geological subsurface national knowledge-base and highly critical in the ongoing search and management of other subsurface resources such as water and energy sources and all vital for our socioeconomic development, environmental protection and management balanced spheres.

Your inputs are important to us and please, contact me if you require any further clarifications. I will keep you updated on the progress of the ECCs applications processes.

Many thanks,

Dr Sindila Mwiya

Subject: Registration as I&AP

Good Day,

I kindly ask you to register Earthlife Namibia as I&AP for the following EPS and regions

- 7876 & 8075 Erongo Region
- 72287, 72288, 72584 & 72585 Hardap Regio
- 8156, 8158 & 8157 Otjozondjupa Region

Kindly respond to the registration and forward all BIDs.

Thank you and kind regards,

Bertchen Kohrs

RE: CLARIFICATION RESPONSE TO WRITTEN OBJECTIONS - PUBLIC NOTICE: APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATES FOR MINERALS PROSPECTING ACTIVITIES BY MARTHA N. DAWETI - EPLS NOS. 8158 - IN RE: FARM OTJOMBALI NO. 189

I hereby acknowledge receipt of your client's objection as contained in your letter dated 5th November 2021. The following are my clarifications with respect to the Environmental Clearance Certificate (ECC), Background Information Document (BID), Environmental Impact Assessment (EIA) and Environmental Management Plan (EMP) and the proposed minerals exploration processes:

1. The BID as you rightfully pointed out under Point No. 7 of your objection letter is prepared to be used as a source of additional information by the registered stakeholders / registration of the project with the Environmental Commissioner.
2. The BID does not replace the need for preparing and submitting of the EIA and Environmental EMP to the Environmental Commissioner.
3. The environmental assessment process and steps to be undertaken for listed activities as per the Environmental Management Act (EMA), 2007 and EIA Regulation 2012 and similar to the proposed minerals exploration activities in the EPL 8158 has been provided in the BID on pages 17 and 18 Section 4.2 and clearly illustrated in Fig. 4.1 of the same document. The BID provided, does not present any findings of an assessment process nor the mitigation measures thereof in support of an application for an ECC.
4. In this instant an EIA and EMP document have been prepared to support the application for an ECC for the EPL 8158 and the documents are attached to this letter.
5. The documents required to support an application for an ECC for a listed activity are normally prescribed by the Environmental Commissioner following the screening of the BID submitted online on the MEFT Portal: <http://www.eia.met.gov.na/>. Once a project is register and the supporting reports have been uploaded on the Portal, the project is available for further comments / inputs/ objections by the public and registered stakeholder directly to the Environmental Commissioner. As a registered stakeholder, you will be given opportunity to comment on the reports and I will indeed notify you once the reports have been uploaded on the MEFT Portal.
6. The ECC application cover the entire exploration phases with respect to the specific authorisation and in this case the EPL 8158. The ECC is not linked to a single exploration stage / step, but to an authorisation and in this case the EPL 8158 as authorised by the Competent Authority (MME) to undertake exploration activities. If economic resources are discovered, then a separate ECC will be required for a Mining License (ML) as an authorisation to undertake mining activities.

7. Thank you very much for sharing the key baseline information of the Farm Otjombali No. 189 as detailed in Point 8 of your objection letter. We hereby take note of the highly important baseline information provided and taken into consideration in the preparation of the EIA and EMP Reports. The aim of conducting the environmental assessment is to identify key sensitive receiving environmental receptor and likely negative or positive impacts that may be caused by the proposed exploration activities and prepare mitigation measures contained in the EMP report for implementation by the Proponent.
8. Currently no potential minerals target/s have been delineated on the farm in question and there no guarantee that detailed field-based exploration will indeed be undertaken on this specific farm and more so, covering the entire farm resulting in negative impacts presented in your objection letter. Our study covers environmental assessment work aimed at supporting the applications for ECC for this EPL to enable the minerals rights holder to undertake field-based exploration activities if potential prospective targets are delineated during the desktop study phase. It is highly unlikely that the proposed exploration activities will have major influences on surface land carrying capacity of the farm in question or other surrounding farms in the surrounding area.
9. Exploration involves the collection of data in order to de-risk the theoretical geological model/s underpinning the basis for the proposed exploration process.
10. I am happy to arrange a meeting if needed, so that I could explain the technicalities of minerals exploration and the associated environmental impact and management processes.
11. Please find attached to this covering letter our EIA and EMP Reports that will be submitted to the Environmental Commissioner via the Competent Authority (MME). Comments / Inputs/ objections can be submitted to as provided for in Regulations. Alternatively, once the documents have been uploaded on the MEFT Portal: <http://www.eia.met.gov.na/> a link will be provided to all registered stakeholders. Further comments / inputs/ objections can be directly sent to the Environmental Commissioner.

Your Sincerely,

Dr. Sindila Mwiya

WINDHOEK

Attention: Dr. S. Mwiya

Dear Dr,

PUBLIC NOTICE: APPLICATION FOR ENVIRONMENTAL CLEARANCE CERTIFICATES FOR MINERALS PROSPECTING ACTIVITIES BY MARTHA N. DAWETI - EPLS NOS. 8158 - IN RE: FARM OTJOMBALI NO. 189

We refer to the above subject.

1. We write on behalf of our client, Mr Benhard Zaaruka. Our client is the owner of farm Ombu-yoTjimbari commonly known as Otjombali No. 189, registration division "J" situated in the green field areas, district of Okahandja, Otjozondjupa region.
2. Martha N. Daweti applied for minerals rights under the EPL No. 8158 with respect to base, rare metals and precious stones, dimension stones and industrial minerals. With only prospecting rights, Ms Diweti intends on conducting prospecting activities around the areas covered by the EPL 8158, which includes Farm Otjombali belonging to our client. In light of the above, Ms Daweti applied for an Environmental Clearance Certificate to be able to carry out these prospecting activities.
3. A public notice was published in the local newspaper informing the public that the proponent (Martha N. Daweti) intends to conduct prospecting starting with desktop studies and regional fields reconnaissance work and if the results are positive, conduct geological studies, trenching, drilling, sampling, and testing for feasibility reporting. A copy of the public notice is marked as 'BZ01'.
4. The notice calls upon interested and affected parties to register and submit written comments/objections/ inputs with respect to the proposed prospecting activities. A background Information Document (BID) was made available to the interested parties

5. We hold instructions to register and submit our client's written objections on his behalf, as an interested party, to the proposed prospecting activities, which we now do.
6. The written comments/objections/ inputs are raised and made on the following grounds:
7. The proponent states under paragraph 3.2 that the BID is prepared to be used as a source of background information for stakeholders and a public consultation process as required to be undertaken as part of the environmental assessment process. It is opportune at this point to clearly but briefly set out the environmental assessment process as stipulated by the Environmental Management Act 7 of 2007 and the Environmental Impact Assessment Regulations, GG 4878 of 6 February 2012:
 - 7.1. Part VII - IX of the Act determines the procedures to be followed during an environmental assessment process to which a proponent is expected to strictly comply with such procedures (reg. 3(c)). In terms of regulation 5, once an activity has been identified as a listed activity which cannot be carried out without an Environmental Clearance Certificate (ECC), the proponent must apply to the Minister for an ECC. In terms of regulation 7, the proponent must conduct a public hearing in terms of regulation 21 and must subject the proposed application to scoping as part of the initial assessment process. The proponent is required to assess the potential effects of the proposed listed activity on the environment; to determine whether and to what extent the potential effects referred to can be mitigated and whether there are any significant issues and effects that require further investigation.
 - 7.2. Our instructions are that the proponent has not met these requirements in the BID. Paragraph 4.3 of the BID does not set out the potential effects of the proposed exploring activities on the environment. With due respect, it merely indicates how the impacts are going to be assessed and the considerations to be used by the proponents in assessing the impact. The extent of such impact is also not identified. Paragraph 4.4 sets out broad concepts on mitigation measures to be adopted and the proponent does not clearly indicate how the impacts on the environment are going to be mitigated as required by regulation 7. The BID document therefore does not lay out proper information for purposes of assessing the proposed activity.
 - 7.3. Our instructions are that the above requirements would be properly covered in the scoping report and the environmental management Plan to be submitted for comments during the second phase of assessment. However, currently, the BID is of no assistance and the Client fully objects to any prospecting activities and to the granting of any ECC.

8. Our client's objections are further supported by the following facts:
 - 8.1. Our client invested multi-millions of dollars in the acquisition and running of the farm for farming and income generating activities. The farm generates income and employment which all stand to be adversely affected by the proposed prospecting operation activities. The prospecting operation activities will therefore cause or has the potential to cause irreparable harm to our client's business.
 - 8.2. The area in which the proposed exploration activities are to be carried out is the operational backbone of the entire farm for the following reasons:
 - 8.2.1. At the moment there are ten (10) permanent employees and their families living on the farm and surviving not only from their monthly salary, but from the natural resources on the farm.
 - 8.2.2. The camps situated in that area carry the highest capacity of large and small stock on the farm.
 - 8.2.3. In the camps designated for proposed prospecting operations activities, there are strong boreholes and two (2) water dams currently used for livestock and designated for a huge plantation project which is at an advanced stage with respect to planning and designing of the crop fields and irrigation systems.
 - 8.2.4. The plantation project will enable the farm to be self-sustainable in that it will immensely contribute to the production of food to be sold to the supermarket for generation of income.
 - 8.2.5. The plantation project will enable the farm to be self-sustainable in that the by-products from the plantation project will be used as fodder for the livestock on the farm. This is part of the farm's business proposal with respect to cost cutting measures.
 - 8.2.6. The plantation project is projected to employ twenty-three (23) permanent employees and more than one hundred and fifty (150) part-time employees. This will greatly contribute to job creation in Namibia, especially the youth and previously disadvantaged Namibians.
 - 8.3. The area where farm Otjombali is situated, is known to be home to a number of lodges and accommodation establishments, which have made considerable investments to attract tourists and to stimulate employment in the area. Plans are underway to establish a five star hotel and recreational facilities on the portion designated for

exploration activities. The prospecting exploration activities will have a negative impact on the natural topography of the area and, will negatively affect the rich flora and fauna of the area. The prospecting operations will be highly damaging to the rich biodiversity of the area and at a national level it will negatively affect Namibia's international reputation as a tourism destination of choice, which industry is crucial to the Namibian economy and is currently try to rise from the impact of Covid-19.

- 8.4. The area size on the farm designated for exploration activities is not specifically set out in the notice nor is it specified in the BID, but on observation from the map that area can be easily two thousand, three hundred hectares (2300 Ha) of farmland which can carry three hundreds (300) herd of cattle which livestock contributes to income generating activities on the farm which then enable Mr Zaaruka to service his loans, maintains one, pay land tax and levies, and pay employees on the farm. This will be negatively affected by the exploration activities on the farm, which ultimately will halt from operations activities.
9. The BID specifically set out that there will be a possibility of trenching and drilling on the farm for purposes of exploration, but the document does not the set out potential negative impact for the farmer and/or possible problems they will encounter during the prospecting operations activities.
 - 9.1. The BID does not set out what will happen and/or plans of succession in instances where the EPL of Martha Namutenya Daweti is acquired by a third party or third parties.
 - 9.2. Typical of the wording in the Environmental Clearance Certificate, the following phrase always appears:

"[t]his clearance letter does not in any way hold the Ministry of Environment and Tourism accountable for ... any adverse effects that may arise from this project activity.
 - 9.3. The proponent does not make any undertaking as to who will be held liable for adverse effects on the farm which will be caused by prospecting operations activities.
10. In terms of regulation 5(1), before an application for ECC is submitted to the Environmental Commissioner, the proponent must determine that the activity for which the application is made is a listed activity. It is clear that section 27 (2), read with GG 4878 of 6 February 2012: List of Activities that may not be undertaken without Environmental Clearance Certificate, Annexure, Item 3, resource removal or extraction of any natural resources is a listed activity which may only be carried out with an Environmental clearance certificate.

11. However, the proponent in its document indicates that the first activity to be undertaken is an initial desktop exploration activity which merely involved a review of existing information and all previous prospecting activities undertaken and as prescribed in detail under clause 2.1 of the BID. No period within which this is to commence and be completed is indicated apart from a general indication that it will last for 6 months. In any event, desktop activities are not a listed activity that needs an ECC and the application for the ECC is at this stage premature.
12. There is no guarantee that the desktop research will reveal the existence of natural resources as the proponent correctly points out that the prospecting activities are eventually to be done in a greenfield area historically not known to have mineral potential and that no detailed exploration activities have taken place there. The consistent assertion by the proponent in the document that the ECC will be abandoned in the desktop research is not favorable and does not assist much.
13. Our client is of the view that adopting the mechanisms provided for in the Act at this stage is premature and may lead to an unjustified encroachment on our client's private rights to his property so enshrined in the Namibian Constitution. Our instructions are therefore in this regard that an application for an ECC at this stage is premature.

Our client objects to the proposed prospecting operations activities and to any application for ECC for reasons set out above and his rights are strictly reserved.

Yours faithfully,

DR WEDER, KAUTA & HOVEKA INC
