APPLICATION FOR AN ENVIRONMENTAL CLEARANCE CERTIFICATE (ECC) FOR THE PROPOSED EXPLORATION AND QUARRYING OF DIMENSION STONE QUALITY NATURAL ROCK ON MINING CLAIM 68945, DAURES CONSTITUENCY, ERONGO REGION

COMBINED MEETING MINUTES COMMUNITY/ CONSERVANCY LEADERSHIP AND GENERAL MEETINGS HELD ON 9 APRIL 2022 VENUE: !Oe#Gan TRADITIONAL AUTHORITY OFFICE, SPITZKOPPE

Table 1: Questions, comments and response register

Question/ Comment by (Name & Surname)	Question/ comment	Response by	Response
Mr. Anthony	<p>Water resources is limited, will the license holder drill their own boreholes?</p> <p>Maintenance of the road is already poor- after usage of trucks carrying big blocks of rocks, the road will be in a worse condition.</p> <p>How will the rehabilitation of the exploration and quarry sites be implemented?</p>	A. Josef and E. Kanime	<p>The proponent will attend to drill at least 2-3 water supply boreholes close to prospective sites. If good strikes are encountered those boreholes will supply the water and may be shared with the community. If poor water strikes are encountered the proponent envisages to cart water from Usakos on a weekly basis in water bowsers.</p> <p>Recommendations on measures to be implemented to maintain the road and on rehabilitation shall be detailed in the Environmental Management and Rehabilitation Plan.</p> <p>For now provision of these concerns should be stipulated in consent letters o the proponent in the form conditions attached to the consent letter that is to be provided to the license holder</p>
Mrs. Getrude Jameson	There are concerns around waste management, possible pollution and possible harm to the environment.	A. Josef and E. Kanime	Details on how quarry waste will be managed as well as measures to minimize pollution will be provided in the detailed Environmental Management and Rehabilitation Plan.

	Will the license remain a claim or will it be upgraded to a mining license at some stage?		Both exploration and mining are permitted to take place on a mining claim. However, depending on the scale of operation that ultimately is set up a mining license may be applied for. Such will only become evident post exploration drilling and test quarrying phase.
Mr.Chris	Request to have a translator for damara/ nama community to fully understand in their native language.	A. Josef and E. Kanime	Consultants usually get someone from that specific community that understands both English and specific native language in the area to translate to both parties. OMAVI arranged for Mr. Isak to be translator
Headman Mr. Naruseb	How many km left from the main road is the site? Site should be viewed before hosting the meeting. Klein Spitzkoppe, Haksteen and Maronica communities are closer to the site than Spitzkoppe, they too should be consulted.	A. Josef and E. Kanime	Site visit was conducted on the day of the meeting The claim is located exactly 52km from the D3716 (i.e. the road to Spitzkoppe) - Henties Bay T-junction and then an additional 6 km off the Henties Bay road towards the south. Based on the site visit we had with Headman Mr. Naruseb the site is situated out of the breeding area and away from the furthest settlement, Marenica Farm
Pastor Isak	Transport is a challenge in the Spitzkoppe area, is there a possibility to arrange transport for everyone from all 4 communities to attend the next meeting? All notes and minutes from the meeting should be summarized and sent back to the community for confirmation to reference minutes for future references.	A. Josef and E. Kanime	Once a site visit has been conducted after today's meeting and it is found that the concerned site is proximal to the concerned settlements, OMAVI will liaise with the license holder to host second meeting. License holder was engaged and proposed that a second meeting can be held if an Environmental Clearance Certificate (ECC) is granted and prior to commencement of any activities as the cost of arranging such transport is high and would be futile if the ECC is not granted. OMAVI will inform the leadership of the community on the issuance or refusal of the ECC It is recommended that there should be a single point of communication. Community should appoint one person to receive the summarized minutes or it should be sent to the Traditional authority secretary to avoid distortion of information.
Mr. Given Afrikaaner	How will the community benefit from this project? Directly? Through the traditional authority or conservancy? How will women, the youth and physically disable people benefit?	A. Josef and E. Kanime	Normal practice is that the exact details of the benefits to be realized will be agreed upon between the leadership of the land owner and the license holder during the compensation agreement stage, which is the

			<p>next stage should the ECC be granted. The leadership of the community is expected to have a list of what benefits they seek so that they are in a better negotiating space during the compensation negotiation stage. Typically both parties will have their list of desired interests and each party would typically compromise in order to reach common ground that is mutually beneficial to either parties</p>
<p>Mrs. Jacky !Goagosos</p>	<p>There are health risks (such as dust) to the community and the possible employees on the project? What measures will be put in place for this? What are the rehabilitation plans in place if the mining goes unsuccessful?</p> <p>Request for a copy of the management plan and environmental impact assessment once ready. This must be shared with us upon completed</p>	<p>A. Josef and E. Kanime</p>	<p>On health risks - health risks on a project such as this typically include exposure to dust, noise, and sometimes vulnerability of women and children due to usage of earthmoving machinery and influx of workers to the area. Health risks from dust and noise are usually minimized by providing adequate and suitable PPE to employees and visitors to the operation sites. The proponent further desires to enter into an agreement with the local clinic to be able to respond to health emergencies and to treat their workers as when necessary. Risks of victimizing vulnerable women and children are typically minimized by having adequate disciplinary processes in place for workers, and joint coordination between the community and the leadership of the mine in handling such cases.</p> <p>Details on rehabilitation will be provided in the detailed Environmental Management and Rehabilitation Plan (EMRP) which will be provided to the leadership of the community as well. The EMRP is a legally binding document and must therefore be taken serious by the community and community leadership to ensure that it is successfully implemented</p>
<p>Mr. Edward !Uiseb</p>	<p>It is very important to close up holes dug after the mining because it might lead to animals falling in.</p>	<p>A. Josef and E. Kanime</p>	<p>Closing up test quarries and other small excavations is normal practice and will be enforced through the EMRP.</p> <p>Complete closure and backfilling of large open pit quarries is usually not economically pragmatic. Other end uses are usually identified in the EMRP for such areas. Those typically include battering the slopes to safe angles, installing perimeter fences and preserving the holes for beneficial uses such as water storage</p>

			ponds/ dams
Mr. Stanley Gawanab	Operational contract terms should be linked with the beneficiary terms. Contract should be renewable on a yearly basis and should be renewed according to the performance of either parties involved in the contract.	A. Josef and E. Kanime	An operational and compensation contract will need to be put in place prior to commencement of any prospecting and mining activities. The exact terms will typically be agreed upon between the 2 parties. From an Environmental Management standpoint it is vital such contract accounts for measures set out in the EMRP. A dedicated team of community representatives must be elected to take custodian ship of managing and implementing the terms of such a contract.
E. Kanime	Does the technical committee have any guidelines to deal with mining in the area?	Mr. Anthony	The technical committee broadly deals with socio-economic community activities, and not specifically only mining. Because mining is becoming a common activity in the area the leadership will look into formulating a committee that will specifically deal with mining. However, a basic requirement is that any mineral exploration or mining company wishing to apply for rights in the area should go through the traditional authority and the conservancy.
Other broad issues raised by the community			
	We have been consulted by a number of consultants about various developmental projects including Nampower but these projects never seem to materialize. What assurance do we have that this is not one of them	A. Josef and E. Kanime	Unfortunately, OMAVI can speak for the other projects. Specifically with this project it must be understood that exploration will first be conducted to confirm if there are rocks of suitable quality for the production of dimension stone. If there are such rocks, the project may proceed to mining stage and materialize into a fully operational quarry. If the results of exploration however turn out to be unfavourable then exploration sites will be simply be rehabilitated and that is the end of this project. Hence, in nutshell the results of the exploration program will dictate whether or not the project will materialize into a fully operational quarry
Recommendations by OMAVI			
1. The community and conservancy leadership must strategically organize themselves and prepare themselves for the next phase of the project which is to negotiate terms and conditions of the operational contract to be entered into between the license holder/ quarry operator and the community.			

2. The community and conservancy leadership must take custodianship in managing relationships with the license holder/ quarry.

The meeting was administered by Atushe Josef as representative of the consultant and proponent, and by Mr. Isak and Mr. Anthony Jantjies on the side of Spitzkoppe community and #Gaingu Communal Conservancy.

035 Regskennisgewings Legal Notices

PUBLIC NOTICE FOR THE APPLICATION OF AN ENVIRONMENTAL CLEARANCE CERTIFICATE: Closure of existing waste dumpsite & development + operation of new waste dumpsite for Helao Nafidi Town Council, Ohangwena Region. In accordance with the environmental management Act, 2007, (Act No. 7 of 2007) & the EIA regulations 30 of 2012, the development & operation of any waste dumpsite are listed activities which cannot be carried out without an environmental clearance certificate (ECC) from the department of environmental affairs & forestry (DEAF). OMAVI Geotechnical & Geo-environmental Consultants has been appointed to develop a closure plan for the existing municipal waste dumpsite, and undertake an environmental assessment study as well as prepare an environmental management & rehabilitation plan for the proposed new waste dumpsite to support the application for ECC. Proponent: Helao Nafidi Town Council site locality: The old municipal waste dumpsite is located within the Helao Nafidi Townlands, while the proposed site for the new waste dumpsite is located just outside the western town land boundary on communal state land. In terms of the requirements of the EIA regulations, all interested & affected parties (I&APs) must be provided with a fair opportunity to participate in the environmental assessment process. I&APs are therefore, invited to register & submit written comments/ concerns/suggestions by close of business on 1st April 2022. A background information document is available to I&APs upon registration. A public consultation meeting will be held on 26th March 2022 at a venue to be communicated with registered & obvious I&APs. The meeting shall run from 10:00 to 13:00. The meeting venue will be communicated with registered I&APs approximately 7 days prior to the meeting date. Tel: +264 81 478 6303 (SMSes or WhatsApp Texts preferred for record keeping purpose) Email: enviro@omavi.com.na **DM0202200400499**

035 Regskennisgewings Legal Notices

PUBLIC NOTICE FOR THE APPLICATION OF AN ENVIRONMENTAL CLEARANCE CERTIFICATE: Continuous prospecting & quarrying of marble for dimension stone production on mining Claim 68945, Daures constituency, Erongo region. In accordance with the environmental management Act, 2007, (Act No. 7 of 2007) & the EIA Regulations 30 of 2012, prospecting activities & extraction of natural stone blocks for dimensions stone production are listed activities which cannot be carried out without an environmental clearance certificate (ECC) from the department of environmental affairs & forestry (DEAF). OMAVI Geotechnical & Geo-environmental Consultants has been appointed to undertake an environmental scoping study & prepare an updated environmental management & rehabilitation plan to support the application for ECC. Proponent: Jacobus Zandberg site locality: 20 km northwest of the Trekkopje mine along a straight-line trajectory, and lies within the #Gaingu communal conservancy in Daures Constituency. A locality map is available on request from OMAVI. In terms of the requirements of the EIA regulations, all interested & affected parties (I&APs) must be provided with a fair opportunity to participate in the environmental scoping process. I&APs are therefore, invited to register & submit written comments/ concerns/suggestions by close of business on 11th April 2022. A background information document is available to I&APs upon registration. A public consultation meeting will be held near the project site. The meeting date, time and venue shall be communicated with registered I&APs only approximately 2 weeks in advance. Tel: +264 81 478 6303 (SMSes or WhatsApp Texts preferred for record keeping purpose) Email: enviro@omavi.com.na **DM0202200400466**

REZONING NOTICE DUNAMIS CONSULTING TOWN, REGIONAL PLANNERS AND DEVELOPERS on behalf of the owner of Erf 615 Zambezi Street Wanaheda Extension 2 is applying to the Windhoek Municipal Council for the following:
 - Rezoning of Erf 615 Zambezi Street Wanaheda Extension 2 from Business with a bulk of 0.4 to Residential with a density of 1:250,
 Erf 615 Wanaheda Extension 4 is located in Zambesi Street. The property is currently zoned 'Business' with a bulk 0.4 and it measures 453m². The new zoning of 'Residential' with a density of 1:250 will rectify the land use that the Erf was created and intended for, being single residential use.
 On-site parking as required in terms of the Windhoek Zoning Scheme is provided
 Further, take note that the locality plan of the Erf can be inspected at the Windhoek Town Council Customer Care Centre Town Planning Notice Board, 80 Independence Avenue, Windhoek.
 Further take note that any person objecting to the proposed land use as set out above may lodge such objection together with the grounds thereof in Writing at the Windhoek Urban Planning Offices Room 518, 5th Floor, Town House Main Building within 14 days of the last publication of this notice (final date for objections is 28 March 2022).

REZONING NOTICE DUNAMIS CONSULTING TOWN AND REGIONAL PLANNERS on behalf of the owner of Erven1587 and 1589, Gobabis Extension 4 intends to apply to the Municipality of Gobabis for:
 Rezoning of Erf 1587 and 1589 corner Kalahari Street and Roesners Road, Gobabis Extension 4 from 'Undetermined' to 'General Business' with a Bulk of 2.0,
 Consent to use these Erven for General Business purposes with the proposed Bulk of 2.0 while the rezoning process is being finalized.
 Erven 1587 and 1589 Gobabis Extension 4 are located in Kalahari Street and Roesners Road. These properties are currently zoned 'Undetermined' and measure 3304m² and 10301m² in extent respectively. The new bulk of 2.0 will allow the owner to erect Business buildings on both Erven. Enough onsite parking as required in terms of the Gobabis Zoning Scheme will be provided onsite.
 Further take note that the locality plan of these Erven lies for inspection at the Municipal Head Offices, Church Street No. 35 Epako Nossobville Town, Gobabis.
 Further take note that any person objecting to the proposed use of land as set out above may lodge such objection together with the grounds thereof at the Gobabis Municipal Office in Writing within 14 days of the last publication of this notice (final date for objections is 28 March 2022).

CALL FOR PUBLIC PARTICIPATION/COMMENTS ENVIRONMENTAL IMPACT ASSESSMENT AND ENVIRONMENTAL MANAGEMENT PLAN TO OBTAIN AN ENVIRONMENTAL CLEARANCE TO CONSTRUCT AND OPERATE A MOTORIZED PASSENGER TRANSPORT SYSTEM AND TETHERED HELIUM BALLOON AND SUPPORTING ACTIVITIES AT SOSSUSVLEI, NAMIB NAUKLUFT NATIONAL PARK. Green Earth Environmental Consultants have been appointed to attend to and complete an Environmental Impact Assessment and Environmental Management Plan (EMP) in order to obtain an Environmental Clearance Certificate as per therequirements of the Environmental Management Act (No. 7 of 2007) and the Environmental Impact Assessment Regulations (GN 30 in GG 4878 of 6 February2012) to construct and operate a motorized passenger transport system and atethered helium balloon and supporting activities at Sossusvlei in the Namib Naukluft National Park. Name of proponent: Sky Eye Tours & Hospitality (Pty) Ltd Project location and description: The project will be in the Sossusvlei area which is in the Namib Naukluft National Park. It is the intension of Sky Eye Tours & Hospitality (Pty) Ltd to introduce a motorized passenger transport system and tethered helium balloon and supporting facilities (ticketing office, boarding facilities, ablutation, a snack shop, bar area, medical room, etc.) at Sossusvlei. The proposed motorized-transport system will cover the last ±4 km from the end of the tar road to thevlei-area. Currently this section of the road to Sossusvlei and the Deadvlei Area is only reachable via a 4x4 vehicle. It is the intensi-on to close this stretch of the road for all vehicles by offering an exclusive motorized transport system in the form of a train which will take tourists from the end of the tar road to the vlei area and back as alternative. The Proponent also intends to install and operate a tethered helium balloon at the western end of the rail which will take tourists up in the air to allow them to view the vlei area and dunes from above. A locality plan of the site is available at the offices of Green Earth Environmental Consultants at Bridgeview Offices, No. 4 Dr. Kwame Nkruma Avenue, KleinWindhoek. Interested and affected parties are hereby invited to register in terms of the assessment process to give input, comments, and opinions regarding the proposedproject. A public meeting is scheduled for Friday, April 1, 2022, at 10:00 at the Sossusvlei Lodge Conference Venue just to the east of Sesriem. A Background Information Document will be availed to all registered I & APs. The last date for comments and/or registration is 6 April 2022. Contact details for registration and further information: Green Earth Environmental Consultants Contact Persons: Charlie Du Toit/Carien van der Walt Tel: 081-1273145 E-mail: carien@greenearthnamibia.com

RE: RE: Meeting notice and Notice for Environmental Renewal of Environmental Clearance Certificate for proposed prospecting & quarrying activities on mining claim **68945** in the Daures Constituency, Erongo Region

To: annastreidwolf@gmail.com

ESA and Draft EMRP_MC 68945_Site Notice.pdf
334 KB

Dear Interested and Affected Party (I&AP),

The rightful holder of Mining Claim **68945**, Mr. Jacobus Zandberg (herein referred to as The Proponent) intends to apply for an Environmental Clearance Certificate to enable the prospecting and subsequent quarrying of dimension stone + associated activities on this mining claim.

The Proponent has appointed OMAVI Geotechnical & Geo-Environmental Consultants (herein referred to as OMAVI) to conduct an Environmental Scoping Assessment and draft an Environmental Management + Rehabilitation Plan (EMRP) to help support the renewal of the mining claim and the proposed prospecting and quarrying activities on this claim. This is in accordance with the Environmental Management Act (EMA) No. 7 of 2007 and its 2012 EIA Regulations.

The Public Participation process, which involves the pre-identification and registration of new I&APs is a vital component of the above-mentioned scope for OMAVI. For this reason, you have been identified as a potential interested and affected party (I&AP) with regards to the proposed project. We would therefore like to get your input to ensure that all pertinent issues that could potentially arise from the proposed activities have been considered as far as possible in the environmental assessment and management reports.

The project background information document (BID) and project area locality map have been attached here, and are also available on request. In addition an I&AP and comments register form has been attached, which I&APs may use to register their comments/ inputs. The BID provides an overview of the current and proposed activities, as well as details of the planned public engagement meeting. **Please note that the BID is not an environmental assessment nor an environmental management plan report, but is rather a summary of the planned activities, location of the planned activities and details that could be used for I&APs to become or remain involved in the project.** With that said, upon completion of the Environmental Assessment and amendment of the Environmental Management + Rehabilitation Plan, reports will be uploaded onto the Ministry of Environment, Forestry and Tourism EIA web-portal and an email will be circulated to all registered I&APs for their final review, input and comments.

In order to fulfil the requirements of Section 21 - 24 of the EIA Regulations (Public Consultation), two (2) Consultation Meetings have been scheduled for the **10th of April 2022** (on request of the Gaingu Communal Conservancy chairman, Mr. Jantjies) at the **Spitzkoppe Community Centre**. The first meeting will take place from **10h00 to 12h00** and will be for the leadership of the **conservancy and the traditional leaders**. The second meeting will take place at same venue from **13h00 to 15h30** and will be for the broader affected community of Trekkopje, Hakskeen, Suksee, Spitzkoppe, Black Range and all other relevant nearby areas.

Should you have any comments, questions, concerns, or input related to the proposed project, please submit them (to be included in the environmental reporting documents) in writing to the contact details provided below before the end of business on **18 April 2022**.

May I please ask the leadership of these communities to convey this invitation via Radio announcements and possibly SMS or WhatsApp notifications to the relevant community members who do not have access to emails. Thank you

Kind Regards,

o.b.o OMAVI Geotechnical & Geo-Environmental Consultants

Subject: RE: Meeting notice and Notice for Environmental Renewal of Environmental Clearance Certificate for proposed prospecting & quarrying activities on mining claim **68945** in the Daures Constituency, Erongo Region

 Good day Sir,

 This is very much professional approach. Not sure about the Sunday meeting hence most of the people will be driven back after the meeting again, Saturday could have been ideal day but perhaps management do have another commitment.

 Regards,
 Isak
