4.6 DECOMMISSIONING PHASE

The decommissioning of these developments is not foreseen as the intended development is envisaged to be permanent. If this infrastructure development is decommissioned the following management actions should apply.

Table 4-5: Decommissioning phase management actions

| Environmental Feature | Management Actions |
|--------------------------|---|
| Decommissioning activity | Many of the mitigation measures prescribed for construction activity for these developments (Table 4-3 above) would be applicable to some of the decommissioning activities. These should be adhered to where applicable. |

5 CONCLUSION

The management actions included in this report aim to assist in the avoidance, management and/or mitigation of potential impacts on the environment that may result from the proposed activities.

Should the measures recommended in this EMP be implemented and monitored, SPC is confident that the risks identified in the FESR can be reduced to acceptable levels.
