Appendix E: Background Information Document (BID)

Background Information Document (BID)

Project Name: **Environmental Scoping Assessment Study for the Proposed Mineral Exploration Activities on Exclusive Prospecting Licence (EPL) No. 8092 located North-west of Usakos in Erongo Region, Namibia**

Proponent: **Suh Casa Investment CC**

Consultant: **Excel Dynamic Solutions Pty Ltd**

1 INTRODUCTION: BACKGROUND

Suh Casa Investment CC (hereinafter referred to as The Proponent) has applied to the Ministry of Mines and Energy (MME) to be granted an Exclusive Prospecting Licence (EPL) No. 8092 on the 28th of February 2020. However, the approval and granting of the EPL is subjected to an Environmental Clearance Certificate, thus the “pending ECC” status on the mining cadaster portal here <https://portals.landfolio.com/namibia/>. The 10 886.1132 hectares (ha) EPL is located about 6.54 km North-west of Usakos in the Erongo Region (**Figure 1**). The Proponent is interested in Base and Rare Metals, Dimension Stones, Industrial Minerals, Precious Metals, Precious Stones and Semi-Precious Stones.

Exploration and all mining-related activities are among the listed activities that may not be undertaken without an Environmental Clearance Certificate (ECC) under the Environmental Management Act (EMA) (2007) and its 2012 Environmental Impact Assessment (EIA) Regulations. The relevant listed activities as per EIA regulations are as follows:

-3.1 The construction of facilities for any process or activities which requires a license, right of other forms of authorization, and the renewal of a license, right or other form of authorization, in terms of the Minerals (Prospecting and Mining Act, 1992).

-3.2 other forms of mining or extraction of any natural resources whether regulated by law or not.

-3.3 Resource extraction, manipulation, conservation and related activities.

-8.1 The abstraction of ground or surface water for industrial or commercial purposes.

The Proponent is, therefore, required to obtain an ECC for the approval of the EPL and before the commencement of works on the EPL. To fulfill the legal requirements, the Proponent has appointed Excel Dynamic Solutions (Pty) Ltd, an independent team of Environmental Consultants / Assessment Practitioners (EAP), to conduct the required Environmental Scoping Assessment (ESA) process and submit the ECC application to the Department of Environmental Affairs and Forestry (DEAF) at the Ministry of Environment, Forestry & Tourism (MEFT).

2 PURPOSE OF THIS DOCUMENT

This Background Information Document (BID) is a non-technical document of the ESA and not an ESA Report. The BID is aimed at:

-Introducing the proposed project and related activities to potential interested and affected parties (I&APs) and stakeholders, and afford them an opportunity to raise issues, concerns / submit comments about the proposed project.

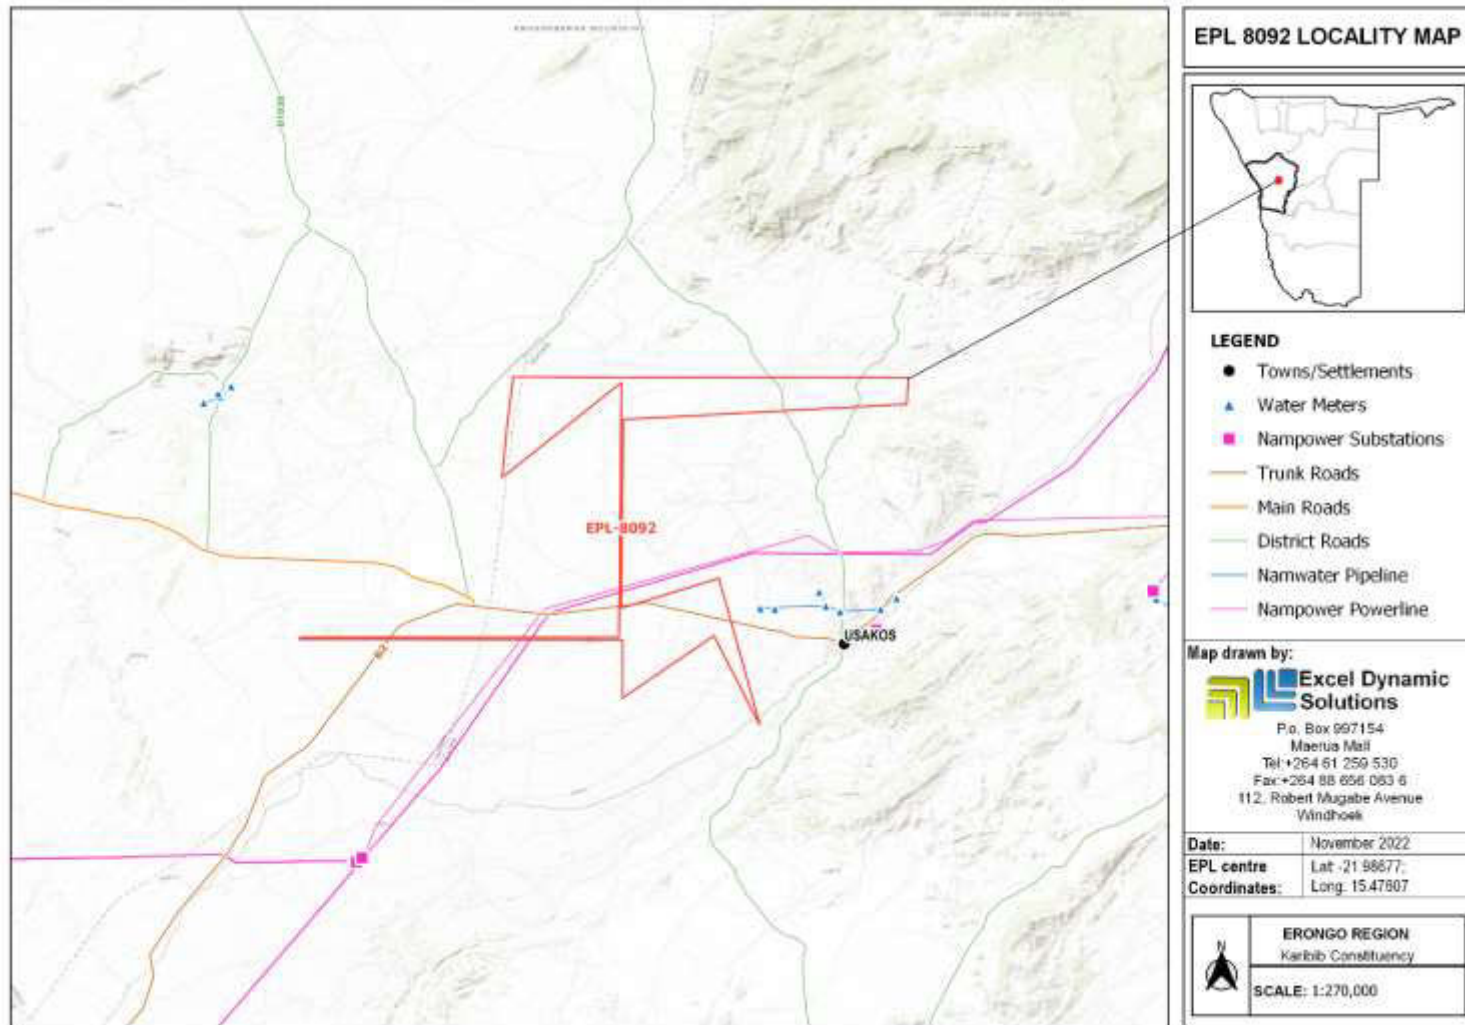

Figure 1: The locality map of EPL - 8092 located near Usakos in the Erongo Region

3 PROJECT DESCRIPTION

Once the Proponent has been issued with the ECC and obtained all required permits such as land use consents, where necessary and is ready to commence the exploration activities, the planned activities will commence.

The proposed activities entail prospecting and detailed exploration activities to delineate the mineral deposits. This is to determine whether the deposit for the targeted commodities is economically feasible (to advance to the resources development and mining phase).

The prospecting and exploration of minerals are the first components of any potential mining project. This is done to acquire the necessary data required for further decision-making and investment options.

Exploration activities are anticipated to last for about three years or sometimes longer (depending on the various factors such as turnaround between exploration data analysis and availability of funds between project phases, etc.).

3.1 Project Activities

The proposed prospecting and exploration activities (methods) are divided into the following categories:

-Phase 1: Non-invasive techniques (prospecting) – mapping / surveys.

-Phase 2: Invasive techniques (detailed exploration) – soil sampling, trenching and exploration drilling.

Once the target areas have been selected and verified under the prospecting phase, detailed exploration works will follow.

3.2 Human Resources, Services and Infrastructure

The following services and infrastructure as provided below will be required for the project activities:

-Human resources and accommodation:
Around 5-10 people will be employed on-site during the exploration phase and will be accommodated in tented camps or accommodate in the nearby town (Usakos).

-Working Space (Administration and Control).

-Water supply: Water will be required for the project activities such as drilling, equipment cooling, washing, and drinking. However, the estimate volumes will be confirmed during and provided in the Report.

-Fuel Supply (machinery and equipment):
Diesel will be used for machinery and equipment and fuel generator.

-Accessibility (roads): The EPL is accessible via the B2 road.

-Waste management:

Sewage: Mobile chemical ablution facilities will be provided on-site. The wastewater will be transported offsite for treatment at a facility.

Solid waste: Sufficient waste bins (containers) will be made available at exploration sites and campsites for waste storage and later disposal at the nearest approved waste facility.

Hazardous waste: The waste fuel/oils will be carefully stored in a standardized container for disposal at an approved hazardous waste management facility in the nearest Town.

Health and Safety: Adequate and appropriate Personal Protective Equipment (PPE) will be provided to project personnel. A minimum of two first aid kits will be readily available onsite.

Potential Accidental Fire Outbreaks: Fire extinguishers will be readily available in vehicles, at the sites and campsite.

Project Equipment, Material, Machinery, and Vehicles: Among others two or three 4X4 vehicles, drilling supporting truck, excavator / front-end loader, dozer, air compressor, drilling fluids stored in manufacturers approved containers, generator for power supply, etc.

Upon completion of exploration works, the disturbed sites will be rehabilitated as practically possible. This will include backfilling of exploration trenches, boreholes, levelling of stockpiled topsoil and cleaning of site areas.

4 ENVIRONMENTAL ASSESSMENT

This ESA process is conducted in accordance with the provisions stated in the EMA No 7 of 2007 and its 2012 EIA Regulations.

The primary objective of the ESA is to identify potential negative impacts associated with the project and assess them. Practical and effective mitigation measures will be recommended for implementation.

The main objectives of this ESA are to:

-Identify potential impacts associated with the proposed Activity.

-Inform I&APs and relevant authorities about the project and provide them with an opportunity to participate during the ESA process.

-Assess the significance of issues and concerns raised.

-Compile a report addressing all identified issues and potential impacts.

-Compile a Draft Environmental Management Plan (EMP) which includes impacts management and mitigation measures.

4.1 Potential Impacts

The following potential impacts have been identified:

4.1.1 Positive:

-Socio-economic development: employment creation and skills transfer.

-Investment opportunities/infrastructure-related development benefits,

-Produce a trained workforce and small businesses in the area.

-Boosting the local economic and regional economic development.

-Increased support for local businesses through the procurement of locally available goods and services.

4.1.2 Adverse (Negative) Impacts:

-Disturbance of existing communal grazing areas,

-Physical land/soil disturbance and prone to erosion.

-Impact on fauna and flora (habitat disturbance and poaching).

-Water resources (over-abstraction of water) and soils pollution.

-Air quality issue owing to dust generation

-Occupational and community health and safety risks/hazards.

-Vehicular traffic safety and services infrastructure (local roads).

-Vibrations and noise associated with drilling activities.

-Environmental pollution from poor waste management,

-Archaeological or cultural heritage impact

-Potential social nuisance and land use conflicts.

Other potential impacts may be identified as the ESA process progresses. All impacts and public concerns/comments will be incorporated and addressed in the Environmental Report and EMP.

4.2 Public Consultation Registration

Public consultation is an important part of the EA process. During the consultation process, I&APs are given an opportunity to raise any issues or concerns pertaining to the project activities.

To comment or receive further information on the project, please register with Excel Dynamic

Solutions (Pty) Ltd as an I&AP to be provided the opportunity to comment on the ESA / Scoping Report.

For comments and or further information requests, please contact the EDS Consultant on the details provided below:

CALL FOR PUBLIC PARTICIPATION ENVIRONMENTAL IMPACT ASSESSMENT FOR MINERAL EXPLORATION ON EPL 8737

This notice serves to inform all interested and affected parties that an application for the environmental clearance certificate will be launched with the Environmental Commissioner in terms of the Environmental Management Act (No.7 of 2007) and the Environmental Regulations (GN 30 of 2012).

Project: The licence is located 10 km North of Grootfontein, accessible along the C42 road. The proponent intends to explore for Copper and Zinc. Exploration methods may include geological mapping, geophysical surveys, sampling, and drilling.

Proponent: Tura Wood Trading CC
All interested and affected parties are hereby invited to register and submit their comments regarding the proposed project on or before 02/12/2022.

Contact details for registration and further information: Impala Environmental Consulting

ENVIRONMENTAL IMPACT ASSESSMENT (EIA) INVITATION TO COMMENT / PARTICIPATION

Masioline Zeenaro Kasiringua EPL 8724, Karasburg District Karas Region
CENTRE FOR GEOSCIENCES RESEARCH cc has been appointed to undertake an Environmental Impact Assessment (EIA) in accordance with the Namibian Environmental Management Act (2007) and its Regulations (2012).

Masioline Zeenaro Kasiringua EPL 8724, Karasburg District Karas Region
is proposing to undertake exploration for Base, Rare Metals and Industrial Minerals. The exploration is being undertaken in line with the exploration programme that has been approved by the Ministry of Mines and Energy in the licence that was conditionally granted on 27th April 2022 and is pending an ECC for final granting.

Interested and affected parties are encouraged to register via email in order to receive the Background Information Document (BID) to the email below within a period of fourteen days from the date of advert to the email below, and information on a possible arrangement for a Public meeting.

All comments and concerns should be submitted to CENTRE FOR GEOSCIENCES RESEARCH.
Please contact:

CALL FOR PUBLIC PARTICIPATION/COMMENTS ENVIRONMENTAL IMPACT ASSESSMENT AND ENVIRONMENTAL MANAGEMENT PLAN TO OBTAIN AN ENVIRONMENTAL CLEARANCE FOR THE ROUTE DETERMINATION OF ROADS AND DESIGN OF ASSOCIATED PHYSICAL INFRASTRUCTURE ON PORTION 87 (A PORTION OF PORTION H) OF THE FARM BRAKWATER NO. 48, WINDHOEK

Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) in order to obtain an Environmental Clearance Certificate as per the requirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February 2012) for the route determination of roads and design of associated physical infrastructure on Portion 87 (a portion of portion H) of the Farm Brakwater No. 48 to be subdivided into 9 portions and the Remainder.

Name of proponent: BV Investments Twenty-Six CC
Project location and description: Portion 87 of the Farm Brakwater No. 48 is located east of the B1 which link Windhoek and Okahandja dual-carriage road and west of the Klein Windhoek River. It is the intention of the proponent to subdivide Portion 87 into 9 new portions and the Remainder. To provide the newly created portions with access, new public roads must be aligned and associated physical infrastructure must be designed and constructed. A locality plan of the site is displayed at the Town Planning Notice Board in the Customer Care Centre, Municipal Offices, Rev. Michael Scott Street, Windhoek and available at the offices of Green Earth Environmental Consultants at Bridgeview Offices, No. 4 Dr. Kwame Nkruma Avenue, Klein Windhoek.

Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposed project. A public meeting will be held only if there is enough public interest. Only I&APs that registered will be notified of the possible public meeting to be held.

The last date for comments and/or registration is 30 November 2022.
Contact details for registration and further information: Green Earth Environmental Consultants

NOTICE OF ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR: THE PROPOSED EXPLORATION ACTIVITIES ON THE EXCLUSIVE PROSPECTING LICENSE (EPL) No. 8201 LOCATED NORTHEAST OF KARIBIB, ERONGO REGION

Under the Environmental Management Act No. 7 of 2007 and its 2012 EIA Regulations, the proposed prospecting and exploration activities on EPL 8201 require an Environmental Clearance Certificate (ECC) from the Department of Environmental Affairs and Forestry (DEAF) before commencement.

The public is hereby notified that an application for an ECC will be submitted to the Environmental Commissioner. Brief Project Description: The environmental scoping process will identify potential positive and negative impacts of the proposed exploration activities on EPL 8201. The target commodities on the EPL are Base & Rare Metals, Dimension Stone, Industrial Minerals, and Precious Metals.

Proponent: Damaraland Trading Enterprises CC.
Environmental Consultant: Excel Dynamic Solutions (Pty) Ltd
Members of the public are invited to register as Interested and Affected Parties in order to comment/raise concerns or receive further information on the Environmental Assessment process.

Public Consultation meeting details will be communicated with all the registered I&APs
Registration requests and comments should be forwarded to Excel Dynamic Solutions (Pty) Ltd on the contact details below, before or on 25th November 2022.

Appendix G: Farmers' Consultation Meeting Minutes

19 November 2022

PUBLIC CONSULTATION MEETING MINUTES:

ENVIRONMENTAL SCOPING ASSESSMENT (ESA) FOR THE PROPOSED PROSPECTING & EXPLORATION ACTIVITIES ON EXCLUSIVE PROSPECTING LICENCE (EPL) No. 8092 LOCATED EAST OF USAKOS, ERONGO REGION.

Date: Thursday, 17 November 2022

Time: 10:00 – 10:45

Venue: Farm Goabeb No. 63

The public consultation meeting was attended by five (5) people, including one (1) environmental consultant and one (1) archaeologist from Excel Dynamic Solutions (Pty) Ltd (EDS) - **Please refer to the attached attendance register.**

INTRODUCTION AND WELCOMING REMARKS

The meeting was officially opened by Mr. Silas David, an Environmental Assessment Practitioner (EAP) from Excel Dynamic Solutions (Pty) Ltd. Mr. David expressed gratitude to everyone in attendance for making time to attend the meeting. The meeting attendance register was circulated for the attendees to sign and provide their contact details for addition to the list of Interested and Affected Parties (I&APs).

MEETING AGENDA AND PRESENTATION

The agenda of the meeting included the following main points:

2.1 Brief Description of the Project

Physical Address: 112, Robert Mugabe Avenue, Windhoek

Postal Address: PO Box 997154 Maerua Mall, Windhoek

Telephone: +264 (0) 61 259 530

Fax2email: +264 (0) 886 560 836

Email: info@edsnamibia.com

Web: www.edsnamibia.com

Mr. David provided a short description of the planned project and its associated activities, the Environmental Scoping Assessment (ESA) process, and the reason the proponent appointed Excel Dynamic Solutions (Pty) Ltd (EDS), an independent environmental consultant, to carry out the EIA and apply for the Environmental Clearance Certificate (ECC).

2.2 Presentation of Potential Project Impacts

To ensure transparency and clarity for the attendees, the environmental consultant presented the pre-identified potential positive and negative environmental and social impacts.

2.3 Public Open Discussion (Interactive Session)

Mr. David provided the meeting attendees the opportunity to raise their concerns or issues and/or comment on the proposed project activities. The issues and comments are presented in **Table 1** below.

Table 1: Comments and issues raised during the public consultation meeting, 17th of November 2022

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
1.	<p>Mr. Samuel Hoebeb (SH): The Background Information Document (BID) is too technical; one needs to study this document in depth for a deeper understanding. The distance stated in the BID that the EPL is 6.54 kilometres from Usakos is incorrect.</p> <p>Farm Goabeb is a state owned farm where some of the Damara people have relocated.. The main sources of living in the area are animal hunting and crop farming. It is against this background that if a mine is to be opened, we, the residents of Farm Goabeb, cannot move away from our farm.</p> <p>Poaching is a concern in the area, and this project can potentially cause high cases of poaching in the area.</p>	<p>Mr. Silas David (SD): Thank you, the distance stated in the BID is an approximate distance and not an exact distance. We acknowledge the error as per your statement and we will revisit this matter and rectify it in the Environmental Scoping Assessment (ESA).</p> <p>SD: Noted.</p> <p>SD: Noted, in such cases, we usually provide mitigation measures, for example, the proposed project's exploration team is not permitted to work after hours (17:00), the proponent is advised to hire a security guard to control the entry and exit of people in and out of the farms, and so on.</p>

Comment/ issue No.	Commenter name & issue / comment / question	Response and name of responder:
	The main source of water in the area is groundwater abstraction. Where will the proponent source the project' water from?	SD: The proponent is allowed to apply for an abstraction permit to abstract water, if water abstracted from the ground is not enough for the project. The proponent is recommended to apply for water source permission from the Usakos Town Council.
2.	Ms. Sofia Goagoses: Drilling activities create noise pollution which can cause animals to flee and run into fences which can lead to death.	SD: Noted, we will take this concern into account and provide extensive mitigation measures accordingly.
3.	Mr.SH: What is the duration of the ECC?	SD: The ECC is only valid for three (3) years. Within those 3 years, every six (6) months, an environmental audit is conducted to ensure what was stipulated in the Environmental Management Plan (EMP) has been adhered to.
4.	Mr. Cornelius Gurirab (CG): A lot of exploration companies do not practice what they preach. It is against this background that we do not support this project.	SD: Noted.

FINAL REMARKS AND CONCLUSION OF THE MEETING

Mr. David thanked the attendees for their crucial input through comments and raising their concerns. He indicated to the attendees that all their comments, concerns and inputs had been noted down for consideration, and for addressing in the Environmental Scoping Assessment (ESA) Report, as well as incorporating their recommendations into the draft EMP.

Furthermore, Mr. David informed the attendees that the draft meeting minutes, Environmental Assessment (EA) report, and Environmental Management Plan (EMP) will be shared with them for review and further comments. These documents will be made available through emails provided on the attendance register.

Once the review of the reporting is complete, the documents will be finalized and submitted to the Environmental Commissioner at the Department of Environmental Affairs and Forestry (DEAF) for evaluation and consideration for an ECC.

The meeting adjourned at 10h45.
