CALL FOR REGISTRATION AS INTERESTED AND AFFECTED PARTIES

ENVIRONMENTAL ASSESSMENT FOR THE PROPOSED EXPLORATION ACTIVITIES IN RESPECT TO BASE AND RARE METALS AND PRECIOUS METALS ON EPL 8769 NEAR US SETTLEMENT, ERONGO REGION

1. PROJECT SITE AND DESCRIPTION

Zhoengwe Mining (Pty) Ltd, intends to apply in order to obtain an Environmental Clearance Certificate for its proposed Base and Rare and Metals, and Precious Metals prospecting activities on EPL 8769. The key component of the proposed activity entails analytical resource and survey and manual sample collection for laboratory analysis. Access to the sampling or survey sites will be by existing tracks and on foot where vehicle access is limited.

2. PUBLIC PARTICIPATION MEETING

Enviro-Leap Consulting invites all interested and Affected Party (I & AP) to register and receive Environmental Assessment (ES), Scoping and (SMP) documents relating to the proposed project for their comments and input.

Enviro-Leap Consulting invites all interested and Affected Party (I & AP) to register and receive Environmental Assessment (ES), Scoping and (SMP) documents relating to the proposed project for their comments and input.

3. COMMENTS AND QUERIES

Interested and Affected Parties are herewith request to register by writing to us at the address below no later than **05 APRIL 2022**.

3. COMMENTS AND QUERIES

Please register and direct all comments, queries to:

Supply disruptions

OPEC has no control over global oil markets

Russia is the world's top exporter of crude and fuel, shipping around 7 million bpd or 7% of global supplies.

MARIANNA PARRAGA

OPEC has no control over the events that have led to the run up in global oil prices and there is not enough capacity worldwide to compensate for the loss of Russian supply, OPEC Secretary General Mohammed Barkindo said on Monday.

Benchmark Brent crude prices surged on Monday, touching a 14-year high of over US\$139 a barrel as the United States and European allies considered banning Russian oil imports following Russia's invasion of Ukraine.

Russia is the world's top exporter of crude and fuel, shipping around 7 million bpd or 7% of global supplies.

"There is no capacity in the world that could replace 7 millions barrels per day," Barkindo told reporters at an industry conference in Houston. "We have no control over current events, geopolitics, and this is dictating the pace of the market," he said.

US, European and other governments exempted energy trade from sanctions to prevent already tight markets rallying further, but that has failed.

Traders have avoided Russian oil to avoid running afoul of future sanctions or unwittingly violating sanctions already imposed on Russian banks, companies and individuals.

With an outright ban, some analysts posit prices could rocket even higher. JPMorgan predicted Brent could hit US\$185 by year-end. A supply shortage would require prices to rise enough to cut demand.

"I have heard from several speakers here at CERWeek that current tightness in the market condition might be creating some demand destruction," said Barkindo.

"Even as that might be the case, the other side of the equation is probably more critical at the moment, which is supply is increasingly lagging behind."

Restrictions

When asked why the Organization of the Petroleum Exporting Countries (OPEC) and its allies did not just end all restrictions on output at their meeting last week, Barkindo told Reuters the situation in oil markets had developed since the group met on March 2.

"Let's see what happens at the next meeting," he said.

OPEC and allies led by Russia, a group known as OPEC+, said after that meeting in a statement that markets were well balanced, and OPEC sources reaffirmed that earlier on Monday.

OPEC remained committed to market stability, Barkindo said. The group continued to unwind the deep cuts imposed at the height of the pandemic, he said. Production should be fully restored from the cuts in September, he said.

OPEC struck a plan for a modest output rise in April at the March 2 meet and ignored the Ukraine crisis in their talks.

The situation in the markets was likely to be a game-changer in the energy transition, Barkindo told reporters.

Access to capital for the oil industry has become more challenging, he said, but the crisis was showing the world could not afford to stop investing in oil and gas.

Most OPEC members have little spare oil production capacity at the moment, with the bulk of the extra capacity available in the Gulf states of Saudi Arabia and the United Arab Emirates, according to the International Energy Agency.

Moderna announces vaccine facility in Kenya

US vaccine maker Moderna announced Monday that it would build its first mRNA jab-manufacturing facility in Africa after signing an agreement with Kenya's government to produce up to 500 million doses a year.

The company said it expected to invest US\$500 million in the new facility, which will produce vaccines for the continent of 1.3 billion people whose population has been largely shut out of access to Covid jabs.

"Batting the Covid-19 pandemic over the last two years has provided a reminder of the work that must be done to ensure global health equity. Moderna is committed to being a part of the solution," the company's CEO Stéphane Bancel said in a statement.

Moderna said it hopes to use the facility to supply doses of its Covid-19 jab to African nations as early as next year, in a bid to boost vaccine coverage on the world's least immunised continent.

"Moderna's investment in Kenya will help advance equitable global vaccine access and is emblematic of the structural developments that will enable Africa to become an engine of sustainable global growth," Kenya's President Uhuru Kenyatta said.

More than a year after the world's first Covid-19 shot was administered and two years into the pandemic itself, just 12.7 percent of Africans have been fully immunised, according to the Africa

Centres for Disease Control and Prevention (CDC).

Imports

The pandemic has exposed Africa's huge dependence on imported vaccines and its tech weakness compared with Europe, China and the United States.

Moderna's announcement follows a decision by the World Health Organization to create a global mRNA vaccine hub in South Africa last year, with Kenya among six African nations selected to be the first recipients of technology aimed at enabling local manufacturers to make jabs.

WHO chief Tedros Adhanom Ghebreyesus has repeatedly called for equitable access to vaccines in order to beat the pandemic, and attacked wealthy nations for hogging doses.

Currently only one percent of the vaccines used in Africa are produced on the continent.

African and other developing nations are pushing at the World Trade Organization for a temporary intellectual property waiver to allow the generic production of Covid-19 vaccines and treatments.

Europe, the home of some of the major companies behind the vaccines has opposed the move, arguing that the first priority was to build up production capacity in poorer countries.
